A1. Preamble

Interviewer read:

Hello, my name is [____] and I work with BISAM, a national social research company based in Almaty. [*Show official BISAM letter*]

Our team is working in this community with the permission of the akimat and the prime minister's office to conduct social research. This research is being done across Almaty Oblast. The main purpose is to collect information from communities to better understand how families care for young children. This will inform policy and programmes.

We have come to this village by chance. We will be visiting many other villages across the oblast, and interviewing many households in this village. There is no particular reason why we have come here, we chose randomly. We are here today because information that we received from the akimat shows that some children from this village attend pre-school here.

I would like to ask your views on a range of subjects related to pre-school education in this community, as well as some specific questions about your facility. The research should not take up more than 1 hour of your time.

All of the information that you share with me will be kept **confidential**. This means that this information will not be shared with anybody, including local government authorities. This information will also be **anonymous**, which means that all of the information we collect from you will only be analysed in a general way, and your individual details will never appear anywhere. Nobody will be able to tell that you have participated in our research.

Please understand that you will not receive any direct benefit from talking to us. Your participation is very important to our research, and there will be no negative consequences for talking to us. But if you would like me to leave, please feel free to tell me at any time and I will go. If you decide to participate in this research, I will be asking you questions and making notes of your answers in this questionnaire.

Do you have any questions about this research or your participation in this research?

Do I have your permission to continue with this interview?

If you have any further questions, please feel free to ask anything later in the interview.

A2. The respondent

Interviewer: Select the director (or a deputy director). If he/she is absent, select a teacher or an administrator who has access to the school's records. If the relevant school records for the current (or most recent, if during the summer vacation) school year are not available then you can complete the remainder of the questionnaire but you will need to return for the records.
