to people*

ST

Data processed

- Interview modules = 122 megabytes
- Expenditure diary = 3.1 million entries
- Income diary = 0.9 million entries
- Total 1.1 Gigabyte of data in various formats

f- 15,000 hh
= 240 / hh

Presentations

- Tong Chhay Rine about situation now
- Mr. Yip Thavrin about accessing data from reference database

Situation now (1)

- All interview modules are finally edited to correspond with information in questionnaire
- Analysts using data will find problems
- Remaining small data management team can help analysts with checks of error lists

||

not sure if talking
past or present tense
(simultaneous transfer
used past tense)

Situation now (2)

- Remaining problems: Expenditure diary
- Expenditure values are fine
- Quantities must be in standard units
- *To calculate price per kilogram, gram*
- *To calculate calorie content of food*
- Automatic conversion program +
- Manual conversion of 30 000 entries needed
