INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : BK1
TOPIC : Person Characteristics

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
BK1		322
BK1_A		2504
BK1_B		1872
BK1_D1		564
BK1_D1A		426
BK1_D2		980
BK1_D3		605
BK1_D4		563
BK1_E1		68
BK1_E2		512
BK1_F1		2504

BK1_F2	2052
BK1_G	2191
BK1_I	939
BK1_IR	1235
BK1_J	1878
BK1_PAP0	313
BK1_PAP1	2808
BK1_PAP2	66
BK1_PAP3	936
BK1_PAP4	936
BK1_PMKD	5634
BK1_TR	1878

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

B O O K : BK1

T O P I C : Person Characteristics

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK 1

Book I was administered in a group interview setting to the village leader and/or members of his/her staff. The composition and size of the group varies across communities. The purpose of the book was to provide information about the basic physical, social, demographic, and economic characteristics of the IFLS communities.

C16 Where do households dispose of sewage

Variable C16 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, C16 will have the value ACF. If the interviewee selected D and E, C16 will have the value DE. Use the key below to correctly interpret these values.

key for variable: C16 A = Drainage ditch(flowing)
 B = Drainage ditch(stagnant)
 C = Water disposal pits
 D = Disposed into rivers
 E = Thrown away beside
 F = Pond/fishpond/lake

C6B Which are involved in providing water

variable name	value	frequency	percent
---------------	-------	-----------	---------

(C6B continued)

Variable C6B can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, C6B will have the value ACF. If the interviewee selected D and E, C6B will have the value DE. Use the key below to correctly interpret these values.

key for variable: C6B A = Government
 B = Domestic NGO
 C = International NGO
 D = Private company
 E = Community self reliance
 V = Other

F12 What preparations for natural disaster

Variable F12 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, F12 will have the value ACF. If the interviewee selected D and E, F12 will have the value DE. Use the key below to correctly interpret these values.

D17	Crops/livestock covered by [...] program		
-----	--	--	--

Variable D17 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, D17 will have the value ACF. If the interviewee selected D and E, D17 will have the value DE. Use the key below to correctly interpret these values.

key for variable: D17 A = Cassava
 B = Sweet potatoes
 C = Peanuts
 D = Cashews and other nuts
 E = Soybean
 F = Corn
 G = Chili
 H = Red Onion
 I = Coconut
 J = Bananas
 K = Spice
 L = Coffee
 M = Sugarcane
 N = Tobacco
 O = Rubber
 P = Wood
 Q = Chickens
 R = Fish
 S = Pigs
 T = Goats
 U = Cattle
 X = No other crop/livestock
 Y = Rice
 AA = Other vegetables
 AB = Other fruits
 V = Other
 Z = Missing

PAP02	Criteria used to determine GAKIN		
-------	----------------------------------	--	--

Variable PAP02 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP02 will have the value ACF. If the interviewee selected D and E, PAP02 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP02 A = Landless

B = Quality of house/welling is poor

C = No/shared toilets

D = No electricity for lighting

E = Use wood/kerosene/arang for cooking fuel

F = Eat less than 2 meals a day

G = Eat meat/chicken/milk less than once a week

H = Cannot afford health service

I = Household head has no more than elementary scho

J = Household head is unemployed

K = Children dropped out of school

L = Pra Sejahtera (Pre Welfare) Family

M = KS 1(Welfare 1) Family

N = Low Health Status

O = Widow/Widower

P = Do not have permanent income

Q = Do not have assets

R = BPS' 14 criteria

V = Others

Y = Don't know

Z = Missing

PAP03 Who determines households as GAKIN?

Variable PAP03 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP03 will have the value ACF. If the

variable name	value	frequency	percent
---------------	-------	-----------	---------

interviewee selected D and E, PAP03 will have the value DE. Use the key below to correctly interpret these values.

- key for variable: PAP03 A = Village head
 B = Village official/staff
 C = PLKB
 D = Village midwife
 E = Puskesmas staff
 F = Community figure
 G = Activist
 H = PKK
 I = NGO
 J = LKMD
 K = Head of RT/RW
 L = Consultant
 V = Other
 Y = Don't know
 Z = Missing

PAP04 Who is more appropriate to be involved

Variable PAP04 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP04 will have the value ACF. If the interviewee selected D and E, PAP04 will have the value DE. Use the key below to correctly interpret these values.

