فخامة الرئيس محمود عباس "أبو مازن"
رئيس اللجنة التنفيذية لمنظمة التحرير الفلسطينية
رئيس السلطة الوطنية الفلسطينية

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

السلطة الوطنية الفلسطينية

منظمة التحرير الفلسطينية

بسم الله الرحمن الرحيم

تقديم من سيادة الرئيس محمود عباس "أبو مازن"
رئيس السلطة الوطنية الفلسطينية

يعتبر التعداد العام للسكان والمساكن والمنشآت ركناً أساسياً من أركان النظام الإحصائي الرسمي في أي دولة، حيث يأتي تنفيذه خلال عام 2007 استحقاقاً قانونياً وتنموياً ووطنياً وسيادياً، ويمثل تنفيذه لبنة أساسية في عملية بناء الدولة وإرساء أسس التخطيط السليم بمعايير علمية نظراً لما يوفره من إحصاءات دقيقة وتفصيلية لكافة نواحي الحياة، ويساهم في بناء الدولة الفلسطينية وإنجاز الاستقلال السياسي والاقتصادي والاجتماعي، وتحقيق التنمية.

لقد جاء تنفيذ هذا المشروع الوطني الكبير في ظل ظروف غاية في التعقيد على مختلف الأصعدة، مما جعل تنفيذ التعداد مهمة صعبة تعترضها الكثير من التحديات والأخطار، إلا أن عزيمة الشعب الفلسطيني وإصرار الفريق الوطني، واحتضان القيادة السياسية جعلت من التغلب على هذا التحدي أمراً ممكناً أدى إلى تنفيذ التعداد العام الثاني في الأراضي الفلسطينية بجودة عالية وفق المعايير الدولية، بأيد وبخبرات فلسطينية وبقرار فلسطيني مستقل، واستجابة للحاجات الوطنية في شتى المجالات.

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

السلطة الوطنية الفلسطينية

منظمة التحرير الفلسطينية

لقد أسهم التعداد في إعادة الموضوع التنموي على الأجندة الوطنية والدولية في فلسطين، بعد أن تراجع دورها لصالح الأجندة الإغاثية، فالتنمية أهم الدعامات الضرورية لتأسيس مجتمع ديمقراطي، وبناء إنسان حر ملتزم بالمبادئ الوطنية والإنسانية. والإحصاءات الدقيقة والعلمية هي العمود الفقري لوضع خطط تنموية مبنية على أسس سليمة تشكل رافعة لقضايا التنمية وتحقيق الأهداف المعلنة عليها.

لقد أبدى المجتمع الدولي اهتماماً بالغاً بهذا المشروع التنموي وعبر عن اهتمامه من خلال الدعم المادي والفني الذي قدمته بعض الدول الصديقة والمنظمات الدولية. فقد كان لصندوق الأمم المتحدة للسكان مساهمة مادية وفنية جادة، وكذلك صندوق أوبك للتنمية الدولية، وحكومات النرويج وهولندا وسويسرا وأستراليا، والمملكة العربية السعودية ومنظمة الأمم المتحدة للطفولة "اليونيسيف".

إننا إذ نهدي هذا الإنجاز التاريخي الى كل فلسطيني، فإننا نعبر عن تقديرنا وشكرنا لأسرة الجهاز المركزي للإحصاء الفلسطيني والفريق الوطني للتعداد على إصرارهم وعطائهم وتفانيهم في تحقيق هذا الإنجاز.

رام الله: 2008/5/22

محمود عباس

رئيس اللجنة التنفيذية لمنظمة التحرير الفلسطينية

رئيس السلطة الوطنية الفلسطينية

Acknowledgments

The Population, Housing and Establishment Census (PHC-2007) is the second census conducted by the Palestinian Central Bureau of Statistics (PCBS) since the Palestinian National Authority (PNA) was established in 1994. The PHC-2007 was conducted in a very critical and complicated political, administrative, financial and organizational environment. It could not have been accomplished without the generous support of a number of friendly countries, international and national institutions and personalities.

The implementation of the PHC-2007 was co-financed by the PNA, United Nations Population Fund (UNFPA), the Core Funding Group (CFG) of PCBS (Norway, Netherlands, and Switzerland), OPEC Fund for International Development (OFID), Australia, and the United Nations Children's Fund (UNICEF), and the European Union (EU).

PCBS would not have been able to implement the PHC-2007 as a national project in such complicated circumstances without the important contribution made by the PHC-2007 National Higher Committee, the committees in the governorates, publicity campaign committees, and many other official and popular supporting committees and bodies.

We would also like to highlight the outstanding efforts made by the Census National Director, Executive Director, and all census national team members to plan, manage, implement, supervise, monitor, and coordinate census activities: senior assistants of the national and executive director, census directors in the governorates and their assistants, coordinators of the publicity campaign and their assistants, field supervisors, field observers, enumerators, administrators and other team members.

Printing of this document has been produced with financial assistance of the EU. The contents of this document are the sole responsibility of the PCBS.

PCBS extends its deep thanks to all of these personalities and institutions for the tremendous efforts they exerted to bring the second Palestinian census to light.

PCBS President / Census National Director

Preface

The PHC-2007 is an important pillar of the national development process. It is a primary prerequisite for the socioeconomic planning. Furthermore, it helps reinforcing the Palestinian sovereignty on the ground. Countries around the world usually conduct censuses every decade according to the degree of population stability, the amount of potential changes in the demographic characteristics and the availability of the financial resources.

Realizing the importance of bridging the gap between society's statistical needs the current situation in the Palestinian Territory conducted the first national population, housing and establishment Census in 1997. PHC-2007 has been conducted for legal, development and statistical considerations. Success is vehemently attributed to the colossal efforts exerted by the national census team and the continuous support of the Palestinian leadership.

The main objective of the PHC-2007 is to update statistical data on the Palestinian population, housing units, economic establishments and agricultural holdings, and to provide small area statistics to the planners and decision makers. PHC-2007 will contribute to realizing a balanced and comprehensive development in all sectors.

PHC-2007 was designed and implemented in accordance with the United Nations principles and recommendations of Population and housing census taking into consideration the local Palestinian needs. Special attention was given to affording complete and adequate data on the size, structure, distribution and characteristics of the demographic, economic and social components of the Palestinian population; the characteristics of housing units; the number and characteristics of the economic establishments and making an inventory of the agricultural holdings. Consequently, obtained statistical data will foster and support the role and efficiency of planning both on the national and local governments levels.

In an effort of PCBS to provide the users with the census results as soon as possible, the national census team made every possible effort to fulfill that, where we were able to publish the preliminary results of the census after five weeks of the end of the census fieldwork events and this is considered a record time compared to other countries. In addition the final results of buildings and establishments for Palestinian Territory were disseminated. In a continuation of this approach this report comes as a part of detailed reports about population at governorate level.

PCBS and the national census team are pleased to present this report which contains the census final results in the west bank. Hoping to be a reference for all planners, decision makers and policy makers in the public and private sectors and civil society institutions.

February, 2009

Luay Shabaneh, Ph.D
President of PCBS/
Census National Director

Important Notes

Based on The contained data in this report is based on the following facts:-

1. Population and socio-economic data are based on the actually enumerated population and doesn't include uncounted population estimates according to the post enumeration survey.
2. Because of the special situation in the Jerusalem governorate, especially the J1 area, a reduced questionnaire has been designed especially for the household and housing conditions for the Jerusalem J1 which contains only the following questions:
 - Number of nuclear families, type of housing and number of rooms.
 - Household roster (relationship to the head, sex, religion, age, refugee status, educational level, marital status).
3. In some tables the total of percentages might not add up to 100% due to rounding.
4. A set of special symbols were used in the tables of this report. The representation of these symbols are:
 - (-) Nil (not found).
 - (0) less than 0.05%.

Chapter One

Introduction

1.1 Introduction

The PHC-2007 is the second census conducted in the Palestinian Territory. It is the largest and the most inclusive statistical operation conducted to obtain statistical data necessary for socioeconomic planning and monitoring. Given the great importance of this census, the Council of Ministers issued specific decisions at its meeting convened in Ramallah on 16/12/2006 regarding carrying out the Population, Housing and Establishments Census-2007. These decisions set the geographical scope of the census and establishing the national committees assigned to supervise the implementation.

The census is one of the pillars of the official statistical system; accordingly, all sectors of society and its private and governmental institutions were requested to support the national team which has the responsibility for planning and conducting the census activities.

1.2 Objectives

The main objective of the PHC-2007 is to provide figures for the Palestinian population and their geographical distribution in accordance with a number of relatively stable basic characteristics to inform socioeconomic development purposes. Preparations for conducting censuses take usually 3-5 years for piloting, testing tools, work plans, human and physical needs and timetable. The census is one of the most important statistical activities as it provides statistical data on the distribution of population, and their demographic, social and economic characteristics in a certain reference period of time for all the individuals within the borders of the state.

