SECTION 2: SAMPLING

Yes

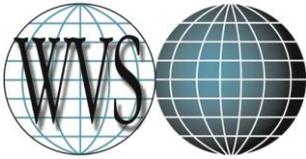

GO TO Q 9

NO

ANSWER

IF NOT DESIGNED TO BE REPRESENTATIVE

8. Which groups were excluded from, under-represented or over-represented in your sample design?

9. What was the lower age cut-off for your sample?

10. Was there any upper age cut-off for your sample?

Yes - please write in cut-off

No cut-off

11. What were the different stages in your sampling procedure?

PLEASE WRITE IN: the first stage was in diving the country into 12 governorates, the second is to have these governorates divided into stratum (each governorates is divided into 2 stratum deepening in the socio-economics level of each area in the governorate, so at the end we had 24 stratum to sample from). The third stage is to distribute the sample on the stratum proportional to the size of the stratum. So, each stratum will have number of PSU's according to the size of the stratum. Then randomly we chose these PSU's and from each PSU we systematically draw 8 houses and chose the respondents in each house according to Kish grid.

12. What was the final number of clusters or sampling points?

No clusters

WRITE IN:

13. What was the sampled unit you got from office sampling?

A map that shows the PSU location and the number of houses in this PSU

IF NAMED INDIVIDUAL WAS NOT THE SAMPLED UNIT

14. What selection method was used to identify a respondent?

PLEASE SPECIFY: Kish grid

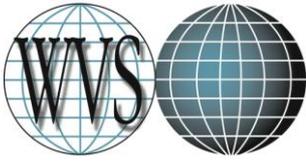

The household selection was made randomly in the targeted municipalities (mentioned on the daily work sheet of the interviewer). In the neighbourhood mentioned in the work sheet the interviewer use to select systematically the households to cover using a fixed skip pattern for each PSU and this skip pattern changed according to PSU size.

The daily work sheet mentioned also the profile required of the interviewee.

15. Were there any quota-controls on the type of individual selected to take part in the survey (for example, age or sex controls)?

Yes → ANSWER

EVERYONE PLEASE ANSWER

21. All in all, what are the known limitations of your realized sample?
