فخامة الرئيس محمود عباس "أبو مازن"  
رئيس اللجنة التنفيذية لمنظمة التحرير الفلسطينية  
رئيس السلطة الوطنية الفلسطينية

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

السلطة الوطنية الفلسطينية

منظمة التحرير الفلسطينية

بسم الله الرحمن الرحيم

تقديم من سيادة الرئيس محمود عباس "أبو مازن"  
رئيس السلطة الوطنية الفلسطينية

يعتبر التعداد العام للسكان والمساكن والمنشآت ركناً أساسياً من أركان النظام الإحصائي الرسمي في أي دولة، حيث يأتي تنفيذه خلال عام 2007 استحقاقاً قانونياً وتنموياً ووطنياً وسيادياً، ويمثل تنفيذه لبنة أساسية في عملية بناء الدولة وإرساء أسس التخطيط السليم بمعايير علمية نظراً لما يوفره من إحصاءات دقيقة وتفصيلية لكافة نواحي الحياة، ويساهم في بناء الدولة الفلسطينية وإنجاز الاستقلال السياسي والاقتصادي والاجتماعي، وتحقيق التنمية.

لقد جاء تنفيذ هذا المشروع الوطني الكبير في ظل ظروف غاية في التعقيد على مختلف الأصعدة، مما جعل تنفيذ التعداد مهمة صعبة تعترضها الكثير من التحديات والأخطار، إلا أن عزيمة الشعب الفلسطيني وإصرار الفريق الوطني، واحتضان القيادة السياسية جعلت من التغلب على هذا التحدي أمراً ممكناً أدى إلى تنفيذ التعداد العام الثاني في الأراضي الفلسطينية بجودة عالية وفق المعايير الدولية، بأيد وبخبرات فلسطينية وقرار فلسطيني مستقل، واستجابة للحاجات الوطنية في شتى المجالات.

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

السلطة الوطنية الفلسطينية

منظمة التحرير الفلسطينية

لقد أسهم التعداد في إعادة الموضوع التنموي على الأجندة الوطنية والدولية في فلسطين، بعد أن تراجع دورها لصالح الأجندة الإغاثية، فالتنمية أهم الدعامات الضرورية لتأسيس مجتمع ديمقراطي، وبناء إنسان حر ملتزم بالمبادئ الوطنية والإنسانية. والإحصاءات الدقيقة والعلمية هي العمود الفقري لوضع خطط تنموية مبنية على أسس سليمة تشكل رافعة لقضايا التنمية وتحقيق الأهداف المعلنة عليها.

لقد أبدى المجتمع الدولي اهتماماً بالغاً بهذا المشروع التنموي وعبر عن اهتمامه من خلال الدعم المادي والفني الذي قدمته بعض الدول الصديقة والمنظمات الدولية. فقد كان لصندوق الأمم المتحدة للسكان مساهمة مادية وفنية جادة، وكذلك صندوق أوبك للتنمية الدولية، وحكومات النرويج وهولندا وسويسرا وأستراليا، والمملكة العربية السعودية ومنظمة الأمم المتحدة للطفولة "اليونيسيف"

إننا إذ نهدي هذا الإنجاز التاريخي الى كل فلسطيني، فإننا نعبر عن تقديرنا وشكرنا لأسرة الجهاز المركزي للإحصاء الفلسطيني والفريق الوطني للتعداد على إصرارهم وعطائهم وتفانيهم في تحقيق هذا الإنجاز.

رام الله: 2008/5/22

محمود عباس

رئيس اللجنة التنفيذية لمنظمة التحرير الفلسطينية

رئيس السلطة الوطنية الفلسطينية

## **Acknowledgments**

**The Population, Housing and Establishment Census (PHC-2007) is the second census conducted by the Palestinian Central Bureau of Statistics (PCBS) since the Palestinian National Authority (PNA) was established in 1994. The PHC-2007 was conducted in a very critical and complicated political, administrative, financial and organizational environment. It could not have been accomplished without the generous support of a number of friendly countries, international and national institutions and personalities.**

**The implementation of the PHC-2007 was co-financed by the PNA, United Nations Population Fund (UNFPA), the Core Funding Group (CFG) of PCBS (Norway, Netherlands, and Switzerland), OPEC Fund for International Development (OFID), Australia, and the United Nations Children's Fund (UNICEF), and the European Union (EU).**

**PCBS would not have been able to implement the PHC-2007 as a national project in such complicated circumstances without the important contribution made by the PHC-2007 National Higher Committee, the committees in the governorates, publicity campaign committees, and many other official and popular supporting committees and bodies.**

**We would also like to highlight the outstanding efforts made by the Census National Director, Executive Director, and all census national team members to plan, manage, implement, supervise, monitor, and coordinate census activities: senior assistants of the national and executive director, census directors in the governorates and their assistants, coordinators of the publicity campaign and their assistants, field supervisors, field observers, enumerators, administrators and other team members.**

**Printing of this document has been produced with financial assistance of the European Union. The contents of this document are the sole responsibility of the PCBS.**

**PCBS extends its deep thanks to all of these personalities and institutions for the tremendous efforts they exerted to bring the second Palestinian census to light.**

## **Preface**

The PHC-2007 is an important pillar of the national development process. It is a primary prerequisite for the socioeconomic planning. Furthermore, it helps reinforcing the Palestinian sovereignty on the ground. Countries around the world usually conduct censuses every decade according to the degree of population stability, the amount of potential changes in the demographic characteristics and the availability of the financial resources.

Realizing the importance of bridging the gap between society's statistical needs the current situation in the Palestinian Territory conducted the first national population, housing and establishment Census in 1997. PHC-2007 has been conducted for legal, development and statistical considerations. Success is vehemently attributed to the colossal efforts exerted by the national census team and the continuous support of the Palestinian leadership.

The main objective of the PHC-2007 is to update statistical data on the Palestinian population, housing units, economic establishments and agricultural holdings, and to provide small area statistics to the planners and decision makers. PHC-2007 will contribute to realizing a balanced and comprehensive development in all sectors.

PHC-2007 was designed and implemented in accordance with the United Nations principles and recommendations of Population and housing census taking into consideration the local Palestinian needs. Special attention was given to affording complete and adequate data on the size, structure, distribution and characteristics of the demographic, economic and social components of the Palestinian population; the characteristics of houses; the number and characteristics of the economic establishments and making an inventory of the agricultural holdings. Consequently, obtained statistical data will foster and support the role and efficiency of planning both on the national and local governments levels.

In an effort of PCBS to provide the users with the census results as soon as possible, the national census team made every possible effort to fulfill that, where we were able to publish the preliminary results of the census after five weeks of the end of the census fieldwork events and this is considered a record time compared to other countries. In addition the final results of buildings and establishments for Palestinian Territory were disseminated. In a continuation of this approach this report comes as a part of detailed reports about the characteristics of housing in the West Bank.

PCBS and the national census team are pleased to present this report which contains the final results for the Housing Census 2007 in the West Bank. Hoping to be a reference for all planners, decision makers and policy makers in the public and private sectors and civil society institutions.

**February, 2009**

**Luay Shabaneh, Ph. D.  
President of PCBS/  
Census National Director**

## **Important Notes**

Based on The contained data in this report is based on the following facts:-

1. Population, housing and socio-economic data are based on the actually enumerated population and housing units and doesn't include uncounted population estimates according to the post enumeration survey. In addition it doesn't include the collective households.
2. Because of the special situation in the Jerusalem governorate, especially the J1 area, a reduced questionnaire has been designed especially for the household and housing conditions for the Jerusalem J1 which contains only the following questions:
  - a. Number of nuclear families, type of housing and number of rooms.
  - b. Household roster (relationship to the head, sex, religion, age, refugee status, educational level, marital status).
3. In some tables the total of percentages might not add up to 100% due to rounding.
4. A set of special symbols were used in the tables of this report. The representation of these symbols are:
  - (-) Nil (not found).
  - (0) less than 0.05%.

