## **1. Introduction**

This statistical release presents a selection of key findings from the Governance, Public Safety, and Justice Survey (GPSJS) 2023/24, conducted by Statistics South Africa (Stats SA) from April 2023 to March 2024.

### **1.1 Background**

The GPSJS is a countrywide household-based survey that aims to bridge statistical information gaps in the field of governance statistics by conducting interviews with households and individuals collecting data items needed for planning and monitoring. The GPSJS was conducted for the first time in South Africa in 2018/19 as an updated version of the long-running Victims of Crime Survey (VOCS) to include themes on governance. The re-engineered GPSJS retained many items from the Victims of Crime Survey (VOCS), while new content was added. There is, therefore, a break in series in the estimates of crime from VOCS to GPSJS. However, there is no break in series for questions that remained the same; for example, questions on perceptions of crime. In particular, there is also no break to the five-year crime series arising from the question “In the past 5 years have you or any member of the household experienced any of the following crimes?” because no change was made to this question. Therefore, it is possible to determine whether crime increased or decreased between 2016/17 and 2020/21 using the five-year series, while the twelve-month series will be used to determine whether crime increased or decreased between 2019/20 and 2023/24 data collection periods.

Victims of crime statistics are population estimates of the level of crime in South Africa derived from GPSJS data and previous VOCS data. These estimates complement crime statistics provided by the South African Police Service (SAPS). GPSJS is able to provide estimates of the prevalence and incidence of crime, while SAPS statistics provide the total number of reported cases. Moreover, GPSJS statistics also report on feelings of safety, perceptions of crime, and satisfaction with the police, courts, and correctional services. Such information is indispensable in the monitoring of development goals.

### **1.2 Objectives of the survey**

The GPSJS is a countrywide household-based survey and the objectives of the survey are to provide information on:

- Perceptions about citizen interaction/community cohesion.
- Trust in government/public institutions.
- Government's performance and effectiveness.
- Experience of corruption.
- General individual perceptions.
- Household and individual perceptions and experience of crime.

### **1.3 Survey scope**

The target population of the survey consists of all private households in all nine provinces of South Africa and residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old-age homes, hospitals, prisons, and military barracks, and is therefore, the only representative of non-institutionalised and non-military persons or households in South Africa.

## **1. Target population**

The target population of the survey consists of all private households in all nine provinces of South Africa and residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old-age homes, hospitals, prisons and military barracks. It is only representative of non-institutionalised and non-military persons or households in South Africa.

## 2. Purpose of this document

This document provides information that will allow users to properly use and interpret statistical information, as well as understand the properties of data. To make sure that information is interpretable, this metadata will give descriptions of the underlying concepts, variables and classifications that have been used, and the method of data collection, processing and estimation used in the production of statistics.

## 3. Structure of the document

The GPSJS 2023/24 metadata is presented in numerous files, which include flat files, ASCII, fixed field files, with one line of a given length per record. These formats make the data usable with as many statistical programs as possible, thus making it accessible to a wider range of users.

The files and the corresponding sections of the questionnaire are as follows:

Part 1: Household information (Household file).

- Section 1: Experience of household crime
- Section 2: Police
- Section 3: Courts

Part 2: Individual information (Individual file):

- Section 4: General health and functioning
- Section 5: Individual experience of crime
- Section 6: Individual perceptions on crime

Since this metadata is mainly for the public use of microdata files, information in each file contains the following:

- Nature of records in the file and population covered
- Description of variables
- Questions
- Code list

### Description of variables

The description of variables comprises the following information:

**Descriptive name:** This is a short English description plus the variable name in the original file used by Stats SA to construct the ASCII file.

**Position of the variable:** The position of the data within the record, recorded in the format (@xxx y.). '@xxx' indicates that the data begins at position (i.e. column) xxx and 'y' indicates that it is y digits wide. All data is numeric. All data is right justified.

**Source:** This is the question obtained directly from the questionnaire or, for derived variables, the method of derivation. Derived variables are indicated as such.

**Valid range:** The range of valid values for the variable. For continuous variables, this reflects the upper and lower limits as found in the data.

**Not applicable:** A numeric code for 'not applicable' is provided for each variable.

**Missing value:** A code for 'missing/unspecified' values is given for each variable.

**Notes to user:** Specific observations to be noted by users.

**Linking files:** The data from different files can be linked on the basis of a record identifier. A unique number is the record identifier in the first field/s of each file and is unique to each record. All records with a given unique number belong to the same household.

#### **4. Accessibility of data**

Users can access the questionnaire and publications, explore and download the microdata in various formats, i.e. SAS, SPSS, Stata, etc. from Stats Online at [www.statssa.gov.za](http://www.statssa.gov.za).

