

Központi Statisztikai Hivatal
Elnök

Dear Sir, Madam,

It is important task of the Central Statistical Office to provide real facts, analysis and statistics about social and living circumstances of individuals, families and households.

We carry out surveys to fulfil our task. The statistics on the living conditions of different social groups e.g. pensioners, families with children, single persons, households living in cities or at the country are based on the data supplied by the responding families.

It has always a great importance for us to draw accurate statistics and provide objective picture of the financial conditions of the population. We need your co-operation to provide those information.

Your family was chosen randomly. We ask you to respond for this survey.

We ensure you the individual personal data of yours won't be surrendered neither private persons nor institutions. The result of the survey will be published in report by the form of aggregated statistical tables without any personal identifying code.

Our representative visiting you has a letter of assignment or an identity card with a photo issued by the Directorate of Central Statistical Office.

Thank you in advance for your kind efforts.

Yours sincerely,

Dr. Tamás Mellár