1.3 Justifications for Conducting the Census

Nationally, there is a consensus on the necessity of conducting a regular census every decade. Also, a census was considered a legal requirement according to the General Statistics Law No. 4, 2000. In particular, the census was conducted for the following justifications:

1. Comparing statistics from both 2007 and 1997 censuses for various statistical indicators and tracking the fundamental changes in population, fertility, immigration, labor force and housing conditions.
2. Measuring the impact of the Expansion and Annexation Wall on population displacement, especially in the localities through which the wall passed or totally segregates.
3. Providing small areas statistics which is essential for planning process at the micro level.
4. Realizing the goals of the millennium. This would not been achieved without a variety of indicators on development and trends of change in the population, social and economic fields, and particularly, indicators in education, employment, demography, and the population age structure.
5. Updating population projections: The availability of statistical data on the population from two censuses is one of the most important requirements for success in preparing accurate population projections for the coming years, in addition to the updating of population and establishments registers.
6. Updating households, buildings, houses and establishments sampling frames, which are essential for implementing sample-based surveys.

7. Strengthening national statistical capacities and enforcing them as a form of national sovereignty over land and population.

1.4 History of Censuses in Palestine

1. The first population census in Palestine was executed in October 1922 during the British mandate era. The estimated population was 752 thousand.
2. A second population census was executed in November 1931. The population was estimated at 1.033 million.
3. A demographic survey was executed in 1944. The estimated number of the population of Palestine was estimated at 1.74 million.
4. Under the Hashemite Kingdom of Jordan administration of the West Bank, the Palestinian population in the West Bank was estimated at 667 thousand in the 1952 census and 805 thousand in the 1962 census.
5. Under the Israeli occupation, a comprehensive enumeration of the Palestinian population was done in September 1967. About 599 thousand inhabitants were enumerated in the West Bank and approximately 400 thousand in the Gaza Strip. It is worth mentioning that about 400 thousand Palestinians were displaced from the Palestinian Territory immediately after the Israeli occupation in 1967.
6. PCBS conducted the first Palestinian census in 1997. The estimated population in the West Bank (West Bank excluding J1, i.e., the part of Jerusalem which was annexed by Israel in 1967) and Gaza Strip was 2.6 million. The estimated population of J1 at the time was about 210 thousand. The Israeli Occupation prevented the national census team from surveying the J1 population.

1.5 Stages of Census Implementation

The Population Housing and Establishment Census-1997 was undertaken in three stages:

1.5.1 The Preparatory Stage:

This stage began at the beginning of 2005 and finished in July 2007. The preparatory stage was a preliminary stage during which formal decisions on the census were announced. Different organizational structures and committees were formed during this phase. In order to meet expected governmental needs, PCBS cooperated with ministries and governmental departments so as to prepare a list of different variables and indicators.

Moreover, maps were prepared for localities, and these localities were divided into enumeration areas. Also, questionnaire design, modules, and different plans were developed in this phase.

1.5.2 The Field Work Stage:

This stage began in August 2007 and was completed by the end of 2007. It included delineation of enumeration areas, marking and listing of buildings, housing units and establishments from 30/10/1997 - 23/11/1997, and the population count from 1-16/12/2008.

1.5.3 Data Processing Stage:

This stage began in November 2007 and will continue up to the end of the year 2008. The main activities of the census data processing stage were: Office editing, Office coding, Data entry and Computer editing.

1.6 Dissemination Stages

1.6.1 Preliminary Findings

Preliminary Findings of Population, Housing and Establishments Census - 2007 were disseminated on 9/2/2008 and they were in the form of numbers at the governorate and regions level (the West Bank and Gaza Strip) and the Palestinian Territory. These results were preliminary since they were compiled manually depending on the organization books of the observers in the census. The results were disseminated in record time during a month after finishing the fieldwork operations.

1.6.2 Final Findings

After completing editing, coding and data entry of all questionnaires for each enumeration area in the West Bank, which took about 8 months, the census final results in the West Bank summary (population and housing) report was disseminated, in addition the summary reports for governorates were disseminated. In this report, the detailed final results for the census in the West Bank was disseminated.

1.6.3 Analytical Reports

The analytical reports regarding population and social themes will be disseminated through the dissemination project, which will be carried out by experts from universities and research centers.

Chapter Two

Concepts and Definitions

The definitions used in the PHC-2007 are based on the de-facto concept as the United Nations standard concepts and definitions stated in order to be consistent with the 1997 census and to ensure comparability. The following concepts and definitions were used in this report

Population Census:

The process of collection, classification, processing, analysis, assessment, dissemination of statistical data on the number of population and their distribution by basic demographic and socio-economic characteristics in a specific reference period within the boundaries of a specific geographic area.

Geographical, Administrative and Statistical Divisions

According to current administrative divisions, the Palestinian Territory is divided into two geographic regions: West Bank and Gaza Strip.

1. **West Bank** is divided into 11 Governorates (Jenin, Tubas, Tulkarm, Nablus, Qalqiliya, Salfit, Ramallah & Al-Bireh, Jericho & AlAghwar, Jerusalem, Bethlehem, and Hebron).
2. **Gaza Strip** is divided into 5 Governorates (North Gaza, Gaza, Deir Al-Balah, Khan Yunis, Rafah).

Locality:

A permanently inhabited place, which has an independent municipal administration or a permanently inhabited, separated place not included within the formal boundaries of another locality.

Locality Type:

Localities have been divided into three types: **Urban, Rural, Camps**

Urban: Any locality whose population amounts to 10,000 persons or more. This applies to all governorates/districts centers regardless of their size. Besides, it refers to all localities whose populations vary from 4,000 to 9,999 persons provided they have, at least, four of the following elements: public electricity network, public water network, post office, health center with a full – time physician and a school offering a general secondary education certificate.

Rural: Any locality whose population is less than 4,000 persons or whose population varies from 4,000 to 9,999 persons but lacking four of the aforementioned elements.

Camp: It refers to any locality referred to as a refugee camp and administered by the United Nations Refugees and Work Agency in the Near East (U.N.R.W.A.).

Building:

A building is defined as any fixed construction that is temporarily or permanently erected on the surface of the earth or water. A building is surrounded by four walls or with at least one completed ceiling at the time of the visit, regardless of the construction material and the purpose of construction and utilization at the time of the Census. The building might be utilized for habitation, for work, for both, vacant, closed, deserted, under preparation or under construction at the time of the Census.

House:

A building or part of a building constructed for one household only, with one or more independent entrance leading to the public road without passing through another house.

Collective Households:

It refers to the place constructed for the residence of a group of individuals, who live therein and benefit from the services it provides. The collective household; it may be comprised of one building or more or one housing unit or more. Examples of collective households include hotels, hostels, elderly and orphans homes, psycho-therapy clinics and hospitals, collective households for university students, collective living quarters (camps) at the passages, and housing units of priests and nuns in the monasteries and churches (who do not have other households).

Household:

One person or a group of persons with or without a household relationship, who live in the same housing unit, share meals and make joint provision of food and other essentials of living. In PHC-2007, the household includes:

3. Household members found in the housing unit on the night of 01/12/2007.
4. Visitors living outside the Palestinian Territory but who spent the night of 01/12/2007 in the housing unit of the household (relatives and non- relatives).
5. Visitors from the Palestinian Territory who, as a whole household, remained for all of the enumeration period 1-16/12/2007.
6. Servants and other workers living usually within the household who spent the night of 01/12/2007 with the household.
7. New births born prior to the night of 01/12/2007 and still alive, irrespective of whether they were within the household or in the hospital.
8. Household members who spent the night of 01/12/2007 with the household and died after that night.
9. Household members who usually live in the housing unit but were not available in the night of 01/12/2007. This category includes:
 - Household members who spent the night of 01/12/2007 with another household inside the Palestinian Territory.
 - Household members working at night 01/12/2007 in factories, hospitals, airports, etc.
 - Individuals who spent the night of 01/12/2007 traveling in the public ways inside the Palestinian Territory.
 - Fishermen who spent the night fishing in the regional waters.
 - Members of internal security forces, and civil defense forces irrespective of where they spent the night of 01/12/2007.
 - Palestinian household members living usually within the household and who are holding an ID card, but who were abroad less than one year for temporary reasons (tourist, visit, pilgrim or any other reason).
 - Palestinian household members living usually within the household but who were absent during the night of 01/12/2007 due to urgent causes including hospital, detainee, etc.
 - Palestinian household members living usually within the households but who were absent during the night of 01/12/2007 due to their stay in a hotel in the Palestinian Territory.
 - Students studying abroad regardless of the length of their stay.

- Students studying in Palestinian universities, institutes and other educational institutions irrespective of place of existence.
- Household members detained in Israeli prisons.

The following were excluded from households:

- Persons who died before the night of 01/12/2007.
- Persons who were born after the night of 01/12/2007.
- Persons who stayed during the counting in elderly homes, orphans homes, psychotherapy clinics and hospitals, and other collective households in the Palestinian Territory.

Type of households that underwent enumeration are divided into:

Private Households: The households included in the aforementioned definition of the household.

