Second Integrated Household Survey, 2004/5

Supplementary Manual to accompany the original Manuals

June 2004

CARRY THIS MANUAL ALL THE TIME YOU ARE WORKING IN THE FIELD

**National Statistical Office
P.O Box 333
Zomba**

Dear all,

Over the past 3 months, we have been sending you updated notes on various areas in the questionnaire. These have been in form of separate sheets of paper. We have realised that it may not have been easy for all to read and or keep all these loose papers in one place.

We have therefore decided to make things easier, by putting together all the notes that we have been sending you in this single handout, called the *IHS-2 Supplementary Manual*.

PLEASE NOTE:

- READ THESE NOTES CAREFULLY AND IMPLEMENT THE CHANGES IN THE QUESTIONNAIRES.
- CARRY THIS MANUAL TOGETHER WITH THE ENUMERATORS MANUAL AT ALL TIMES YOU ARE WORKING IN THE FIELD.
- COULD WE ALSO ASK YOU TO FILL ALL THE FORMS THAT YOU ARE REQUESTED TO FILL eg FORMS A, B, N, O, P, F. etc THESE ARE TO BE SENT TOGETHER WITH THE QUESTIONNAIRES. FAILURE TO DO SO LEADS TO DEDUCTION IN YOUR MARKS FOR THE BONUS PAYMENTS.

Thank you very much and keep up the good work.

**IHS Management Unit,
National Statistical Office
Zomba**

 COMMUNITY QUESTIONNAIRE	 13
 ANNEX 1: IHS-2 FIELD STAFF CODES	 14

GENERAL NOTES ON HOUSEHOLD QUESTIONNAIRE

- DO NOT RUB out wrong answers. Cross out the wrong answer with one line, and write the corrected answer beside it. Crossing out of errors must be done in a clearer and more consistent manner. It is ultimate responsibility of the FS to ensure that each change is unambiguously visible and clear.
- Remember to take 2 questionnaires to every interview, in case the household is larger than 12 members and you need 2 questionnaires for the interview. (Remember in such cases to write '1 of 2' and '2 of 2' on the front of the questionnaires).
- We do not expect to see a lot of DK. It is your responsibility to probe and help the respondent to determine the answer, and only accept DK (don't know) as a last resort.
- If quantity is 0, then unit should be blank. (Examples: I04, P03, S03)
- Enumerators should be very careful completing questionnaires where the household roster flap does not line up with questionnaire rows.
- Please, continue to write comments for anything to specify, or to describe any unusual situation. These comments will help us in Zomba to understand, and make it easier for you because we will not have to send the questionnaire back to ask for explanations.
- Enumerators must try to identify all 20 households within the first few days in the EA. They can write on Form IHS 1A to note which households were identified and any problems (with names or other listing information). They should *not* write any notes on the Listing Form (Form IHS 1). If there are any households that are difficult to identify or possibly refuse to participate, they must report these cases to their Field Supervisor as soon as possible.

SPECIFIC NOTES ON HOUSEHOLD QUESTIONNAIRE

MODULE B: ROSTER:

- **B08. Household members:** No matter what the household head reports, we have our definition of who we consider members of the HH for this survey, and enumerators must use this definition.
 - *Example:* An enumerator interviewed a family with 7 members. The 7th was a girl of 12 who had lost both her parents and who lived with the household because she had nowhere else to go. She was not related to the family. The head of the HH did not consider her a member of the HH and did not give any information on her. The enumerator had to return to get information on this girl, telling the HH head that he understood that he did not consider her a part of the household, but because she was living with his family we needed to ask her some questions for the survey.
- **B08.** After determining who are the household members, the Enumerator should take a few minutes to complete the Flap *before* proceeding to B09. Kindly ask the respondent to excuse them while they fill in the Flap.
- **B12 and B20.** If the respondent was born in another district (codes 3-6, B12) or moved from another district (codes 3-7, B20) please write the code of the town or district or foreign country. We will code these in the office in Zomba.
 - *Note:* This will not apply for questionnaires already completed in Month 1. If you have not noted the town/district/country in Month 1, do not worry. But you must start as of now. We are interested to track migration, so we need this information.
- **B17.** Do not consider that someone has moved away and then returned if the person was away from the household for several months.
 - B17. Suppose someone was away from the village for several months. For example, a woman went away for 6 months when she had her baby.
 - B17: 1 (Yes) if the woman has always lived in the village with the exception of those 6 months.
B18-B20: Skip
- **B21.** Take care when identifying the main activity for during the last 7 days. The information provided here should be consistent with the information that will be provided in Module E, Time Use & Labour, Questions E08 to E12.
 - If the person's main activity in the last 7 days was "ganyu", code that person as 12 Other and comment.
 - If the person has a business that is run out of their house, code that person as 3 Family Enterprise Worker. Also make sure that Module V, Household Enterprise is completed.

