Preface

The primary mission of 2006 Census was to provide data for policy-making, evidence-based planning and good governance. The Government at all tiers, researchers, the academia, civil society organizations and the international agencies will find the sets of socio-demographic data useful in formulating developmental policies and planning. The 2006 Census data will certainly provide benchmarks for the monitoring the Millennium Development Goals (MDGs).

Enumeration in the 2006 Population and Housing Census of Nigeria was conducted between March 21st and 27th, 2006. It was designed to collect information on the quantity and quality of the population and housing, under the following broad categories: demographic and social, education, disability, household, economic, migration, housing, mortality and fertility. The results of the exercise are being released as per the Commission's Tabulation Plan. This begun with the release of the total enumerated persons by administrative areas in the country in the Official Gazette of the Federal Republic of Nigeria No.2, Vol. 96 of February 2, 2009. This was followed with the release of Priority Tables (Volume I) that provide some detailed characteristics of the population of Nigeria by State and LGA and some housing information at the national and state levels. This publication which is the second volume of the Priority Tables is directed at the housing characteristics and amenities at LGA level.

The data dissemination strategy for 2006 Population and Housing Census is designed to facilitate optimal use of the data collected for national and local planning and monitoring of various targets and policies while at the same time satisfying the data needs of other users. The Commission will continue to release further publications on all variables canvassed in the census.

I wish to acknowledge the contributions of the management and staff of the Commission and Development Partners that ensured the production of both volumes of the Priority Tables. May I assure stakeholders in the census that more useful data on the characteristics of the Nigeria's population will be provided in due course. It is my hope that census data end users will avail themselves of the valuable data contained in this publication.

METADATA

POPULATION AND HOUSING CENSUS PRIORITY TABLES - METADATA

The metadata describes the concepts, explains the variables and tables generated from the 2006 Census to facilitate ease of understanding and use by various stakeholders. The metadata has been structured in line with Concepts contained in the Enumerator's Instructions Manual used for the census to ensure consistency in the meaning and interpretation.

HOUSEHOLD AND TYPES OF HOUSEHOLD

REGULAR HOUSEHOLD: a household consisted of a person or a group of persons living together usually under the same roof or in the same building/compound, who share the same source of food and recognize themselves as a social unit with a head of household. There are two major types of households recognized: regular and institutional. The criteria used to categorize regular and institutional households were “presence of a recognized head of household”, “sharing of catering arrangement” and “feeling of belonging together as a social unit”.

There were other types of household classification/identification used during the census: Homeless households, Homeless persons, and Nomadic households, Transient persons, Fishing and Hunting population and Census functionaries.

Homeless persons: were single persons who had no homes of their own, that is, they do not live in any permanent homes but were enumerated while roaming around. They often slept under bridges, in market stalls and railway stations or motor parks. They consisted mostly of vagabonds, lunatics and persons of no fixed abode.

Nomadic households: were the households of herdsmen who are always on the move. They were identified differently because their residences were known to be very temporary

Households with head absent: were households whose heads were away at the time of enumeration.

Regular households:

It usually recognises one of its members as the head, shares a common catering arrangement and members conduct themselves as a social unit. A one-person household consists of a single, man or woman, a multi-person household consists of two or more members.

Institutional households

Defined as collective household in which members do not have any recognised head.

Homeless person: were individuals who slept in public places such as footpaths, pavement of markets, shopping centres and motor parks.

Nomadic households: were persons who migrate from one place to place in search of pasture for their animals, such as some Fulani herdsmen. By their characteristics they do not settle in a place for a long period, live in groups with identifiable households, and stay in semi-permanent structure.

Transient persons: were individuals who were on their way out of or into a country at the time of enumeration and are not likely to be enumerated with the normal households such as transit passengers at seaports, airports, and international motor parks.

Fishing and hunting households: were people on fishing or hunting expedition who were not returning to their regular homes at the time of enumeration.

HOUSING

Regular households: This is a person or group of persons living together usually under the same roof or in the same building/compound, who share the same source of food and recognize themselves as a social unit with a head of household.

Type of housing unit: This refers to the type of residence occupied by the household as at the time of the census enumeration. Seven types of housing units were distinguished; they were houses on separate stand or yard, traditional/hut structures made of traditional materials, flat in block of flats, semi-detached house, rooms/let in house, informal/improvised dwellings and other types of housing unit not mentioned.

Sleeping rooms: These are rooms under exclusive use for sleeping by all the members of the households during the census. A room used for purposes other than sleeping (that is the used for sleeping purposes and as parlour or kitchen or shop or office or garage etc) were not considered as sleeping room.

Floor (Finish): This is the main material used for the largest part of the floor of the dwelling occupied by the household. The area of interest here is the largest part of the floor, for example, the finishing of the sitting room might be marble while the 6 sleeping rooms have cement finishing. Since the finishing of the major part of the dwelling is cement, cement is considered as the floor finishing. The floor material listed include; earth/mud/mud bricks, wood/bamboo, cement/concrete, stone, burnt brick, vinyl tiles, ceramic marble tile, terrazzo and others.

Wall (finish): This is the main material used for the outer walls of the housing unit. Outer wall refers to the wall of the main building and not to the fence that may surround the building/ compound. These include; Mud/Reed, Wood/Bamboo, Stone, Cement/Blocks/Bricks, Metal/Zinc Sheet and others

Roof: This is the main construction material used for the roof the housing unit. These are Thatch/palm leaves/raffia, wood/bamboo, earth/mud/mud bricks, corrugated metal/zinc sheet, slate/asbestos, cement/concrete, roofing tiles and others.

