Title of the Study: Socioeconomic Panel Surveys in Ghana.

Research Partners: Yale Economic Growth Center, Institute of Statistical, Social and Economic Research (ISSER) at the University of Ghana

My name is _____. I am from the Institute of Statistical, Social and Economic Research at the University of Ghana. I am collecting data for a research study to see how the lives of individuals and households in Ghana are affected by the process of economic change. You have been chosen randomly as one of the participants for this study in Ghana. We expect that the results from this survey will help the Ghanaian government as well as other governments in low-income countries and international organizations to develop policies and procedures that improve the lives of people.

Because many parts of your lives are likely to have been affected by economic change, if you agree to participate in this study we will ask you many detailed questions about such things as who lives in your household, your education and health, your children and others in the household, employment and sources of income, the types and amounts of goods you buy, possible disputes in the village that you are aware of, and your sense of the problems in the village as well as the role of various organizations in remedying those problems. The health questions include history of medical care you have received, your use of methods to prevent pregnancy and mental health. We will also obtain measures of your children's height and weight and will provide them with simple tests to assess their knowledge and skills. [For women only: You will also be asked questions about your previous pregnancies; including care you received before giving birth, live births, stillbirths and aborted births, as well as questions about your use of contraceptives.]

If you choose to take the survey, you are free to refuse to answer any of the questions that may make you uncomfortable and you also have the option to end the interview at anytime. You can stop me at anytime to clarify the questions or ask me to repeat something if you don't understand. We will work with you to find convenient times for us to meet about seven times over the next few weeks. The question sessions will last for about 1-2 hours at a place of your comfort and convenience. Because we are interested in long term changes in your household and your community we will try to re-contact you every 3 years for at least 10 years, even if you move, to conduct follow-up surveys. We realized that your time is valuable and that it may not be easy for you to devote this much time to our survey. We would like you to know that your participation is greatly appreciated and is extremely valuable to the success of our efforts to develop better policies and procedures to improve the lives of Ghanaians and people in other low-income countries.

Your participation in this study will not affect you in anyway as the study is solely for research purposes. The answers you provide will be stored securely in the offices of ISSER and Yale University and confidentiality will be maintained at all times. Your name and any other identifying information will be accessible only to the researchers and will never appear in any sort of report that might be published.

Your decision to participate or not participate will not affect you. You can contact the research organization that has hired us to conduct this survey at the address below with any problems or questions you may have:

Robert Osei Darko at the Institute of Statistical, Social and Economic Research University of Ghana, Legon: 0302 501182

Or you may contact the Principal Investigator of the study:

Christopher Udry at the Yale Economic Growth Center, 27 Hillhouse Avenue, New Haven, CT 06511, USA, (+001) (203) 432-3637

If you think I have answered all your doubts and questions about this study and have received a satisfactory answer, please sign or make a thumb imprint if you **consent** to participate in the study. Your participation in this study is completely voluntary. We are very grateful if you participate. Do you agree to participate in the study?

Part B1: Future Contact Information

Enumerator: please remind the household that it will be interviewed multiple times over the next 15 years, and thus having a way to contact them in the future is critical to the success of the survey. We are going to ask them for two people who can be contacted in the future should the family move from the village.

0: If you left this place, who would be the most likely people to know where you are?

	Contact 1	Contact 2
1. Name of contact people		
2. Relationship to you		
3. Where do these people currently live?		
1. Name of community	1. _____	1. _____
2. Name of region	2. _____	2. _____
4. Phone numbers of these people		
5. How best would we be able to contact these people? (Pls. <i>feel free to give as many options as necessary</i>) e.g. Contact address, landmarks, street numbers, nicknames etc		

Section 0 and 1B2-ROSTER

Part B2: Household Roster

Notes on definition of a household appear to remind the interviewer.

Read: First, we will ensure that the list of the people we have from the last round of collection is correct, and then we can add any new people who are now members of the household. I will read you the names and nicknames of people we already have on our list, and you can correct any mistakes and let us know if the person is still a member of the household. After we have gone through the list from the last round, you can add new members to the list.

The following people were listed as members of your household the last time we visited. (please which name is this person first name, which name is this person's last name (family name)? Are the nicknames we have for this person correct, if not correct them?

For this document, only two fields for household members (ID 1 and 2) are assumed for simplicity.