- **B23 Polygamy:** If a woman is married to a man who has more than one wife, you must give both the man and the woman a code of “2” polygamous.
- **B29.** This question refers to *any children* under 15 of anyone in the household. It is not only about polygamous household heads.
- Please note that any children under 15 living elsewhere of any adult in the household must be counted. This includes children living with grandparents, or other relatives, or the children from former marriages of any HH member.

Additional Codes: Module B

The following are an update of coding decisions –that replaces the March 31 note.

Re: extra codes for IHS-2 HH questionnaire. If there is recoding, then the DE need not enter “other” text.

- **B04.** Take note that code 16 (other) should be able to be fitted into one of the codes 1-15.
- **B11.** An addition code 6 has been introduced for respondents who are too young or too old to be interviewed. And code 7 has also been introduced for those who are sick and cannot be interviewed.
- **B12 and B20** If responded was born or moved from ‘village in other district’ code 3 to be recoded to 4 digits to reflect district of origin. Every district has to be preceded by 3 i.e. Mzimba will be recoded 3105. Use district numbers provided in the manual.

If the respondent was born or moved from ‘town or urban center in the other district’ code 6 has to recode for the districts. Use the following city codes:

Mzuzu	6401
Lilongwe	6402
Zomba	6403
Blantyre	6404

All other districts will be preceded by 6 i.e Mzimba will be 6105.

If the respondent was born or moved from outside the country code 7 to recode to reflect the country or counties using the same codes as used by the trade statistics.

701- SADC region, eg Botswana, Lesotho, Mauritius, Namibia, et
702- Tanzania
703- Zambia
704- Mozambique
705- Zimbabwe
707- South Africa
708- European Union
710- Far East
711- North America e g, USA,Canada,Mexico
712- United kingdom

- **B19.** If the respondent relocated to the present place due to war/refugee use code 14; if due to death of spouse use code 15; due parents death use 16 as a code.
- **B22.** If the respondent says he belongs to last church you should include code 11.

MODULE D- HEALTH:

- **D02:** If the respondent is absent, always probe for a eligible proxy respondent. If someone in the household can answer on behalf of the absent respondent, complete Module D (D02=2). *Only* if respondent is absent and there is *no one* in the household who can answer on their behalf, enter code 3 and comment on the bottom explaining the reason.
- **D05.** Many respondents are giving “cough” as the illness or injury. This should be coded as “lower respiratory”, code 5. For anything else not listed, please put “other” and write the illness.
- **D06.** When a proxy respondent is responding for someone else who has suffered an illness or accident during the last 2 weeks, then the response for “Who diagnosed the illness?” is **not** 6 Self. The proxy respondent will identify who made the diagnosis. For example, if the mother is responding for her young child, the child did not diagnose him or herself, but rather, the mother diagnosed the child as being ill. Then the correct response is (5 - HH member). Think in terms of who the information is about, not in terms of who is responding,.
- **D09.** If the respondent is a child, normal daily activities means playing, running around the village, whatever the child usually does, and if that activity is changed by illness then the answer in D09 should be yes.

- **D12:** this question is only be for amounts spent as a result of a prescription by a doctor or medical person. Panadol and the like should be recorded under D14. Also remember that transportation expenses to visit a medical practitioner, clinic, hospital etc. should *not* be recorded as a cost in Health, but will be recorded (IF the expense is in the last week) in Module J: Non-food Expenditures.