#### **5. Survey requirements and design**

The questionnaire design, testing of the questionnaire, sampling techniques, data collection, computer programming, and weighting constituted the research methodology used in this survey, are discussed below.

##### **6.1 Sample design**

The Governance, Public Safety and Justice Survey (GPSJS) 2023/24 uses the **Master Sample** (MS) sampling frame which has been developed as a general-purpose household survey frame that can be used by all other Stats SA household-based surveys having design requirements that are reasonably compatible with GPSJS. The GPSJS 2023/24 collection was drawn from the 2013 Master Sample. This master sample is based on information collected during Census 2011. In preparation for Census 2011, the country was divided into 103 576 enumeration areas (EAs). The Census EAs, together with the auxiliary information for the EAs, were used as the frame units or building blocks for the formation of primary sampling units (PSUs) for the master sample, since they covered the entire country and had other information that is crucial for stratification and creation of PSUs.

There are 3 324 primary sampling units (PSUs) in the master sample with an expected sample of approximately 33 000 dwelling units (DUs). The number of PSUs in the current master sample (3 324) reflect an 8,0% increase in the size of the master sample compared to the previous 2008 Master Sample which had 3 080 PSUs. The larger master sample of PSUs was selected to improve the precision (smaller coefficients of variation, known as CVs) of the GPSJS estimates.

The master sample is designed to be representative at provincial level and within metro/non-metro levels. Within the metros, the sample is further distributed by geographical type. The three geography types are Urban, Tribal and Farms. This implies, for example, that within a metropolitan area, the sample is representative of the different geography types that may exist within that metro. The sample for the GPSJS is based on a stratified two-stage design with probability proportional to size (PPS) sampling of PSUs in the first stage, and sampling of dwelling units (DUs) with systematic sampling in the second stage.

##### **6.2 Data collection**

The GPSJS was conducted for the first time in South Africa in 2018/19. GPSJS is an updated version of the previous long-running Victims of Crime Survey (VOCS) designed to include themes on governance. The rule of law and control of corruption were the only themes or sub-themes covered by VOCS prior to 2018. To achieve a reasonable balance between questionnaire length and depth of questions, a three-year rotation regime was

adopted where the five themes are spread over a three-year period. Once in three years, GPSJS will measure in detail the general experience of household and individual crime in the country.

Stats SA conducted the second annual GPSJS and data collection took place from April 2019 to March 2020 with a moving reference period of 12 months. This is different from the 2011 and 2012 collections, which were done from January to March and had a fixed reference period from January to December of the previous year. The sample has been distributed evenly over the whole collection period in the form of quarterly allocations. This will provide a guarantee against possible seasonal effects in the survey estimates. It will, in future, provide an opportunity for the production of rolling estimates relating to any desired time period. It has been noted that the change of data collection methodology may cause concerns over the survey estimates, particularly upon comparisons of years before and after the change. Victimization questions referred to the twelve calendar months ending with the month before the interview. Statistics South Africa is committed to meeting the highest ethical standards in its data collection processes. In addition to being bound to the Statistics Act (Act No. 6 of 1999), the GPSJS, due to its sensitive nature, required additional measures to ensure that the integrity and well-being of the households are protected.

Stats SA suspended face-to-face data collection for all its surveys on 19 March 2020 as a result of the COVID-19 pandemic and restricted movement. This was to ensure that the field staff and respondents were not exposed to the risk of contracting the coronavirus and to contain its spread.

To facilitate data collection, Stats SA changed the mode of data collection for GPSJS 2020/21 from Computer-assisted Personal Interviews (CAPI) to Computer-assisted Telephone Interviews (CATI). Since Stats SA uses a dwelling unit sample, the GPSJS 2019/20 sample was reused and households that provided operational telephone numbers during the 2019/20 collection period were contacted by Survey Officers (SOs). Many households, however, did not provide useable contact numbers and many contact numbers were found to be invalid while some calls were not answered. Some households also indicated that they were not residing in the dwelling units they were sampled in during 2019/20 anymore. All of these were regarded as non-contacts and were adjusted for during the weighting processes. Dwellings that were out-of-scope in 2019/20 remained so in 2020/21. The details of how the adjustment was done are contained in the Technical notes in that report. Given the change in the survey mode of collection and the fact that the GPSJS 2020/21 estimates are not based on a full sample, comparisons with previous years should be made with caution.

Stats SA went back to face to face data collection for GPSJS 2022/23 using CAPI, this was the fourth circle of the survey and is regarded as the year when all was returning to normal after the pandemic, with full size sample. This report focuses on GPSJS 2023/24 which was conducted similarly to the GPSJS 2022/23.

