E135	WHO SHOULD DECIDE: INTERNATIONAL PEACEKEEPING
-------------	--

Question text:

Some people believe that certain kinds of problems could be better handled by the United Nations than by the various national governments. Others think that these problems should be left entirely to the respective national governments; while others think they would be handled best by the national governments working together with co-ordination by the United Nations. I'm going to mention some problems. For each one, would you tell me whether you think that policies in this area should be decided by the national governments, by the United Nations, or by the national governments with UN co-ordination?

E136**WHO SHOULD DECIDE: PROTECTION OF THE ENVIRONMENT****Question text:**

Some people believe that certain kinds of problems could be better handled by the United Nations than by the various national governments. Others think that these problems should be left entirely to the respective national governments; while others think they would be handled best by the national governments working together with co-ordination by the United Nations. I'm going to mention some problems. For each one, would you tell me whether you think that policies in this area should be decided by the national governments, by the United Nations, or by the national governments with UN co-ordination?

G014**OPINION EUROPEAN UNION****Question text:**

There is much talk about what the individual member states of the European Community Union have in common and what makes each one distinct. (Interviewer presents illustration with responses and scale from 1 to 7)

A. Some people say: If the European member states were truly to be united, this would mean the end of their national, historical and cultural identities. Their national economic interests would also be sacrificed.

B. Others say: Only a truly united Europe can protect its states' national, historical and cultural identities and their national economic interests from the challenges of the superpowers.

Which opinion is closest to your own opinion, the first one or the second one? Please use the scale listed. 1 would mean that you agree completely with A and 7 would mean that you agree completely with B. The numbers in between allow you to show which of the opinions you tend to agree with, whether you tend to agree more with the one or with the other.

S017**WEIGHT****Question text:**

Weight by gender and age

The variable "weight" was computed by the EVS for all national datasets on the basis of information and population statistics provided by the EVS countries. The weight is constructed on the basis of gender and age categories (-24; 25-34; ... ; 65-74; 75 and over). Value '0' implies that year of birth information was missing in the data.

The weight adjusts the socio-structural characteristic in the samples to the distribution of gender and age of the universe–population. The current weight variable should be used with caution. Especially when the weights are “big”, say outside the 0.50-2.00 range.

S017A**WEIGHT [WITH SPLIT UPS]****Question text:**

Weight for country-specific characteristics

Additional country-specific weight variable that includes a special weight factor for the regions of Germany (East and West) and of Belgium (Brussels capital region, Flanders and Walloon region). This

design weight corrects for the disproportional sample size of these regions in both countries. The reported population sizes refer to adult inhabitants, i.e. people of age 18 and older. For the computation

of the weighting factors two calculation steps are necessary:

(I) $(\text{inh. Region1} / \text{inh. country}) * \text{total sample size} = \text{proportional share of interviews from Region1}$

(II) $\text{proportional share of interviews} / \text{realized share of interviews} = \text{weighing factor}$

Germany:

- West-Germany (81.54 % inhabitants West-Germany, total sample size is 2075):

$(55451318/68002101)*2075=1692$.

Weighting factor for West-Germany (1071 interviews from West-Germany): $1692/1071=1.579$.

- East-Germany (18.46 % inhabitants East-Germany, total sample size is 2075):

$(12550783/68002101)*2075=383$.

Weighting factor for East-Germany (1004 interviews from East-Germany): $383/1004=0.381$.

Belgium:

- Brussels - capital region (9.59 % inhabitants Brussels, total sample size is 1509):

$(818462/8534862)*1509=144$.

Weighting factor for Brussels (127 interviews from Brussels): $144/127 = 1.13385$.

- Flanders (57.97 % inhabitants Flanders, total sample size is 1509):

$(4947997/ 8534862)*1509 = 874$.

Weighting factor for Flanders (791 interviews from Flanders): $874/791 = 1.1049$.

- Walloon region (32.24 % inhabitants Walloon region, total sample size is 1509):

$(2768402/8534862)*1509 = 489$.

Weighting factor for Walloon region (591 interviews from Walloon region): $489/591 = 0.82741$.

A combination (i.e multiplication) of the design weight "weight_c" and the general weight "weight" corrects for any over-/under-sampling related to sex, age and regions.

X047D MONTHLY HOUSEHOLD INCOME (X1000), CORRECTED FOR PPP IN EUROS**Question text:**

For each country, the national currency is converted into Euros and corrected for purchasing power parity (PPP). PPP is derived from the IMF World Economic Outlook Database (October 2008 Edition). For Montenegro the World Bank statistics 2009 were used and for Kosovo the CIA World Factbook 2009. The year(s) in which the data were collected, form(s) the basis for the calculation of the PPP rates. For non-euro countries, the mean exchange rate was calculated over the survey period. Exchange rates came from the European Central Bank for Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Hungary, Iceland, Latvia, Lithuania, Republic of Macedonia, Republic of Moldova, Norway, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, Sweden, Switzerland, Turkey, Ukraine, and the United Kingdom. For the other countries, the exchange rates were taken from OANDA - Forex Trading and Exchange Rates Services (we used the 'bid' interbank exchange rate).

To construct a linear income variable, the mid-points of the country specific categories were taken; for the first category, the mid-point is its upper bound minus half the range of the second category, e.g., if (1) <500 Euro and (2) 500-800 Euro, then the mid-point of the first category is: $500 - (800 - 500) / 2 = 350$ Euro.

To compute the mid-point of the last category, an equal range for the last and the penultimate category was assumed, e.g., if (one but last category) 7.500-10.000 Euro and (last category) >10.000 Euro, then the mid-point of the last category is: $10.000 + (2.500 / 2) = 11.250$ Euro.