## Chapter One

### Introduction

#### 1.1 Introduction

The Population and Housing Census is the main source for providing basic information about housing units and housing conditions statistics. Such censuses provide much needed data by the Palestinian society about the number of housing units and their different characteristics. Such information is needed at the levels of region, governorate, and locality and include the number of housing units, their distribution, basic characteristics, and the living conditions of the people, in order to set up the housing policies, define the surplus or deficit in the number of housing units, and use the projections to define the needs of the different regions for housing units in the future in light of having information and data about the population growth rates.

Therefore, PCBS sought to conduct the Housing Census as part of the Population, Housing and Establishment Census of 2007, which is the second census to be conducted by PCBS after carrying out the Population, Housing, and Establishments Census in 1997. This enables building a database about the various indicators of the housing units and housing conditions statistics.

#### 1.2 Objectives of the Census

The Housing Census aims to provide reliable data about the key indicators of the housing conditions in accordance with the most recent international recommendations, to prepare more modern frame for housing units through counting the entire housing units of the West Bank in 2007.

#### Specific Objectives of the Census

1. Define the number of housing units by their type, tenure, average number of rooms, number of bedrooms, and housing density.
2. Define the number of housing units by governorate and type of locality.
3. Define the number of housing units by main source of water and by connection to the electricity, water, and sewage network.
4. Define the number of housing units by availability of a kitchen, bathroom, and toilet.
5. Define the number of housing units by key energy source used for cooking and heating.
6. Define the number of households by availability of durable goods.

#### 1.3 Report Structure

This report consists of five chapters. The first chapter presents the introduction, the census objectives and the report structure. The second chapter describes the most important concepts and definitions used in the census, and the third chapter briefly describes the most important main results of the houses census. The fourth chapter presents the methodology used in the planning and implementation of the census. The last chapter includes an assessment of data quality.

## Concepts and Definitions

### 2.1 Geographical, Administrative and Statistical Divisions

According to current administrative divisions, the Palestinian Territory is divided into two geographic regions: the Remaining West Bank and Gaza Strip.

1. **West Bank** is divided into 11 Governorates (Jenin, Tubas, Tulkarm, Nablus, Qalqiliya, Salfit, Ramallah & Al-Bireh, Jericho & AlAghwar, Jerusalem, Bethlehem, and Hebron) .
2. **Gaza Strip** is divided into 5 Governorates (North Gaza, Gaza, Deir Al-Balah, Khan Yunis, Rafah).

#### Remaining West Bank

Includes the West Bank except those parts of Jerusalem which were annexed by Israel in 1967.

#### Definitions of Jerusalem J1&J2

Given the geographical and political situations in the Jerusalem governorate, it has been divided into two parts (J1, and J2).

For mere statistical purposes, the Jerusalem Governorate was divided into two parts.

**The first part (J1)** includes that part of Jerusalem, which was annexed forcefully by Israel following its occupation of the West Bank in 1967. This part includes the following localities: (Beit Hanina, Shu'fat Refugees Camp, Shu'fat, Al' Isawiya, Jerusalem "Al - Quds"( Sheikh Jarrah, Wadi Al - Joz, Bab Al-Sahira, As Suwwana, At -Tur, , Ash - Shayyah, Ras Al-Amud), Silwan, Ath – Thuri, Jabal Al – Mukabbir, As – Sawahira Al – Gharbiya, Beit Safafa, Sharafat, Sur Bahir, and Um Tuba and Kufr A'qab).

**The second part Jerusalem (J2)** Includes Jerusalem governorate except that part of Jerusalem which was forcefully Annexed by Israel following its occupation of the West Bank in 1967. This part includes the following localities: Rafat, Mikhmas, Qalandya Refugees Camp, the Bedouin Community - Jaba', Qalandya, Beit Duquq, Jaba', Al – Judeira, Beit Anan, Al-Ram, Dahiat Al-Pareed, Al Al – Jib, Bir Nabala, Beit Ijza, Al – Qubeiba, Khirbet Um Al – Lahem, Biddu, An – Nabi Samu'eil, Hezma, Beit Hanina Al Balad, Qatanna, Beit Surik, Beit Iksa, A'nata, Al Ka'abina (the Bedouin Community – Al – Khan Al – Ahmar), Arab al Jahalin (the Bedouin Communites, Al – Eizariya and Abu Deis), Az Za'eem, Al – Sawahreh Al – Sharqiyeh and Ash – Sheikh Sa'd.

#### Locality:

A permanently inhabited place, which has an independent municipal administration or a permanently inhabited, separated place not included within the formal boundaries of another locality.

#### Locality Type:

Localities have been divided into three types: **Urban, Rural, Camps**

**Urban:** Any locality whose population amounts to 10,000 persons or more. This applies to all governorates/districts centers regardless of their size. Besides, it refers to all localities whose populations vary from 4,000 to 9,999 persons provided they have, at least, four of the following elements: public electricity network, public water network, post office, health center with a full – time physician and a school offering a general secondary education certificate.

**Rural:** Any locality whose population is less than 4,000 persons or whose population varies from 4,000 to 9,999 persons but lacking four of the aforementioned elements.

**Camp:** It refers to any locality referred to as a refugee camp and administered by the United Nations Refugees and Work Agency in the Near East (U.N.R.W.A.).

**Enumeration Area:**

A group of houses (about 150 housing units) with clear boundaries on the ground, it may constitute one locality or part of a locality.

## **2.2 General Definitions**

**Housing Census:**

This is the overall process for the collection, classification, processing, analysis, evaluation and dissemination of statistical data and provides for the preparation and distribution of the houses by various characteristics of the houses in the reference period and within certain specific geographic area.

**Housing Unit:**

A building or part of a building constructed for one household only, with one or more independent entrance leading to the public road without passing through another house.

**Collective Households:**

It refers to the place constructed for the residence of a group of individuals, who live therein and benefit from the services it provides. The collective household; it may be comprised of one building or more or one housing unit or more. Examples of collective households include hotels, hostels, elderly and orphans homes, psycho-therapy clinics and hospitals, collective households for university students, collective living quarters (camps) at the passages, and housing units of priests and nuns in the monasteries and churches (who do not have other households).

**Household:**

One person or a group of persons with or without a household relationship, who live in the same housing unit, share meals and make joint provision of food and other essentials of living.

**Type of households that underwent enumeration are divided into:**

**Private Households:** The households included in the aforementioned definition of the household.

**Collective (Institutional Households):** It refers to the households enumerated in the previously mentioned collective households.

**Palestinian Household:**

It refers to the private household whose head holds the Palestinian nationality. As for non Palestinian household, it refers to the household whose head holds non Palestinian nationality irrespective of the nationality of other household members.

**Special types of Households:**

**A one-person-household:** It refers to the household comprised of one individual.

**Nuclear household:** It refers to the living household comprised of a couple only; a couple and a son or a daughter (not adopted son or daughter) or more; or a male head of a household with a son or a daughter or more; or a female head of a household with a son or a daughter or more. It is worthy to note that no other relatives or non-relatives live with this household.

