

ELDERS ENDLINE SURVEY DRAFT

INTRODUCTION

My name isand I am representing the 2M Corp in collaboration with the NOVAFRICA research center at the Nova University of Lisbon in conducting a research survey aimed at learning more about the desires and needs of the Gambian youth. One year ago, your household was selected to participate in this study.

There are no risks involved in participating in this study. Taking part in this study is completely voluntary. All information collected in this study will be kept confidential and anonymized. All information will be strictly used for university research purposes and will not be shared with any third party. Participants have the right to withdraw their participation at any point in time.

The interview will take about an hour.

In case you require further information and clarification, you can contact Tijan L. Bah on the following numbers: 7321546/5122794.

Can we continue with the interview? If so, I would like you to sign this informed consent letter stating that you agree to participate in our research study. You will keep a copy of this letter with our contact information so that you can reach our team at any time.

[NOTE TO INTERVIEWER: During the baseline, we went door-to-door in the settlement and interviewed households with at least one male aged 18-30. Based on these interviews, we produced a list of households with young males aged 18-30. We then met alkalo/elders/ teachers, showed them the list and asked them to identify the 11 households with the males 18-30 more likely to migrate in the next year. We now want to know whether these young males have attempted to move or moved since the baseline.]
