

## The HBS 2002

The first Household Budget Survey (HBS) was implemented by SOK during the period June 2002- May 2003 .The sample of HBS 2002 consists of 2400 households, 960 in rural areas and 1440 in urban ones, selected from 300 enumeration areas (8 households are selected from each one). 200 Households were surveyed each month during 12 months. The questionnaire contains information on demographic composition of household including individual information on each member of household as well as household income, expenditure and consumption data, housing conditions, ownership of durable goods, farming and business activities, access to basic infrastructure and public services.

The tables below were produced by Sasun Tsirunyan, Consultant to the World Bank, with assistance from the SOK team working with HBS 2002. Comments on the tables can be sent by email at [stsirunyan@hotmail.com](mailto:stsirunyan@hotmail.com).