**Extended Household:** A household of at least one nuclear household together with other relatives.

**Composite Household:** Refers to household consisting of at least one nuclear household with other non-relatives.

**Average Household Size:**

It refers to the average number of household members calculated through dividing the total number of members for a certain category by the number of households for that particular category.

**Head of the household:**

It refers to the person who usually lives within the household and is considered as the head of the household by its other members. Often, he \ she is the main decision-maker and responsible for financial support and economic welfare of the household.

### **2.3 The Basic Definitions for the Population Characteristics**

This status relates to the Palestinians who were forced to leave their land in the Palestinian Territory occupied by Israel in 1948. It applies to their male sons and grandchildren.

1. **Registered Refugees:** It applies to registered refugees holding refugee registration cards issued by UNRWA.
2. **Non-Registered Refugees:** It applies to unregistered refugees who do not hold refugee registration cards issued by UNRWA.
3. **Non-Refugee:** It applies to any Palestinian not categorized under any of the two aforementioned statuses.

**Sex:**

It is divided into male and female.

**Age in Completed Years:**

The completed age in years of the person enumerated, which is the difference between the date of birth and the survey reference period.

**Employed:**

Persons who were at work at least one hour during the reference period, whether for their own account or for others paid or unpaid, or in the interest of the household. Employees classified according to the number of weekly working hours of the workers (1-14) hours, workers (15-34) hours, workers 35 hours or more.

**Labor Force Status:**

A person's work status in terms of being inside or outside the labor force and also classified as follows:

1. **Employed 1-14 work hours:** All persons aged (7 years and over) who were at work at least one hour during the reference week, or who were not at work during the reference week, but held a job or owned a business from which they were temporarily absent and usually working 1-14 hours per week.
2. **Employed 15-34 work hours:** All persons aged (7 years and over) who were at work during the reference week, and held a job or owned a business from which they were temporarily absent and usually working 15-34 hours per week.

3. **Employed 35 hours or more:** All persons aged (7 years and over) who were at work during the reference week, and held a job or owned a business from which they were temporarily absent and usually working 35 hours or more per week.

**Does not work and seeking work - who has ever been employed:**

4. **Actively seeking a job during the reference week:** Those individuals aged (7 years and over) who did not work at all during the reference week, were not absent from a job, were available for work and actively seeking a job during the reference week, and looking for a job by one method of the following: registration at employment office, or registration at a labor union, or asking friends or relatives, or a personal visit of the premises, or reading the newspaper in order to obtain jobs, or searching for a building or land or machinery or equipment in order to establish a private project or seek of financial resources. Noting: that this category is the category that worked in the past two weeks continuously.
5. **Not seeking work because of discouragement:** Those individuals aged (7 years and over) who had worked in the past but within a reference week did not work even one hour, were not looking for work and were willing to work or need to work and sought previously but had been unable to find work.

**Does not work and wants to work – Never Employed:**

6. **Actively seeking a job during the reference week:** Those individuals aged (7 years and over) who did not work at all during the last period, were not absent from a job, were available for work and actively seeking a job during the reference week, and looking for a job by one method of the following: registration at employment office, or registration at a labor union, or asking friends or relatives, or a personal visit of the premises, or reading the newspaper in order to obtain jobs, or searching for a building or land or machinery or equipment in order to establish a private project or seek of financial resources.
7. **Not seeking work because of discouragement:** Those individuals aged (7 years and over) who has not worked throughout their life with any kind of work, has not worked even for one hour during the reference period, was not looking for work, but has desire or need to work and sought work previously but was unable to find and has no income due to this and did not continue in looking for work.

**Does not work does not want to work:**

Individuals aged (7 years or over) for which the concept of employed or unemployed does not apply, are classified outside the labor force, in the sense that this individual did not work even one hour during the reference period, nor looking for work and does not wish to work and falls under this definition:

8. **Full-time study / training:** Individuals aged (7 years or over) who regularly study in order to obtain a qualified skill and not linked to work during a certain period of reference. It should be noted here that household chores and hobbies are not included in the concept of work.
9. **Full-time housekeeping:** Any person (male or female) aged (7 years and over) not working but has capability to work and not looking for work and not attending regular study and aims at serving the household home. This does not include the servicing of the homes of others in return for payment in kind or cash since this type of service is within the workplace.

10. **Disabled /old age / illness:** An individual who is aged (7 years and over) who cannot do any kind of work due to chronic illness or due to any disability This category also includes all individuals who are unable to work because of old age.
11. **The existence of income / retiree:** If an individual is able to work but does not work and did not wish to work nor look for work because there is revenue from real estate, or retirement, etc.
12. **Other:** Includes any individual for which all the previously stated did not apply, such as a prisoner, or individual capable of work but not wishing or looking for work and who has no income, such as sons and daughters who are not attending school, who do not apply to any situation mentioned previously.

### **Main Occupation:**

The main job or type of work performed by the employed person or used to be performed by the unemployed ever worked person. The occupation refers to the activity in which the employee works more than half of his/her working hours or the most frequent job during the last three months prior to the enumeration night.

**Educational Attainment:** It refers to the highest successfully completed educational attainment level. The educational level for persons aged 10 years and over .

**Illiterate:** It applies to persons unable to read or write in any language and who were never awarded a certificate from any formal education system.

**Can Read and Write:** It applies to persons who are able to read and write without completing any of the educational stages. Such persons are generally able to read and write simple sentences.

### **Qualification (The highest successfully completed educational attainment):**

It refers to the highest educational attainment level (elementary and higher) the person successfully completed. Elementary is the educational level for persons who successfully completed the sixth elementary grade. Those who successfully completed the ninth grade shall be classified under the preparatory level. Likewise, persons who successfully completed the general secondary certificate examination shall be classified under the secondary level. As for the rest of levels, they are as follows: Associate diploma, bachelor degree (BA/BS), higher diploma, masters degree (MA/MS), doctorate (Ph.D)

## **2.4 The Basic Definitions for the Housing Units Characteristics**

### **House type:**

Housing unit type may refer to any of the following:

1. **Villa:** A separately established building that is usually constructed from clean stone. It is constructed for the living of one household and consists of a 2–suite, single or double or multiple stories connected through internal stairs. One of the suites is constructed as bedrooms whereas the second suite is constructed for reception and involves the kitchen and other related services. In general, the villa is surrounded by a garden, regardless of the area of this garden, which is surrounded by boarder wall or fence. Villas normally have a roofed parking area (garage). Villas may also include a separate small building or extension as part of them.
2. **House:** A building usually established for the residence of one household or more; it is the typical form of residential buildings prevailing in Palestine. The house may be comprised of a single story or more that is utilized by a single household.
3. **Apartment:** It is a part of a building or a house, consisting of one room or more and annexed with kitchen, bathroom and toilet, which are all closed by an external door

leading to the road through a stairway and/or path way. It is prepared usually for one household.

4. **Independent Room:** It is a separate room with no kitchen, bathroom or toilet, but sharing these basic services with other households, and it is prepared for living.
5. **Marginal:** It is a separate unit, usually comprised of one or more rooms. The main construction material of the ceiling and the external walls is zinc, tinplate, etc, but it does not undergo listing unless it is occupied.
6. **Tent:** It is made of textile, wool, or hair. It is typically used in the Bedouin localities.
7. **Other:** It refers to any type of building other than the aforementioned. Examples of this type include cottages, caves, grottos, and booths occupied by a tenant during the Census.