- key for variable: PAP04 A = Village head
 B = Village official/staff
 C = PLKB
 D = Village midwife

E = Puskesmas staff
 F = Community figure
 G = Activist
 H = PKK
 I = NGO
 J = LKMD
 K = Head of RT/RW
 L = Consultant
 V = Other
 Y = Don't know

PAP57 Who did field registration of poor HHs?

Variable PAP57 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP57 will have the value ACF. If the interviewee selected D and E, PAP57 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP57 A = Village/township officials
 B = PKK/Posyandu cadres
 C = Puskesmas staff/PLKB staff/Midwives
 D = Community figure
 E = BPS officials/partners
 V = Others
 Z = Missing

PAP10 Criteria to determine eligibility

Variable PAP10 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP10 will have the value ACF. If the interviewee selected D and E, PAP10 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP10 A = Landless

B = Quality of house/welling is poor

C = No/shared toilets

D = No electricity for lighting

E = Use wood/kerosene/arang for cooking fuel

F = Eat less than 2 meals a day

G = Eat meat/chicken/milk less than once a week

H = Cannot afford health service

I = Household head has no more than elementary scho

J = Household head is unemployed

K = Children dropped out of school

L = Pra Sejahtera (Pre Welfare) Family

M = KS 1(Welfare 1) Family

N = Low Health Status

O = Widow/Widower

P = Do not have permanent income

Q = Do not have assets

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : BK2
TOPIC : Person Characteristics

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
BK2		322
BK2_KA3		622
BK2_KA4		967
BK2_LU1		3139
BK2_PL		1261
BK2_PR2		392
BK2_ST		3452

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users'

Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-suppl@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : BK2

TOPIC : Person Characteristics

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK 2

Book II provides a place to record statistical data about the community. Generally the statistical data is extracted from the community's Statistical Monograph or from a copy of its PODES (Census of Village Potential) questionnaire. If neither of these sources is available, the respondent is asked to estimate the answers, and the fact that the answer is an estimate is recorded in the questionnaire booklet. Book II also provides a protocol for the Community-Facility Interviewers to go to up to three markets or sales outlets and record the prices of various foods.

S37D Source of data about poor households

Variable S37D can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, S37D will have the value ACF. If the interviewee selected D and E, S37D will have the value DE. Use the key below to correctly interpret these values.

key for variable: S37D A = BKKBN
 B = BPS
 C = Health Ministry
 D = Village
 E = Local Government
 V = Others
 Z = Missing

S05A Who grants permission for clearing?

Variable S05A can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, S05A will have the value ACF. If the interviewee selected D and E, S05A will have the value DE. Use the key below to correctly interpret these values.

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK: PKK
TOPIC: DESA/KELURAHAN WOMEN'S GROUP (PKK)

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
PKK		322
PKK_I		948
PKK_J		1887
PKK_J1		2310
PKK_KR		432
PKK_KSR		946
PKK_PAP2		364
PKK_PM		5627

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-suppl@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : PKK

TOPIC : DESA/KELURAHAN WOMEN'S GROUP (PKK)

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK PKK

The PKK book is administered to the head of the Village Women's Group and to one or more of her staff members in a group interview setting.

This book contains modules covering the availability of health facilities, health programs and schools.

J10E Type of support received by midwife

Variable J10E can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, J10E will have the value ACF. If the interviewee selected D and E, J10E will have the value DE. Use the key below to correctly interpret these values.