Additional Codes: Module D

- **D05** If the respondent says pneumonia and cough had been a problem during the last 2 weeks. This should be recoded as 7 (lower respiratory).
- **D37** Code 5 has been introduced to take care of those mothers who say they had to seek Traditional Birth Attendant clinic to deliver.
- **D38** For those who provided some help during child birth a new code 8 has been introduced to cover for other medical personnel such as Health Surveyor's Assistant (HSA) and other.

MODULE E: TIME USE & LABOUR

- E 9, E 10.** Cross check with V01. If reported having spent time in non-farm household business in last 7 days, make sure that activity is recorded in Module V.
- E 11.** Cross check with E29. If reported having spent time in ganyu in last 7 days, make sure that ganyu activity is reported in questions E29-E31.
- E 12,** Cross check with E18. If reported having done wage work in past 7 days, make sure that job is reported in E18.
- E 15** The main reason for not having been able to work has addition codes; 6 if the respondent devoted ones time to care for a sick family member. However, the code 7 is for those whose who did not do any economic activity as they had to attend a funeral.
- E19, 20** FS to pay more attention to occupation and industry coding (ZS also to check all entries, at least for the next month).
- E21** The question refers the employer of the respondents' main occupation in the last 12 months. New codes have been introduced; code 7 for those who have been engaged with the church or religious organization. For NGO/ charitable organization a code 8 has to be in use.
- E 31,** Question refers to AVERAGE DAILY WAGE, and NOT to total MK earned. We observed many cases in which enumerators report total amount earned instead of the average daily wage e.g. in E30 they report having done 30 days of ganyu and in E31 it is reported a value of MK 1500. This is wrong, as MK 50 (the average wage received in the 30 days) should be recoded in E31. FS should check amounts.

MODULE F- SECURITY AND SAFETY:

- Questions F03-F14 should be asked directly of the respondent. If the respondent is not available (absent), leave the questions blank and comment “RESPONDENT ABSENT” at bottom. Do not collect these questions by a proxy respondent.
- **F18, F20, and F21** You must remember the answers in F18 (livestock stolen), F20 (crops stolen), and in F21 (petty theft). If the answer to any of these questions is yes, then the amount of losses must be recorded in **Module L** (Non-food expenditures in last 12 months): Line 411- Losses to theft (value of items or cash lost).
- **F 18, 19** Cross check with U10. i.e If the respondent says in F18 the HH had livestock stolen, then you must record this theft in **Module U**, in U10. In many cases it was observed that respondent reported in F18 having been victims of theft of animals but no loss was reported in U10. Please use F18 to probe correct answer in U10.
 - In Module U, you must be sure to ask for the reference period of 12 months, especially if the household had livestock losses. The household may have no livestock now, because it has all been stolen, but they may have owned livestock in the last 12 months, and you will know from Mod F, F18 if they had livestock losses in the last 12 months.
 - Theft, especially livestock theft in the rural areas, is a large problem, and it’s important the amount of the losses is properly recorded.

F20: Cross check consistency with production and sales data. It would be useful to write note on page 17 specifying crop stolen.

MODULE G: HOUSING

- G 2, 3** Probe better answer. If respondent doesn't know, write DK (allow DK in DE). although we discourage the use of DK, we understand the difficulty for the respondent to properly quantify the dwelling and rental values, especially in rural areas. However, try to probe the respondent to be as realistic as he can. If after probing he still doesn't know, then record DK.

MODULE H. CONSUMPTION PAST 3 DAYS

- H 3** Cross check information in this module with consumption from own production and gifts in Mod. I, e.g. if reported consumption of item in Mod H, the amount consumed from own-production (and gifts) relative to the same item in Mod. I must be greater or equal to the amount reported in Mod. H.

Item code 16:

- “Poultry” includes bird meat. It DOES NOT include eggs.

MODULE I: FOOD CONSUMPTION

Consumption in general: How to ask these modules.

