

2. Review of Results

2.1 Introduction

2.1.1 The main findings of the survey, which covers the registered manufacturing sectors of the entire country, are highlighted in the following sections including the present one. These results, both in aggregates and in percentage terms, are presented at macro level and are based on the central sample data collected by the FOD, NSSO and processed by the CSO (IS Wing). Some of the important structural ratios and technical coefficients, wherever relevant, have also been computed and incorporated in some of the statements presented in these sections. The discussions of the results are mainly based on the all-India results.

2.1.2 Another important point may also be noted here that the rates and ratios of some parameters presented in this report at the disaggregate level, particularly for the smaller states and UTs cross classified by 2-digit level of activity classification, are subject to the limitation of small sample and thus, the user may cautiously interpret the changes of these parameters over time. In order to facilitate better understanding of the estimates of these rates and ratios, the number of factories available in the frame, number of factories selected for the survey and number of factories surveyed for ASI 2008-09 are given in Statement 0 separately for each state and all-India.

2.2 Principal Aggregates – All India

2.2.1 Statement 1 presents the estimates for principal characteristics for all industries taken together at all-India level for 2008-09 with comparative estimates for the preceding four years.

2.2.2 The statement shows that in the year 2008-09, there have been 1,55,321 factories registered with the Chief Inspector of Factories (CIF) in all States and Union Territories except the States of Arunachal Pradesh, Mizoram and Sikkim and Union Territory of Lakshadweep. These factories include those which were, at the time of survey, found to be either (i) opened and operated, or (ii) existed in the given location and had engaged some employees during the reference period, but could not initiate production or did not produce anything during the reference period due to various reasons, and can take up production any moment once the problems are sorted out, or (iii) existed in the given location, but did not engage any employee during the reference period, and also, did not initiate production or produce anything during the reference period. The number of factories in 2008-09 is found to be higher by 6.10 percent than that of last year. These factories together have a total stock of fixed capital worth Rs. 10,55,96,614 Lakhs and invested capital of Rs. 15,35,17,773 Lakhs. These are higher by 24.95 and 19.92 percent, respectively compared to those estimated as per ASI 2007-08. These factories have provided gainful employment to 1,13,27,485 persons showing an increase of 8.37 percent with respect to the preceding year and distributed Rs. 1,29,44,123 Lakhs as emoluments to employees, showing an increase of 22.76 percent in one year. These factories have consumed inputs both industrial and non-industrial in nature, worth Rs. 26,61,48,638 Lakhs, produced Rs.

32,72,79,786 Lakhs, worth of goods and services valued at ex-factory prices and contributed by the way of net value added by organized manufacturing sector Rs. 5,27,76,558 Lakhs to the national income. These are found to be higher by 19.73, 17.91 and 9.59 percent, respectively compared to those estimated as per previous ASI.

2.3 Structural Ratios and Technical Coefficients

2.3.1 A few structural ratios and technical coefficients derived from the macro level estimates of principal characteristics for the current and the preceding four years have been given in Statement 2. It may be noted that the measuring changes in ratios over time are subject to certain limitations. Some of these ratios - particularly value based characteristics - are not strictly comparable over time due to the changes in prices of commodities from year to year. Two new structural ratios viz. output per worker and net value added per worker and a new technical coefficient viz. fuel consumed to output, perceived as an indicator of energy efficiency of an industry has been newly introduced in Statement 2.

