## LF: Labor Force

Now I would like to ask some questions about the employment of people in your household.

## Household economy

Now we would like to know about your household's economic situation. We would first like to know whether you or anyone else in your household are involved in any type of self-employment or independent income-earning activities. We will ask about salaries from employers and other types of incomes later.

By self-employment activities we mean any economic activities that are not managed by an employer, in which salaries are not received from an employer or any other person or institution outside the household, and in which the risks and profits are borne by the involved persons themselves. Such activities include the operation of larger or smaller businesses, or sale of any product or services for payment in cash or kind, which is managed by the household itself.

If in kind payment, please try and estimate the market value of the payment, that is the value that would have had to be paid for the goods or services received as payment were you to buy them in the market.

We ask you to report the net profit from these activities, after taxes and costs for the materials, products, tools, hired labor, and other expenses paid to start or operate the activity have been deducted. (i.e. the income to be used by the persons in the households)

HE1

**During the past 12 months, did yourself or any other member of your household earn or receive any income in cash or kind from any of the following activities...**

If yes, ask:

**What was the net total earning made from this activity during the past 12 months from each person involved in the activities?**

Note roster number of person involved in the earning activity in the and the earnings accruing to each one of the persons. Start with the person(s) with the highest earnings. If more than four earners on one type, ask the respondent to sum up the rest and note the amount under "others".

NB: For own-produced farm-products, include only cash-sales.

1 = Yes, had income in cash  
2 = Yes, had income in kind  
3 = No  
7 = DK 8 = NA  
DK income: 999997  
NA income: 999998

Net total household earning  
past 12 months (to be filled  
in by interviewer)

## Other income

We will now ask you about all incomes received by the household by employers, relatives and friends, support from the state or charity organizations, gifts from relatives or friends, property rented out or sold, or any other income not mentioned above.

We will list all the various other types of income that the household may possibly have, and ask you to estimate the net (after tax) income for each type that the household or any of its members received during the past 12 months, and for last month separately. For income in kind, we will ask you to estimate the market value of the income type.

*Now we would like to about your own consumption and barter of self-produced agricultural products and fish. We will ask you about your own consumption of food-products that you have told us have been produced in your household. We want to know about the amount and value of you consumption.*

Probing question for AG53 and AG57: how much would you have had to paid for [the quantity of ... eaten] / [the goods and services received in return for the ... bartered] by your household last week if you were to buy it in the market?
