Verbal Consent

My name is _____. I work with the Ministry of Education in Liberia.

- We are trying to understand how children learn to read. Your school was selected through the process of statistical sampling. We would like your help in this. But you do not have to take part if you do not want to.
- Your name will not be mentioned anywhere in reports based on this survey. The survey data and the results will be published in the form of collective tables. The information acquired through this instrument will be shared with the Ministry of Education in the hopes of identifying areas where additional support may be needed. Your name may be used to track the training provided to you and whether the training is helping you.
- The name of your school will be recorded so that we can correctly link school, principal, teacher, and student data. Your school's name may be used to track your training and the help given to your school. The information acquired through this instrument will be shared with the Ministry of Education in the hopes of identifying areas where additional support may be needed.
- If you agree, I would ask you some questions regarding your normal activities at school, including your interactions with school staff, Ministry office staff, students, and parents.
- Then, with your assistance, I would randomly select 10 students in Grade 2 and 10 students in Grade 3 to assess their reading skills. I would also ask these students about some of their normal school activities, school assets, language use, and reading practices at home, as well as home asset ownership. Selected students need only participate if they wish. I will spend 15-20 minutes interviewing each child. My interview with you will take 15 minutes.
- Are you willing to participate? Once again, you do not have to participate if you do not wish to. Once we begin, if you would rather not answer a question, that's all right.

Can we get started?