### **Tenure of the House:**

This section refers to the household tenure of the house that could be one of the following categories:

1. **Owned:** This category applies when the household or one of the household members usually living therein owns the house.
2. **Rented Unfurnished:** If the house is rented without furniture.
3. **Rented Furnished:** If the house is rented with furniture.
4. **Without Payment:** If the house is used without any payments.
5. **For Work:** If the house is offered to the household as a result of a working relation with one member of the household or more.
6. **Other:** If the tenure of the house is not mentioned above.

### **Room:**

The housing unit or part of the housing unit surrounded with walls and having a ceiling, provided that its area is not less than 4 square meters.

### **Bedroom:**

Any area equal to or greater than (4) m<sup>2</sup> (four square meters and over), surrounded by walls, ceiling and easy to isolate users from the others, used to sleep one person or more members of the household. The balconies (Frendat) repelling if the bedroom area equal to or more than four square meters, and used for the purpose of sleep.

### **Connection to Water:**

1. **Public Water Network:** A network of pipes for the purpose of providing clean water to households. It normally belongs to a municipality, the council or to a private company.
2. **Mekorot Israeli company:** A network of pipes for the purpose of providing clean water to households. It normally belongs to Mekorot Israeli company.
3. **Collection Water Wells:** Wells that are dug in the ground for the purpose of collecting rain water.
4. **Springs:** Water that is discharged from the ground at an intersection point between the topographic surface and the groundwater table; it could be permanent or seasonal, and it is considered as one of the natural resources for irrigation.
5. **Water Tanks:** Using water from vehicles that distribute and transfer water.
6. **Others:** If the source of water was not mentioned above.

### **Connection to Electricity:**

1. **Public Network:** Electrical wiring deployed in residential areas and covering all or most of the households in the locality, particularly through electricity companies or local authorities (municipal or village),
2. **Private Generator:** Device used for electric power generation and supply to housing and owned by the owner of the household or group of individuals.
3. **Not Available:** In the case of lack of means and therefore foregoing electricity.

### **Connection to Sanitation:**

This question illustrates the house connections to sanitation which are:

1. **Sewage Network:** System of collectors, pipelines, conduits and pumps to evacuate wastewater (rainwater, domestic and other wastewater) from any of the location places generation either to municipal sewage treatment plant or to a location place where wastewater is discharged.
2. **Porous Cesspit:** A well or a pit in which night soil and other refuse is stored, constructed with porous walls.
3. **Tight Cesspit:** A well or a pit in which night soil and other refuse is stored, constructed of tight walls.
4. **Not Found:** In case of no provision from the above methods.

### **Availability of a kitchen:**

The kitchen is normally defined as a four – wall – room with a ceiling typically used for preparing food. Kitchens are classified as follows:

1. **Kitchen with Piped Water:** This category applies to cases involving a water tap in the kitchen.
2. **Kitchen without Piped Water:** This category applies to cases not involving a water tap in the kitchen.
3. **No Kitchen:** This category applies when there is no separate kitchen in the Housing unit.

### **Availability of a Bathroom:**

The bathroom is defined as the room used for taking a shower or a bath. It has a door that could be closed during the shower. A bathroom is classified as follows:

1. **Bathroom with Piped Water:** This category applies when there is a bathroom connected to water resources or when there is a water tap in the bathroom.
2. **Bathroom without Piped Water:** This category applies when there is a bathroom that is not connected to water resources.
3. **No Bathroom:** This category applies when there is no separate bathroom in the Housing unit.

### **Availability of a Toilet (WC):**

A toilet (WC) may be classified as follows:

1. **Toilet with Piped Water:** This category applies when there is a toilet connected to water resources or when there is a water tap in the toilet.
2. **Toilet without Piped Water:** This category applies when there is a toilet that is not connected to water resources.
3. **No Toilet:** This category applies when there is no separate toilet in the Housing unit.

### **The Main Source of Energy Used in Cooking:**

Is the energy used by residents for domestic purposes in the process of cooking, in the case of the use of more than one source is the most widely used source selection.

It may be a source of energy used in cooking as follows: (1) Gas (2) Kerosene (3) electricity (4) wood (5) other.

**The Main Source of Energy Used for Heating:**

Is the energy consumed by the population for domestic purposes in the process of heating, in the case of the use of more than one source is the most widely used source selection.

It may be a source of energy used in heating as follows: In the case of non-use of heating figure placed in the family (0) no (1) Gas (2) Kerosene (3) electricity (4) wood (5) Coal (6) Diesel (7) other.

**Housing Density (Number of persons per Room):**

It is defined as the number of occupants per room (number of persons who live in the household divided by the total number of occupied rooms of the household). Households, who live in housing units with unknown number of rooms are not considered in the calculation.

**Average Housing Density:**

It refers to the average number of persons living in the room. This average calculated through dividing the total number of individuals for a certain category by the total number of rooms for that particular category.

**Availability of Durable Goods:**

This section refers to the durable goods owned by the household: Private car, refrigerator, solar boiler, central heating, home library (availability of a minimum of 10 non -scholastic books used for developing the cultural, religious aspects of knowledge ...etc.), cooking stove, washing machine, television, video, computer, phone line (other than mobile phones).

## Main Results

The findings of the Population, Housing, and Establishment Census of the West Bank, conducted during 1/12/ -16/12/2007, show that the number of housing units in the West Bank is 414,493 and 369,790 in the Remaining West Bank, which means an increase of 43.9% in comparison with the 1997 Census.

The Census findings also show that the number of Persons in the West Bank housing units totals 2,279,452 and the 2,054,036 in the Remaining West Bank. This points to an increase of 28.9% in comparison with the 1997 Census.

**Figure 1: Number of Occupied Housing Units and Persons in the Remaining West Bank by Year 1997, 2007 (in Thousands)**

### 3.1 Occupied Housing Units by their Type

Findings show that 221,060 of the occupied housing units of the West Bank are of apartment type. The figure constitutes 53.2% of the total occupied housing units. Moreover, according to the findings, the number of occupied housing units of house type is 178,924 or 43.2% of the total number of occupied housing units. The number of occupied housing units of villa type is 6,841 or 1.7% of the total number of occupied housing units in the West Bank.

### 3.2 Occupied Housing Units by Tenure of Housing Unit

The Census finding show that the majority or 299,979 of the occupied housing units in the Remaining West Bank are owned by one of the household's members. This constitutes 81.0% of the total number of the occupied housing units. On the other hand, the unfurnished rented occupied housing units constitute 8.9% or 32,744 of the occupied housing units. The furnished rented occupied housing units constitute 0.7% or 2,596 of the occupied housing units.

### 3.3 Housing Density

The average housing density in the West Bank, according to the findings, is 1.6 ( persons per room). The Census data show that approximately 11.3% of the West Bank households live in housing units with a housing density of 3 or more persons per room. The average number of occupied housing units rooms in the West Bank is 3.5 rooms.

**3.4 Occupied Housing Units by Main Water Source**

The public water network, according to the findings, is the main source of water for the majority of the occupied housing units in the Remaining West Bank at 80.8%; alternatively, the rain water gathering wells constitute the main source of water for 8.2% of the occupied housing units.

**3.5 Occupied Housing Units by Connection to the Electricity Network**

The Census findings show that the majority of the occupied housing units in the Remaining West Bank is supplied with electricity at 97.7% of the occupied housing units totaling 361,234 housing units. The percentage of housing units using electricity generators is 0.9% or 3,381 housing units. On the other hand, 0.7% or 2,509 occupied housing units are not connected to the electricity network.

**3.6 Occupied Housing Units by Connection to the Sewage System**

Findings show that the percentage of occupied housing units in the Remaining West Bank, which are connected to cesspits is 65.1%. The percentage of occupied housing units linked to a public sewage system is 32.8% and the percentage of occupied housing units that are not linked to any sewage system is 1.2%.

