## FOREWORD

The 2006 Population and Housing Census of Nigeria was conducted from March 21<sup>st</sup> – 27<sup>th</sup> 2006. It was designed to collect information on the quantity and quality of the population and housing, under the following broad categories: demographic and social, education, disability, household composition, economic activity, migration, housing and amenities. The primary mission of 2006 Census was to provide vital information for policy-making, evidence-based planning and good governance. Our intention was to make available to government at all tiers, researchers, academicians, civil society, international agencies data sets that will serve as guide in formulating policies and infrastructure development and provide benchmarks for monitoring of the MDGs.

In line with the Commission's Tabulation Plan, Census 2006 final results have been released at the Country, State and LGA levels and published in the Official Gazette of the Federal Republic of Nigeria No.2, Vol. 96 of February 2, 2009. The Priority Tables provide detailed characteristics of the population and housing information at the national and state levels. The data dissemination strategy for 2006 Population and Housing Census has been designed to facilitate optimal use of the data collected for national and local planning and assist in monitoring of various targets and policies while at the same time satisfying the data needs of various users.

The Commission has worked as a team to achieve success in the conduct of 2006 Population and Housing Census. I wish to acknowledge the contributions of the key officials that ensured the publication of this Priority Tables Report. Special thanks go to the Federal Commissioners who directed the affairs of the Commission throughout the census up to this date. The technical guidance provided by the Director General and Directors is acknowledged. Finally, the untiring and selfless efforts of the Census Data Analysis Team under the leadership of the UN Chief Technical Adviser are acknowledged.

The National Population Commission will continue with its efforts to disseminate the 2006 Population and Housing Census results as widely as possible. It is my hope that data users will avail themselves of the valuable census data contained in this Priority Tables Report for their various activities. I wish to assure the stakeholders that more useful data on the characteristics of the Nigeria's population will be released in due course.

**Chief Samu'ila Danko Makama, CON**  
Chairman  
National Population Commission,  
Abuja, Nigeria.

26<sup>th</sup> August 2009

## POPULATION AND HOUSING CENSUS PRIORITY TABLES - METADATA

The metadata describes the concepts and explains the variables in the Priority Tables generated from the 2006 Population and Housing Census to facilitate understanding and use by various stakeholders. The metadata have been structured in line with the 'Concepts and Definitions' contained in the Enumerator's Instructions Manual used for the census, to ensure consistency in interpretation and serve as an aid to both the informed and uninformed readers.

### DEMOGRAPHIC AND SOCIAL CHARACTERISTICS

#### AGE

Age data was collected in completed years as at 'last birthday' of the respondent. An infant, a child less than one year old, who is one week, three months, or eleven months, had 0 year recorded for him/her because the child has not yet lived one completed year. A child, who was 2 years and 8 months old, was recorded as 2 years.

For the purpose of the census, it was decided that the ages of all persons who were 95 years and above should be recorded as 95 years i.e. persons who were 96, 97, 99, 100 or over, were recorded as 95 years.

For persons, particularly in the rural areas who did not know their exact age, the best estimate of their age was recorded. This was done with the use of a list of historical events in the area at the time of their births. If a list of historical event was not available or found to be inadequate, the enumerator's good sense of judgment was employed to estimate the respondent's age without fail.

#### TABLES ON AGE

**TABLE DS 1** presents the total population by sex at national and state levels. For the 2006 Census to elicit the response on 'sex' of the respondent the question canvassed was '*What is (name's) sex?*' Two options were given 'Male' and 'Female'.

**TABLE DS 5** presents the distribution of population by five year age groups and sex at the national and state levels.

## MARITAL STATUS

The marital status recorded was the 'current marital status' of the respondent at the time of the census. This question was asked of all respondents age 10 and above. A marriage involves certain obligations between husband and wife. For the purpose of the Census, marriage must have been established by: the marriage ordinance and registered in a marriage registry; customary laws and customs; Christian rites; and tenets of Islam to be recorded as married. The man and wife may be living together at the time of the census or may not and may be with or without children.

