The 2018 Saint Lucia GSHS was a school-based survey of students in Forms 1-5, Lower 5, Upper 6, which are typically attended by students aged 13-17. A two-stage cluster sample design was used to produce data representative of all students in Forms 1-5, Lower 5, Upper 6 in Saint Lucia. At the first stage, all schools were selected to participate. At the second stage, all classes were selected to participate and all students were eligible to participate.

The Saint Lucia GSHS measured alcohol use; dietary behaviors; drug use; hygiene; mental health; physical activity; protective factors; sexual behaviors; tobacco use; and violence and unintentional injury. Students self-reported their responses to each question on a computer scanable answer sheet.