**3.7 Availability of Durable Goods**

According to the Census findings, gas/electric cookers, televisions, refrigerators, washing machines, and satellite dishes are available to most households in the Remaining West Bank at 96.9%, 93.1%, 91.9%, 89.7%, and 81.4% respectively. The other goods are available in different percentages. In urban areas, the most available durable goods are gas/electric cookers, televisions, refrigerators, washing machines, and satellite dishes at 96.8%, 93.5%, 92.4%, 90.5%, and 82.7% respectively. On the other hand, in rural areas, the most available durable goods are gas/electric cookers at 96.9%, televisions at 91.7%, refrigerators at 90.4%, washing machines at 87.8%, and satellite dishes at 78.6%. The most available durable goods in refugee camps are gas/electric cookers, televisions, refrigerators, washing machines, and satellite dishes at 98.1%, 95.1%, 93.4%, 89.5%, and 80.0% respectively.

**Figure 2: Number of Households in the Remaining West Bank by Availability of Durable Goods, 2007 (in Thousands)**

## Chapter Four

### Methodology

#### 4.1 Census Coverage

The PHC-2007 covered all individuals who were in the Palestinian Territory on the census reference night (30/11-1/12/2007) regardless of nationality and citizenship. It also covered all Palestinians who have usual residence in the Palestinian Territory (including those who were temporarily absent for less than one year for the purpose of visit, tourism, treatment, etc. while their households are still living at their permanent places of residence in the Palestinian Territory). All Palestinian students abroad while their households are still living at their permanent places of residence were also included, in addition to all prisoners and detainees in the Israeli jails regardless of the duration of detention. The census excluded all Palestinians holding identity cards who were absent for more than one year (except for the students), even if their households are still living in their places of residence in the Palestinian Territory. This was a decision made by the Census National Committee in its first meeting. The resolution states the following

1. **Determine the coverage of the census to include the entire population, housing and establishments in the Occupied Palestinian Territory in 1967, with the exception of Israeli settlements.**
2. **The enumeration includes the following categories of individuals:**
  - A. All individuals living in the Palestinian Territory at the census reference date regardless of nationality, citizenship and reason of presence, and regardless of where present in the Palestinian Territory.
  - B. All Palestinians who live abroad temporarily and for less than a year whose normal place of residence is in the Palestinian Territory, are to be counted with their households.
  - C. All Palestinians who are studying abroad, regardless of the duration of the study and length of residence abroad, and all individuals detained in Israeli jails regardless of the period of detention, are to be counted with their households.

#### 4.2 Special Questionnaire of Jerusalem Governorate

Due to the special situation in the governorate of Jerusalem, particularly (J1) area. A summarized questionnaire has been designed especially for household and housing conditions for the J1 area of Jerusalem containing the following questions:

1. Number of nuclear households, type of housing unit and number of rooms.
2. Household members booklet which includes (head of the household relationship, sex, religion, age, refugee status, educational level and marital status).

#### 4.3 Questionnaires and Forms

Three questionnaires have been designed for data collection which are: listing of buildings, housing and households questionnaire, the household and housing conditions questionnaire and economic establishments questionnaire. An additional questionnaire has been allocated for hotels. The following is a detailed demonstration of the items and variables of these questionnaires:

#### **4.3.1 Buildings, Housing and Households Listing Questionnaire**

The questionnaire of buildings, housing and households contains in addition to the identification data, a number of items and detailed variables including:

The owner's name or the name of the building, the type of building, current use of the building, type of owner, the year of establishment, construction material for external walls, the number of floors in the building, the number of housing units at the building, current use of the housing unit, and the reason for the closure, absence, desertion of closed units, or abandoned.

#### **4.3.2 Households and Housing Conditions Questionnaire**

The questionnaire of households and housing conditions in addition to the identification data, has the following items and variables:

##### **Section I: Housing Data and Conditions**

Housing data includes occupation type, housing type, number of rooms, number of nuclear households, housing property, number of bedrooms, connectivity of public water, electricity and sanitation, availability of a kitchen, bathroom and toilet, the method used for the disposal of household wastes, the main source of energy used in cooking and heating, availability of durable goods to the household, available information technology for the household.

##### **Section II: Individuals Data**

- A. Data of all individuals regardless of their age, sex and nationality which are: the name, the head of the household, sex, date of birth, age in completed years, original nationality, religion, usual place of residence of the individual's mother when giving birth, usual place of residence, duration of residence in the usual place of residence, previous place of residence, and reason for changing previous place of residence.
- B. Data of Palestinian individuals which are: identification number, the refugee status, and difficulties or disabilities that might cause suffering for the individuals in case they exist and availability of insurance.
- C. Data of all individuals aged 5 years and over, namely: education, number of study years which are successfully completed in the formal educational system, usage of computer.
- D. Data of all individuals 7 years and over, namely: relation to labor status, main occupation, economic activity, sector activity status and place of work.
- E. Data of all individuals 10 years and over, namely: education level, specialization, place of getting higher education level and vocational training obtained by the individuals.
- F. Data of all individuals aged 12 years and over, namely: marital status, age at first marriage, duration of marriage, the number of live births and the number of them still alive males and females throughout the duration of marriage for women, and the number of live births and the number of them still alive males and females during the previous year.

##### **Section III: Household Members**

Summary of the number of household members divided into males and females.

##### **Section IV: Tourism and Kindergartens**

Tourism inside and outside Palestine; children enrolled in kindergartens by sex.

##### **Section V: Agricultural Holdings**

Includes the individual holder in the questionnaire, and the number of agricultural holdings by type (plant, animal, and mixed).

## **Section VI: Mortality**

Includes questions about a case or more of death in the household during the 12 months preceding the census and thus the name of the deceased and their relationship to the head of the household, sex and age at death and whether death was during pregnancy and childbirth and that for females in the stage of pregnancy and childbearing.

### **4.4 Fieldwork**

Fieldwork stage of implementing the Population, Housing and Establishment Census-2007 includes several consecutive fieldwork operations which are:

#### **4.4.1 Updating Maps**

PCBS proceeded to conduct a comprehensive updating of the maps for all Palestinian localities in early November 2006, which was completed at the end of June 2007. All localities were visited and their maps which had been prepared by the Census National Committee for nominating and enumerating the localities were updated.

After the completion of amendments to the maps, localities were divided into enumeration areas; each one includes about 150 housing units, with the exception of small localities that include less than 150 housing units, where each locality was considered to be an enumeration area, regardless of the number of the housing units accompanied by identifying aspects of the census fieldwork teams: supervisors, observers and enumerators. Everyone was allocated a specific area of work on maps to avoid overlapping or under counting of enumeration areas; many copies of the maps were photocopied for field work teams and the central operations room. The number of enumeration areas reached 4,916.

#### **4.4.2 Identifying and Delineation Enumeration Areas**

Supervisors put signs on the walls of buildings located on the outer borders of enumeration areas of the 4,916 areas distributed on localities in the West Bank and Gaza Strip except (J1). The implementation of this process took 25 days from 18/08/2007 to 11/09/2007.

#### **4.4.3 Numbering and Counting of Buildings, Housings and Households as well as Establishments**

The observers and their assistants carried out this process in all localities during the period from 20/10/2007 to 10/11/2007 through checking all buildings and putting the census number on the entries as well as the numbering of all housing units in each building, and collecting main data of the buildings and the housing units.