Collective (Institutional Households): It refers to the households enumerated in the previously mentioned collective households.

Palestinian Household:

It refers to the private household whose head holds the Palestinian nationality. As for non Palestinian household, it refers to the household whose head holds non Palestinian nationality irrespective of the nationality of other household members.

Special types of Households:

A one-person-household: It refers to the household comprised of one individual.

Nuclear household: It refers to the living household comprised of a couple only; a couple and a son or a daughter (not adopted son or daughter) or more; or a male head of a household with a son or a daughter or more; or a female head of a household with a son or a daughter or more. It is worthy to note that no other relatives or non-relatives live with this household.

Extended Household: A household of at least one nuclear household together with other relatives.

Composite Household: Refers to household consisting of at least one nuclear household with other non-relatives.

Average Household Size:

It refers to the average number of household members calculated through dividing the total number of members for a certain category by the number of households for that particular category.

Head of the household:

It refers to the person who usually lives within the household and is considered as the head of the household by its other members. Often, he \ she is the main decision-maker and responsible for financial support and economic welfare of the household.

Relationship to the head of the household:

It refers to the type of relationship to the head of the household and is normally classified as follows:

Head of the household, Spouse, Son/ daughter, Father / mother, Brother / sister, Grandfather/ grandmother, Grand-child, Son/ daughter in law, Other relatives, Others.

Sex:

It is divided into male and female.

Date of Birth:

It refers to the date in which the person was born. It is normally comprised of three cells: day, month and year according to the official identification documents such as the birth certificate, passport, ...etc.

Age in Completed Years:

The completed age in years of the person enumerated, which is the difference between the date of birth and the survey reference period.

Original Nationality:

It refers to the political identity of the individuals, as Palestinian, Jordanian, Egyptian, Brazilian, French, etc.

Religion:

It refers to the spiritual belief of the person, which is divided into Muslim, Christian, Other.

Mother's usual place of residence (place of birth):

It refers to the usual place of residence of the mother when the person was born.

Usual place of residence:

It refers to the name of the locality in which the person spends most of his time during the year (lived there six months and above), irrespective of whether it is the person's same place of existence during the Census, or the place in which he works and performs related activities or the place in which his original household is based or not.

Refugee Status:

This status relates to the Palestinians who were forced to leave their land in the Palestinian Territory occupied by Israel in 1948. It applies to their male sons and grandchildren.

1. **Registered Refugees:** It applies to registered refugees holding refugee registration cards issued by UNRWA.
2. **Non-Registered Refugees:** It applies to unregistered refugees who do not hold refugee registration cards issued by UNRWA.
3. **Non-Refugee:** It applies to any Palestinian not categorized under any of the two aforementioned statuses.

Handicapped and Disabled:

The disabled is defined as the person suffering from a clear and evident weakness in performing certain activities due to continuous difficulties emanating from a physical, mental or health state that lasted for more than six months.

Seeing (Visual) Disability:

It includes blind and one-eyed persons, and any person suffering from vision weakness even after using special devices, provided they do not suffer from any other disability.

Hearing (Auditory) Disability:

It includes deaf persons and any person suffering from clear auditory problems even after using special auditory devices, provided they do not suffer from any other disability.

Moving Disability:

It refers to the person suffering from evident problems in walking, climbing stairs, bending, bowing, kneeling, provided he / she does not suffer from any other disability.

Cognition Disability:

It refers to the individuals who suffer from difficulties in concentration and memory, decision-making, understanding speech, reading, identifying persons, identifying areas and the use of the map, calculations, reading and thinking.

Communication Disability:

Refers to people who do not have the ability to exchange information and ideas with others and to deal with them through the use of speech, or sign or movement or to write the information they want to share with others, which may be the result of the inability of hearing or speech, or lack of the mental capacity to understand or interpret what others say, whether signals, words or movements.

Causes of Disability/ Difficulty:

The cause of disability/difficulty is the main reason that caused the healthy person to be disabled:

1. **Congenital:** It applies if the disability/difficulty emanates from hereditary or inbred causes.
2. **During delivery:** It applies if the disability/difficulty emanates from causes related to the birth delivery.
3. **Disease:** It applies if the disability/ disability/difficulty originates from a certain disease, such as polio.
4. **Psychological/ physical abuse:** means that person with disability/difficulty resulted from Physical or psychological abuse from one of his family, teacher in the school, unknown person, or unknown site.
5. **Aging:** means that person with disability/difficulty caused by aging, this case apply only to elderly person.
6. **Work Injury:** It applies if the disability/difficulty results from a work injury that took place while performing work.
7. **Traffic accident:** It applies when the disability/difficulty results from car accidents, including all types of accidents.
8. **Other accident:** It applies when the disability/difficulty results from any other type of accidents, e.g. falling from high places, fire, fire shooting, ...etc. (It should be noted that such a disability is considered a work injury if it took place during work).
9. **Israeli measurements:** means that person with disability/difficulty resulted from any kind of attack from Israeli soldiers and Settlers including shooting or other measures during the Intifada (except war).
10. **War:** means that person with disability/difficulty resulted from war, but not including first or second Intifada.
11. **Others:** It applies if the cause of disability/difficulty is not any of the aforementioned reasons.

Educational Attendance:

Attendance means registering the person in any formal education stage irrespective of whether it took the form of continuous attendance or distance learning. Formal education stages include the elementary stage, preparatory stage, (both of which are referred to as the basic stage), secondary stage, and higher education stage (universities, colleges, vocational institutes, etc.).

Enrollment categories are as follows:

1. **Attending:** It applies if the person is currently enrolled in a regular education stage.
2. **Attended and left:** It applies if the person unsuccessfully left a regular education stage, i.e., without obtaining any degree.
3. **Attended and graduated:** It applies if the person successfully graduated from a regular education stage and did not enroll in any stage after that.
4. **Never attended:** It applies if the person is not currently enrolled and was never enrolled in any regular education stage.

Educational Attainment: It refers to the highest successfully completed educational attainment level. The educational level for persons aged 10 years and over .

Illiterate: It applies to persons unable to read or write in any language and who were never awarded a certificate from any formal education system.

Can Read and Write: It applies to persons who are able to read and write without completing any of the educational stages. Such persons are generally able to read and write simple sentences.

Qualification (The highest successfully completed educational attainment):

It refers to the highest educational attainment level (elementary and higher) the person successfully completed. **Elementary** is the educational level for persons who successfully completed the sixth elementary grade. Those who successfully completed the ninth grade shall be classified under the **preparatory** level. Likewise, persons who successfully completed the general secondary certificate examination shall be classified under the **secondary** level. As for the rest of levels, they are as follows: **Associate diploma, bachelor degree (BA/BS), higher diploma, masters degree (MA/MS), doctorate (Ph.D)**

Specialization:

It refers to the name of the subject the person successfully completed.

Employed:

Persons who were at work at least one hour during the reference period, whether for their own account or for others paid or unpaid, or in the interest of the household. Employees classified according to the number of weekly working hours of the workers (1-14) hours, workers (15-34) hours, workers 35 hours or more.

Labor Force Status:

A person's work status in terms of being inside or outside the labor force and also classified as follows:

1. **Employed 1-14 work hours:** All persons aged (7 years and over) who were at work at least one hour during the reference week, or who were not at work during the reference week, but held a job or owned a business from which they were temporarily absent and usually working 1-14 hours per week.
2. **Employed 15-34 work hours:** All persons aged (7 years and over) who were at work during the reference week, and held a job or owned a business from which they were temporarily absent and usually working 15-34 hours per week.

3. **Employed 35 hours or more:** All persons aged (7 years and over) who were at work during the reference week, and held a job or owned a business from which they were temporarily absent and usually working 35 hours or more per week.

Does not work and seeking work - who has ever been employed:

4. **Actively seeking a job during the reference week:** Those individuals aged (7 years and over) who did not work at all during the reference week, were not absent from a job, were available for work and actively seeking a job during the reference week, and looking for a job by one method of the following: registration at employment office, or registration at a labor union, or asking friends or relatives, or a personal visit of the premises, or reading the newspaper in order to obtain jobs, or searching for a building or land or machinery or equipment in order to establish a private project or seek of financial resources. Noting: that this category is the category that worked in the past two weeks continuously.
5. **Not seeking work because of discouragement:** Those individuals aged (7 years and over) who had worked in the past but within a reference week did not work even one hour, were not looking for work and were willing to work or need to work and sought previously but had been unable to find work.

Does not work and wants to work – Never Employed:

6. **Actively seeking a job during the reference week:** Those individuals aged (7 years and over) who did not work at all during the last period, were not absent from a job, were available for work and actively seeking a job during the reference week, and looking for a job by one method of the following: registration at employment office, or registration at a labor union, or asking friends or relatives, or a personal visit of the premises, or reading the newspaper in order to obtain jobs, or searching for a building or land or machinery or equipment in order to establish a private project or seek of financial resources.
7. **Not seeking work because of discouragement:** Those individuals aged (7 years and over) who has not worked throughout their life with any kind of work, has not worked even for one hour during the reference period, was not looking for work, but has desire or need to work and sought work previously but was unable to find and has no income due to this and did not continue in looking for work.