### **6.3 Questionnaire**

Table 1 below, summarises the details of the questions included in the GPSJS 2023/24 questionnaire. The questions are covered in nine sections, each focusing on a particular aspect. Depending on the need for additional information, the questionnaire is adapted on an annual basis. New sections may be introduced on a

specific topic for which information is needed or additional questions may be added to existing sections. Likewise, questions that are no longer necessary may be removed.

Table 1: The structure of the GPSJS 2023/24 questionnaire

Section	Number of questions 2020/21	Details of each section
<b>Cover page</b>		Household information, response details, field staff information, result codes, etc.
<b>Person information</b>	12	Demographic information (name, sex, age, population group, etc.)
<b>Part 01: Household Information</b>		
<b>Section 1</b>	79	Experience of household crime
<b>Section 2</b>	16	Police
<b>Section 3</b>	8	Court
<b>Part 02: Individual Information</b>		
<b>Section 4</b>	8	General health and functioning
<b>Section 5</b>	71	Individual experience of crime
<b>Section 6</b>	11	Individual perceptions on crime
<b>Survey Officer Questions</b>	5	Survey officer to answer questions
<b>All sections</b>	<b>210</b>	

## 6.4 Response rates at national, provincial and metropolitan area levels

Province / Metropolitan Area	Response Rates
Western Cape	81.72
Non-Metro	92.83
City of Cape Town	76.66
Eastern Cape	95.14
Non-Metro	97.41
Buffalo City	92.59
Nelson Mandela Bay	88.49
Northern Cape	88.80
Free State	93.12
Non-Metro	92.77
Mangaung	93.95
KwaZulu-Natal	89.64
Non-Metro	93.23
eThekweni	83.33
North West	90.82
Gauteng	78.17
Non-Metro	87.14
Ekurhuleni	86.43
City of Johannesburg	72.73
City of Tshwane	72.27
Mpumalanga	92.33
Limpopo	97.28
South Africa	<b>87.32</b>

## 6.5 Editing and imputation

Data editing is concerned with the identification, and if possible, the correction of erroneous or highly suspect survey data. Data was checked for valid range, internal logic and consistency. The focus of the editing process was on clearing up skip violations and ensuring that each variable only contains valid values. Very few limits to valid values were set and data were largely released as they were received from the field. When dealing with internal inconsistencies, logical imputation was used, i.e. information from other questions was compared with the inconsistent information. If other evidence was found to back up either of the two inconsistent viewpoints, the inconsistency was resolved accordingly. If the internal consistency remained, the question subsequent to the filter question was dealt with by either setting it to missing and imputing its value or printing a message of edit failure for further investigation, decision-making and manual editing. Hot-deck imputation was used to impute for missing age.

## 6.6 Construction of Sample Weights

### 6.6.1 Person Level Weights

Population estimates used for the calibration of the trimmed adjusted base weights in constructing the person level sample weights for GPSJS 2023/24 were the end-September population estimate for 2023 based on the 2018 mid-year series. The population estimates were used in benchmarking the survey estimates to two sets of control totals:

- National level totals were defined by the cross-classification of age, race, and gender. Age represents the 16 five-year age groups of 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74 and 75+. Race represents the four groups of black African, coloured, Indian/Asian, and white. Gender represents two groups being male and female. The cross-classification resulted in 128 calibration cells at national level.
- Individual metropolitan and non-metropolitan area level totals were defined within the provinces by age. The country has eight metropolitan areas; 1 in Western Cape, 2 in Eastern Cape, 1 in Free State, 1 in KwaZulu-Natal and 3 in Gauteng. The remainder of the provinces are non-metropolitan areas. Since each province has a non-metropolitan area, the partition resulted into 17 areas (i.e. 9 non-metropolitan and 8 metropolitan areas). Age represents the four age groups of 0-14, 15-34, 35-64, and 65+. The cross-classification of the areas with age resulted in 68 calibration cells.

### 6.6.2 Household Level Weights

Household estimates used for the calibration of the trimmed adjusted base weights in constructing the household level sample weights for GPSJS 2023/24 were the end-September population estimates for 2023 based on the 2018 mid-year series. The household estimates were used in benchmarking the survey estimates to two sets of control totals:

- National level totals were defined by the cross-classification of the 'head of household' age, race, and gender. Age represents the four age groups of 10-34, 35-49, 50-64, and 65+. Race represents the four groups of black African, coloured, Indian/Asian, and white. Gender represents two groups being male and female. The cross-classification resulted in 32 calibration cells at the national level.
- Individual metropolitan and non-metropolitan area level totals were defined within the provinces by age. The country has eight metropolitan areas; 1 in Western Cape, 2 in Eastern Cape, 1 in Free State, 1 in KwaZulu-Natal and 3 in Gauteng. The remainder of the provinces are non-metropolitan areas. Since each province has a non-metropolitan area, the partition resulted into 17 areas (i.e. nine non-metropolitan and eight metropolitan areas). Age represents the four age groups of 10-34, 35-49, 50-64, and 65+. The cross-classification of the areas with age resulted in 68 calibration cells.