J25B Types of mass immunization

Variable J25B can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, J25B will have the value ACF. If the interviewee selected D and E, J25B will have the value DE. Use the key below to correctly interpret these values.

key for variable: J25B A1 = Smallpox
 A2 = Measles
 B = BCG
 C = Polio
 D = DPT
 E = Tetanus tox.
 F = Hepatitis B

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK: SAR
TOPIC: Service Availability Roster (SAR)

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
SAR		39348
SAR_COV		322

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK SAR

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : SAR

TOPIC : Service Availability Roster (SAR)

The Service Availability Roster was constructed by the supervisor of the Community-Facility team. The purpose of the SAR is to provide information on facilities that are available to community residents, for each of the IFLS communities. Eight types of facilities are characterized: community health centers (puskesmas), private practitioners, community health posts (posyandu), traditional practitioners, hospitals, elementary schools, junior secondary schools, and senior secondary schools. The listing of facilities is compiled from facilities that were available in 1993 and facilities that were newly available as of 1997 as identified either by NOTE household survey respondents or by community informants. Once the list of facilities was compiled, a community informant (the respondent either to Book I or to the PKK Book) was asked about distances, travel times, and travel costs to each of the facilities on the list.

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : INF
TOPIC : Public Perception

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
INF		644
INF_PAP0		628
INF_PAP1		5652
INF_PAP2		128
INF_PAP5		3768
INF_TR1		3768

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently

asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : INF
TOPIC : Public Perception

will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

BOOK INF-PUBLIC PERCEPTION OF GOVERNMENT PROGRAMS AND SERVICES

This book asked informants to judge the state of public infrastructure and whether it has gotten better or worse. Governance and corruption questions are also included.

PAP01 System to identity GAKIN eligibility?

1. Yes	598	95.22
3. No	30	4.78
total	628	100.00

PAP02 Criteria used for GAKIN eligibility

Variable PAP02 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP02 will have the value ACF. If the interviewee selected D and E, PAP02 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP02 A = Landless
 B = Quality of house is poor
 C = No/shared toilets
 D = No electricity for lighting
 E = Use wood/kerosene/arang for cooking fuel
 F = Eat less than two meals a day
 G = Eat meat/chicken/milk less than once a week
 H = Cannot afford health services
 I = Household head has no more than elementary scho
 J = Household head is unemployed
 K = Children dropped out of school
 L = Pra Sejahtera (Pre Welfare) Family
 M = KS 1 (Welfare 1) Family
 N = Low Helath Status
 O = Widow/widower
 P = Don't have permanent employment
 Q = Don't have asset
 R = BPS' 14 criteria
 V = Others
 Y = Don't know
 Z = Missing

PAP03 Who determines GAKIN eligibility?

Variable PAP03 can have multiple responses. Users were asked to select

IFLS4 HOUSEHOLD SURVEY CODEBOOK

page 29

book: INF - Public Perception

module: INF_PAP0

variable name value frequency percent

all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP03 will have the value ACF. If the interviewee selected D and E, PAP03 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP03 A = Village head

B = Village official/staff

C = PLKB

D = Village midwife

E = Puskesmas staff

F = Community figure

G = Activist

H = PKK

I = NGO

J = LKMD

K = Head of RT/RW

L = Consultant

V = Others

Y = Don't know

PAP04 Who is more appropriate to determine

Variable PAP04 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP04 will have the value ACF. If the interviewee selected D and E, PAP04 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP04 A = Village head

B = Village official/staff

C = PLKB

D = Village midwife

E = Puskesmas staff

F = Community figure

G = Activist

H = PKK

I = NGO

J = LKMD

PAP10 Criteria used to determine eligibility

Variable PAP10 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP10 will have the value ACF. If the interviewee selected D and E, PAP10 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP10 A = Landless
 B = Quality of house/welling is poor
 C = No/shared toilets
 D = No electricity for lighting
 E = Use wood/kerosene/arang for cooking fuel

F = Eat less than 2 meals a day
 G = Eat meat/chicken/milk less than once a week
 H = Cannot afford health service
 I = Household head has no more than elementary scho
 J = Household head is unemployed
 K = Children dropped out of school
 L = Pra Sejahtera (Pre Welfare) Family
 M = KS 1(Welfare 1) Family
 N = Low Health Status
 O = Widow/Widower
 P = Do not have permanent income
 Q = Do not have assets
 R = BPS' 14 criteria
 V = Others
 Y = Don't know

PAP11 Who determines household eligibility

Variable PAP11 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP11 will have the value ACF. If the interviewee selected D and E, PAP11 will have the value DE. Use the key below to correctly interpret these values.