Does not work does not want to work:

Individuals aged (7 years or over) for which the concept of employed or unemployed does not apply, are classified outside the labor force, in the sense that this individual did not work even one hour during the reference period, nor looking for work and does not wish to work and falls under this definition:

8. **Full-time study / training:** Individuals aged (7 years or over) who regularly study in order to obtain a qualified skill and not linked to work during a certain period of reference. It should be noted here that household chores and hobbies are not included in the concept of work.
9. **Full-time housekeeping:** Any person (male or female) aged (7 years and over) not working but has capability to work and not looking for work and not attending regular study and aims at serving the household home. This does not include the servicing of the homes of others in return for payment in kind or cash since this type of service is within the workplace.

10. **Disabled /old age / illness:** An individual who is aged (7 years and over) who cannot do any kind of work due to chronic illness or due to any disability This category also includes all individuals who are unable to work because of old age.
11. **The existence of income / retiree:** If an individual is able to work but does not work and did not wish to work nor look for work because there is revenue from real estate, or retirement, etc.
12. **Other:** Includes any individual for which all the previously stated did not apply, such as a prisoner, or individual capable of work but not wishing or looking for work and who has no income, such as sons and daughters who are not attending school, who do not apply to any situation mentioned previously.

Main Occupation:

The main job or type of work performed by the employed person or used to be performed by the unemployed ever worked person. The occupation refers to the activity in which the employee works more than half of his/her working hours or the most frequent job during the last three months prior to the enumeration night.

Main Economic Activity:

Economic activity refers to the activity of the establishment in which an employed person worked during the reference period, or last worked if unemployed. This activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works. Economic activities are classified according to the unified commodity classification in the West Bank and Gaza Strip which is based on the International Standard Classification of All Economic Activities (ISIC Rev3).

Sector:

the sector is the work place (establishment) the person currently worked in or the work place that previously worked if he is currently unemployed the sector classified as follows:

1. **National private (indoor):** Comprise any profit establishment owned by about 51% of it's capital to one person or group of persons or Palestinian establishments that resident in the Palestinian Territory.
2. **National private (outdoor):** Comprise all persons who worked as self employed and do not work for fixed establishment; instance for that the street venders who worked as own account, own account taxi driver, or the worker in construction without being employed as permanent worker for any establishment or contractor or farmer who works in his own farm.
3. **Foreign private (indoor):** Comprise any profit establishment owned by about 51% of it's capital to a group of persons or establishments non resident in the Palestinian Territory, and also it comprise all employed in the foreign establishments branches in the Palestinian territory, but the employed persons in the official diplomatic missions for this governments not included.
4. **Foreign private (outdoor):** Comprise all persons who worked as self employed and do not worked at fixed establishments out side Palestinian Territory such as Israel or Arab Countries.
5. **National government:** Comprise the central government and the local authorities and public sector government establishments.
6. **Foreign government:** Comprise any government establishment attached to foreign government also included the diplomatic missions and official foreign government.

7. **Non profit organization:** Comprise the charitable association and the nonprofit establishments such as the unions, all women and youth organizations, churches and the establishments attached to it
8. **UNRWA:** Comprises all the UNRWA establishments for employing the Palestinian refugees, either administration services offices, schools, training centers, clinics.
9. **International organization:** Comprises the international organizations attached to the United Nation, any international or regional organization (excluded UNRWA) such as UNISCO, UNDP, and the similar international organization (WB, IMF,.....)

Employment Status:

It refers to the employment status of the employed or unemployed ever worked persons. The employment status is categorized as follows:

1. **Employer:** A person who works in an establishment that is totally or partially belonging to him \ her and hires or supervises the work of one or more waged employees. This includes persons operating their projects or contracting companies provided they employ a minimum of one waged employee. Shareholders are not considered employers even if they are working in the public \ public limited liability companies.
2. **Self-employed:** A person who works in an establishment that is totally or partially belonging to him \ her and hires no waged employees. This includes persons engaged independently in a profession or trade.
3. **Regular wage employee:** A person who works for others or for employer and receives remuneration in wage, salary, commission, tips, piece-rates or pay in kind, and must take in consideration that there is a agreement (written/orally) between the employer /work side and the employee which guarantee for employee work for period of time and guarantee for him some rights. This concept include employees in the ministries and the other public parties, in addition to wage employees in household projects or for others, employee\National Government, employee\Foreign Government, employee\ UNRWA, employee\International Organization, employee\Nonprofit Organization, regular employee\ private sector, regular employee\ foreign private sector.
4. **Irregular wage employee:** A person who works for employer, or under enterprise supervising as irregular employee, such as casual workers, daily or weekly without any official commitment for work, and when they are unemployed in the reference week they do not classified as employed.
5. **Unpaid family member:** A person who works without pay in an economic enterprise (farm, undertaking ... etc) operated by a related person in the same family.

Place of work:

It refers to the working place of the employed person and the last working place of the unemployed ever worked person. Place of work is classified as follows:

1. **At home:** It applies if the employee works inside his housing unit. However, it does not apply to cases in which a grocery with its own door (for instance) is close to the housing unit. In this case, the place of work is considered in the same locality.
2. **In the same locality:** It applies if the employee works inside his locality.
3. **In the same governorate:** It applies if the employee works in one of the localities belonging to the same governorate.
4. **In other governorate:** It applies if the employee works in one of the localities belonging to a different governorate.
5. **In Israel:** It applies if the employee works in the Palestinian Territory occupied by Israel in 1948.

6. **In Settlements:** It applies if the employee works in one of the Israeli settlements established in parts of the Palestinian Territory occupied in 1967.
7. **Abroad:** It applies if the employee works in another country outside the Palestinian Territory.

Marital Status:

The status of those 12 years old and over in terms of marriage traditions and laws in the country.

May be one of the following cases:

1. **Never married:** It applies if the person aged 12 years and over has not been married or legally engaged (according to customs and traditions applicable in the country).
2. **Legally engaged:** It applies if the person aged 12 years and over has an official marriage document (issued by a competent court) but has not been actually married yet according to customs and traditions applicable in the country. The divorced, widowed, and married twice do not belong to this category.
3. **Married:** It applies if the person aged 12 years and over is actually and officially married (according to customs and traditions applicable in the country) irrespective of his / her past marital status as well as of whether the couple were together during the reference period or not. The person married to more than one wife is classified as married.
4. **Divorced:** The person aged 12 years and over who previously married and legally divorced but was not married again.
5. **Widowed:** The married person aged 12 years and over whose marriage was ended by the death of the spouse and was not married again.
6. **Separated:** The individual 12 years old and over who was married, but his/her marriage was revoked for some reason without any legal or official registration, and he/she did not marry again.

Age at first marriage in completed years:

refers to the age of the person in the actual marriage date.

Live Birth: It refers to any live birth who shouted, cried or shown any signs of live upon delivery, irrespective of whether he died after that or not.

Living Children: Infants born alive and are still living regardless of age

Definitions of Jerusalem J1&J2

Given the geographical and political situations in the Jerusalem governorate, it has been divided into two parts (J1, and J2).

For mere statistical purposes, the Jerusalem Governorate was divided into two parts.

The first part (J1) includes that part of Jerusalem, which was annexed forcefully by Israel following its occupation of the West Bank in 1967. This part includes the following localities: (Beit Hanina, Shu'fat Refugees Camp, Shu'fat, Al' Isawiya, Jerusalem "Al - Quds" (Sheikh Jarrah, Wadi Al - Joz, Bab Al-Sahira, As Suwwana, At -Tur, , Ash - Shayyah, Ras Al-Amud), Silwan, Ath – Thuri, Jabal Al – Mukabbir, As – Sawahira Al – Gharbiya, Beit Safafa, Sharafat, Sur Bahir, and Um Tuba and Kufr A'qab).

The second part Jerusalem (J2) Includes Jerusalem governorate except that part of Jerusalem which was forcefully Annexed by Israel following its occupation of the West Bank

in 1967. This part includes the following localities: Rafat, Mikhmas, Qalandya Refugees Camp, the Bedouin Community - Jaba', Qalandya, Beit Duqqu, Jaba', Al – Judeira, Beit Anan, Al-Ram, Dahiat Al-Pareed, Al Al – Jib, Bir Nabala, Beit Ijza, Al – Qubeiba, Khirbet Um Al – Lahem, Biddu, An – Nabi Samu'eil, Hezma, Beit Hanina Al Balad, Qatanna, Beit Surik, Beit Iksa, A'nata, Al Ka'abina (the Bedouin Community – Al – Khan Al – Ahmar), Arab al Jahalin (the Bedouin Communités, Al – Eizariya and Abu Deis), Az Za'eem, Al – Sawahreh Al – Sharqiyeh and Ash – Sheikh Sa'd.

Remaining West Bank

Includes the West Bank except those parts of Jerusalem which were annexed by Israel in 1967.