### **6.6.3 Individual Level Weights**

The population estimates used for the calibration of the trimmed adjusted base weights in constructing the individual level sample weights for GPSJS 2023/24 was the end-September population estimate for 2023 based on the 2018 mid-year series. The population estimates were used in benchmarking the survey estimates to two sets of control totals:

- National level totals were defined by the cross-classification of the individual age, race, and gender. Age represents the three age groups of 16-34, 35-64, and 65+. Race represents the four groups of black African, coloured, Indian/Asian, and white. Gender represents two groups being male and female. The cross-classification resulted in 24 calibration cells at the national level.
- Individual metropolitan and non-metropolitan area level totals were defined within the provinces by age. The country has eight metropolitan areas: 1 in Western Cape, 2 in Eastern Cape, 1 in Free State, 1 in KwaZulu-Natal and 3 in Gauteng. The remainder of the provinces are non-metropolitan areas. Since each province has a non-metropolitan area, the partition resulted into 17 areas (i.e. nine non-metropolitan and eight metropolitan areas). Age represents the three age groups of 16-34, 35-64, and 65+. The cross-classification of the areas with age resulted in 51 calibration cells.

### **6.7 Sampling and the interpretation of the data**

Caution must be exercised when interpreting results of the GPSJS at low levels of disaggregation. The sample and reporting are based on the provincial boundaries as defined in 2011. These new boundaries resulted in minor changes to the boundaries of some provinces, especially Gauteng, North West, Mpumalanga, Limpopo, Eastern Cape, and Western Cape. In previous reports the sample was based on the provincial boundaries as defined in 2006, and there will therefore be slight comparative differences in terms of provincial boundary definitions.

### **6.8 Measures of precision for selected variables of the GPSJS**

This section provides an overview of the standard error, confidence interval, coefficient of variation (CV), and the design effect (Deff) for a number of selected persons and household variables. Estimates were computed based on a complex multi-stage survey design with stratification, clustering, and unequal weighting. The standard error is the estimated measure of variability in the sampling distribution of a statistic. The design effect for an estimate is the ratio of the actual variance (estimated based on the sample design) to the variance of a simple random sample with the same number of observations (Lohr, 1999; Kish, 1965). Coefficient of variation (CV) is a measure of the relative size of error defined as  $100 \times (\text{standard error} / \text{estimated value})$ .

**Figure 1: Coefficient of variation thresholds**

<u>Alphabetic</u>	<u>CV</u>	<u>Interpretation</u>
A.	0.0% - 0.5%	Reliable enough for most purposes
B.	0.6% - 1.0%	
C.	1.1% - 2.5%	
D.	2.6% - 5.0%	
E.	5.1% - 10.0%	
F.	10.1% - 16.5%	
G.	16.6% - 25.0%	Use With Caution
H.	25.1% - 33.4%	
I.	33.5% +	Data Not Published

## 7. Definitions of terms

**A household** is a group of persons who live together and jointly provide themselves with food and/or other essentials for living, or a single person who lives alone.

Note: Persons basically occupy a common dwelling unit (or part of it) for at least four nights in a week on average during the past four weeks prior to the survey interview, sharing resources as a unit. Other explanatory phrases can be 'eating from the same pot' and 'cook and eat together'.

Persons who occupy the same dwelling unit but do not share food or other essentials, are regarded as separate households. For example, people who share a dwelling unit, but buy food separately, and generally provide for themselves separately, are regarded as separate households within the same dwelling unit. They are generally referred to as multiple households (even though they may be occupying the same dwelling).

Conversely, a household may occupy more than one structure. If persons on a plot, stand or yard eat together, but sleep in separate structures (e.g. a room at the back of the house for single young male members of a family), all these persons should be regarded as one household.

**Multiple households** occur when two or more households live in the same dwelling unit.

Note: If there are two or more households in the selected dwelling unit and they do not share resources, all households are to be interviewed. The whole dwelling unit has been given one chance of selection and all households located there were interviewed using separate questionnaires.

**Household head** is the main decision-maker, or the person who owns or rents the dwelling, or the person who is the main breadwinner.

**An acting household head is any member of the household acting on behalf of the head of the household.**

**Formal dwelling** refers to a structure built according to approved plans, i.e. house on a separate stand, flat or apartment, townhouse, room in backyard, rooms or flatlet elsewhere. Contrasted with informal dwelling and traditional dwelling.

