

Table H-3C	DISTRIBUTION OF CENSUS HOUSES BY PREDOMINANT MATERIAL OF FLOOR
-------------------	---

*Level of presentation: India / State / District / Tahsil / Town
Corresponding Table of 1991 Census: Table H-2 Parts A and B*

This table gives the distribution of census houses by the predominant material of floor. The materials of floor are grouped into 7 broad categories viz., Mud; Wood, Bamboo; Brick; Stone; Cement; Mosaic, Floor tiles; and any other material. In determining the material of floor, the major portion of which the floor of the house was made has been considered. This table shows the types of floor material used in building of census houses. The data in this table are presented for total, rural and urban areas separately.

Tahsil and town level data are available only in electronic format.