Chapter Three

Methodology

3.1 Census Coverage

The PHC-2007 covered all individuals who were in the Palestinian Territory on the census reference night (30/11-1/12/2007) regardless of nationality and citizenship. It also covered all Palestinians who have usual residence in the Palestinian Territory (including those who were temporarily absent for less than one year for the purpose of visit, tourism, treatment, etc. while their households are still living at their permanent places of residence in the Palestinian Territory). All Palestinian students abroad while their households are still living at their permanent places of residence were also included, in addition to all prisoners and detainees in the Israeli jails regardless of the duration of detention. The census excluded all Palestinians holding identity cards who were absent for more than one year (except for the students), even if their households are still living in their places of residence in the Palestinian Territory.

This was a decision made by the Census National Committee in its first meeting. The resolution states the following

1. **Determine the coverage of the census to include the entire population, housing and establishments in the Occupied Palestinian Territory in 1967, with the exception of Israeli settlements.**
2. **The enumeration includes the following categories of individuals:**
 - A. All individuals living in the Palestinian Territory at the census reference date regardless of nationality, citizenship and reason of presence, and regardless of where present in the Palestinian Territory.
 - B. All Palestinians who live abroad temporarily and for less than a year whose normal place of residence is in the Palestinian Territory, are to be counted with their households.
 - C. All Palestinians who are studying abroad, regardless of the duration of the study and length of residence abroad, and all individuals detained in Israeli jails regardless of the period of detention, are to be counted with their households.

3.2 Special Questionnaire of Jerusalem Governorate

Due to the special situation in the governorate of Jerusalem, particularly (J1) area. A summarized questionnaire has been designed especially for household and housing conditions for the J1 area of Jerusalem containing the following questions:

1. Number of nuclear households, type of housing unit and number of rooms.
2. Household members booklet which includes (head of the household relationship, sex, religion, age, refugee status, educational level and marital status).

3.3 Questionnaires and Forms

Three questionnaires have been designed for data collection which are: listing of buildings, housing and households questionnaire, the household and housing conditions questionnaire and economic establishments questionnaire. An additional questionnaire has been allocated for hotels. The following is a detailed demonstration of the items and variables of these questionnaires:

Buildings, Housing and Households Listing Questionnaire

The questionnaire of buildings, housing and households contains in addition to the identification data, a number of items and detailed variables including:

The owner's name or the name of the building, the type of building, current use of the building, type of owner, the year of establishment, construction material for external walls, the number of floors in the building, the number of housing units at the building, current use of the housing unit, and the reason for the closure, absence, desertion of closed units, or abandoned.

Households and Housing Conditions Questionnaire

The questionnaire of households and housing conditions in addition to the identification data, has the following items and variables:

Section I: Housing Data and Conditions

Housing data includes occupation type, housing type, number of rooms, number of nuclear households, housing property, number of bedrooms, connectivity of public water, electricity and sanitation, availability of a kitchen, bathroom and toilet, the method used for the disposal of household wastes, the main source of energy used in cooking and heating, availability of durable goods to the household, available information technology for the household.

Section II: Individuals Data

- A. Data of all individuals regardless of their age, sex and nationality which are: the name, the head of the household, sex, date of birth, age in completed years, original nationality, religion, usual place of residence of the individual's mother when giving birth, usual place of residence, duration of residence in the usual place of residence, previous place of residence, and reason for changing previous place of residence.
- B. Data of Palestinian individuals which are: identification number, the refugee status, and difficulties or disabilities that might cause suffering for the individuals in case they exist and availability of insurance.
- C. Data of all individuals aged 5 years and over, namely: education, number of study years which are successfully completed in the formal educational system, usage of computer.
- D. Data of all individuals 7 years and over, namely: relation to labor status, main occupation, economic activity, sector activity status and place of work.
- E. Data of all individuals 10 years and over, namely: education level, specialization, place of getting higher education level and vocational training obtained by the individuals.
- F. Data of all individuals aged 12 years and over, namely: marital status, age at first marriage, duration of marriage, the number of live births and the number of them still alive males and females throughout the duration of marriage for women, and the number of live births and the number of them still alive males and females during the previous year.

Section III: Household Members

Summary of the number of household members divided into males and females.

Section IV: Tourism and Kindergartens

Tourism inside and outside Palestine; children enrolled in kindergartens by sex.

Section V: Agricultural Holdings

Includes the individual holder in the questionnaire, and the number of agricultural holdings by type (plant, animal, and mixed).

Section VI: Mortality

Includes questions about a case or more of death in the household during the 12 months preceding the census and thus the name of the deceased and their relationship to the head of the household, sex and age at death and whether death was during pregnancy and childbirth and that for females in the stage of pregnancy and childbearing.

3.4 Fieldwork

Fieldwork stage of implementing the Population, Housing and Establishment Census-2007 includes several consecutive fieldwork operations which are:

3.4.1 Updating Maps

PCBS proceeded to conduct a comprehensive updating of the maps for all Palestinian localities in early November 2006, which was completed at the end of June 2007. All localities were visited and their maps which had been prepared by the Census National Committee for nominating and enumerating the localities were updated.

After the completion of amendments to the maps, localities were divided into enumeration areas; each one includes about 150 housing units, with the exception of small localities that include less than 150 housing units, where each locality was considered to be an enumeration area, regardless of the number of the housing units accompanied by identifying aspects of the census fieldwork teams: supervisors, observers and enumerators. Everyone was allocated a specific area of work on maps to avoid overlapping or under counting of enumeration areas; many copies of the maps were photocopied for field work teams and the central operations room. The number of enumeration areas reached 4,916.

3.4.2 Identifying and Delineation Enumeration Areas

Supervisors put signs on the walls of buildings located on the outer borders of enumeration areas of the 4,916 areas distributed on localities in the West Bank and Gaza Strip except (J1). The implementation of this process took 25 days from 18/08/2007 to 11/09/2007.

3.4.3 Numbering and Counting of Buildings, Housings and Households as well as Establishments

The observers and their assistants carried out this process in all localities during the period from 20/10/2007 to 10/11/2007 through checking all buildings and putting the census number on the entries as well as the numbering of all housing units in each building, and collecting main data of the buildings and the housing units.

The main objective of this operation is to provide a range of important data on the numbers and characteristics of the buildings for use in policy making concerning housing. This process also aims to facilitate the work of enumerators in the implementation stage of counting the population. The observers during these operations have given each household a reminder questionnaire to be filled in on the morning of 01/12/2007 regarding the people who spent the reference night which is (30/11-01/12/2007) in housing and submit it to the enumerator to assist in the process of counting the population and ensure accuracy and coverage.

3.4.4 Population Count

This process was implemented in the West Bank during the period from 01/12/2007 to 16/12/2007, while in the Gaza Strip it was implemented during the period from 25/12/2007 to 08/01/2008, where enumerators visited all the households in their homes and obtained data on the housing in which they live and their different characteristics, as well as all household

members and registered the demographic, social and economic characteristics of each household member.

3.4.5 Receipt of Booklets

The process of receiving booklets started after each enumerator had covered his/her enumeration area, which ended in the West Bank in the evening of 16/12/2007, and in the Gaza Strip in the evening of 08/01/2008. The process of receiving booklets is divided into two parts: fieldwork receipt, and then delivery to the censuses directorate in PCBS premises.

Receipt of Booklets from the Fieldwork

After the completion of the counting phase, the observers received all booklets and questionnaires from the enumerators which are: the household and housing conditions booklets, the enumerator organizational book. After receiving them, the observers submitted them to their supervisors, where they also conducted a technical check. The receiving process began in the West Bank as of 16/12/2007 and lasted until 25/12/2007 (during which was the holiday of Eid Al-Adha), while in the Gaza Strip it started from 08/01/2008 until 12/01/2008. All booklets were handed over to PCBS main premises in Ramallah and Gaza.

Receipt of Booklets in PCBS Main Premises

The receipt process started in the main premises in Ramallah from all governorates on 29/12/2007 and ended on 07/01/2008 in the West Bank, while it started on 24/01/2008 and ended on 26/01/2008 in the Gaza Strip.

3.4.6 Post Enumeration Survey

Post enumeration is considered to be a developed technique of assessing and evaluating census findings. It was implemented through selecting a random sample of 218 enumeration areas representing all types of localities. The purpose of conducting such a study was to measure the rate of coverage and individuals in the Census-2007 to take these rates into account when preparing estimates of the population in the years to come after the census.

The field work was implemented during the period from 29/12/2007- 03/01/2008, and 12/01/2008-16/01/2008 in the Gaza Strip. The process of editing the selected booklets for this survey was begun, matching them with the booklets of household and housing conditions which were obtained during the process of counting the population, i.e., data entry, data processing and extracting findings. These processes ended on 30/01/2008.

3.4.7 Preparation of the Preliminary Results

After the completion of the counting process on 16/12/2007, the enumerators and observers carried out a desk review and prepared the preliminary results in the fieldwork from 16/12/2007 until 18/12/2007. After that, during the period from 24/12/2007 until 30/12/2007 preliminary results were compiled and reviewed by census managers in the governorates and then sent to the Census office in PCBS main premises. This operation was carried out in Gaza Strip during the period from 08/01/2008 until 15/01/2008.

