Corresponding Table of 1991 Census: Table H-3

This is a three way table giving cross-classification of households by ownership status of census houses, size of the households and the number of dwelling rooms occupied. The ownership status of occupied census houses has been shown in three categories viz., owned, rented and any other. If a household is occupying the census house owned by itself and is not making payments in the form of rent to anyone, then the household has been considered as living in owned house. A household has been treated as living in rented house, if rent is paid or contracted for by the household in cash or even in kind. The third category, 'any other', includes the households living in rent free accommodation and also those who live in houses where ownership either of the land or of the structure does not belong to the household. This also includes households living in houses erected on encroached land. The households are grouped into seven size-classes depending upon the number of persons normally residing in the household viz., 1, 2, 3, 4, 5, 6-8 and 9 persons or more. The number of dwelling rooms occupied by the households are presented in 7 classes viz., no exclusive room, one room, two rooms, three rooms, four rooms, five rooms and six rooms or more. This table excludes the institutional households for which the information on ownership status and number of living rooms occupied by them was not collected. The data in this table are presented for total, rural and urban areas separately.

This table is available only in electronic format.