PAP17C Reason for the protests

Variable PAP17C can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP17C will have the value ACF. If the interviewee selected D and E, PAP17C will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP17C A = The listing and selection was not transparent

B = Nepotism practice in the selection

C = The amount was not as specified

D = Assistance was late

E = Unfair distribution

F = Practice of illegal fee in the program implement

G = Assistance were given to those not eligible

H = In-transparent implementation of the program

V = Others

Z = Missing

PAP17D Government response to protest?

Variable PAP17D can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PAP17D will have the value ACF. If the interviewee selected D and E, PAP17D will have the value DE. Use the key below to correctly interpret these values.

key for variable: PAP17D A = Clarify the problems

B = Re-listing

C = Improve management of the program

D = Take punitive action

E = Cancel those who are not eligible

F = Through the court system

V = Others

W = No action was taken

Z = Missing

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK: ADT
TOPIC: Traditional Law and Community Customs

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of	
		recs	
ADT		340	
ADT_AP1		660	
ADT_DG1		660	

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : ADT
TOPIC : Traditional Law and Community Customs

NOTES ABOUT BOOK ADT

Book Adat was used in IFLS2 in order to collect information on community norms pertaining to daily life. In IFLS4 we added back ADAT in order to see if any changes had occurred in the ensuing decade.

variable name value frequency percent

AC01 Acceptable grounds for a man to divorce

Variable AC01 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses

A, C, and F from the list, AC01 will have the value ACF. If the interviewee selected D and E, AC01 will have the value DE. Use the key below to correctly interpret these values.

key for variable: AC01 A = Wife is not obedient to the husband
 B = Not harmoniou/can't get along
 C = Wife was unfaithful
 D = Interested in another woman
 E = Wife cannot manage money
 F = Differences with family/parents
 G = Problems relating to children
 H = Wife behaved inappropriately
 J = Economic problems
 K = Wife has major illnes
 L = Spouse cannot meet household need
 V = Other
 W = Never acceptable
 Z = Missing

AC02 Acceptable grounds for woman to divorce

Variable AC02 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, AC02 will have the value ACF. If the interviewee selected D and E, AC02 will have the value DE. Use the key below to correctly interpret these values.

key for variable: AC02 A = Not harmonious/can't get along/doesn't like him
 B = Husband was unfaithful
 C = Husband got married again
 D = Economic problems
 E = Differences among the couple
 F = Diferences with family or parents
 G = Problems with children
 H = Husband behaved inappropriately
 J = Didn't provide for the family
 K = Wife has major illnes
 L = Spouse cannot meet household need

FG11 How this activity is organized ?

Variable FG11 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, FG11 will have the value ACF. If the interviewee selected D and E, FG11 will have the value DE. Use the key below to correctly interpret these values.

- key for variable: FG11 A = Organize community member to help the poor
 B = Each community member helps the poor
 C = Advide those who wealtheir to help the poor
 D = Helping the poor is the responsibility of desa/
 E = Personal responsibility
 V = Other
 Z = Missing

PB4 Last 5 yr, changes in behaviour/attitude

Variable PB4 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PB4 will have the value ACF. If the interviewee selected D and E, PB4 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PB4 W = No changes
 A1 = Less feeling of togetherness
 B1 = Less feeling of tolerance
 C1 = Easier to get angry
 D1 = Easier to be influenced
 E1 = More selfish
 A2 = More feeling of togetherness
 B2 = More feeling of tolerance
 C2 = More patient
 D2 = More difficult to be influenced
 E2 = Unselfish
 Z = Missing

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : PUSK
TOPIC : Community Health Centers (PUSKESMAS)

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
PUSK		952
PUSKAKM1		6447
PUSK_A1		10472
PUSK_B1		1904
PUSK_C0		5712
PUSK_C1		84728
PUSK_C2		2856
PUSK_C3		12376
PUSK_C4		5706
PUSK_D1		13328
PUSK_D2		4249

PUSK_D3	12257
PUSK_DM1	7616
PUSK_DM2	7616
PUSK_E1	26656
PUSK_E2	15232
PUSK_G1	5562

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

H O U S E H O L D S U R V E Y C O D E B O O K page 4

B O O K : PUSK

T O P I C : Community Health Centers (PUSKESMAS)

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK PUSK

Puskesmas are public health clinics that provide basic outpatient care. Some facilities may offer limited inpatient care, such as delivery assistance. The puskesmas questionnaire is administered to staff of the health center in order to collect data on the types of

services available, their prices, and the quality of health facilities. Facility quality is characterized in terms of functional capacity (adequacy of the laboratory, the pharmacy, equipment, the staff, the physical environment) and in terms of abilities to provide specific services such as general outpatient services, care for pregnant women, well-baby care, and family planning. Different sections of the questionnaire can be answered by different staff members.