After the receipt of the preliminary results forms from the fieldwork by the end of December 2007, which included a number of households and individuals both males and females at the level of the enumeration area, this data was entered into computers to extract preliminary statistical tables at the level of Palestinian Territory and the governorates level. These tables contain the number of households and the number of male and female individuals.

During the receipt of preliminary results, their coverage had been thoroughly checked which covered all enumeration areas to be compared with the main enumeration areas booklet to make sure that no enumeration area was dropped.

3.4.8 Data Processing

Data processing stage includes all the stages after the fieldwork such as: editing, coding, data entry, electronic editing and disseminating through both the traditional methods (Publications) and online and on CDs and databases. Data processing was carried out in the West Bank by having two work shifts. This process started on 13/01/2008 by training editors and coders, and about 120 employees had been hired for each work shift in addition to the supervisor crew for each shift.

3.4.9 Preparation of Final Findings Stage

During this stage certain basic steps had been achieved of which the most important were: data processing, tabulation and dissemination.

Chapter Four

Summary of Final Results

4.1 Population findings

Findings show that the total number of the West Bank population on the eve of December 1, 2007 was 2,350,583 people, including 1,193,244 males and 1,157,339 females. The male/female sex ratio totaled 103.1 males per 100 females. The number of the population includes the following:

4.1.1 The actual counted population

According to the findings of the actual count process, the number of the actually counted population in the West Bank is 2,281,714 people at an increase of 6,785 people only in comparison with what was announced in the preliminary findings. This constitutes 97.0% of the total population as per the results of the post enumeration survey.

The number of the West Bank population is divided by type of locality where 1,567,903 or 68.7% of the total West Bank population live in urban areas, 591,149 or 25.9% of the total West Bank population live in rural areas, and 122,662 or 5.4% of the total West Bank population live in refugee camps. Comparatively, in the 1997 census, the figures for rural and urban areas were close at 46.6% for urban areas of the total of the West Bank population and 46.9% for rural areas of the total of the West Bank population. The percentage of refugee camps was 6.5% of the total of the West Bank population.

4.1.2 The population number according to the post enumeration survey

The aim of conducting post enumeration survey is to measure the coverage rates of individuals in the Census in order to consider such rates when the population number is projected in the years following the Census. The post enumeration survey shows that the number of the West Bank population is 2,350,583 based on the findings of the post enumeration survey. Moreover, the post enumeration survey shows that the under coverage rate is 3.0%.

4.2 The basic demographic and social characteristics of the population

4.2.1 Population age structure

The Palestinian society of the West Bank is still a society of young people, according to the findings. The number of the people aged 0-14 years in the West Bank totals 920,649 or 40.3% of the total West Bank population. The number of people aged 15-64 is 1,231,290 or 54.0% of the total number of the West Bank population. The number of the rest of the population whose age is 65 years and over totals 75,933 of the West Bank population or 3.3% of the total West Bank population. 2.4% of the West Bank population had their ages unstated.

4.2.2 Basic Characteristics of Marriage

The findings show that the number of people aged 12 and over who are married in the West Bank is 764,841 or 51.5% of the total population of the West Bank who are in the age group of 12 years and over. The number of married males is 377,947 or 50.3% and the number of

married females is 386,984 or 52.7%. The number of divorced people in the West Bank is 9,438 or 0.6% of the total population in the age group of 12 and over in the West Bank.

4.2.3 Refugee status

The number of refugees in the West Bank totaled 624,067 or 27.4% of the total Palestinian population of the West Bank. They are distributed as follows: 375,271 in urban areas (24.0% of the total Palestinian population of the urban areas), 133,308 in rural areas (22.6% of the total Palestinian population of the rural areas), and 115,488 in refugee camps (94.2% of the total Palestinian population of the refugee camps).

4.2.4 Basic Characteristics of Education

The number of people aged 5 years and over Remaining West Bank attending education is 738,937 or 42.9% of the total population of the Remaining West Bank of the same age group. They are distributed as follows: 369,897 males or 42.4% of the total Palestinian males aged 5 years and over, 369,040 females or 43.5% of the total Palestinian females aged 5 years and over.

According to findings, there are 90,780 illiterates in the West Bank in the age group of 15 years and over (they constitute 7.0% of the total of the Palestinian population of the same age group in the West Bank. Illiteracy is more prevalent among females than males since there were 21,815 illiterate males or 3.3% of the total number of illiterate West Bank population aged 15 years and over and 68,965 illiterate females or 10.7% of the total number of illiterate West Bank population of the same age group. The highest concentration of illiteracy was at rural areas 9.1% followed by refugee camps 7.3% and urban areas 6.1%.

In comparison with the 1997 Census, illiteracy has dropped. The rate of the Palestinian illiterate people reached approximately 14.0% of the total Palestinian population aged 15 and over of which 7.2% were males and 21.0% females. Distribution by locality type produced these results: 11.5% of the illiterates aged 15 and over were in urban areas, 16.5% of the illiterates aged 15 and over were in rural areas, and 14.5% of the illiterates aged 15 and over were in refugee camps.

The number of the Palestinian population of the Remaining West Bank with diploma and higher reached 166,374 or 11.5% of the total number of the population in the age group of 10 years and over in the Remaining West Bank. Those specialized in business administration occupied the first place at 20.1% of the graduates belonging to this category of Palestinians with diploma and higher. This was followed by specializing in education science and teachers rehabilitation at 15.2% of the graduates.

In the 1997 census, business administration and humanities science occupied the first place. According to findings, 19.0% of the diploma and higher graduates were specialized in each of business administration and humanities.

4.2.5 Basic Characteristics of Labor

The number of economically active Palestinian population in the Remaining West Bank is 484,553 or 33.5% of the total Palestinian population in the age group of 10 and over in the Remaining West Bank, including 413,103 males or 56.4% of the total male population in the age group of 10 and over in the Remaining West Bank and 71,450 females or 10.0% of the total female population in the age group of 10 and over in the Remaining West Bank.

The number of unemployed people of the Palestinian population of the Remaining West Bank in the age group of 10 and over was 71,492 or 14.8% of the total population in the age group of 10 and over in the Remaining West Bank. The highest rate of unemployment by locality

type was found at refugee camps at 18.1% followed by 15.1% at rural areas, and 14.1% at urban areas.

4.2.6 Basic characteristics of disability/Difficulty

The findings of the Census show that the number of the Palestinian population in the Remaining West Bank who have at least one disability/Difficulty is 107,785 or 5.3% of the total number of the Remaining West Bank Palestinian population. The distribution of Palestinian people with disability/Difficulty by type is as follows: 60,041 persons have seeing disability/Difficulty or 2.9% of the total number of the Remaining West Bank Palestinian population; 28,658 persons have hearing disability/Difficulty or 1.4% of the total number of the Remaining West Bank Palestinian population; 42,181 persons have moving disability/Difficulty or 2.1% of the total number of the Remaining West Bank Palestinian population; 14,781 persons have cognition disability/Difficulty or 0.7% of the total number of the Remaining West Bank Palestinian population; and 14,959 persons have communication disability/Difficulty or 0.7% of the total number of the Remaining West Bank Palestinian population.

4.3 Findings of households' number

According to the findings of population count, the number of private households, which were actually counted in the West Bank, totaled 414,493 households. The average size of the West Bank households is 5.5. The number of Palestinian nuclear families in the West Bank reached 338,989 or 81.8% of the total number of the Palestinian households.

Data Quality

5.1 Introduction

There are two types of errors that can occur: statistical errors and non statistical errors. Statistical errors occur in surveys using samples and do not exist in the censuses. It is easy to measure errors and to estimate the rate of errors since it results from errors in the sample. While non-statistical errors are possible to occur at any stage of the implementation of the censuses or surveys, there was a need for developing a system to control the quality of census data during the implementation of the second Palestinian Census of 2007 since there were many stages of work in planning and implementing the census requiring a great number of employees hired for a short time, with variation in work quality from one to another that could badly affect the findings of the census and their reliability.

The main objective of the quality control programme is to prevent or reduce the incidence of errors to the greatest extent possible and to detect errors in order to take appropriate measures to correct them. Without using such a programme, census data might contain many errors and may not be suitable for use.

To achieve the required efficiency, an efficient system of quality control at all stages of the census had been developed to control all stages from the very beginning of the preparatory stage till data processing and dissemination to guarantee high level of data quality. Quality control is of vital importance particularly in the planning stage since it is connected with all stages to come, and thus every stage was allocated enough time and procedures to ensure the achievement of high quality and reliability of census data.

5.2 Control Procedures in the Preparatory Stage

The preparatory phase took into account the development of simple definitions and instructions and compatibility with international recommendations and the needs of beneficiaries in the design of questionnaires to the extent that instructions could be transferred honestly. Attention was paid to ensure that all booklets and questionnaires would be received and stored, and that all booklets and questionnaires would be entered into the computer in addition to preparing certain forms to control quality of work, achievement and the design and selection of data entry programs beforehand.