Any respondent living together with one or more partners in the same house with or without children is not married without the formalization of the marriage in one of the ways mentioned above. In some cultures, a woman may be married to another woman or to an object of worship, such as a sword, mountain, tree (ritual marriage). Such women usually do not have a man as their husband and were not recorded as married. Five responses were possible and are defined below:

- **NEVER MARRIED:** This refers to males or females who have never married in their lifetime including single parents.
- **MARRIED:** This refers to males and females who have a spouse at the time of the enumeration
- **SEPARATED:** These were respondents separated from their current marriages by judicial, religious or customary laws or by mutual agreement. Legal separation is affected by court decision and it forbids either of the partners to remarry. The partners may not be residing in the same house.
- **DIVORCED:** These were respondents who were earlier married but whose last marriage have been terminated by legal, customary or religious procedures and who have not remarried. Persons who divorced but remarried belong to the category married.
- **WIDOWED:** A respondent is widowed if the last marriage ended by the death of the spouse and one has not yet remarried. A respondent whose last spouse died and who has not yet remarried is widowed. A man with more than one wife, who loses one, is not widowed but a man whose only wife died is widowed until he marries another wife.

## **TABLES ON MARITAL STATUS**

**TABLE DS 7** presents marital status by sex in terms of absolute numbers. The question on Marital status was canvassed for persons 10 years and above '*What is name's present marital status*'. Five response options were given as; Never Married, Married, Separated, Divorced and Widowed.

## **HOUSEHOLD AND TYPES OF HOUSEHOLD**

**REGULAR HOUSEHOLD:** A household consists of a person or a group of persons living together usually under the same roof or in the same building/compound, who share the same source of food and recognize themselves as a social unit with a head of household. There are two major types of households recognized: regular and institutional. The criteria used to categorize regular and institutional households were 'presence of a recognized head of household', 'sharing of catering arrangement' and 'feeling of belonging together as a social unit'.

There were other types of household classification/identification used during the census: Homeless households, Homeless persons, and Nomadic households, Transient persons, Fishing and Hunting population and Census functionaries.

### **REGULAR HOUSEHOLDS:**

It usually recognises one of its members as the head, shares a common catering arrangement and members conduct themselves as a social unit. A one-person household consists of a single, man or woman; a multi-person household consists of two or more members.

### **INSTITUTIONAL HOUSEHOLDS**

Defined as collective household in which members do not have any recognised head.

**HOMELESS HOUSEHOLDS** are identical to regular households except that they do not have a fixed dwelling at the time of enumeration. The reason of being homeless could be destruction of the house by natural disaster, demolition by authorities. Homeless household can comprise of one or more members.

**HOMELESS PERSONS** are single persons who had no home of their own that is, they do not live in any permanent homes but were enumerated while roaming around. They often slept in public places such as, under bridges, footpaths, pavement of markets, shopping centers or motor parks. These consisted mostly of vagabonds, lunatics and persons of no fixed abode.

**NOMADIC HOUSEHOLDS** are households who migrate from one place to place in search of pasture for their animals, such as some Fulani herdsmen. By their characteristics, they do not settle in a place for a long period, usually live in groups with identifiable households, and stay in semi-permanent structure.

**TRANSIENT PERSONS** are individuals who were on their way out of or into a country at the time of enumeration and are not likely to be enumerated with the normal households such as transit passengers at seaports, airports, and international motor parks.

**FISHING AND HUNTING HOUSEHOLDS** are people on fishing or hunting expedition who were not returning to their regular homes at the time of enumeration.

## **TABLES ON HOUSEHOLD**

**TABLE HH1** presents the distribution of population by type of household.

**TABLE HH2** presents the population by size class; that is number of persons in households by particular class and size.

**TABLE HH4** presents the distribution of population by relationship to the head of household. On relationship the question asked was on, '*What is name's relationship to the head of household*'. Nine response options were provided; Head of household, Absentee head of household, Spouse, Child, Parent, Brother/Sister, Other blood relation, Non-blood relation and Institutional.

