2006 Population and Housing Census

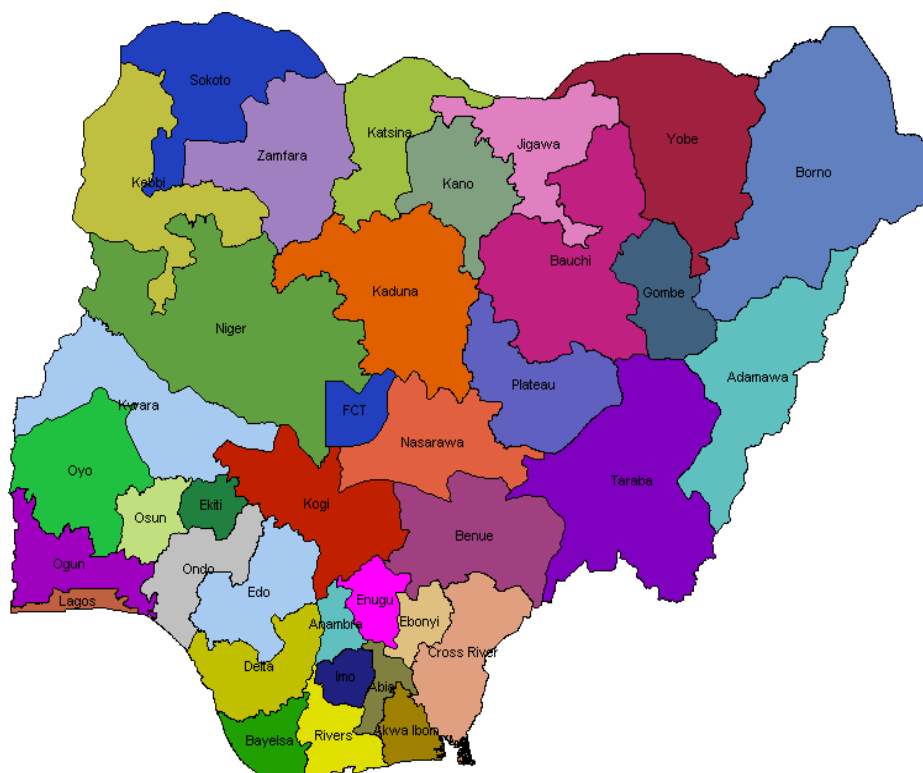

PRIORITY TABLE Volume VII

POPULATION DISTRIBUTION BY AGE, SEX & EDUCATIONAL ATTAINMENT

(STATE & Local Government Area)

Table ED10

*National Population
Commission*

Abuja, Nigeria

April, 2010

Preface

In all nations, education plays a key role in development. Education is seen as the process through which the intellectual, physical and moral capacities of individuals are developed to make them cultured members of their society.

Nigeria is committed to education and has accorded priority to the sector. In 1999, the government launched the Universal Basic Education programme which covers primary and junior secondary schooling. As a result of this enrolment in schools has risen considerably. It is in the light of this that data on educational attainment of population is important.

Educational attainment among persons is an indicator of the person's exposure to schooling, as well as an indicator of a country human resource base.

The 2006 Population and Housing Census collected data on the highest level of schooling attended and the highest class completed at that level among Nigerians age six and above. This information allowed for the calculation of educational attainment among Nigerian population. Although most Nigerian persons have attended school, there are sizeable differences by sex. The tables by age group presented those who have never attended school, those who have attended and the highest level they attained.

Information on educational attainment of Nigerian population is invaluable in the design and implementation of policies in several sectors.

However, population census provides information not only on how many the people are, but also gives a complete profile of the economic and social conditions of the people at a given time. The National Population Commission is committed to providing relevant data for planning and sustainable development. It is my hope that the data will be useful for the policy makers and other stakeholders.

The National Population Commission remains grateful to many persons and organizations that made the 2006 Population and Housing Census a huge success.