**Informal dwelling** is a makeshift structure not erected according to approved architectural plans, for example shacks or shanties in informal settlements or in backyards

**State media or state-owned media** is media for mass communication which is controlled financially and editorially by the state.

**Social grant** refers to grants paid by government to South African citizens who are in need of assistance. In South-Africa, social grants are administered by the South African Social Security Agency (SASSA).

**Government: The national government of SA is composed of three inter-connected branches:**

- Legislative: Parliament, consisting of the National Assembly and the National Council of Provinces
- Executive: The President, who is both Head of State and Head of Government
- Judicial: The Constitutional Court, Supreme Court of Appeal, and High Court

Table 3: SAPS and GPSJS definitions of crime

SAPS	GPSJS
<p>Murder</p> <p>Murder consists of the unlawful and intentional killing of another human being.</p>	<p>Murder</p> <p>Unlawful and intentional killing of another human being.</p>
<p>Sexual offences</p> <p>Rape, compelled rape, sexual assault, compelled sexual assault, compelled self-sexual assault, incest, bestiality, sexual act with corpse, acts of consensual sexual penetration with certain children (statutory rape), acts of consensual sexual violation with certain children (statutory sexual assault).</p>	<p>Sexual offences</p> <p>Refers to grabbing, touching someone's private parts or sexually assaulting or raping someone. Note: In terms of the Sexual Offences Act No. 32 of 2007 section 5, (1) A person ('A') who unlawfully and intentionally sexually violates a complainant ('B'), without the consent of B, is guilty of the offence of sexual assault. (2) A person ('A') who unlawfully and intentionally inspires the belief in a complainant ('B') that B will be sexually violated is guilty of the offence of sexual assault.</p>
<p>Assault with intent to inflict grievous bodily harm</p> <p>Assault with the intent to cause grievous bodily harm is the unlawful and intentional direct or indirect application</p>	<p>Assault (excludes sexual assault)</p> <p>Direct or indirect application of force to the body of another person which may cause bodily harm, or</p>

<p>of force to the body of another person with the intention of causing grievous bodily harm to that person.</p> <p>Common assault</p> <p>Assault is the unlawful and intentional —</p> <p>(a) direct or indirect application of force to the body of another person, or</p> <p>(b) threat of application of immediate personal violence to another, in circumstances in which the threatened person is prevailed upon to believe that the person who is threatening him/her has the intention and power to carry out his/her threat.</p>	<p>threat of application of immediate personal violence to another, in circumstances in which the threatened person is prevailed upon to believe that the person who is threatening him/her has the intention and power to carry out his/her threat.</p>
<p>Common robbery</p> <p>Robbery is the unlawful and intentional forceful removal and appropriation of movable tangible property belonging to another.</p>	
<p>Robbery with aggravating circumstances</p> <p>Robbery with aggravating circumstances is the unlawful and intentional forceful removal and appropriation in aggravating circumstances of movable tangible property belonging to another.</p>	<p>Robbery (excludes home robbery and car/truck hijackings)</p> <p>Unlawfully obtaining property with use of force or threat of force against a person with intent to permanently or temporarily withhold it from a person.</p>
<p>Hijacking</p> <p>Robbery of a motor vehicle is the unlawful and intentional forceful removal and appropriation of a motor vehicle (excluding a truck) belonging to another.</p>	<p>Hijacking of motor vehicle</p> <p>Unlawful and intentional forceful removal and appropriation of a motor vehicle from the occupant(s).</p>
<p>Truck hijacking</p> <p>Robbery of a truck is the unlawful and intentional forceful removal and appropriation of a truck (excluding a light delivery vehicle) belonging to another.</p>	
<p>Robbery of cash-in-transit</p> <p>Cash-in-transit robbery is the unlawful and intentional forceful removal and appropriation of money or containers for the conveyance of money, belonging to another while such money or containers for the conveyance of money are being transported by a security company on behalf of the owner thereof.</p>	

Table 4: SAPS and GPSJS crime types

SAPS crime category	Type of crime – SAPS	Type of crime – GPSJS
Crime against a person	Murder	Murder
	Attempted murder	
	Sexual offences	Sexual offences
	Assault with intent to inflict grievous bodily harm	
	Common assault	Assault (excludes sexual assault)
	Common robbery	
	Robbery with aggravating circumstances	Robbery (excludes home robbery and car/truck hijackings)
Sexual offences	Rape	
	Sexual assault	
	Attempted sexual offences	
	Contact sexual offences	
Trio crimes	Carjacking	Hijacking of motor vehicle
	Truck hijacking	
	Robbery of cash-in-transit	
	Bank robbery	
	Robbery at residential premises	Home robbery
	Robbery at non-residential premises	
Property-related crime	Burglary at residential premises	Housebreaking
	Theft of motor vehicle & motorcycle	Theft of motor vehicle
	Theft out of or from motor vehicle	Theft out of motor vehicle
	Stock theft	Theft of livestock/poultry and other animals