2.3.2 Statement 2 reveals that the average size of the factory, measured in terms of value based characteristics, namely, fixed capital, gross output and net value added by manufacture have maintained a steady upward trend over years. As stated in the preceding paragraph, the increase in the value-based characteristics may be the combined result of the increase in physical output as well as increase in prices. The survey results revealed that in 2008-09, a factory with an average investment of Rs. 680 Lakhs in fixed capital have provided gainful employment to 73 persons, produced goods and services at ex-factory prices worth Rs. 2,107 Lakhs and contributed by way of net value added by manufacture Rs. 340 Lakhs to the national income. However, taking an employee as a unit of measurement, the survey revealed that an employee in the organized manufacturing sector during 2008-09 has, on an average, worked with a fixed capital stock of Rs. 9,32,216, gave an output of Rs. 28,89,254 and contributed to the national income by way of net value added by manufacture Rs. 4,65,916. The corresponding averages in the preceding year are, respectively, Rs. 8,08,453, Rs. 26,55,537 and Rs. 4,58,282. The average emoluments drawn by an employee was Rs. 1,14,272 during 2008-09 and average wages given to a worker was Rs. 68,103 during the same period.

2.3.3 The capital output ratio which provides a measure of the capital required to produce one unit of net output (i.e. net value added) has increased to 2.0 in 2008-09 from 1.76 in 2007-08. The capital required to produce one unit of gross output has also increased from 0.30 in 2007-08 to 0.32 in 2008-09. The level of efficiency, measured by the ratio of the net value added to gross output has been 0.16 in 2008-09 against 0.17 as observed in 2007-08. The share of labour in net value added, measured by the ratio of emoluments to the net value added has increased from 0.22 in 2007-08 to 0.25 in 2008-09. Fuel consumed to produce one unit of output has remained same (0.05) over the period of five years at least at the macro level.

Figure 1: Number of workers and total persons engaged during 2004-05 to 2008-09

Figure 1 is showing the number of workers and total persons engaged during 2004-05 to 2008-09. The above figure is showing an upward trend of both workers and total persons engaged. However, the total persons engaged are slightly steeper than the workers. It implies that the number of auxiliary employees, managerial staff, etc. that are not directly linked with the production, is increasing over time in comparison to the employment directly linked to the production process.

Figure 2: Technical coefficients during 2004-05 to 2008-09

Figure 2 presents some technical coefficients during 2004-05 to 2008-09. Here, the technical coefficients are estimated on the basis of NVA to output, output to input and emoluments to NVA. From the above figure, it is found that output to input ratio that indicates the industrial efficiency has remained static over past few years. The other two coefficients viz. NVA to output and emoluments to NVA have also remained stable over the last five years.

**Statement 0: Number of factories in the frame, selected
for survey and actually surveyed in ASI 2008-09**

3. PRINCIPAL CHARACTERISTICS BY MAJOR ECONOMIC ACTIVITY

3.1 Principal Aggregates

3.1.1 Statements 3 and 4 give the distribution of some of the selected aggregates in absolute and percentage terms by the main sectors of economic activity (NIC-2008) covered in ASI.

3.1.2 It may be observed that 93.82% of the factories covered in ASI 2008-09 are engaged in manufacturing activities, 0.32% are undertakings engaged in the generation, transmission and distribution of electricity, gas, water supply etc. and remaining 5.85% in 'other' activity including cotton ginning, cleaning and baling, extraction of salt and some repair services etc. Though the electricity undertakings are a few in number, they account for about 5.78% of the total fixed capital of all the factories covered in the survey as against 1.43% share by the 'other' activities. The manufacturing activities account for about 92.79% of the fixed capital. The manufacturing sector, consistent with its large number of factories, accounts for 95.93% of the value of output, which is produced by 96.63% of the total employees. The electricity, gas, water sector contributes about 1.30% to the gross output and is produced by 0.30% of the total employees. The corresponding share of the 'other' activities in the value of output is 2.77% and this is produced by 3.06% of the employees. Of the estimated total net value added by industrial sector of Rs. 5,27,76,558 lakh, Rs. 5,09,60,964 lakh constituting 96.56% originate from manufacturing activities, another Rs.10,54,988 lakh forming 2% from electricity, gas, water supply etc., and the remaining Rs. 7,60,606 lakh making 1.44% come from the 'other' activities.