The best way to ask on consumption items is to go by sub-headings and use your general experience of the food item/non food items that can be generally found in that area especially if it is rural areas. Also consider the economic status of the household you are interviewing. You can proceed as follows

- a. Cereals, grains cereal products; For these you may wish to ask about all of them (Kodi Mulungu wapitawu mwadyapo zakudya monga izi? Ufa wa mgaiwa, ufa wa ??? -----, Mpunga, zotelozo etc then you need only ask for extras eg biscuits. In the rural areas its very unlikely for hhs to consume spaghetti, wheat flour etc. Just confirm with them.
 - b. Roots and tubers; You say nanga zakudya zokumba monga chinangwa/Vikhawo/mayawo, Kachewere/Mbatata, Nthochi zophika etc
 - c. Pulses ; Nyemba etc.
- Line 602. The unit of “mkoko” is acceptable for bananas. Put the unit as “20” other, and write “Small, medium or large mkoko”.
 - Line 803. Cooking Oil. If cooking oil is bought in a plastic sachet or tube, record the unit as 20 and specify “large tube” or “small tube”. A small tube is approximately the size of a standard Freezes. The large tube is maybe 1.5 times larger than a small tube. Do not record the unit as 9 (piece).
 - Lines 901 and 902. Beverages: Tea and coffee. The amount of tea and coffee consumed at home should be by grams (preferable) or teaspoons. This is the amount of tea leaves or coffee used in the past 7 days. You can ask to see the package. You should not report by cups, even though this is listed under beverages. If tea is consumed in a teashop, it should be recorded on Line 829 Meals eaten at a restaurant and should there be recorded by cups (because it is bought by cups).
 - **I 3, 4** Code 20 must be coded by FS. Ensure that all enumerators and FS have the conversion tables e.g. for small spoon, spoon, small tube, large tube, etc. Also, explanation/description of Unit should be written outside of table (and not erased), ensuring that reference to specific cell is clear (e.g. use an asterisk, an arrow, specify item in note).
 - **Nkhwani** – we realize that although nkhwane will be listed by many respondents as a crop in O8, it is very difficult for a respondent to estimate how much was harvested. Please advise the enumerators that nkhwane harvest must be recorded in Module P, line 27 (other) for rainfed crops, or Module S, line 22 for dimba if the respondent sells nkhwane or dries it and stores it, but not otherwise.
 - **Green peas (nsawawa)** – please be sure to record green peas (nsawawa) in Module I (Consumption last 7 days) on Line 309 (other).

- **THERERE/OKRA:** In Module S, dimba crops, line 23 for THERERE/OKRA should include all such vegetables, eg. Denje, chewe, lobala (the one with seeds). Specify the type so that we can estimate the size.

Additional Unit Codes: MODULES H,I,P,S

Modules H,I,P,S	For Unit codes in 20(Other-specify)	Please comment on unit used eg Large, Medium, Small <i>Mkoko</i> for bananas. For a bunch of 5,10,15 bananas better put code 9 <i>number of pieces</i> (that is how they are sold anyway) eg A bunch of 10 bananas; can be recorded as Quantity=10,Unit code=9 Sachets of Cooking oil (<i>Omanga</i>).eg 2 sachets can be recorded as, Quantity=2,Unit=20(<i>Sachet/Omanga</i>), <i>large medium, small</i>
--------------------	--	---

(MODULE K&L) NON-FOOD EXPENDITURES

Durable Goods: If you are in the middle of the rural areas electrical items like TVs, refrigerators Air conditions, Washing machines are unlikely to be found unless you observe the household is capable of having such items.

Probe better answer. Avoid going through list in a mechanical manner. The respondents gets bored , they may become offended and postpone the interview.

We observed an unusually large number of questionnaires with zero non-food expenditures. Although many of the households are very poor and having no non-food expenditure is a real possibility, it is unlikely that they have spent absolutely nothing in the past 3-12 months other than food.

Item code 411: Non-foods expenditures in last 12 months, item code 411, “losses to theft (value of items or cash lost)”.

- Include the total value of items or cash lost to theft. This includes the estimate value of any stolen goods (including livestock and crops).

MODULE M. DURABLE GOODS:

- **M03** – this is the number of items the household owns. For instance, if the household owns 4 chairs, we would put ‘4’ in M03 on the line for chairs.
- **M04** If item is old, it is likely for the respondent not to remember exact age. It is important that you approximate age. For example, putting 40 or 50 years will not matter much in terms of the estimation but it is important that you put something. Use date benchmarks provided in manual to approximate age of item. For newer item, it is important to put correct age.
- **M07.** If the item was broken and no longer works, code as 55. Thus, the code 55 is for items which were lost, stolen, given away or broken/damaged in the last 5 years.

