# Number and structure of private households

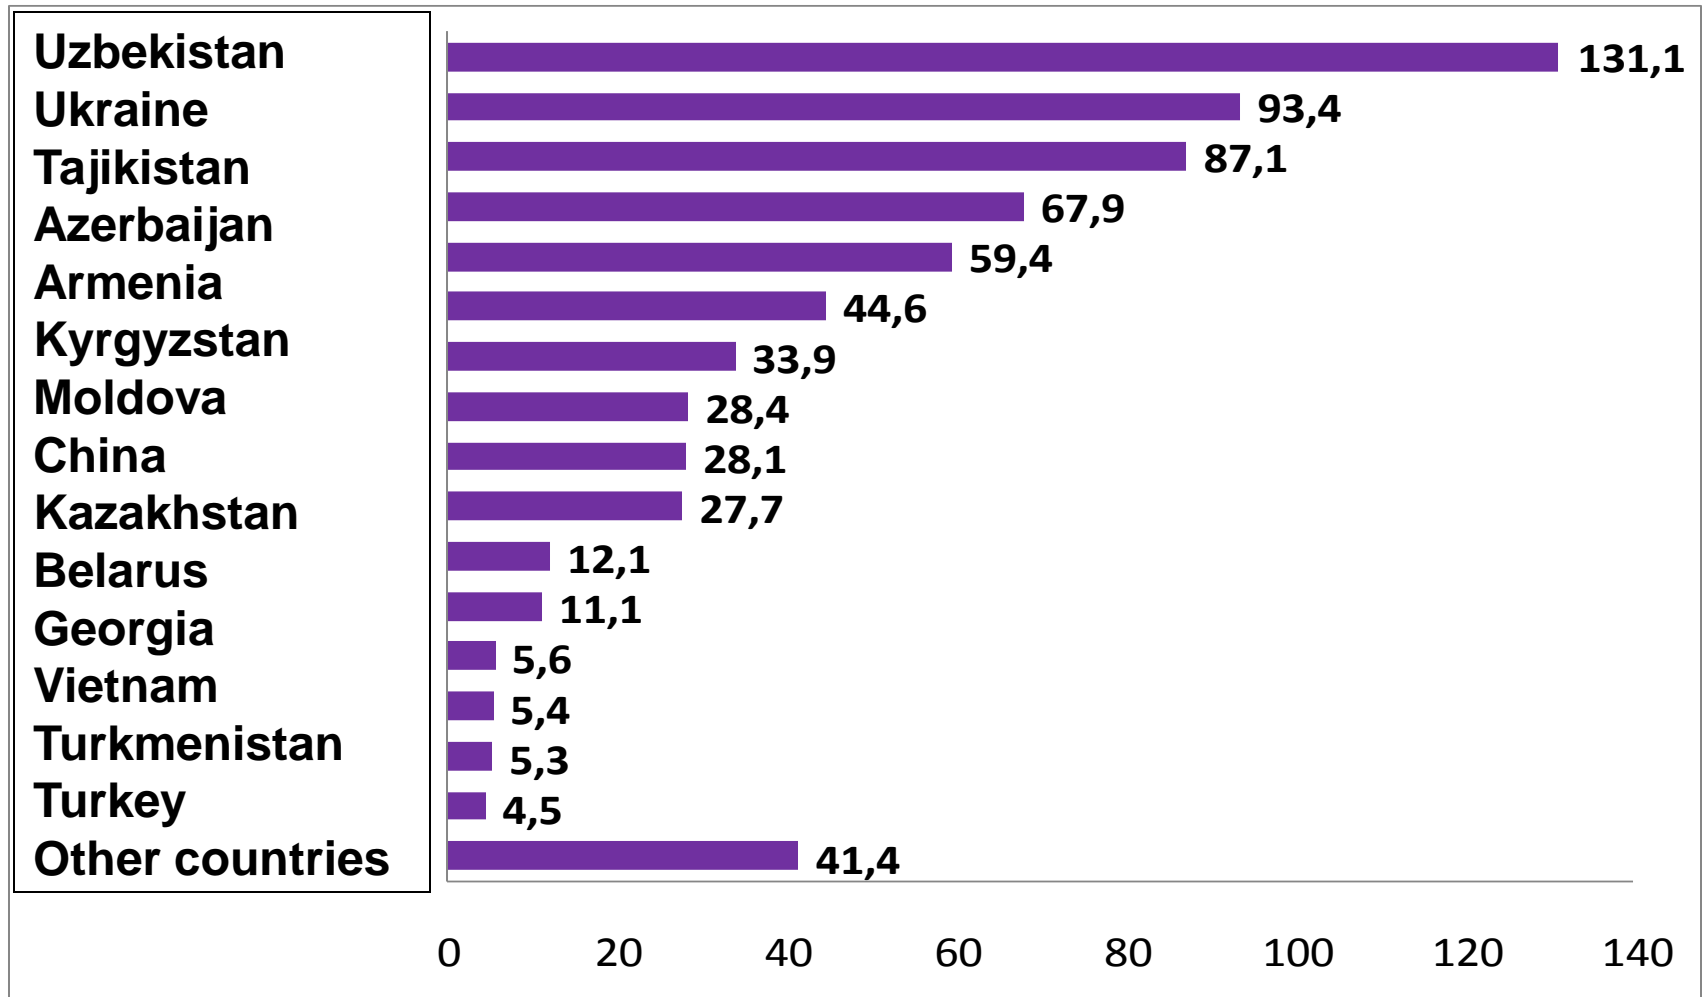

54,6 mln. of  
private households

141,0 mln. of people live there  
(99% of total population)