Statement 3 : Estimate of principal characteristics by major economic activity based on ASI 2008-09

4. DISTRIBUTION OF FACTORIES BY SIZE OF EMPLOYMENT

4.1 Principal Characteristics

4.1.1 Statements 5 and 6 present the distribution of factories as well as certain selected characteristics, in absolute and percentage terms, by size class of employment. In 2008-09, the number of factories by size class of employment indicates a skewed distribution in the sense that there are larger number of factories with low employment size and a fewer with higher number of employment size. For example, out of an estimated number of 1,55,321 factories, 1,11,889 factories are found to employ less than 50 employees each. Further, there is a, by and large, heavy concentration of various attributes like fixed capital, total output, net value added etc., among the factories belonging to the higher employment size classes. While the lowest size class has largest concentration of factories (72.04 %), it utilizes only 8.45 % of the fixed capital, provides employment to 17.23 % of the employees, produces 11.63 % of the total output and generates 8 % of national income in the form of net value added by manufacture. On the other hand, the factories each of which employ 200 or more employees, constituting 8.39% of the factories, utilize 77.37% of the fixed capital, provide gainful employment to 57.99% of the employees, produce 69.60 % of the total output and generate 76.35 % of net value added by manufacture. The very large factories employing 5,000 or more employees each, constituting only 0.18% of the number of factories, however, engage 7.92% of employees of industrial sector, utilize 13.01% of the fixed capital, produce 10.45% of the total output and contribute 14.24% to the net value added.

5. DISTRIBUTION OF FACTORIES BY SIZE OF CAPITAL

5.1 Principal Characteristics

5.1.1 The Statements 7 and 8 give the distribution of factories together with their shares in certain selected characteristics, obtained from ASI 2008-09, by size of capital, namely, the undepreciated gross value of plant and machinery owned by the factory. The range of capital defined in Statements 7 and 8 is as per the definition of MSME for Manufacturing Sector in Micro, Small and Medium Enterprises Development Act (MSME), 2006. It is revealed from Statement 8 that the factories with an investment in plant and machinery up to Rs. 5 crore account for 90.05% of the total population of registered factories which worked during the reference period of 2008-09. While these factories share 12.78% of fixed capital to work with, they provide employment to 51.56 % of the total employees. Their contribution to the total output and net value added by manufacture are of the order of 25.11 % and 21.17 %, respectively. As against this, the factories with gross investment in plant and machinery of Rs. 10 crores & above, though are a very few (6.70%) in number, account for about 83.47 % of total fixed capital, 41.42% of total employees, 68.61% of the total output and 74.08% of the total net value added by manufacture.

6. DISTRIBUTION OF FACTORIES BY SIZE OF GROSS OUTPUT

6.1 Principal Characteristics

6.1.1 The distribution of factories along with related characteristics classified by size class of gross output is presented in Statement 9. The percentage distribution of these characteristics is given in Statement 10. It is observed that during the accounting year 2008-09, 40.87% of the factories that produce gross output up to Rs one crore each, share 2.63% of fixed capital, provide an employment in the tune of 10.13%, pay emoluments to the extent of 3.34%, and contribute 0.68% to the total output. About 21.84% of the factories producing more than Rs 10 crores gross output each cover 90.59 % of fixed capital, provide 68.35% of employment and pay 84.18% of emoluments. This group of factories also contributes about 93.07% of gross output.

7. DISTRIBUTION OF FACTORIES BY SIZE OF NET VALUE ADDED

7.1 Principal Characteristics

7.1.1 Statement 11 sets out the distribution of factories along with related characteristics classified by net value added based on ASI 2008-09 results. These characteristics in percentage terms are given in Statement 12. During the accounting year 2008-09, about 14.58 per cent of factories each with less than Rs. 2.5 Lakhs of net value added, shared about 15.66 per cent of fixed capital resources providing gainful employment to 7.57 per cent of employees of the factory sector, sharing 7.47 per cent of the emoluments. These units, though consumed about 10.11 per cent of input, are found to produce 7.57 per cent of total output. On the other hand, about 4.81 per cent of the factories each contributing at least Rs. 10 crores of net value added possess 62.22 per cent of the fixed capital resources. They have 36.66 per cent of employees, taking away 57.04 per cent of the wage bill in terms of emoluments and produced 63.15 per cent of total output consuming 58.64 per cent of inputs.

