National Establishment Census
LISGIS

Date: 23, 2008

INTRODUCTION

The Liberia Institute of Statistics and Geo- Information Services, on the 11th of December started the National Establishment census.

OBJECTIVE

To know how many establishments are within the Country, (Liberia).

In view of the foregoing team, I was assigned in the various areas:

S.D. Cooper Road
King Gray/ ELWA
Kende – Jah
Rehab- Borbor
Kpelle Town
GSA Road /Rock Hill
Paynesville/ Joe Bar
Duport Road South
Duport Road North-East
Town Hall Community
A.B. Tolbert Road
RIA High Way
Central Monrovia A

CHALLENGES

- Poor information about the Survey to the local authority.
- Too much call backs

CONSTRAINTS

- Walked to all Establishments

ACHIEVEMENTS

With all of the difficulties encountered by field workers team, I completed six hundred and four NEC Questionnaires (604) within her assigned area.

RECOMMENDATIONS

That LISGIS authority should inform the public earlier about said exercise so as to easily get informations as required by LISGIS staff.

CONCLUSION

We are of the strongest conviction that when these recommendations are adhered to, difficulties by field workers will be minimized thus resulting to the collection of quality and reliable data which clearly defines one of the purposes of LISGIS.