		Theft of personal property
Other property-related crimes	Arson	Deliberate damage/burning/destruction of dwellings
	Malicious damage of residential premises	
		Theft of bicycle
		Theft of crops
Crime detected as a result of police action	Drug-related crime	
	Driving under the influence of alcohol or drugs	
	Sexual offences detected as a result of police action	
Other crimes	All theft not mentioned elsewhere	Corruption
	Commercial crimes	Consumer fraud
	Illegal possession of firearms or ammunition	

## HOUSEHOLD INFORMATION

**Data file:** HOUSEHOLD

Unique number (uqno) (@1 18.)

Unique Household Identifier

Note: This is the unique household identifier, which can be used to link data from this file with data for the same household from other files. This is an 18-digit number that is made up of the PSU number, dwelling unit number, household number and questionnaire number.

**Valid range:** 160100090000001601–987106920000054701

*Person id (Person\_id)* (@19 20.)

This is a unique twenty-digit identifier for a person within a household. It is made up of the unique household identifier and the person number.

**Valid range:** 16010009000000160101–98710692000005470101

Province (Province\_code) (@39 1.)

South African provinces as of December 2005 released by the Municipal Demarcation Board in January 2006.

### Final code list

- 1 = Western Cape
- 2 = Eastern Cape
- 3 = Northern Cape
- 4 = Free State
- 5 = KwaZulu-Natal
- 6 = Northwest
- 7 = Gauteng
- 8 = Mpumalanga
- 9 = Limpopo

*Metro code (metro\_code)* (@40 2.)

Derived variable: Derived from stratum

Final code list:

- 01 = WC – Non-metro
- 02 = WC – City of Cape Town
- 03 = EC – Non-metro
- 04 = EC – Buffalo City
- 05 = EC – Nelson Mandela Bay
- 06 = NC – Non-metro
- 07 = FS – Non-metro
- 08 = FS – Mangaung
- 09 = KZN – Non-metro
- 10 = KZN – eThekweni
- 11 = NW – Non-metro
- 12 = GP – Non-metro
- 13 = GP – Ekurhuleni
- 14 = GP – City of Johannesburg

15 = GP – City of Tshwane  
16 = MP – Non-metro  
17 = LP – Non-metro

Primary sampling unit number (PSUNO\_Seg)

(@42 11.)

This is a unique number given to the Primary Sampling Unit (PSU) for the purpose of record keeping.

**Valid range:** 16010009000–98710692000

Stratum (stratum)

(@53 5.)

A five-digit number representing stratum formed during the creation of sampling frame, where the first digit is province, second, metro and non-metro, third, geography type with fourth and fifth digits being sequential numbering of strata using socio-economic variables.

**Valid range:** 10101–90401

Geography type code (Geo\_type\_code)

(@58 1.)

This is the classification of enumeration areas according to set criteria profiling land use and human settlement within the area.

**Final code list:**

1 = Urban  
2 = Traditional  
3 = Farms

*Household Head sex (head\_sex)*

(@59 1.)

<b>C</b>	<b>Is ... a male or a female?</b> 1 = Male 2 = Female
----------	---

**Note to users:**

Derived from Question C and if person is head of household.

**Universe:**

Respondents who answered Question F==1.

**Final code list:**

1 = Male  
2 = Female

*Age of household head (head\_age)*

(@60 3.)

<b>D</b>	<b>What is ...'s date of birth and age in completed years?</b> Age in years
----------	--

**Note to users:**

Derived from D and Respondents who answered Question F==1.

**Universe:**

All households in the selected dwellings.

**Final code list:**

**Valid range:** 12–109

*Population group of the household head (head\_population)*

(@63 1.)

<b>E</b>	<b>What population group does ... belong to?</b> 1 = Black African 2 = Coloured 3 = Indian/Asian 4 = White 5 = Other (Specify )
----------	--

**Note to users:**

Derived from Question E and if person is head of household.

**Universe:**

All households in the selected dwellings.

**Final code list:**

- 1 = Black African
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White

*Marital status of the persons in the household (Maritalstatus)*

(@64 1.)