A plan was made for updating localities, enumeration areas manual, and detailed maps of the enumeration areas manual, where every establishment, building, housing, household and individual were counted, and adequate attention was given to special localities such as nomads, since they were covered in the census. Clear and simple instructions were developed for counting personnel at border crossings and the residents of collective housing.

It also set up a procedures to examine the coverage rates for individuals and households through the post Enumeration Survey. Also taken into account was the printing of booklets and questionnaires to validate data collection, entry and storage. A certain type of indexed bags was used for keeping the households and housing conditions booklets as well as the buildings booklets to be easily reached and used.

Through a pilot census comprehensive testing was done for all questionnaires, tools, procedures, forms, fieldwork and office editing, PES, printing of questionnaires and manuals

at this stage, selection of data entry programs and error detecting programs, reviewing lists and coding manuals and tabulation processes and preparatory stage dissemination in advance. The expected requirements of human and financial resources, time schedule for the completion of all activities in this stage had been estimated in advance.

5.3 Control Procedures in the Implementation Stage

5.3.1 Selection and training of employees

Given the magnitude of this project, multiple levels and the volume of its employees, it was necessary to develop procedures that ensure the collection of reliable data, since maps of each area were updated under continuous supervision from the project management, and to re-divide enumeration areas according to the ability of fieldworkers in various activities so as to achieve them on time.

It had been taken into consideration to select the best qualified unemployed employees particularly those with scientific qualifications like diploma and B.A. since there are many in nearly all the governorates except (Ramallah and Al-Bireh, and Jerusalem) where we had to employ a small number of Palestinian university students as enumerators, and also that the fieldworkers have to be from the same locality to guarantee their efficiency in carrying out their mission.

Plans and training programs for all employees had been prepared in advance: census managers had been trained in the governorates first and then trained supervisors, who participated in turn in the training of enumerators and observers. As a precaution, PCBS trained in each stage an additional 30% of the actual required employees as alternates in case of resignation, dismissal, emergent conditions, and low achievements.

5.3.2 Data collection

Fieldworkers were distributed so that each supervisor had responsibility for managing 5 observers, and each observer had to supervise 5 enumerators, while each enumerator had to collect data for about 150 housing units within 15 days. The basics of selecting the employees depended on the a unified assessment (test); the individuals who got the highest grades were selected and employed, while the census directors (PCBS Managers) were selected for their considerable experience in administrative and statistical work, and some of PCBS statisticians and fieldworkers were appointed to work as supervisors.

With regard to the method of counting, the direct interview technique was used and the necessity of getting data from the head of households, or from a reasonable adult person. In case of the absence of the head of household or non-existence of the right person, the enumerator pays other visits to the household at different periods of time until he/she collects the data from the qualified person.

Enumerators had also depended on official documents in terms of collecting basic data such as name, date of birth, identification number, and submitting a reminder questionnaire to the households to fill in the basic required data before the actual counting to save time and facilitate the mission for both households and enumerators. Moreover, specific instructions had been given to all employees of all levels in how to carry out fieldwork and desk reviews, and in how to review and correct the errors. The supervisor, for example, had to check himself/herself part of the questionnaires for at least 2% of what had been achieved by the observer and the enumerator in addition to checking the coverage and quality of data,

particularly on the first days of work, and supervising the daily desk and fieldwork. As for observers, they have to collect 5% of the data from the households that the enumerator had collected to ensure household coverage and consistency of individual data, and notifying the enumerators of their errors.

Every supervisor had to meet his/her fieldworkers subordinates on a daily basis to give new directions and instructions received from the operations room to correct errors that occurred in the previous day and to avoid errors. Those supervisors had to conduct a daily desk review of what had been achieved by their subordinates. A campaign had accompanied all activities of the census, and included all means of media, and as the census date approached, to ensure greater cooperation of the citizens census crews.

Many types of forms were developed regarding either the daily accomplishments and follow up or the accomplishment of the preliminary findings and related materials, documents, booklets, received supplies or deliveries, control of employees work duration and follow up forms of households coverage which were prepared ahead in stage of enumerating buildings and others.

A central operations room was formed at the PCBS headquarters in the West Bank and another in the Gaza Strip whose main task was to work 24 hours a day, including technicians, administrators and support services to answer queries and to meet the needs and requirements and issuing any written general instructions. This was in addition to the group of assistants in each governorate to assist the census director.

This census was also significant for using decentralized databases in the governorates, through which the employees daily achievement was registered and which controlled all technical and administrative work processes in all stages. This helped the Census management and the central operations room at the headquarters of PCBS to control and follow-up on work at various levels and take necessary action in the suitable time.

The post enumeration survey was implemented for 4% of the total enumeration areas aiming at examining the coverage rates of individuals and households, and a complete re-count of all households and individuals in selected enumeration areas was conducted. This study showed under coverage of individuals reached 3% in the West Bank.

5.3.3 Refusals Cases

Several procedures were developed to cope with the refusal cases by some private citizens especially in the Jerusalem Governorate and surrounding communities resulting from Israeli harassment toward the Palestinians residing in Jerusalem and the surrounding areas. These procedures included field visits by members of the central operations room to deal with such cases, and participation of officials to eliminate these cases.

5.4 Control Procedures in the Stage of Data Processing

Data processing stage includes editing, coding, data entry, reviewing lists and checking all previous operations to data entry for all enumeration areas. All procedures and instructions were made so as to check the consistency of the data and coding fields and ensure the entry of all enumeration areas as well as all booklets and questionnaires, and their content of buildings and housing units, households and individuals data. As procedures to check the booklets and questionnaires and the process of moving them from one operation to another, to ensure that all operations required for each form were properly implemented, a store was prepared for all

the documents to be indexed and categorized, so that the store keeper controlled the flow of bags and booklets and the preparation of daily achievement.

Coding manuals were prepared and examined beforehand as well as the instructions for editing and coding procedures for checking the consistency of the data and how to detect and correct errors. All editing and coding employees were selected among the best fieldworkers who collected the data from households and individuals. Training was conducted for them centrally to ensure unifying of concepts and checking data to eliminate disparities in fieldwork in all governorates. Editing, coding and testing consistency of (100%) of the questionnaires was conducted, in addition to desk reviewing, editing and coding (100%) in order to eliminate differences between individual editors, and to discover and correct errors and circulating them daily.

With regard to data entry, tests had been held for all applicants, and those that performed best on the exam were trained centrally on a unified procedures of data entry. During the first three days all what had been entered was deleted to be reentered again to correct errors and notify the employees to avoid such errors in the future. Certain procedures were adopted to ensure the correctness of data entry, since in the first stage a unique separate file was prepared for each enumeration area that included identification data (to ensure coverage) including the number of households and the total number of booklets to ensure that all booklets and all households had been entered. Upon data entry a thorough examination of the identification data and the range of each digital key question was conducted, so that the computer did not accept any figure outside this range, such as the head of the household relationship, sex and all the pre-coded questions in the household and housing conditions questionnaire, and the type of building in the buildings questionnaire, for example. The remaining other questions were exposed to a comprehensive re-examination of the range of each question after data entry, and extraction errors lists resulting from data of inconsistency.

After data entry certain lists were extracted to ensure the coverage of data entry of all enumeration areas, buildings, housing units, households and individuals, and to examine the internal consistency of the data of each unit. The used procedures were to extract errors lists that must be corrected or questioned, and these lists were submitted to the best reviewers under full supervision of the technical operations in the censuses directorate.

Certain prepared previously programs were used to detect errors according to the following procedures:

1. A manual was prepared for instructions of desk editing and the procedures of the questionnaire of the household and housing conditions, as well as a set of desk editing instructions printed on paper, and the procedures of the questionnaire of buildings, containing all the tests, whether the tests designed to ensure the coverage of data entry, to detect inconsistency errors or to detect abnormal and rare cases; they were reviewed, and there is a printed name and number for every error in the manual to be easily found.
2. A list was extracted for each enumeration area including the identification data of each building, housing unit, household or individual message (Type of Check) and the number printed in the manual, which helps the auditor to recognize the message name and type of error, location and procedures of editing and audit procedures patch, which consists of more than (600) checks on several stages.
3. Lists were submitted to the reviewers to go back to the original booklets; if the error was caused by the data entry, it would be corrected on the list, but if the error was due to fieldwork, all associated questions should be considered for correction. For example: if

the type of housing was a tent or a separate room, the number of rooms must be (1) by definition, so the first treatment would be conducted through manual editing, then extracting the electronic lists after data entry for such types of tests, then they were corrected manually on the original booklets, and data were reentered correctly. As for the coverage test, there is a key reference that contains all enumeration areas and shows the number of booklets and households in the enumeration area then to be entered to computer. At this point if there was a variation between the number that was actually entered of booklets and households, and what was entered of the total number of households in the file of each area, an error message appears to indicate it to be corrected. Through this method we ensure that 100% of the households were entered. By the same method we ensure that all household members were distributed to males and females and that 100% of them were entered through connecting the manually prepared summary of household members and the entered data of each household, and the individuals number distributed to males and females through the individual successive number in the household to ensure that 100% of households members were counted and entered according to their gender, in addition to the existence of a unique successive number for each household in the enumeration area.