8. RELATIVE IMPORTANCE OF INDUSTRIES

8.1 Principal Characteristics

8.1.1 Statement 13 summarizes the relative status of the major industry groups as per NIC-2008. All the major industry groups have been ranked in the descending order of their contribution to the net value added by manufacture. Statement 14 gives the percentage distribution of these characteristics. It may be seen that the first four positions are occupied by *basic metals* (NIC: 24); *coke and refined petroleum products* (NIC: 19); *chemicals and chemical products* (NIC: 20); and *machinery and equipment n.e.c.* (NIC: 28) in that order. These four major industry groups, while accounting for 41.46 per cent of the fixed capital, have only 20.36 per cent of the total employees in the factory sector, shared among themselves 43 per cent of net value added. The share of the major industry group *basic metals* (NIC: 24) alone (which occupies the top position in terms of its contribution to the value added) is 19.81 per cent in the total fixed capital stock, 7.93 per cent in the work force, i.e., employees, 13.62 per cent in the net value added. *Food products* (NIC: 10) have the distinction of having maximum no. of factories (16.65 per cent) and employing the maximum number of employees - about 14.40 Lakhs (12.71 per cent of total employees).

Statement 13 : Relative status of major industry groups in respect of NVA and some selected characteristics based on ASI 2008-09
(Arranged in Descending Order of Net Value Added)

(Value Figures in Rs. Lakhs & Others in Numbers)

9. RELATIVE IMPORTANCE OF STATES – ALL INDUSTRIES

9.1 Principal Characteristics

9.1.1 Statements 15 and 16 present data on some selected aggregates both in absolute and percentage terms for thirty-one states/UTs ranked in the descending order of their contribution to net value added.

9.1.2 In 2008-09, the number of factories is reported highest in Tamil Nadu (16.82 %) followed by Maharashtra (13.17 %). Maharashtra's share is the highest in relation to other States for some of the other aggregates like fixed capital (16.95%), invested capital (17.01%), total emoluments (20%) and net value added (21.39%). Gujarat occupies the second position by virtue of its contribution to net value added. Gujarat's share in the total fixed capital is 16.32 per cent; its contribution to the value of net value added is 11.45 per cent of the corresponding totals. Gujarat is again followed, in terms of its contribution to net value added, by Karnataka (8.06%), Tamil Nadu (7.52%), Andhra Pradesh (6.72%), and Uttarakhand (5.39%) in that order.

Statement 15 : Relative status of states in respect of NVA and some selected characteristics based on ASI 2008-09**(Arranged in Descending Order of Net Value Added)**

10. REGIONAL DISTRIBUTION OF INDUSTRIES

10.1 Statement 17 presents the share of seven most important industries in terms of gross value of output and gross value added within each of the thirty one states/UTs. The ranking of major industries in a state has been done according to the value of their gross output. The industry with maximum gross output is ranked first and others in their descending order of their gross output. Besides the gross output, the contribution of each of these industries to gross value added is also given.