B04A Has this facility ever moved location

1. Yes	160	16.81
3. No	792	83.19
total	952	100.00

B04B Why move location

Variable B04B can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, B04B will have the value ACF. If the interviewee selected D and E, B04B will have the value DE. Use the key below to correctly interpret these values.

key for variable: B04B A = Building was too small
 B = Location hard to reach
 C = Flood
 D =
 V = Other

G15A Contraceptive recomend while brestfeed

IFLS4 HOUSEHOLD SURVEY CODEBOOK

page 40

book: PUSK - Community Health Centers (PUSKESMAS)

module: PUSK

variable name	value	frequency	percent
---------------	-------	-----------	---------

Variable G15A can have multiple responses. Users were asked to select

all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, G15A will have the value ACF. If the interviewee selected D and E, G15A will have the value DE. Use the key below to correctly interpret these values.

key for variable: G15A A = Low dose pills
 B = Medium dose pills
 C = IUD
 D = Contraceptive injections
 E = Norplant
 F = Sterilization
 G = Condom
 H = Tradition Methods

SDP10 Who currently determines the budget ?

Variable SDP10 can have multiple responses. Users were asked to select

all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, SDP10 will have the value ACF. If the interviewee selected D and E, SDP10 will have the value DE. Use the key below to correctly interpret these values.

key for variable: SDP10 A = Puskesmas
 B = Dinas
 C = Kabupaten Planning Unit
 D = Bupati/Walikota
 E = DPRD
 V = Other

SDP11 Relocate without approval from dinas?

missing	286	30.04
1. Yes	66	6.93
3. No	600	63.03
total	952	100.00

SDP12 Compared to 2000, budget better/worse?

missing	286	30.04
1. Much better	15	1.58
2. Better	291	30.57
3. Same	296	31.09
4. Worse	59	6.20
5. Much worse	5	0.53
total	952	100.00

SDP13 Why the Puskesmas budget is worse

Variable SDP13 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, SDP13 will have the value ACF. If the interviewee selected D and E, SDP13 will have the value DE. Use the key below to correctly interpret these values.

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : PRA
TOPIC : Doctor / Clinic / Midwife / Paramedic / Nurse / Midwife

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
PRA		1595
PRA_A1		17545
PRA_B1		11165
PRA_B2		78114
PRA_B3		4782
PRA_B4		19128
PRA_B5		3708
PRA_B6		11074
PRA_C1		47820
PRA_C2		30286
PRA_PH1		4879

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know

----------	---	---------

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK PRA

A number of types of private practitioners offer health services in Indonesia, including doctors, midwives, nurses, and paramedics. This questionnaire was administered to all of these kinds of providers, some of whom practice alone and some of whom practice are part of a clinic. The private practitioner questionnaire close parallels the questionnaire for public health clinics and was administered to the provider in order to collect data on the availability of services and quality of care offered by private providers.

total	1,595	100.00

E18 Where are the vaccines kept?

Variable E18 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, E18 will have the value ACF. If the interviewee selected D and E, E18 will have the value DE. Use the key below to correctly interpret these values.

key for variable: E18 A = Refrigerator/freezer/special vaccine box
 B = Regular refrigerator
 C = Refrigerator without electricity
 W = No place to keep vaccine
 V = Other
 Z = Missing

E2 How clean are the walls in this room?

missing	1	0.06
1. Dirty	43	2.70

PB3 Medical Workers

Variable PB3 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, PB3 will have the value ACF. If the

interviewee selected D and E, PB3 will have the value DE. Use the key below to correctly interpret these values.