Chief Samu'ila Danko Makama CON

Chairman

National Population Commission

Notes

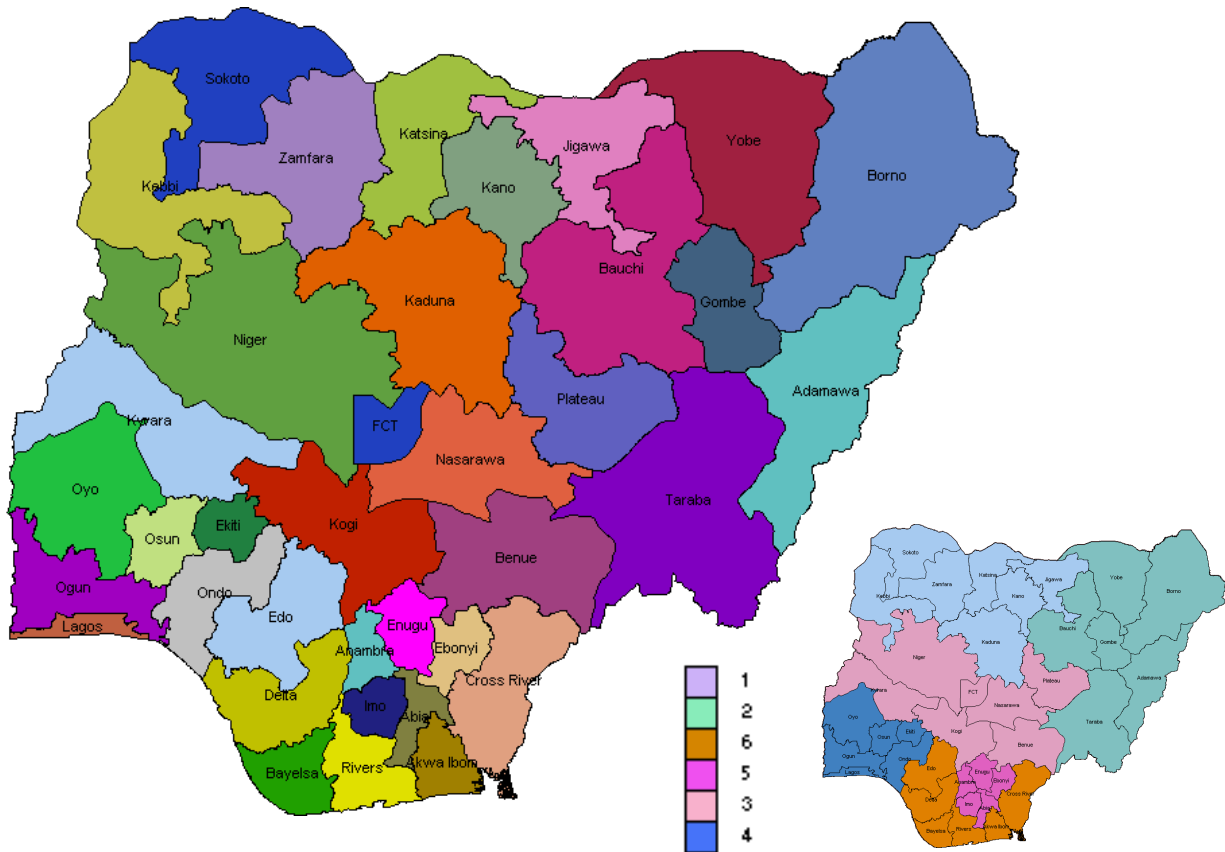

The Information here explains the concept used. The aim of canvassing for Educational Attainment is to find out the highest level of formal education completed by persons, age 6 years and above. The person should have completed the school and received a certificate or diploma. When one completed primary school and next followed two years of secondary education before dropping out, in such a case the highest level of educational attainment is primary school. For an under-graduate in his/her third year of a University who completed Senior Secondary School (SSS) is still in the University, his/her highest level of educational attainment is Senior Secondary School.

There are eight groups of educational attainment. This include Nursery, Primary, JSS Modern School, SSS/SEC/TTC, OND/NCE, University/Graduate HND, Post Graduate, others. Every person belongs to one our of these eight. There are same people who never attended any formal school but develop themselves and are literate. This goes to explain why one can be literate without attending any school, and illiterate while having attended school.