Tenure Status: This is the form of ownership or tenancy under which the household occupies the building/compound. By “owned” it means one of the members of the household alone or together with other household members owns the housing unit, the housing unit is fully paid off, and no rent is paid to anybody. The tenure status could be owned, owned but not yet paid off, rented, occupied rent-free, squatting and others.

Ownership Status: This is the actual owner of the housing unit where the household reside. The ownership include, head of household, spouse to the head of household, other household member, relative but not household member, privately owned (landlord), private employer, other private agency, public/government ownership and others.

Water Supply: This is the main source of water for domestic activities, such as drinking, cooking, bathing and washing. The sources include, pipe-borne inside dwelling, pipe-borne outside dwelling, tanker supply/water vendor, well, bore-hole, rainwater, rivers/stream/spring, dugout/pond/like/dam/pool and others.

Toilet Facility: Toilet is a place primarily meant for the disposal of human waste. The main toilet facility available to the household was recorded. These include; water closet, pit latrine, bucket/pan, toilet facility in another (different) dwelling, public toilet, nearby (bush/beach/field) and others.

Cooking Fuel: This is the main source of fuel for the preparation of meal by the household. The source could be electricity, gas, kerosene, firewood, coal, animal dung/sawdust/coconut husk, solar and others that have not been mentioned.

Lighting Fuel: This is the main source of power used for lighting at night by the household. Six types of lighting energy/ fuel are distinguished as electricity, gas, kerosene, candle, solar, and others.

Solid Waste Disposal: Solid waste are rubbish (refuse), excluding excreta, generated by members of the household. Solid waste does not include the liquid waste from kitchen, bathroom, washing places and disposed off through sewage or gutter or thrown onto the street. Six types of solid waste disposal distinguished as; collected, buried by household, public approved dump, unapproved dump site, burnt by household and others.

Tables

Table HC2 presents the distribution of households by type of housing unit. This is the first question in housing questionnaire, it asked for **“Type of housing unit”**. Seven types of housing units were distinguished; they were house on separate stand or yard, traditional/hut structure made of traditional material, flat in block of flats, semi-detached house, rooms/let in house, informal/improvised dwelling and other types of housing unit not mentioned.

Table HC3 presents the distribution of sleeping rooms available to all members of the household. The question was stated as **“How many sleeping rooms are available to this household?”** There were nine response categories as follows 0, 1, 2.....7 and 8 and above. The rooms included were those under exclusive use for sleeping excluding dining rooms, bathrooms, kitchens, sheds, garages, stores, stables, etc unless persons were living in them. The table presents the format the results obtained will be tabulated.

Table HC4 presents the number of households by Type Of Floor material. The question was **“What is the main construction material used for the floor of this dwelling?”** The question sought to find out the material used for the largest part of the floor of the dwelling.

Table HC5 presents the households by Type Of Floor material used for the wall of the dwelling unit. The question read **“What is the main construction material used for the wall of this dwelling?”** The decision as to the type of materials used for the outer wall of the dwelling was taken in consultation with the respondent, the focus was the main material used for the outer wall of the dwelling unit. The outer wall here refers to the main building and not the fence that may surround the building/compound.

Table HC6 presents the distribution of households by the type of roofing material used for the dwelling unit. The question was **“What is the main construction material used for the roof of this dwelling?”** There were nine options namely; Thatch/Palm Leaves/Raffia, Wood/Bamboo, Earth/Mud/Mud Bricks, Corrugated Metal/Zinc sheet, Slate/Asbestos, Cement/Concrete, Roofing Tiles and Others.

Table HC7 presents the distribution of households by tenure status. The question was **“What is the tenure status [i.e. Tenancy arrangement] of this household?”** The question was interested in the form of ownership or tenancy under which the household occupied the building/compound. By “owned” it meant one or more of the members of the household owns the housing unit.

Table HC8 presents the distribution of the number of household by ownership status. The question was **“Who owns this dwelling?”** sought identify the actual owner of the housing unit where the household reside.

Table HC9 presents the distribution of households by main source of water supply for domestic purpose. The question was **“what is the household’s main source of water for domestic use?”** sought to determined was the main source of water for domestic activities, such as drinking, cooking, bathing and washing.

Table HC10 presents the distribution of households by type of toilet facility. The question was framed as **“What type of toilet do you use in this household?”** A toilet is a place primarily meant for the disposal of human waste. Eight categories of responses as contained in the table above were created for this question.

Table HC11 presents the distribution of the households by type of cooking fuel. The question asked in 2006 Census was **“what type of energy/fuel (source) does this household mainly use for cooking?”** Here, the main type of fuel for the preparation of meals for the household was determined.

Table HC12 presents the distribution of households by type of lighting fuel. The question was **“What type of energy/fuel (source) does this household mainly use for lighting?”** The main source of lighting particularly at night was sought from the respondents.

Table HC13 presents the distribution of the number of households by method of waste disposal. The question was **“How does this household dispose of its rubbish (solid waste)?”** Waste could be solid or liquid. Liquid waste is generated from kitchen, bathroom and washing places and disposed off through sewage, gutter or thrown on the street. Solid waste was rubbish (refuse), excluding excreta, generated by members of the household. This question only referred to solid waste.