key for variable: PB3 A = General practitioner
 B = Pediatrician
 C = Obstetrician
 D = Internist
 E = Ear,nose, and throat specialist
 F = Dentist
 G = Midwife
 H = Nurse
 I = Other Specialist
 J = Paramedic
 Z = Missing

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : TRA
TOPIC : Traditional Practice

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs

TRA		4373

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

5. Other	105	2.40
total	4,373	100.00

A11 What language do you usually use

Variable A11 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, A11 will have the value ACF. If the interviewee selected D and E, A11 will have the value DE. Use the key below to correctly interpret these values.

key for variable: A11 W = Indonesian

A = Javanese
B = Sundanese
C = Maduranese
D = Balinese
E = Sasak
F = Minang
G = Batak
H = Bugis
I = Chinese

J = Banjar
 L = Bima
 M = Makasar
 N = Nias
 O = Palembang
 P = Sumbawa
 Q = Toraja
 R = Lahat
 S = other south sumatra
 T = Betawi
 U = Lmapung
 V = Other

---------------	-------	-----------	---------

C00 Check: Are you a traditional midwife?

missing	5	0.11
1. Yes	2,142	48.98
3. No	2,226	50.90
total	4,373	100.00

C01 Trained as a traditional midwife?

missing	2,231	51.02
1. Yes	1,379	31.53
3. No	763	17.45
total	4,373	100.00

C02A Year of your most recent training(year)

min:	1960.00
mean:	2149.66
max:	9998.00
#obs	1,078
#miss:	3,295

C02X Do you know the year of most recent?

missing	2,994	68.47
1. In year	1,078	24.65
3. Years	301	6.88
total	4,373	100.00

C02B Years ago most recent training

min:	3.00
------	------

mean: 18.95
max: 98.00
#obs 301
#miss: 4,072

C03 Who organized the training?

Variable C03 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, C03 will have the value ACF. If the interviewee selected D and E, C03 will have the value DE. Use the key below to correctly interpret these values.

key for variable: C03 A = Midwife
 B = Puskesmas
 C = Posyandu
 V = Other
 Z = Missing

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK: HTW
TOPIC: Prices: Warung (Shop/Stall)

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
HTW		645
HTW_H		16075
HTW_HOUR		313

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
 and facilities conducted in 13 provinces in Indonesia
 between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
 been provided by the National Institute of Aging grant number 1R01
 AG026676 and the National Institute of Child and Human Development,
 grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : HPS
TOPIC : Prices: Market

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of
		recs
HPS		328
HPS_H		12480
HPS_HOUR		311

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : HIN
TOPIC : Prices: Informant

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

		# of
Module	Description	recs
HIN		322
HIN_H		13202

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK HIN

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : HIN
TOPIC : Prices: Informant

Book HIN contains market price data as reported by up to 3 community respondents.

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : POS
TOPIC : Integrated Community Health Post (Posyandu)

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
POS		636
POS_B1		6360
POS_B2		3180
POS_C0		3512
POS_C2		3816
POS_D1		11448
POS_PRP1		1064
POS_SDP1		1776

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

H O U S E H O L D S U R V E Y C O D E B O O K page 4

B O O K : POS

T O P I C : Integrated Community Health Post (Posyandu)

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK POS

Posyandu are community-sponsored health posts that offer family planning and maternal and child health services. Generally these posts offer services once a month and are run by volunteers from the community, with supervision from staff from a government health center. In some ways it is more accurate to call the health post an activity rather than a facility. The health post questionnaire was administered to the volunteers who staff the post. The questionnaire ascertained the characteristics of the volunteer staff (including general education and training in health), frequency of contact with Health Center outreach workers, services offered at the post, and also asked some general questions regarding health problems in the village. Because the respondents to the health post questionnaire are typical community residents, a food price module

(Section H) was included to provide multiple responses to questions on food prices.