MODULE O- AGRICULTURE:

Tobacco

Ensure that all tobacco plots, whether burley or other kinds, are reported in module O.

- Information on tobacco farming (including harvest, sales, etc) should be recorded in both Module P and Q.
- **O14.** This question refers to *type* of fertilizer applied and not when the application occurred on the plot. If only one type of fertilizer was applied to the plot, this should be recorded as “FIRST FERTILIZER”, and the “SECOND FERTILIZER” should be blank. This is true even if the fertilizer was applied at the end of the season.
 - It does not matter how many times or when one type of fertilizer was applied. Only the total amount should be recorded for any one type of fertilizer.

MODULE P: RAIN FED CROP SALES:

- **P01.** The enumerator *must re-ask all* crops listed which were not reported in O08. This is a way to double-check the list of crops farmed is complete.
- **P08.** “What portion of your sales of this crop were to the first buyer”. This question refers to *sales*; it does *not* refer to harvest. If the respondent has indicated only one buyer, then 100% of his sales were to this buyer, and the answer in P08 should be “4” (more than 75%).
-
- **P01, P05, P09, P10, P11.** In some instances the crop harvested (P01) will not equal the sum of amount sold (P05) +the amount to labourers (P09) + consumed(P10) + still being stored (P11). An example where the sum will not be correct is if the respondent has used the onions harvested to replant for a second planting. Another example is if the crop is eaten by pests after harvest.
If you find an example of the crop harvested not all being accounted for, please write a comment about the reasons.
- Report other (NON-burley) tobacco (e.g. flue-cured, fire-cured) production and sale in one of last two rows marked as "OTHER" (crop code 27 or 28) in Module P. Do not forget to specify type of crop e.g. fire-cured tobacco. Note that BURLEY tobacco production and sales will be reported in Module Q so there is no need to report Burley tobacco in Module P. Also, cross check information entered in OTHER in module P with Q12-Q13 in Module Q. If Q12=1 and no other kind of tobacco had been recorded in module P, go back to Module P and fill in information on other tobacco in one of the last two rows (OTHER).

Cassava

- Cassava may remain a long time in the field, so it may not be harvested now even if planted in 2002/03. It is possible that the harvest could be 0.

Crop harvesting

- For some crops which are harvested over a longer duration (such as cassava and sugar cane), be sure to probe and account for all the crop which as harvested over a few months.

Agriculture Quantity Units

- For harvests, quantity units should be reported in the “fresh” state of the crop as it was when harvested. For sales, quantity units should be reported in the state of the crop when sold. If the crop is processed before selling, then the quantity units should be in that processed form.
 - For example, maize maybe harvested in terms of ox-carts of cobs and it may be sold in kgs of grain.
- If the quantity unit of harvest or sale is strange (not typical), there should be a written comment by the enumerator.

MODULE Q – TOBACCO:

- The respondent may know only the variety of tobacco he grows but not which category it is in the questionnaire.
 - **Q11-** did you grow burley tobacco? Burley is mostly grown by smallholders. It can be the following varieties:
 - Burley**
 - BA 1
 - KBM-33
 - KBM-20
 - B82, -B1054

Note: For burley, farmers usually use seeds recycled from the previous year.

- For **Q13**, other kinds of tobacco, here is the list of varieties:
 - 1.Flue-cured (mostly grown by commercial growers)**
 - RK 23
 - KE-1
 - ABL-13-ABL29
 - FLS Series
 - 2 Fire-cured, chikopa (Western Tobacco)**
 - SDDF- Southern division Dark fired Tobacco, mostly grown by smallholders in south.
 - Malawi Western (MW) 86-57
 - LAI 8,10, 28 (Limited release).
 - 3.Oriental Tobacco**
 - Grown by very few farmers in the North.
 - ELSOMA
 - SINDIGI

4. NDDF –Northern Division Dark Fired Tobacco, mostly grown by smallholders in Northern and central regions. (This is actually a fire-cured tobacco, but is classed separately in the questionnaire)

5. Other – specify as other and write the name of any variety not mentioned above.

MODULE S – DRY SEASON/DIMBA CROPS

When probing, if applicable use information recorded in consumption from own-production in MOD. I e.g. if reported consuming specific crop out of own-production, cross check information with crop production data, particularly Dimba crops. Please note that this is only a guideline. You may have cases in which you have something recorded in MOD. I but crops grown refers to last completed cropping season.