**TABLE HH5** presents various members of household according to their relationship to head by their five age groups.

## **DISABILITY**

Disability is the inability of the respondent to perform up to normal natural expectation; some specified physical or mental activities up to the normal (natural)

expectation due to certain physiological malformations or weakness that can be congenial or incurred through injury.

Disability includes paralysis of any part of the body, blindness and deafness.

Six types of disability categories were used as follows;

**Seeing:** An impairment of the sense of vision partial or complete (with or without the use of aid) of the respondent.

**Hearing:** Inability of the respondent to hear sound through the eardrum, with or without the aid of any device, physical or electronic.

**Speaking:** Inability of the respondent to speak clearly and intelligibly the normal human sound.

**Mobility:** Inability of the respondent to move normally or use any of the limbs, hands, fingers or legs, like a normal person.

**Mental:** Suffering from any mental disability.

**Other:** Any other type of disability other than any of the above.

## **TABLES ON DISABILITY**

**TABLE DI 1** presents the distribution of population by five year age groups and type of disability. The table shows total number of Disabled persons for each of the disability category:

- **SEEING,**
- **HEARING**
- **SPEAKING**
- **MOBILITY**
- **MENTAL**
- **OTHER (SPECIFY)**
- **NONE.**

## EDUCATIONAL CHARACTERISTICS

**LITERACY** was defined in the 2006 Census as the ability to '*both read and write with understanding in any language*'. A literate person is therefore, one who can read and write with understanding a short and simple statement about h/is daily life in any language (local or foreign). A person has to be age six or more to be considered as literate for the purposes of census.

## SCHOOLING STATUS

In the 2006 Census, only formal schooling was considered. Formal schooling may be obtained either at private or public institutions and may be at any level of education such as primary, secondary, polytechnic, college of education, and university. Islamic institutions that adopted the national school curriculum such as 'Islamiyya' primary and secondary schools where Mathematics and English are also taught are regarded as part of formal school system.

However, skill and vocational training out of the formal educational system such as apprenticeship; on-the-job training; education at Qur'anic institutions where only Qur'an and Islamic religious knowledge is taught were not considered in schooling status.

There were six categories of schooling status responses available as explained below:

**NEVER ATTENDED** are those who never attended any formal school.

**ATTENDED IN THE PAST BUT NOT NOW** are those who attended any formal schooling in the past but currently not attending any now.

**ATTENDING PRIMARY** are those attending primary school irrespective of class during the census.

**ATTENDING JSS** are those attending Junior Secondary School (JSS) irrespective of class during the census.

**ATTENDING SENIOR SECONDARY SCHOOL (SSS)** are those attending Senior Secondary School (SSS) irrespective of class during the census.

**ATTENDING TERTIARY** are those attending Post-Secondary School (college of education, polytechnic, university, etc.) irrespective of class during the census.

## EDUCATIONAL ATTAINMENT

This was the highest level of formal education completed by all respondents who were age 6 years and above. The respondent should have completed the school and obtained the certificate or diploma as at the time of census.

Someone who completed primary school, attended two years of secondary education then, dropped out of school had primary school as his/her highest level of educational attainment. In the same way, an undergraduate in h/is third year of a university who completed senior secondary school (SSS) and was still in the university, had senior secondary school as his/her highest level of educational attainment.

Every respondent age 6 years and above belongs to one out of the nine groups of educational attainment: None, Nursery, Primary, JSS/modern school, SSS/SEC/TTC, OND/NCE, University Graduate/HND, Postgraduate and Other (specify)

## TABLES ON LITERACY, SCHOOLING AND EDUCATIONAL ATTAINMENT

**TABLE ED 1** presents the distribution of population (age 6 and above) by sex and literacy status.

**TABLE ED 2** presents the distribution of population (age 6 and above) by sex, age groups and literacy status.

**TABLE ED 4** presents the distribution of literate population by age groups and sex.

**TABLE ED 6** presents the distribution of population (age 6 and above) by Sex, age groups and Schooling Status.

**TABLE ED 10** presents the distribution of population (age 6 and above) by Sex, age groups and educational attainment.

## HOUSING AND AMENITIES

The housing and amenities section had questions that were canvassed to the *'regular households only'*, and were answered by the Head of Household or any other adult member of the household.