The main objective of this operation is to provide a range of important data on the numbers and characteristics of the buildings for use in policy making concerning housing. This process also aims to facilitate the work of enumerators in the implementation stage of counting the population. The observers during these operations have given each household a reminder questionnaire to be filled in on the morning of 01/12/2007 regarding the people who spent the reference night which is (30/11-01/12/2007) in housing and submit it to the enumerator to assist in the process of counting the population and ensure accuracy and coverage.

#### **4.4.4 Population Count**

This process was implemented in the West Bank during the period from 01/12/2007 to 16/12/2007, while in the Gaza Strip it was implemented during the period from 25/12/2007 to 08/01/2008, where enumerators visited all the households in their homes and obtained data on

the housing in which they live and their different characteristics, as well as all household members and registered the demographic, social and economic characteristics of each household member.

#### **4.4.5 Receipt of Booklets**

The process of receiving booklets started after each enumerator had covered his/her enumeration area, which ended in the West Bank in the evening of 16/12/2007, and in the Gaza Strip in the evening of 08/01/2008. The process of receiving booklets is divided into two parts: fieldwork receipt, and then delivery to the censuses directorate in PCBS premises.

#### **Receipt of Booklets from the Fieldwork**

After the completion of the counting phase, the observers received all booklets and questionnaires from the enumerators which are: the household and housing conditions booklets, the enumerator organizational book. After receiving them, the observers submitted them to their supervisors, where they also conducted a technical check. The receiving process began in the West Bank as of 16/12/2007 and lasted until 25/12/2007 (during which was the holiday of Eid Al-Adha), while in the Gaza Strip it started from 08/01/2008 until 12/01/2008. All booklets were handed over to PCBS main premises in Ramallah and Gaza.

#### **Receipt of Booklets in PCBS Main Premises**

The receipt process started in the main premises in Ramallah from all governorates on 29/12/2007 and ended on 07/01/2008 in the West Bank, while it started on 24/01/2008 and ended on 26/01/2008 in the Gaza Strip.

#### **4.4.6 Post Enumeration Survey**

Post enumeration is considered to be a developed technique of assessing and evaluating census findings. It was implemented through selecting a random sample of 218 enumeration areas representing all types of localities. The purpose of conducting such a study was to measure the rate of coverage and individuals in the Census-2007 to take these rates into account when preparing estimates of the population in the years to come after the census.

The field work was implemented during the period from 29/12/2007- 03/01/2008, and 12/01/2008-16/01/2008 in the Gaza Strip. The process of editing the selected booklets for this survey was begun, matching them with the booklets of household and housing conditions which were obtained during the process of counting the population, i.e., data entry, data processing and extracting findings. These processes ended on 30/01/2008.

#### **4.4.7 Preparation of the Preliminary Results**

After the completion of the counting process on 16/12/2007, the enumerators and observers carried out a desk review and prepared the preliminary results in the fieldwork from 16/12/2007 until 18/12/2007. After that, during the period from 24/12/2007 until 30/12/2007 preliminary results were compiled and reviewed by census managers in the governorates and then sent to the Census office in PCBS main premises. This operation was carried out in Gaza Strip during the period from 08/01/2008 until 15/01/2008.

After the receipt of the preliminary results forms from the fieldwork by the end of December 2007, which included a number of households and individuals both males and females at the level of the enumeration area, this data was entered into computers to extract preliminary statistical tables at the level of Palestinian Territory and the governorates level. These tables contain the number of households and the number of male and female individuals.

During the receipt of preliminary results, their coverage had been thoroughly checked which covered all enumeration areas to be compared with the main enumeration areas booklet to make sure that no enumeration area was dropped.

#### **4.4.8 Data Processing**

Data processing stage includes all the stages after the fieldwork such as: editing, coding, data entry, electronic editing and disseminating through both the traditional methods (Publications) and online and on CDs and databases. Data processing was carried out in the West Bank by having two work shifts. This process started on 13/01/2008 by training editors and coders, and about 120 employees had been hired for each work shift in addition to the supervisor crew for each shift.

#### **4.4.9 Preparation of Final Findings Stage**

During this stage certain basic steps had been achieved of which the most important were: data processing, tabulation and dissemination.

## Data Quality

### 5.1 Introduction

There are two types of errors that can occur: statistical errors and non statistical errors. Statistical errors occur in surveys using samples and do not exist in the censuses. It is easy to measure errors and to estimate the rate of errors since it results from errors in the sample. While non-statistical errors are possible to occur at any stage of the implementation of the censuses or surveys, there was a need for developing a system to control the quality of census data during the implementation of the second Palestinian Census of 2007 since there were many stages of work in planning and implementing the census requiring a great number of employees hired for a short time, with variation in work quality from one to another that could badly affect the findings of the census and their reliability.

The main objective of the quality control programme is to prevent or reduce the incidence of errors to the greatest extent possible and to detect errors in order to take appropriate measures to correct them. Without using such a programme, census data might contain many errors and may not be suitable for use.

To achieve the required efficiency, an efficient system of quality control at all stages of the census had been developed to control all stages from the very beginning of the preparatory stage till data processing and dissemination to guarantee high level of data quality. Quality control is of vital importance particularly in the planning stage since it is connected with all stages to come, and thus every stage was allocated enough time and procedures to ensure the achievement of high quality and reliability of census data.

### 5.2 Control Procedures in the Preparatory Stage

The preparatory phase took into account the development of simple definitions and instructions and compatibility with international recommendations and the needs of beneficiaries in the design of questionnaires to the extent that instructions could be transferred honestly. Attention was paid to ensure that all booklets and questionnaires would be received and stored, and that all booklets and questionnaires would be entered into the computer in addition to preparing certain forms to control quality of work, achievement and the design and selection of data entry programs beforehand.

A plan was made for updating localities, enumeration areas manual, and detailed maps of the enumeration areas manual, where every establishment, building, housing, household and individual were counted, and adequate attention was given to special localities such as nomads, since they were covered in the census. Clear and simple instructions were developed for counting personnel at border crossings and the residents of collective housing.

It also set up a procedures to examine the coverage rates for individuals and households through the post Enumeration Survey. Also taken into account was the printing of booklets and questionnaires to validate data collection, entry and storage. A certain type of indexed bags was used for keeping the households and housing conditions booklets as well as the buildings booklets to be easily reached and used.

Through a pilot census comprehensive testing was done for all questionnaires, tools, procedures, forms, fieldwork and office editing, PES, printing of questionnaires and manuals at

this stage, selection of data entry programs and error detecting programs, reviewing lists and coding manuals and tabulation processes and preparatory stage dissemination in advance. The expected requirements of human and financial resources, time schedule for the completion of all activities in this stage had been estimated in advance.

### **5.3 Control Procedures in the Implementation Stage**

#### **5.3.1 Selection and training of employees**

Given the magnitude of this project, multiple levels and the volume of its employees, it was necessary to develop procedures that ensure the collection of reliable data, since maps of each area were updated under continuous supervision from the project management, and to re-divide enumeration areas according to the ability of fieldworkers in various activities so as to achieve them on time.

It had been taken into consideration to select the best qualified unemployed employees particularly those with scientific qualifications like diploma and B.A. since there are many in nearly all the governorates except (Ramallah and Al-Bireh, and Jerusalem) where we had to employ a small number of Palestinian university students as enumerators, and also that the fieldworkers have to be from the same locality to guarantee their efficiency in carrying out their mission.

