

REPRODUCTIVE HEALTH SURVEY – Ecuador 1994

The files of the Reproductive Health Survey of Ecuador 1994 are in the following structure of directories and files:

Ecuador 1994			
..\Females			
..\Final_Report	ECUADOR-1994 - ENCUESTA DEMOGRAFICA Y DE SALUD MATERNA E INFANTIL.pdf		Contains the final report in PDF format
..\Questionnaires	Cuestionario_Ecuador 1994_Nombre de variables.pdf		Contains the household and the individual questionnaires in PDF format, and includes variable names for all variables in the questionnaires.
..\SAS	..\Data	ec94f_creadas.sas7bdat	This file is a SAS dataset and contains all questionnaire variables and created variables.
			This files has: 13582 women of reproductive age (WRA 15-49 years) with completed interview. (RESULT=1)
		ec94f_hijos.sas7bdat	SAS dataset that contains one record for each live birth, in the births history.
			This file has: 33761 live births
	..\Formats	formats.sas7bcat	This is the SAS catalog of formats
..\Sasprogs	\File_creation	ec94f_creadas.sas	This SAS syntax file contains the definitions of new variables based on variables in the questionnaire. This file contains the following variables that are needed to weight the data:
			<i>PESOENT - defines the relative weights assigned for each stratum in the sample.</i>
			<i>PESOMEF - weight variable that <u>should be used in all calculations for women with a completed interview</u>, which takes into account the strata weight and the number of women of reproductive age in the household (only one woman 15-49 was selected per household).</i>

PESOHJO - another weight variable to be used for analyses on variables collected for just one randomly selected child under 5 (**Use in questions 440 thru 477 in the questionnaire**). Using this weight gives results that are representative of all children under 5 (it compensates for unequal probabilities of selection).

ec94f_haga_hijo.sas	This is a SAS syntax file that reads from “ec94f_creadas.sas7bdat” and creates the SAS dataset “ec94f_hijos.sas7bdat”, which contains one record for each live birth in the births history.
---------------------	---

setlib.sas	This SAS syntax file defines the directories in which the SAS datasets and format library are located. (users must change the path according to their own structure)
------------	--

..\SPSS	ec94f_creadas.sav	Contains the data for women in SPSS format
	ec94f_hijos.sav	Contains the data for live births in SPSS format
..\STATA	ec94f_creadas.dta	Contains the data for women in STATA format
	ec94f_hijos.dta	Contains the data for live births in STATA format

Ec94_Readme.PDF: Contains the directory structure and file descriptions for Ecuador 1994
