The elasticities are calculated at the population weighted sample. Standard errors calculated with the delta method and NON-significant elasticities are highlighted in green.

Textil expenditures includes leather expenses.

Personal services expenditures includes transportof public administration and cultural services.

(charges related to a private car, a private motor bike and/ or a private bicycle other than the cost of services), expenses related to the use

Beverage includes consumption of qat

Non-metal expenditure include expenses on furniture, paper and wood.