Plans and training programs for all employees had been prepared in advance: census managers had been trained in the governorates first and then trained supervisors, who participated in turn in the training of enumerators and observers. As a precaution, PCBS trained in each stage an additional 30% of the actual required employees as alternates in case of resignation, dismissal, emergent conditions, and low achievements.

#### **5.3.2 Data collection**

Fieldworkers were distributed so that each supervisor had responsibility for managing 5 observers, and each observer had to supervise 5 enumerators, while each enumerator had to collect data for about 150 housing units within 15 days. The basics of selecting the employees depended on the a unified assessment (test); the individuals who got the highest grades were selected and employed, while the census directors (PCBS Managers) were selected for their considerable experience in administrative and statistical work, and some of PCBS statisticians and fieldworkers were appointed to work as supervisors.

With regard to the method of counting, the direct interview technique was used and the necessity of getting data from the head of households, or from a reasonable adult person. In case of the absence of the head of household or non-existence of the right person, the enumerator pays other visits to the household at different periods of time until he/she collects the data from the qualified person.

Enumerators had also depended on official documents in terms of collecting basic data such as name, date of birth, identification number, and submitting a reminder questionnaire to the households to fill in the basic required data before the actual counting to save time and facilitate the mission for both households and enumerators. Moreover, specific instructions had been given to all employees of all levels in how to carry out fieldwork and desk reviews, and in how to review and correct the errors. The supervisor, for example, had to check himself/herself part of the questionnaires for at least 2% of what had been achieved by the observer and the enumerator in addition to checking the coverage and quality of data, particularly on the first

days of work, and supervising the daily desk and fieldwork. As for observers, they have to collect 5% of the data from the households that the enumerator had collected to ensure household coverage and consistency of individual data, and notifying the enumerators of their errors.

Every supervisor had to meet his/her fieldworkers subordinates on a daily basis to give new directions and instructions received from the operations room to correct errors that occurred in the previous day and to avoid errors . Those supervisors had to conduct a daily desk review of what had been achieved by their subordinates. A campaign had accompanied all activities of the census, and included all means of media, and as the census date approached, to ensure greater cooperation of the citizens census crews.

Many types of forms were developed regarding either the daily accomplishments and follow up or the accomplishment of the preliminary findings and related materials, documents, booklets, received supplies or deliveries, control of employees work duration and follow up forms of households coverage which were prepared ahead in stage of enumerating buildings and others.

A central operations room was formed at the PCBS headquarters in the West Bank and another in the Gaza Strip whose main task was to work 24 hours a day, including technicians, administrators and support services to answer queries and to meet the needs and requirements and issuing any written general instructions. This was in addition to the group of assistants in each governorate to assist the census director.

This census was also significant for using decentralized databases in the governorates, through which the employees daily achievement was registered and which controlled all technical and administrative work processes in all stages. This helped the Census management and the central operations room at the headquarters of PCBS to control and follow-up on work at various levels and take necessary action in the suitable time.

The post enumeration survey was implemented for 4% of the total enumeration areas aiming at examining the coverage rates of individuals and households, and a complete re-count of all households and individuals in selected enumeration areas was conducted. This study showed under coverage of individuals reached 3% in the West Bank.

### **5.3.3 Refusals Cases**

Several procedures were developed to cope with the refusal cases by some private citizens especially in the Jerusalem Governorate and surrounding communities resulting from Israeli harassment toward the Palestinians residing in Jerusalem and the surrounding areas. These procedures included field visits by members of the central operations room to deal with such cases, and participation of officials to eliminate these cases.

### **5.4 Control Procedures in the Stage of Data Processing**

Data processing stage includes editing, coding, data entry, reviewing lists and checking all previous operations to data entry for all enumeration areas. All procedures and instructions were made so as to check the consistency of the data and coding fields and ensure the entry of all enumeration areas as well as all booklets and questionnaires, and their content of buildings and housing units, households and individuals data. As procedures to check the booklets and questionnaires and the process of moving them from one operation to another, to ensure that all operations required for each form were properly implemented, a store was prepared for all the

documents to be indexed and categorized, so that the store keeper controlled the flow of bags and booklets and the preparation of daily achievement.

Coding manuals were prepared and examined beforehand as well as the instructions for editing and coding procedures for checking the consistency of the data and how to detect and correct errors. All editing and coding employees were selected among the best fieldworkers who collected the data from households and individuals. Training was conducted for them centrally to ensure unifying of concepts and checking data to eliminate disparities in fieldwork in all governorates. Editing, coding and testing consistency of (100%) of the questionnaires was conducted, in addition to desk reviewing, editing and coding (100%) in order to eliminate differences between individual editors, and to discover and correct errors and circulating them daily.

With regard to data entry, tests had been held for all applicants, and those that performed best on the exam were trained centrally on a unified procedures of data entry. During the first three days all what had been entered was deleted to be reentered again to correct errors and notify the employees to avoid such errors in the future. Certain procedures were adopted to ensure the correctness of data entry, since in the first stage a unique separate file was prepared for each enumeration area that included identification data (to ensure coverage) including the number of households and the total number of booklets to ensure that all booklets and all households had been entered. Upon data entry a thorough examination of the identification data and the range of each digital key question was conducted, so that the computer did not accept any figure outside this range, such as the head of the household relationship, sex and all the pre-coded questions in the household and housing conditions questionnaire, and the type of building in the buildings questionnaire, for example. The Remaining other questions were exposed to a comprehensive re-examination of the range of each question after data entry, and extraction errors lists resulting from data of inconsistency.

After data entry certain lists were extracted to ensure the coverage of data entry of all enumeration areas, buildings, housing units, households and individuals, and to examine the internal consistency of the data of each unit. The used procedures were to extract errors lists that must be corrected or questioned, and these lists were submitted to the best reviewers under full supervision of the technical operations in the censuses directorate.

Certain prepared previously programs were used to detect errors according to the following procedures:

1. A manual was prepared for instructions of desk editing and the procedures of the questionnaire of the household and housing conditions, as well as a set of desk editing instructions printed on paper, and the procedures of the questionnaire of buildings, containing all the tests, whether the tests designed to ensure the coverage of data entry, to detect inconsistency errors or to detect abnormal and rare cases; they were reviewed, and there is a printed name and number for every error in the manual to be easily found.
2. A list was extracted for each enumeration area including the identification data of each building, housing unit, household or individual message (Type of Check) and the number printed in the manual, which helps the auditor to recognize the message name and type of error, location and procedures of editing and audit procedures patch, which consists of more than (600 ) checks on several stages.
3. Lists were submitted to the reviewers to go back to the original booklets; if the error was caused by the data entry, it would be corrected on the list, but if the error was due to

fieldwork, all associated questions should be considered for correction. For example: if the type of housing was a tent or a separate room, the number of rooms must be (1) by definition, so the first treatment would be conducted through manual editing, then extracting the electronic lists after data entry for such types of tests, then they were corrected manually on the original booklets, and data were reentered correctly. As for the coverage test, there is a key reference that contains all enumeration areas and shows the number of booklets and households in the enumeration area then to be entered to computer. At this point if there was a variation between the number that was actually entered of booklets and households, and what was entered of the total number of households in the file of each area, an error message appears to indicate it to be corrected. Through this method we ensure that 100% of the households were entered. By the same method we ensure that all household members were distributed to males and females and that 100% of them were entered through connecting the manually prepared summary of household members and the entered data of each household, and the individuals number distributed to males and females through the individual successive number in the household to ensure that 100% of households members were counted and entered according to their gender, in addition to the existence of a unique successive number for each household in the enumeration area.