**Regular households:** This is a person or group of persons living together usually under the same roof or in the same building/compound, who share the same source of food and recognize themselves as a social unit with a head of household.

**Type of housing unit:** This refers to the type of residence occupied by the household as at the time of the census enumeration. Seven types of housing units were distinguished namely: Houses on separate stand or yard, Traditional/Hut structures made of traditional materials, Flat in block of flats, Semi-detached house, Rooms/Let in house, Informal/Improvised dwellings and Other types of housing unit not mentioned.

**Sleeping rooms:** These are rooms under ‘*exclusive*’ use for sleeping by all the members of the households during the census. A room used for purposes other than sleeping (that is the used for sleeping purposes and as parlour or kitchen or shop or office or garage etc) were not considered as ‘*exclusive sleeping room*.’

**Floor (Finish):** This is the main material used for the finishing of the floor of the dwelling occupied by the household. The area of interest here is the larger part of the floor, for example, the finishing of the sitting room might be marble while the sleeping rooms have cement finishing. Since the finishing of the major part of the dwelling is cement, cement is considered as the main floor material used. The floor material listed include; Earth/ Mud/ Mud Bricks, Wood/ Bamboo, Cement/ Concrete, Stone, Burnt Brick, Vinyl Tiles, Ceramic Marble Tile, Terrazzo and Other.

**Wall (Finish):** This is the main material used for the outer walls of the housing unit. Outer wall refers to the wall of the main building and not to the fence that may surround the building/compound. These include; Mud/ Reed, Wood/ Bamboo, Stone, Cement/ Blocks/ Bricks, Metal/ Zinc Sheet and Other.

**Roof (Finish):** This is the main construction material used for the roof the housing unit. These are Thatch/ Palm Leaves/ Raffia, Wood/ Bamboo, Earth/ Mud/ Mud Bricks, Corrugated Metal/ Zinc Sheet, Slate/ Asbestos, Cement/ Concrete, Roofing Tiles and Other.

**Tenure Status:** This is the form of ownership or tenancy under which the household occupies the building/compound. By ‘*owned*’ it means one of the members of the household alone or together with other household members own the housing unit. The housing unit is fully paid off, and no rent is paid to anybody. The tenure status could be; Owned, Owned but not yet paid off, Rented, Occupied rent-free, Squatting and Other.

**Ownership Status:** This is the actual owner of the housing unit where the household reside. The ownership include; Head of household, Spouse to the head of household, Other household member, Relative but not household member, Privately owned (landlord), Private employer, Other private agency, Public/Government ownership and Other.

**Water Supply:** This is the main source of water for domestic activities, such as drinking, cooking, bathing and washing. The sources include; Pipe-borne inside dwelling, Pipe-borne outside dwelling, Tanker Supply/ Water Vendor, Well, Bore-hole, Rainwater, Rivers/ Stream/ Spring, Dugout/ Pond/ Lake/ Dam/ Pool and Other.

**Toilet Facility:** Toilet is a place primarily meant for the disposal of human waste. The main toilet facility available to the household was recorded. These include; Water Closet, Pit Latrine, Bucket/ Pan, Toilet facility in another (different) dwelling, Public toilet, Nearby (bush/ beach/ field) and Other.

**Cooking Fuel:** This is the main source of fuel for the preparation of meals by the household. The source could be Electricity, Gas, Kerosene, Firewood, Coal, Animal Dung/Sawdust/Coconut husk, Solar and Other.

**Lighting Fuel:** This is the main source of power used for lighting ‘*at night*’ by the household. Six types of lighting energy/ fuel are recorded as; Electricity, Gas, Kerosene, Candle, Solar, and Other.