As for dealing with the non applicable, they were coded as non applicable and represented by the figure (9) according to the number of digits for each question unless there is a certain indication that leads to selecting the suitable answer for variables such as: gender and head of household relationship in the questionnaire of households and housing conditions.

1. Extracting all enumeration areas lists through this way and all kinds of tests.
2. Amended lists were sent back to data entry to be entered and corrected, and a copy of the daily entered data was kept in several different places.
3. Previous stages were conducted twice or more until the data of each enumeration area became clean.
4. All files were compiled for enumeration areas for each locality of each governorate. Then all tables and any additional tests were conducted in participation of all specialists in the different areas (Demography, Education, Labor Force, Housing, Buildings, etc.) to test the data before the final tabulation in order to correct errors according to the aforementioned procedures.

5.5 Data Quality Assurance

The process of census results evaluation by estimating the values of errors and trends is considered to be a necessary process to answer questions concerning the accuracy and the coverage of census data and to defend the credibility of the findings against skeptics. There are several methods and tools to evaluate the results of the census in terms of coverage and content, which includes either a single source of data (the census itself) or multiple sources. The use of multiple sources, in turn, is one of two ways: either by comparing the booklets of individuals or comparing the overall values.

The quality testing programme for the Census 2007 contains several methods for measuring the quality and the coverage of data and trends, concentrated in several areas such as: Post Enumeration Survey (matching individual booklets), the comparison with administrative booklets, the comparison with the results of household surveys, conducting demographic analysis. The following is a detailed explanation of these areas:

5.5.1 Post Enumeration Survey (PES)

The Post Enumeration Survey is a sample survey conducted shortly after the census to assess the census. PES usually consists of two types of match studies: identical study to measure coverage errors and re-interview survey for the purposes of assessing the errors in the content of census data with respect to indicators of population.

The Enumeration Survey is usually the only reliable method of measuring errors in the census coverage in developing countries, if we take into account the lack of accurate administrative registers, and the limited availability of accurate demographic data on fertility, mortality and internal migration. In addition, the method of matching individual records provides the possibility of getting separate estimates on both coverage errors and content errors which is not easily achieved in the studies that do not adopt the method of matching individual records.

In the PES the quality control of data is easier due to the limited area of study, that is, a sample of areas. On the other hand, PES process includes an additional operation that is not included in the census, which is the matching process between census booklets and the booklets of PES and this additional step would include non-statistical errors. Due to this, all requirements of supervisors and enumerators should be prepared and well qualified, so the rate of supervisors to enumerators should be (1 to 5). It is necessary to appoint distinguished and adequately trained matching officials at all stages.

Although that the Enumeration Survey was not designed to be fully independent of the census, since the enumeration areas of the census will be used as preview units for the Enumeration Survey, the following points should be taken into account since they would lead to independence in practical actions:

1. The return of all census questionnaires from the field before the start of counting in the Enumeration Survey.
2. Counting the areas of the Enumeration Survey by crews of fieldworkers excluding those who worked as enumerators in the census (it is logical to employ census supervisors and observers to work in the Enumeration Survey in order to benefit from their experience, as long as they are appointed to work in other areas than those they worked in during the census).
3. The employees of the Enumeration Survey must not have any preliminary information about census findings in the enumeration areas in which they are going to work.
4. The employees of the census also must not know what enumeration areas will be selected to conduct the Enumeration Survey later.
5. The data of the Enumeration Survey must be separately processed from the census data.

Describe the Used Frame

The frame of the Enumeration Survey includes all the enumeration areas of the Census-2007 which totaled 4,916 enumeration areas distributed in all governorates of the West Bank and Gaza Strip. To implement the Enumeration Survey, 218 enumeration areas were chosen to be a stratified cluster sample designed for a single-stage, where all households in selected enumeration areas in the sample were collected.

5.5.2 Assessment of Coverage Based on PES

Rate of coverage was estimated for the individuals on the national level and key areas of research. The following table shows these percentages for the West Bank

Percentages of the coverage and under coverage rates for individuals at the governorate level in the West Bank

Governorate	Coverage Rates	Coverage Rates
Jenin	98.1%	1.9%
Toubas	95.8%	4.2%
Tulkarm	99.2%	0.8%
Nablus	98.5%	1.5%
Qalqilya	97.1%	2.9%
Salfit	98.7%	1.3%
Ramallah and Al-Bireh	94.0%	6.0%
Jericho	95.5%	4.5%
Jerusalem	95.8%	4.2%
Bethlehem	96.4%	3.6%
Hebron	97.5%	2.5%
Total of the West Bank	97.0%	3.0%

5.5.3 Internal Data Consistency Testing

Given the fact that the Population, Housing and Establishments Census-2007 is the second census on population, households, individuals, buildings and housing units and their detailed characteristics, the issue of testing data quality by all possible means was of paramount importance, especially the internal data consistency and comparing the findings with other surveys.

Based on the distinct experience of the census, certain instructions were developed during the fieldwork implementation to assure getting high data quality, and develop procedures and forms to control supervision and follow up.

Certain rules for desk editing and procedures of detecting consistency errors and correcting them had also been drawn up. During the cleaning process, many tables and detailed editing were extracted, reviewed and tested by the Censuses directorate and by those concerned with the subject from the other directorates.

In addition, a copy of the raw data was handed over to each subject specialist to test the accuracy and data quality and consistency of procedures before the process of extracting the final tables and to make any adjustments required.

5.5.4 Findings Comparison with Other Sources

The census data and indicators were compared by the subjects officials and census directorate with the common data and indicators of surveys. A comparison was conducted between the key indicators and the derived rates from census data in several areas. Comparison was made with the indicators of the Household Health Survey 2006, Demographic Survey 2004 and Health survey 2000, in addition to various comparisons with previous census findings of 1997, particularly with regard to population, distribution of gender and age, total fertility rates, average household volume and household composition, and results indicated a great amount of consistency between them. Comparison of disability indicators with Census-1997 findings, and Health Survey 1996, was difficult and even impossible due to variation of the concepts of disability and difficulty.

With regard to housing and housing conditions, data were compared with indicators of census and household surveys common indicators, particularly in the indicators of the number of rooms per household, housing density, and the type of housing, in general; most results were close and logical.

When comparing the Census-2007 with Census-1997 indicators and with certain selected surveys, the results were as they appear in the next table, where the data indicated age structure and quality, percentage distribution of the households depending on the type of household, the average household size, and others. The data was of high quality and differences are logical and justified and there is consistency between indicators drawn from different sources, taking into account the reference date and work methodologies to explain the differences in case it exists.

Comparison Table Between Selected Indicators in Census and Some Surveys

Indicator	Census 1997	Health Survey 2000	Demographic Health Survey 2004	PAPFAM 2006	Census 2007
Sex Ratio	103.2	102.0	102.1	102.8	103.1
Median age	17.0	17.4	17.6	17.9	18.0
Age distribution					
0-14	45.0	44.9	43.9	43.9	40.3
15-64	51.2	51.5	52.3	52.8	54.0
65+	3.8	3.6	3.8	3.3	3.3
Not stated	0.1	0.0	0.0	0.0	2.4
Proportional distribution of the households					
consisted of One person	3.7	4.3	5.0	4.1	4.2
Nuclear household	74.0	79.0	82.7	80.7	83.2
Extended household	21.7	16.5	12.2	15.0	12.4
Compound household	0.6	0.2	0.1	0.2	0.2
Household Size	6.1	5.7	5.5	5.9	5.5
No. of persons per room	1.9	2.0	1.8	1.8	1.6

5.5.5 Dealing with not stated

Percentage of Not Stated in West Bank¹ for Selected Indicators

Indicators	Percentage of not Stated %
Age	2.1
Marital status	0.6
Refugee Status	2.2
Religion	2.0
Type of housing unit	1.1
Relation to labor force	0.4
Enrollment in education	0.2

¹ West Bank: Except that part of Jerusalem which was forcefully annexed by Israel following its occupation of the West Bank in 1967.

5.5.6 Use of Demographic Analysis Methods

The usage of demographic analysis methods to assess population data of censuses is considered one of the common methods for assessing the quality of data. It can assess the data of age and age structure and sex in the community through estimating certain demographic measures to examine and assess the data of age and sex. The following was conducted:

- Calculating some index numbers to measure the accuracy of age data and preference of individual age such as: Myers number, Patchi, Wipple and the Secretariat of the United Nations.
- Calculating the percentages of different age groups.
- Calculating the sex ratio for age groups.
- Calculating the percentage of not stated.
- Examining internal consistency between the relevant variables when extracting the tables.

This had logical and acceptable results within the standards and recommendations.
