Summary

The Global Adult Tobacco Survey (GATS), a component of Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring adult tobacco use and tracking key tobacco control indicators. GATS is a nationally representative household survey of adults 15 years of age or older using a standard core questionnaire, sample design, and data collection and management procedures that were reviewed and approved by international experts. GATS is intended to enhance the capacity of countries to design, implement and evaluate tobacco control interventions.

GATS is designed to produce national and sub-national estimates among adults across countries. The target population includes all non-institutionalized men and women 15 years of age or older who consider the country to be their usual place of residence. All members of the target population are sampled from the household that is their usual place of residence. All GATS countries use country-specific stratified multi-stage cluster sampling designs and an interview consisting of a household screening component and an individual component administered to the selected respondent. Data are collected using electronic handheld devices.

GATS Viet Nam was conducted in 2015 using a multistage stratified cluster sample design. The sample size was 9,514 selected households with 8,996 completed individual interviews. The GATS Viet Nam questionnaire included core questions about background characteristics, tobacco smoking, smokeless tobacco, cessation, secondhand smoke, economics, media, and knowledge, attitudes and perceptions. Questions were adapted in each section, then reviewed and approved by a questionnaire expert review committee. The questionnaire was administered using a software program developed by RTI International for electronic data collection using handheld computers.

Personally-identifying information has been removed from this data file to protect confidentiality. Due to the complex sample design, clustering, stratification and sample weights should be taken into account for data analysis in order to obtain proper point estimates and variances. The stratification, cluster and sample weight variables are gatsstrata, gatscluster and gatsweight, respectively. To access the GATS Viet Nam fact sheet and country report, please visit: www.cdc.gov/tobacco/global/.

Survey Design Variables

CASEID Type = Numeric
Respondent ID

FIID Type = Numeric
Field interviewer ID

GATSSTRATA Type = Numeric
Stratum

GATSCUSTER Type = Numeric
PSU

GATSWEIGHT Type = Numeric
Final individual sampling weight

RESIDENCE Type = Numeric
Residence status(urban/rural)

<u>Value</u>	<u>Label</u>	<u>Frequency</u>	<u>Unweighted Percent</u>	<u>Weighted Percent</u>
1	Urban.....	4,421	49.1	33.8
2	Rural.....	4,575	50.9	66.2
Blank	Missing/Not Applicable.....	0		

AGE Type = Numeric
Final age variable in years

Summary

Minimum	15.01
Maximum	99
Valid Case	8,996
Blank (Missing/Not Applicable).....	0

SELECTEE Type = Numeric
Roster number of the selected person

Household Variables

HH1

Type = Numeric

First of all, please let me know how many people are living in this household?

Summary

Minimum	1
Maximum	50
Valid Case	8,996
Blank (Missing/Not Applicable).....	0

HH2

Type = Numeric

How many of these household members are 15 years old or older (according to the western calendar)?

Summary

Minimum	1
Maximum	10
Valid Case	8,996
Blank (Missing/Not Applicable).....	0

HH4B

Type = Numeric

What is the selected person's age?

Summary

Minimum	15
Maximum	99
Valid Case	8,995
Blank (Missing/Not Applicable).....	1

HH4B01 – HH4B10

Type = Numeric

What is this person's age?

HH4C

Type = Numeric

What is the month of the selected person's date of birth (according to the western calendar)?

<u>Value</u>	<u>Label</u>	<u>Frequency</u>	<u>Unweighted Percent</u>	<u>Weighted Percent</u>
1	01.....	37	10.8	11.2