10.2 From Statement 17, it is seen that during 2008-09, in *basic metals* (NIC: 24), the contribution to the total output is 14.84 per cent at all India level, whereas this group, in the states like Chattisgarh (74.63 per cent), Odisha (60.15 per cent), Jharkhand (59.97 per cent), Meghalaya (43.48 per cent), Dadra & Nagar Haveli (33.10 per cent) and West Bengal (30.96 per cent), is contributing to the highest proportion in respect to the total output of the respective states. *Coke and refined petroleum products* (NIC: 19) accounts for 14.69 per cent of the total output at all India level, which is the second highest in ranking in proportionate share of gross value of output to the total output, whereas this group accounts for the highest value of their respective total output in six states namely Bihar (77.33 per cent), Assam (61.70 per cent), Kerala (39.01 per cent), Gujarat (25.80 per cent), Karnataka (17.44 per cent), and Maharashtra (16.88 per cent). In *Food Products* (NIC: 10), the contribution to the total output is 11.37 per cent (next only to *basic metals* and *coke and refined petroleum products*) at all India level, where as this group, in the states like Punjab (18.58 per cent), Delhi (25.40 per cent), Uttar Pradesh (17.61 per cent), Manipur (56.59 per cent), Madhya Pradesh (32.78 per cent) and Andhra Pradesh (18.95 per cent) contributes to the highest proportion in respect to the total output of these states. The industry group *chemicals and chemical products* (NIC: 20) accounts for 8.84 per cent of the total output in all India, where as this group accounts for the highest value of their respective total output in two states namely Jammu & Kashmir (33.93 per cent), and Goa (28.96 per cent). *Motor vehicles, trailers and semi-trailers* (NIC: 29) industry group accounts for 5.35 per cent of the total output in all India which is the 5th highest in ranking in proportional share of gross value of output. This industry contributes to the highest proportion of their respective total output in the states of Haryana (29.44 per cent) and Tamil Nadu (15.50 per cent). *Other non-metallic mineral products* (NIC: 23), though not included in the top 7 major industries at all India level, but accounts for the highest in share (18.72 per cent) in Rajasthan and (22.18 per cent) in Tripura.

10.3 Statement 18 gives the shares of top three states along with all India figures in the total output and gross value added for major industry groups. Within each such industry, states have been ranked based on their relative contributions to the total output of that industry. From Statement 18, it is clearly seen that in *crop and animal production, hunting and related service activities* (NIC: 01), the states Gujarat, Andhra Pradesh and Maharashtra are the top three

important contributors to total all India output and gross value added. These three states together account for 74.10 per cent of the total output and 81.55 per cent of gross value added in the country. In the case of industry group *food products* (NIC: 10), Gujarat, Maharashtra, and Andhra Pradesh are again the top three contributors to total output together accounting for 40.62 per cent at all India level. Tamil Nadu, Gujarat and Maharashtra are the three important contributors to total output and gross value added of *textiles* (NIC: 13) and they together are accounting for 51.30 per cent at all India level. Tamil Nadu, Uttar Pradesh and West Bengal are the three important contributors in industry group *leather and related products* (NIC: 15) accounting for 67.09 per cent of all India. Again, West Bengal, Gujarat and Haryana are the three important contributors to total output and gross value added of *wood and wood products (except furniture)* (NIC: 16) accounting for 41.50 per cent of all India. In industry group *paper and paper products* (NIC: 17) the important states are Gujarat, Maharashtra and Tamil Nadu - together accounting for 37.98 per cent of all India output. In *coke and refined petroleum products* (NIC: 19) industry group the three most important contributing states are Gujarat, Maharashtra and Karnataka sharing about 56.51 per cent of all India output. In *chemicals and chemical products* (NIC: 20) industry group, the major three contributors are Gujarat, Maharashtra and Andhra Pradesh and these states are accounting for 56.16 per cent in all India level. In *basic metals* (NIC: 24) industry group, the three most important states are Maharashtra, Chattisgarh and Gujarat which are accounting for 36.22 per cent at the national level. In industry group *computer, electronic and optical products* (NIC: 26), the top three states are Uttar Pradesh, Uttarakhand and Maharashtra and they share 53.08 per cent of the total all India output. In *electrical equipment* (NIC: 27), the highest contributing states are Maharashtra, Karnataka and Daman & Diu which together accounts for 39.2% of total national output. In industry group *motor vehicles, trailers etc.* (NIC: 29), the top three states are Tamil Nadu, Haryana and Maharashtra, which together account for 73.92 per cent of the total all India output.

Statement 17: Share of seven major industries in total output & GVA in each State based on ASI 2008-09

(Rs. Lakhs)