	<b>What is ...'s present marital status?</b> 1 = Married 2 = Living together like husband and wife 3 = Divorced 4 = Separated, but still legally married 5 = Widowed 6 = Single, but have been living together with someone as husband/wife before 7 = Single and have never been married/never lived together as husband/wife before
--	--

**Note to users:**

This question is asked to determine the marital status of persons from the selected dwelling.

**Universe:**

All households in the selected dwellings.

**Final code list:**

- 1 = Married
- 2 = Living together like husband and wife
- 3 = Divorced
- 4 = Separated, but still legally married
- 5 = Widowed
- 6 = Single, but have been living together with someone as husband/wife before
- 7 = Single and have never been married/never lived together as husband/wife before
- 9 = Unspecified

*Educational attainment of the persons in the household (Education)*

(@65 2.)

	<b>What is the highest level of education that ... has successfully completed?</b> <i>Diplomas or certificates must be of six months plus study duration full-time (or equivalent) to be included</i> 98 = No schooling 00 = Grade R/0 01 = Grade 1/Sub A/Class 1 02 = Grade 2/Sub B/Class 2 03 = Grade 3/Standard 1/ABET1/AET 1 04 = Grade 4/Standard 2 05 = Grade 5/Standard 3/AET 2 06 = Grade 6/Standard 4
--	---

07 = Grade 7/Standard 5/AET 3
08 = Grade 8/Standard 6/Form 1

01 = Yes

02 = No

09 = Unspecified

*Household weight (hhld\_cal\_abwgt)*

(@354 12.8)

**Valid range:** 236.18762604 – 4114.470017

## PART 2: INDIVIDUAL INFORMATION

Data file: INDIVIDUAL

*Unique number (Uqno)* (@1 18.)

Unique Household Identifier

Note: This is the unique household identifier, which can be used to link data from this file with data for the same household from other files. This is an 18-digit number that is made up of the PSU number, dwelling unit number, household number and questionnaire number.

Valid range: 160100090000001601–987106920000054701

Person id (Person\_id) (@19 20.)

This is a unique twenty-one-digit identifier for a person within a household. It is made up of the unique household identifier and the person number.

Valid range: 16010009000000160101–98710692000005470101

*Province (Province\_code)* (@39 1.)

South African provinces as at December 2005 released by the Municipal Demarcation Board in January 2006.

### Final code list

- 1 = Western Cape
- 2 = Eastern Cape
- 3 = Northern Cape
- 4 = Free State
- 5 = KwaZulu-Natal
- 6 = North West
- 7 = Gauteng
- 8 = Mpumalanga
- 9 = Limpopo

*Metro code (metro\_code)* (@40 2.)

Derived variable: Derived from stratum

### Final code list:

- 01 = WC – Non-metro
- 02 = WC – City of Cape Town
- 03 = EC – Non-metro
- 04 = EC – Buffalo City
- 05 = EC – Nelson Mandela Bay
- 06 = NC – Non-metro
- 07 = FS – Non-metro
- 08 = FS – Mangaung
- 09 = KZN – Non-metro
- 10 = KZN – eThekwin
- 11 = NW – Non-metro
- 12 = GP – Non-metro
- 13 = GP – Ekurhuleni
- 14 = GP – City of Johannesburg

15 = GP – City of Tshwane  
16 = MP – Non-metro  
17 = LP – Non-metro

*Primary sampling unit number (PSUNO)\_Seg* (@42 11.)

This is a unique number given to the Primary Sampling Unit (PSU) for the purpose of record keeping.

Valid range: 16010009000–98710692000

Stratum (stratum) (@53 5.)

A five-digit number representing stratum formed during the creation of sampling frame, where the first digit is province, second, metro and non-metro, third, geography type with fourth and fifth digits being sequential numbering of strata using socio-economic variables.

**Valid range:**10101-90401

Geography type code (Geo\_type\_code) (@58 1.)

This is the classification of enumeration areas according to set criteria profiling land use and human settlement within the area.

**Final code list:**

1 = Urban  
2 = Traditional  
3 = Farms

Gender of persons in the household (sex) (@59 1.)

	<b>Is ... a male or a female?</b> 1 = Male 2 = Female
--	---

**Note to users:**

This question is asked to each household member, to determine their gender.

**Universe:**

Respondents who answered 'Yes' to Question B.

**Final code list:**

1 = Male  
2 = Female

*Age of the persons in the household (age)* (@60 3.)

<b>D</b>	<b>What is ...'s date of birth and age in completed years?</b> Age in years
----------	--

**Note to users:**

Derived from D and Respondents who answered Question F==1.

**Universe:**

All households in the selected dwellings.

**Final code list:**

Valid range: 16–111

*Population group of the persons in the household (population)*

(@63 1.)