	#miss:	83	
A10	In general, where do mothers go to birth		
Variable A10 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, A10 will have the value ACF. If the interviewee selected D and E, A10 will have the value DE. Use the key below to correctly interpret these values.			
key for variable: A10 A = Government hospital			
B = Private hospital			
C = Maternity Hospital			
D = Health Center			
E = Village Maternity Clinic			
F = Clinic/Private Doctor			
G = Clinic/Private Midwife			
H = Traditional midwife's House			
I = Own home			
J = Familys house			
V = Others			
Z = Missing			
A11	Who assists the mother in giving birth?		
Variable A11 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears			

in this public use file. For example, if the interviewee selected responses A, C, and F from the list, A11 will have the value ACF. If the interviewee selected D and E, A11 will have the value DE. Use the key below to correctly interpret these values.

key for variable: A11 A = Doctor
 B = Midwife
 C = Village midwife
 D = Nurse
 E = Trad. midwife

#obs	642
#miss:	2,538

B11 How are changing of users/client

missing	2,260	71.07
1. Increase	205	6.45
2. No change	587	18.46
3. Decrease	128	4.03
total	3,180	100.00

B12 Factors that account for change

Variable B12 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, B12 will have the value ACF. If the interviewee selected D and E, B12 will have the value DE. Use the key below to correctly interpret these values.

key for variable: B12 A1 = Increase in price of services
 B1 = Decrease in availability of service
 C1 = Clients can no longer afford
 D1 = Switch to traditional midwives
 E1 = High risk of side effect
 H1 = Switch to other methods
 I1 = Feel comfortable with the contraceptive
 A2 = Decrease in price of service

B2 = Increase in availability of service
 C2 = Clients can better afford
 D2 = Switch from traditional midwives
 E2 = Low risk of side effect
 H2 = Switch from other methods
 I2 = Feel uncomfortable with contraceptive
 V = Other
 Y = Don't know
 Z = Missing

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : PLS
TOPIC : Integrated Community Health Post for Elderly (Posyandu Lansia)

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
PLS		307
PLS_B1		4605
PLS_D1		3070
PLS_SDP1		811

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

B3 Who is providing services to elderly?

Variable B3 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, B3 will have the value ACF. If the interviewee selected D and E, B3 will have the value DE. Use the key below to correctly interpret these values.

key for variable: B3 A = Doctor
 B = Midwife
 C = Nurse
 D = Village Midwife
 E = Cadre
 F = Community members

B4 Do they receive training for elder care?

1. Yes	167	54.40

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : SCHL
TOPIC : School Questionnaire

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

Module	Description	# of recs
SCHL		2621
SCHL_A1		7680
SCHL_A2		558
SCHL_B3		43520
SCHL_B5		10240
SCHL_B6		38400
SCHL_C1		7680
SCHL_D1		5790
SCHL_D2		4785
SCHL_E		53760
SCHL_F		63775

SCHL_G1	5790
SCHL_G2	4785
SCHL_G3	15360
SCHL_KR	10921

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric Alphanumeric Meaning

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : SCHL

TOPIC : School Questionnaire

5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.

NOTES ABOUT BOOK SCHL

The school questionnaire was administered at public and private religious and secular elementary, junior secondary and senior secondary schools. The questionnaire consists of modules for the principal about his or her characteristics and the characteristics of the school. An additional set of questions were asked to the teachers of Bahasa Indonesia and Mathematics at the highest grade levels at which these

subjects were taught. Another section is partially direct observation on the part of the interviewer concerns the quality of the classroom infrastructure. The final section records basic statistics of the school regarding numbers of pupils by grade level and sex and numbers of teachers. It also records the math and language scores on the EBTANAS tests for a random sample of 25 students. These scores can be used to characterize the achievement levels of students at the school. Finally the module collects some basic information about prices charged to students who attend the school.

A21 Source of funding for school lunch

Variable A21 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, A21 will have the value ACF. If the interviewee selected D and E, A21 will have the value DE. Use the key below to correctly interpret these values.

key for variable: A21 A1 = Central Government
 A2 = Regional Government
 B = Private sector
 C = Foundation/Self-reliance Organization
 E = Parents/schools/community
 F = School
 G = Foreign Assistance
 H = Religious group
 V = Other, mention

COV1 Position of respondent

Variable COV1 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, COV1 will have the value ACF. If the interviewee selected D and E, COV1 will have the value DE. Use the key below to correctly interpret these values.

key for variable: COV1 A = Principal
 B = Vice Principal
 C = Class Teacher
 V = Other
 Z = Missing

SC03 Who are School Committee members?