As for dealing with the non applicable, they were coded as non applicable and represented by the figure (9) according to the number of digits for each question unless there is a certain indication that leads to selecting the suitable answer for variables such as: type of house and tenure of the house and other variables in the questionnaire of households and housing conditions.

1. Extracting all enumeration areas lists through this way and all kinds of tests.
2. Amended lists were sent back to data entry to be entered and corrected, and a copy of the daily entered data was kept in several different places.
3. Previous stages were conducted twice or more until the data of each enumeration area became clean.
4. All files were compiled for enumeration areas for each locality of each governorate. Then all tables and any additional tests were conducted in participation of all specialists in the different areas (Demography, Education, Labor Force, Housing, Buildings, etc.) to test the data before the final tabulation in order to correct errors according to the aforementioned procedures.

### **5.5 Data Quality Assurance**

The process of census results evaluation by estimating the values of errors and trends is considered to be a necessary process to answer questions concerning the accuracy and the coverage of census data and to defend the credibility of the findings against skeptics. There are several methods and tools to evaluate the results of the census in terms of coverage and content, which includes either a single source of data (the census itself) or multiple sources. The use of multiple sources, in turn, is one of two ways: either by comparing the booklets of individuals or comparing the overall values.

The quality testing programme for the Census 2007 contains several methods for measuring the quality and the coverage of data and trends, concentrated in several areas such as: Post Enumeration Survey (matching individual booklets), the comparison with administrative booklets, the comparison with the results of household surveys, conducting demographic analysis. The following is a detailed explanation of these areas:

### **5.5.1 Post Enumeration Survey (PES)**

The Post Enumeration Survey is a sample survey conducted shortly after the census to assess the census. PES usually consists of two types of match studies: identical study to measure coverage errors and re-interview survey for the purposes of assessing the errors in the content of census data with respect to indicators of population.

The Enumeration Survey is usually the only reliable method of measuring errors in the census coverage in developing countries, if we take into account the lack of accurate administrative registers, and the limited availability of accurate demographic data on fertility, mortality and internal migration. In addition, the method of matching individual records provides the possibility of getting separate estimates on both coverage errors and content errors which is not easily achieved in the studies that do not adopt the method of matching individual records.

In the PES the quality control of data is easier due to the limited area of study, that is, a sample of areas. On the other hand, PES process includes an additional operation that is not included in the census, which is the matching process between census booklets and the booklets of PES and this additional step would include non-statistical errors. Due to this, all requirements of supervisors and enumerators should be prepared and well qualified, so the rate of supervisors to enumerators should be (1 to 5). It is necessary to appoint distinguished and adequately trained matching officials at all stages.

Although that the Enumeration Survey was not designed to be fully independent of the census, since the enumeration areas of the census will be used as preview units for the Enumeration Survey, the following points should be taken into account since they would lead to independence in practical actions:

1. The return of all census questionnaires from the field before the start of counting in the Enumeration Survey.
2. Counting the areas of the Enumeration Survey by crews of fieldworkers excluding those who worked as enumerators in the census (it is logical to employ census supervisors and observers to work in the Enumeration Survey in order to benefit from their experience, as long as they are appointed to work in other areas than those they worked in during the census).
3. The employees of the Enumeration Survey must not have any preliminary information about census findings in the enumeration areas in which they are going to work.
4. The employees of the census also must not know what enumeration areas will be selected to conduct the Enumeration Survey later.
5. The data of the Enumeration Survey must be separately processed from the census data.

### **Describe the Used Frame**

The frame of the Enumeration Survey includes all the enumeration areas of the Census-2007 which totaled 4,916 enumeration areas distributed in all governorates of the West Bank and Gaza Strip. To implement the Enumeration Survey, 218 enumeration areas were chosen to be a stratified cluster sample designed for a single-stage, where all households in selected enumeration areas in the sample were collected.

### **5.5.2 Assessment of Coverage Based on PES**

Rate of coverage was estimated for the individuals on the national level and key areas of research. The following table shows these percentages for the West Bank

**Percentages of the coverage and under coverage rates for individuals at the governorate level in the West Bank**

<b>Governorate</b>	<b>Coverage Rates</b>	<b>Under Coverage Rates</b>
Jenin	98.1%	1.9%
Toubas	95.8%	4.2%
Tulkarm	99.2%	0.8%
Nablus	98.5%	1.5%
Qalqilya	97.1%	2.9%
Salfit	98.7%	1.3%
Ramallah and Al-Bireh	94.0%	6.0%
Jericho	95.5%	4.5%
Jerusalem	95.8%	4.2%
Bethlehem	96.4%	3.6%
Hebron	97.5%	2.5%
<b>Total of the West Bank</b>	<b>97.0%</b>	<b>3.0%</b>

**5.5.3 Internal Data Consistency Testing**

Given the fact that the Population, Housing and Establishments Census-2007 is the second census on population, households, individuals, buildings and housing units and their detailed characteristics, the issue of testing data quality by all possible means was of paramount importance, especially the internal data consistency and comparing the findings with other surveys.

Based on the distinct experience of the census, certain instructions were developed during the fieldwork implementation to assure getting high data quality, and develop procedures and forms to control supervision and follow up.

Certain rules for desk editing and procedures of detecting consistency errors and correcting them had also been drawn up. During the cleaning process, many tables and detailed editing were extracted, reviewed and tested by the Censuses directorate and by those concerned with the subject from the other directorates.

In addition, a copy of the raw data was handed over to each subject specialist to test the accuracy and data quality and consistency of procedures before the process of extracting the final tables and to make any adjustments required.

### 5.5.4 Findings Comparison with Other Sources

The census data and indicators were compared by the subjects officials and census directorate with the common data and indicators of surveys. A comparison was conducted between the key indicators and the derived rates from census data in several areas. Comparison was made with the indicators of the Household Health Survey 2006, Demographic Survey 2004 and Health survey 2000, in addition to various comparisons with previous census findings of 1997, particularly with regard to population, distribution of gender and age, total fertility rates, average household volume and household composition, and results indicated a great amount of consistency between them. Comparison of disability indicators with Census-1997 findings, and Health Survey 1996, was difficult and even impossible due to variation of the concepts of disability and difficulty.

With regard to housing and housing conditions, data were compared with indicators of census and household surveys common indicators, particularly in the indicators of the number of rooms per household, housing density, and the type of housing, in general; most results were close and logical.

When comparing the Census-2007 with Census-1997 indicators and with certain selected surveys, the results were as they appear in the next table, where the data indicated age structure and quality, percentage distribution of the households depending on the type of household, the average household size, and others. The data was of high quality and differences are logical and justified and there is consistency between indicators drawn from different sources, taking into account the reference date and work methodologies to explain the differences in case it exists.

### Comparison Table Between Selected Indicators in Census and Some Surveys

Indicator	Census 1997	Health Survey 2000	Demographic Health Survey 2004	PAPFAM 2006	Census 2007
<b>Proportional distribution of the households</b>					
consisted of One person	3.7	4.3	5.0	4.1	4.2
Nuclear household	74.0	79.0	82.7	80.7	83.2
Extended household	21.7	16.5	12.2	15.0	12.4
Compound household	0.6	0.2	0.1	0.2	0.2
Household Size	6.1	5.7	5.5	5.9	5.5
No. of persons per room	1.9	2.0	1.8	1.8	1.6

### 5.5.5 Dealing with not stated

As for dealing with the non applicable, they were coded as non applicable and represented by the figure (9) according to the number of digits for each question unless there is a certain indication that leads to selecting the suitable answer for variables such as: type of house and tenure of the house and other variables in the questionnaire of households and housing conditions.