**Solid Waste Disposal:** Solid waste are rubbish (refuse), excluding excreta, generated by members of the household. Solid waste does not include the liquid

waste from kitchen, bathroom, washing places and disposed off through sewage or gutter or thrown onto the street. Six types of solid waste disposal were distinguished as; Collected, Buried by household, Public Approved Dump, Unapproved Dump Site, Burnt by Household and Other.

## **TABLES ON HOUSING AND AMENITIES**

**TABLE HC 2** presents the distribution of regular households by type of housing unit. This is the first question in housing questionnaire, it asked for '*Type of housing unit*'. Seven types of housing units were distinguished; they were House on separate stand or yard, Traditional/hut structure made of traditional material, Flat in block of flats, Semi-detached house, Rooms/Let in house, Informal/improvised dwelling and Other types of housing unit not mentioned.

**TABLE HC 3** presents the distribution of regular households by the number of '*exclusive*' sleeping rooms available to all members of the household. The question was canvassed as, '*How many sleeping rooms are available to this household?*' There were nine response categories as follows 0, 1, 2.....7 and 8 and above sleeping rooms. The rooms included were those under '*exclusive*' use for sleeping excluding dining rooms, bathrooms, kitchens, sheds, garages, stores, stables, etc. unless persons were living in them.

**TABLE HC 4** presents the distribution of regular households by number of households by type of floor material. The question canvassed was, '*What is the main construction material used for the floor of this dwelling?*' The question sought to find out the material used for the larger part of the floor of the dwelling.

**TABLE HC 5** presents the distribution of regular households by type of floor material used for the wall of the dwelling unit. The question read, '*What is the main construction material used for the wall of this dwelling?*' The decision as to the type of materials used for the outer wall of the dwelling was taken in consultation with the respondent. The focus was the main material used for the outer wall of the dwelling unit. The outer wall here refers to the main building and not the fence that may surround the building/compound.

**Table HC 6** presents the distribution of regular households by the type of roofing material used for the dwelling unit. The question canvassed was, *‘What is the main construction material used for the roof of this dwelling?’*

**TABLE HC 7** presents the distribution of regular households by tenure status. The question canvassed was, *‘What is the tenure status [i.e. Tenancy arrangement] of this household?’* The question was interested in the form of ownership or tenancy under which the household occupied the building/compound. By *‘owned’*, it meant one or more of the members of the household owns the housing unit.

**TABLE HC 8** presents the distribution of the number of household by ownership status. The question canvassed was, *‘Who owns this dwelling?’*, and sought to identify the actual owner of the housing unit where the household reside.

**TABLE HC 9** presents the distribution of regular households by main source of water supply for domestic purpose. The question was, *‘What is the household’s main source of water for domestic use?’*, and sought to determine the main source of water for domestic activities, such as drinking, cooking, bathing and washing.

**TABLE HC 10** presents the distribution of regular households by type of toilet facility. The question was framed as, *‘What type of toilet do you use in this household?’* A toilet is a place primarily meant for the disposal of human waste.

**TABLE HC11** presents the distribution of the regular households by type of cooking fuel. The question asked in 2006 Census was, *‘What type of energy/fuel (source) does this household mainly use for cooking?’* Here, the main type of fuel for the preparation of the meals for the household was determined.

**TABLE HC12** presents the distribution of regular households by type of lighting fuel used. The question was, *‘What type of energy/fuel (source) does this household mainly use for lighting?’* The main source of lighting particularly *‘at night’*, was sought from the respondents.

**TABLE HC13** presents the distribution of the regular households by method of waste disposal. The question was, '*How does this household dispose of its rubbish (solid waste)?*' Waste could be solid or liquid. Liquid waste is generated from kitchen, bathroom and washing places and disposed off through sewage, gutter or thrown on the street. Solid waste was rubbish (refuse), excluding excreta, generated by members of the household. This question only referred to solid waste.