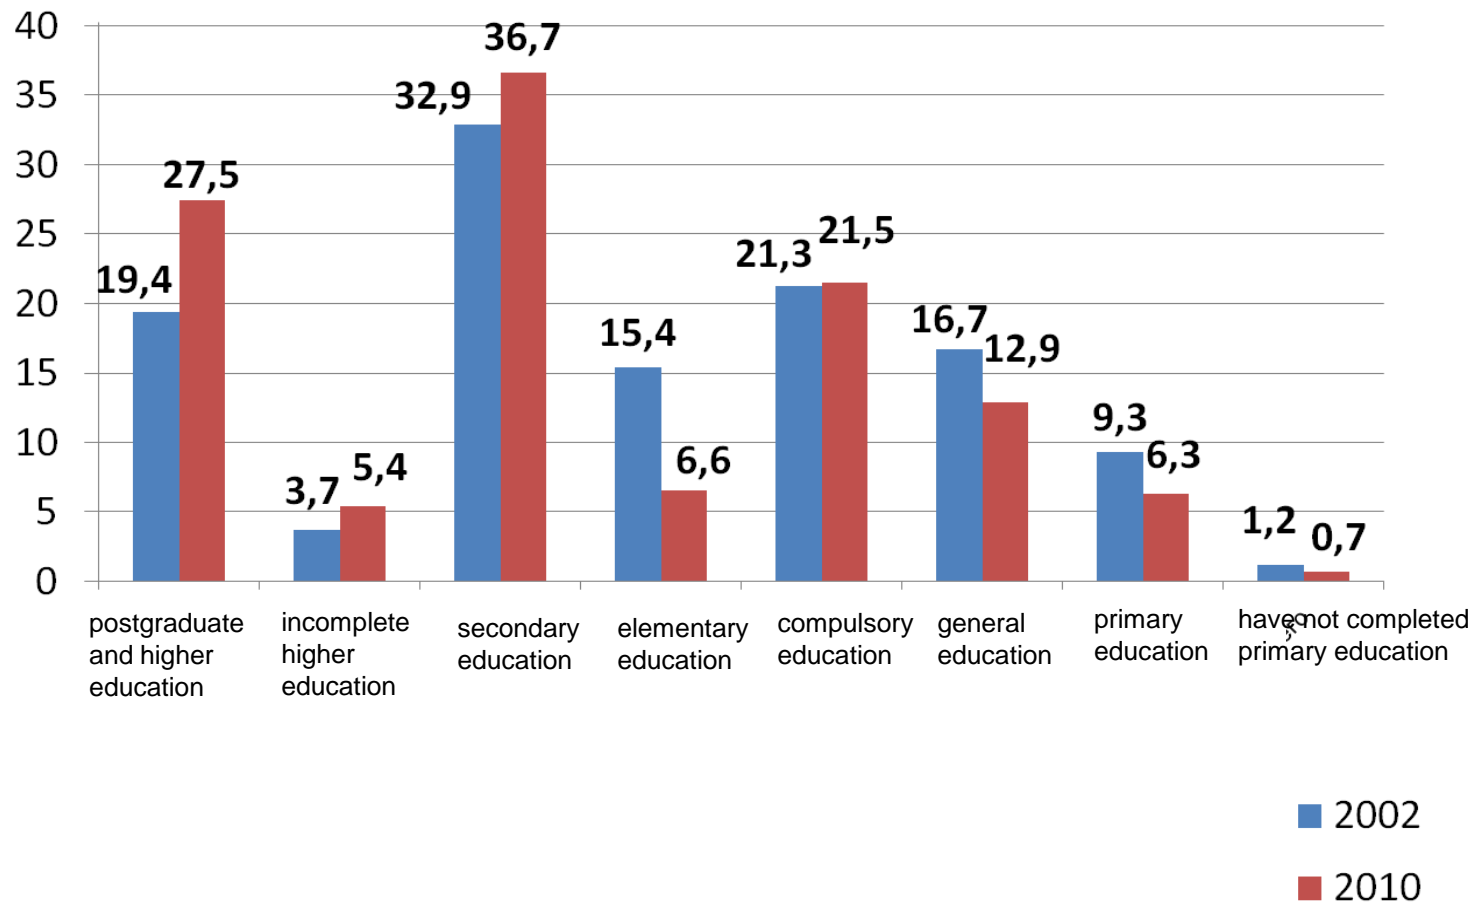

average number of  
persons per household  
- 2,6

# Distribution of population by nationality of foreign states, thous. of people

# Educational level of population aged 15 and older, mln. of people

# Employed population of private households

**People of active working age  
92 %**

**Increase in  
employment  
among people  
aged 55 and older**

**Decrease of share of  
employed population  
aged 15 – 19  
(by 43%)**

**62 mln. of people (94%)  
Population aged 15 – 72  
are employed  
(among total economically active population)**

- Thank you for your attention!
