ORGANISATION OF DATA FOR SCHEDULES 2.345 OF 57TH ROUND IN THE
WORKFILES FOR TABULATION PURPOSE

**Schedule 2.345**

Data contained in different blocks of schedule 2.345 for each enterprise (SSU) are
organized in two separate work files as described below :

| Sl no. | Sector | Workfile name | New Work file Name given | Number of records | Record length (with new line) |
|---|---|---|---|---|---|
| 1 | Rural & urban together | Whcc2.01.final | Ehcc2.01r.final.dat | 138145 | 299 |
| 2 | | | Whcc2.01u.final.dat | 223631 | 299 |
| 3 | Rural & urban together | Whcc2.02.final | Whcc2.02r.final.dat | 138145 | 631 |
| 4 | | | Whcc2.02u.final.dat | 223631 | 631 |

These work files ( whcc2.01.final & whcc2.02.final ) are enterprise level files, which
means there will be only one record for each enterprise. Enterprise level different
characteristics are available in these work files along with identification particulars.

**General**
　　Each record contains sub-sample code both in byte positions 11 & 23. For sub-sample
　　wise tabulation, code given in position 23 is to be used. For getting count of sample
　　number of enterprises for any parameter take count of only those records where sub-
　　sample codes available in two places match.

**Use of Multipliers**
　For generating sub-sample wise estimates
　　　　　　Actual multiplier　　= reported multiplier / 100.

For generating sub-sample combined estimates
　　　　　　Actual multiplier　　=　reported multiplier / 100　　　　if NSC = NSS
　　　　　　　　　　　　　　　　　　　reported multiplier / 200　　　　if NSC > NSS
　　where NSS and NSC are sub-sample wise and combined Ns counts respectively.