MODULE V – HOUSEHOLD ENTERPRISES

V01 Cross check with E9 and E10 and probe. This is very important, as respondents tend to under-report small hh non-farm businesses, particularly this late in questionnaire when respondent's fatigue is at its peak.

MODULE Y – SAFETY NETS

ALL Y: Cross check that if received Starter Pack in last completed agricultural season, it should be reported in O13 and/or R14. Note that O13 and R14 refer to all APPLIED fertilizer. If respondent reports that TIP was either sold, lost or not applied, please take note on page 47. If they received the Starter Pack and did not apply, we want to know the reason.

MODULE Z: CREDIT:

- **Z01.** If the answer to Z01 is no, you must go to Z12 and ask the household head questions Z12, Z13 and Z14.
- **Z04.** Please write the name in detail of the source, ie NASFAM, Farmer's World, Limberleaf, etc.
- **Z11.** If there is a loan, you must record an amount in Z11. The amount to be repaid in Z11 will be at least the amount of the loan in Z07, and will be more if there is interest charged.

MODULE. AA -SUBJECTIVE ASSESSMENT:

THIS MODULE NEEDS TO EXPLAINED, AND PROBED CAREFULLY

MODULE AB. SHOCKS TO HH WELFARE:

AB04. If the household reports “none”, be sure to probe. “None” is accepted if the death of household member did not have effect on both assets and income. This is mostly the case where a family member was not directly a household member. Write “NONE” as the answer

MODULE AC. DEATHS IN THE HH:

In this module respondents must report only deaths of former HOUSEHOLD MEMBERS. Also, cross check information in this module with information in Mod. AB relative to death of household and family members e.g. complete Mod. AC if in Mod. AB reported a death of a household member within the previous 2 years.

- Include any deaths of babies born alive, *even if the infant survived for less than 1 hour.*
 - If the infant was not yet named, record “Baby ...”. For example, record “Baby Banda”, if the family name is Banda. It’s important not to miss this information on infant mortality.

AC09. If the household reports that a family member died because of witchcraft, you should record this and you do not need to probe for the actual illness.

MODULE AD- ANTHROPOMETRY:

- If any child is re-measured because the measurement seemed too small/large, add a note in Module AD to indicate that the child was re-measured.
- Date. Date the anthropometric measurement was taken should be indicated on the left margin of AD01 in the format DD-MM-YYYY as shown below.

INDIVIDUALS.

COMMUNITY QUESTIONNAIRE

- **Module CF: Agriculture and CG: Changes.** There was an inconsistency in how we rated the categories from one module to the next that leads to confusion. In the Agriculture Module, CF21 and CF22, the categories go from 1 (much better) to 5 (much worse). In the Changes module, CG1 –CG40, the categories go from 1 (much worse) to 5 (much better). In other words the numbers for the categories are reversed in the two modules. This could lead to confusion, so we wish to point this out as an area where you should be very very careful to look at the categories for the questions you are asking. **PLEASE, BE SURE TO LOOK AT THE CATEGORIES EACH TIME AND WRITE IN THE CORRECT CODE!!**
- **Module CH: Prices.** The questions says: “Is [ITEM] available for sale in your community or nearby at the present time?” The term “nearby” should be taken to mean generally accessible to most of the people in the community at least once per week, i.e. from a weekly market. So the item does not have to be available daily in the community, but accessible at least once per week.

ANNEX 1: IHS-2 FIELD STAFF CODES

IHS-2 FIELD SUPERVISORS CODES				
CODE	SURNAME	FIRST NAMES	SEX	DISTRICT
101	Mwakaswaya	Sydney	M	Rumphi