Variable SC03 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, SC03 will have the value ACF. If the interviewee selected D and E, SC03 will have the value DE. Use the key below to correctly interpret these values.

key for variable: SC03 A = Teacher
 B = Principal
 C = Student's parent
 D = Community figure
 E = Religious figure
 F = Village/Thownship officials
 G = Government representative
 V = Others

SC04 How many people in School Committee?

min:	1.00

B43A Scholarship program for children?

1. Yes	3,141	30.67
3. No	6,870	67.09
5. Not heard of	206	2.01
8. Don't know	23	0.22
total	10,240	100.00

B43B What are the sources of this scholarship

Variable B43B can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, B43B will have the value ACF. If the interviewee selected D and E, B43B will have the value DE. Use the key below to correctly interpret these values.

key for variable: B43B A = Central government
 B = Kabupaten/Kota Government
 C = Religious groups
 D = Private non-religious
 E = GNOTA
 F = School Committee
 V = Others

KR7 Sections answered by respondent IR

IFLS4 HOUSEHOLD SURVEY CODEBOOK page 88
book: SCHL - School Questionnaire
module: SCHL_KR

variable name	value	frequency	percent
---------------	-------	-----------	---------

Variable KR7 can have multiple responses. Users were asked to select all applicable responses from a list of all possible responses. These were concatenated together into a single character string variable which appears in this public use file. For example, if the interviewee selected responses A, C, and F from the list, KR7 will have the value ACF. If the interviewee selected D and E, KR7 will have the value DE. Use the key below to correctly interpret these values.

key for variable: KR7 A = A
 B = B
 SC = SC
 C = C
 D = D
 E = E
 F = F
 G = G
 H = H
 W = W
 Z = Z

INDONESIAN FAMILY LIFE SURVEY 7

A survey of individuals, households, families, communities
and facilities conducted in 13 provinces in Indonesia
between November 2007 and July 2008

Directed by

John Strauss, RAND and USC

Firman Witoelar, Survey Meter

Bondan Sikoki, Survey Meter

and

Anna Marie Wattie, Univ. of Gadjah Mada

Financial support for the Indonesian Family Life Survey Wave 4 has
been provided by the National Institute of Aging grant number 1R01
AG026676 and the National Institute of Child and Human Development,
grant number 1R01 HD050764

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 3

BOOK : MKD
TOPIC : Minikamades

DATA FILES

Data are available in SAS (9.2) export and STATA (8.0) formats.
Data and electronic documentation are available on the IFLS website.

The survey instrument contains multiple sections. Where possible, sections have been merged together to form a single data module. The modules are organized by level of observation. The module names are listed below. They serve as the names of the SAS and STATA data files. The codebook is also organised by module.

The modules are:

		# of
Module	Description	recs
MKD_COV		3122
MKD_KM1		3067
MKD_KM2		30670
MKD_KM3		18402
MKD_KM4		24536
MKD_KM5		18402

USER SUPPORT

These data should be used in conjunction with the Questionnaires and Users' Manuals. Check the IFLS web page for updates and answers to frequently

asked questions. Please send all questions to ifls-supp@rand.org.

USAGE NOTES

READING THE DICTIONARY

For each variable in the dataset, the dictionary provides

Variable name : Typically the question number

Label : Describes variable

Variable coding is described as follows:

Value : Meaning of values for coded variables

Frequency : Frequency of each value

SPECIAL CODES

The following values are reserved and have a special meaning:

Numeric	Alphanumeric	Meaning
5/95/995	V	Top coded/out of range
6/96/996	W	Not applicable
7/97/997	X	Refused to answer
8/98/998	Y	Don't know
9/99/999	Z	Missing

DATASET VERSION

The variable VERSION identifies the release version of these data; it

INDONESIAN FAMILY LIFE SURVEY 4: CODEBOOK

HOUSEHOLD SURVEY CODEBOOK page 4

BOOK : MKD
TOPIC : Minikamadas

will be updated with each revision of the data and can be used to confirm that you are using the most recent version of the data.
