

NOTES on SLC 2002 Revised Data(24-Oct-03)

1. The revised weights have been attached to the datasets(annual and rec001 as is customary).

Finwght: Final Weight used for tabulations ($\text{Finwght} = \text{parwght} \times \text{newwght}$)

Edwght: Non-response weight (already included in newwght)

Parwght: Parish Adjustment

Newwght: Revised weights

2. The data set “***newweight***” only contains the values for variable “*newwght*” by Enumeration District.
3. The quintiles were reworked for better distribution of household members.
