

Guatemala (Capital City Private)

2015 Fact Sheet

The 2015 Guatemala (Capital City Private) GSHS was a school-based survey of students in Primero, Segundo, and Tercero basico, which are typically attended by students aged 13-17. A two-stage cluster sample design was used to produce data representative of all students in Primero, Segundo, and Tercero basico in Guatemala (Capital City Private). At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate.

The Guatemala (Capital City Private) GSHS measured alcohol use; dietary behaviors; drug use; hygiene; mental health; physical activity; sexual behaviors; and violence and unintentional injury. Students self-reported their responses to each question on a computer scanable answer sheet.

The school response rate was 97%, the student response rate was 87%, and the overall response rate was 84%. A total of 1,472 students participated in the Guatemala (Capital City Private) GSHS. Prevalence estimates (percentages) and 95% confidence intervals are presented below.