	<b>What population group does ... belong to?</b> 1 = Black African 2 = Coloured 3 = Indian/Asian 4 = White 5 = Other (Specify )
--	--

**Note to users:**

This question is asked to determine the population group of persons from the selected dwelling.

**Universe:**

All households in the selected dwellings.

**Final code list:**

- 1 = Black African
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White

*Relationship to the head of the household (reltohead)*

(@64 1.)

	<b>What is ...'s relationship to the head/acting of the household?</b> 1 = Head/acting head 2 = Husband/wife/partner of person 01 3 = Son/daughter/stepchild/adopted child of person 01 4 = Brother/sister/stepbrother/stepsister of person 01 5 = Father/mother/stepfather/stepmother of person 01 6 = Grandparent/great grandparent of person 01 7 = Grandchild/great grandchild of person 01 8 = Other relative (e.g. in-laws or aunt/uncle) of person 01 9 = Non-related persons
--	---

**Note to users:**

This question is asked to determine the relationship of the household members to the household head.

**Universe:**

All households in the selected dwellings.

**Final code list:**

- 1 = Head/acting head
- 2 = Husband/wife/partner of person 01
- 3 = Son/daughter/stepchild/adopted child of person 01
- 4 = Brother/sister/stepbrother/stepsister of person 01
- 5 = Father/mother/stepfather/stepmother of person 01
- 6 = Grandparent/great grandparent of person 01
- 7 = Grandchild/great grandchild of person 01
- 8 = Other relative (e.g. in-laws or aunt/uncle) of person 01
- 9 = Non-related persons

*Marital status of the persons in the household (Maritalstatus)*

(@65 1.)

	<b>What is ...'s present marital status?</b> 1 = Married 2 = Living together like husband and wife 3 = Divorced 4 = Separated, but still legally married 5 = Widowed 6 = Single, but have been living together with someone as husband/wife before
--	--

7 = Single and have never been married/never lived together as husband/wife before
--

**Note to users:**

This question is asked to determine the marital status of persons from the selected dwelling.

**Universe:**

All households in the selected dwellings.

**Final code list:**

- 1 = Married
- 2 = Living together like husband and wife
- 3 = Divorced
- 4 = Separated, but still legally married
- 5 = Widowed
- 6 = Single, but have been living together with someone as husband/wife before
- 7 = Single and have never been married/never lived together as husband/wife before

*Educational attainment of the persons in the household (Education) (@66 2.)*

	<p><b>What is the highest level of education that ... has successfully completed?</b>  <i>Diplomas or certificates must be of six months plus study duration full-time (or equivalent) to be included</i></p> <ul style="list-style-type: none"> <li>98 = No schooling</li> <li>00 = Grade R/0</li> <li>01 = Grade 1/Sub A/Class 1</li> <li>02 = Grade 2/Sub B/Class 2</li> <li>03 = Grade 3/Standard 1/ABET1/AET 1</li> <li>04 = Grade 4/Standard 2</li> <li>05 = Grade 5/Standard 3/AET 2</li> <li>06 = Grade 6/Standard 4</li> <li>07 = Grade 7/Standard 5/AET 3</li> <li>08 = Grade 8/Standard 6/Form 1</li> <li>09 = Grade 9/Standard 7/Form 2/AET 4</li> <li>10 = Grade 10/Standard 8/Form 3</li> <li>11 = Grade 11/Standard 9/Form 4</li> <li>12 = Grade 12/Standard 10/Form 5/Matric</li> <li>13 = NTC 1/N1</li> <li>14 = NTC 2/N2/NC (V)/Level 3</li> <li>15 = NTC 3/N3/NC (V)/Level 4</li> <li>16 = N4/NTC 4</li> <li>17 = N5/NTC 5</li> <li>18 = N6/NTC 6</li> <li>19 = Certificate with less than Grade 12/Std 10</li> <li>20 = Diploma with less than Grade 12/Std 10</li> <li>21 = Higher/National/Advanced Certificate with Grade 12/Std 10/Occupational Certificate-NQF Level 5</li> <li>22 = Diploma with Grade 12/Std 10/Occupational Certificate-NQF Level 6</li> <li>23 = Higher Diploma/Occupational Certificate (B-Tech Diploma)-NQF Level 7</li> <li>24 = Post Higher Diploma (Masters Diploma and Master's Degree)-NQF Level 9</li> <li>25 = Bachelor's Degree and post/ Occupational Certificate-NQF Level 7</li> <li>26 = Honours Degree/Postgraduate Diploma/Occupational Certificate-NQF Level 8</li> <li>27 = Doctoral Degrees (Doctoral Diploma and PhD)-NQF Level 10</li> <li>28 = Other(specify)</li> <li>29 = Do not know</li> </ul>
--	---
