## FOREWORD

Agriculture Census is conducted on quinquennial basis to obtain key information regarding structural changes taking place in the agriculture sector. Provisional results for the first phase of the ninth Census were released in October, 2012. This publication contains the final results of the first phase of Agriculture Census 2010-11. Information collected in the Census is used by various Departments in the Union and State Governments and other data users connected with agricultural planning and development.

The final results for Phase-I of the Census have been brought out on time due to meticulous planning, technical backstopping, administrative support and continuous monitoring by the Agriculture Census Division. I wish to record my appreciation for the outstanding work of Dr. Vidya Dhar, Deputy Director General-cum-Agriculture Census Commissioner and his team in the Agriculture Census Division of this Department. I also wish to convey my thanks to all officers/officials of State/UT Governments without whose wholehearted efforts this mammoth exercise would not have been possible.

I hope the results of the Census would be found useful by persons/organizations associated with the development of agriculture in the country.

(Ashish Bahuguna)

## PREFACE

Agriculture plays a pivotal role in the Indian economy and continues to be one of the most vibrant sector of Indian economy ensuring food security to the country. Although its contribution to GDP is decreasing over the years, it continues to provide gainful employment and livelihood for majority of the population. Recognizing the importance of the sector, Government is implementing various Schemes to improve the productivity of land and enhance farm income with overall objective to ensure food and livelihood security of the population. In this context, collection and maintenance of time series data relating to agricultural operational holdings assumes vital importance.

As part of World Agriculture Census (WCA) Programme, first comprehensive Agriculture Census was carried out in the country with agricultural year 1970-71 as the reference period. In the light of the utility of census data, the second Agriculture Census was conducted in 1976-77. Since then, Agriculture Censuses are being conducted in the country at five yearly interval. The current Agriculture Census with reference year 2010-11 is ninth in the series. The present report, which is an outcome of the first phase of Agriculture Census 2010-11, contains summary results on number and area of operational holdings by various size classes of holdings, social group, types of holding and gender.

Unlike previous censuses, all 35 States/UTs participated in Agriculture Census 2010-11 and the state/national level results (provisional) were brought out in 15 months, shortest time taken so far. After scrutinizing the results at District/Tehsil levels, the database has now been finalized. This became possible due to whole hearted cooperation of officers/staff of State/Union Territory Governments.

I would like to place on record my appreciation to Dr. Vidya Dhar, Agriculture Census Commissioner, Government of India and his team for meticulously planning Census activities and tirelessly pursuing with States/UTs and NIC for bringing out Phase-I results of Agriculture Census 2010-11 in record time.

This Report provides disaggregated information about operational holdings at the national level and for States/UTs. I hope the report would be found useful by data users in Government, academicians, Research Institutions and others associated with agricultural development in India.

## **INTRODUCTION**

The Government of India has been conducting quinquennial Agriculture Census in the country since 1970-71. So far, eight Censuses have been conducted and the ninth one with reference year 2010-11 is going on in the country. The Census provides crucial information on the structural aspects of Indian Agriculture which continues to be the main stay of the Indian Economy. The concepts and definition used in the Indian Agriculture Census are broadly in conformity with those adopted in the World Census of Agriculture. The basic statistical unit for data collection in Agriculture Census is 'Operational Holding' rather than 'Ownership Holding', as the farm level decisions are taken by persons who operate land and not by those who own it.

The Agriculture Census is conducted in three phases. In Phase-I, all the operational holdings in the country are enumerated and the results giving number and area of operational holdings at various administrative levels like Block/Tehsil, District and State are generated according to various size classes, social groups, types of holding and gender.

The provisional results for first Phase of the current Census were released at State and all India level in October, 2012. After, scrutinizing the results at District/Tehsil level, this database has now been finalized and is being published in the form of an All India Report on number and area of operational holdings.

The total number of operational holdings in the country has increased from 129.22 million in 2005-06 to 138.35 million in 2010-11 showing an increase of 7.06 percent. The operated area has also increased to 159.59 million ha. in 2010-11 from 158.32 million ha. in 2005-06, indicating a marginal increase of 0.80 percent. The operated area has increased primarily because the State of Jharkhand participated in Agriculture Census for the first time since the State came into being in the year 2000, while in Bihar, the field work has been successfully completed in all the Anchals for the first time after 1980-81. In Rajasthan the operated area increased as the Government of Rajasthan distributed waste land (culturable) among landless households during 2010-11. In North Eastern States, data is collected on sample basis and because of prevalence of jhoom cultivation in these States, fluctuations occur in the operated area.

The average size of operational holdings has been steadily declining in the country in successive censuses. The average operated size of holding which was 1.23 ha. in 2005-06, has declined to 1.15 ha. in 2010-11 at All India level.

I am happy to record that for the first time, Phase-I results were brought out in a record span of just 15 months, which have now been finalized after scrutinizing at District/Tehsil levels in a time bound manner. This has been possible because of active and whole-hearted cooperation by all the officers/staff associated with the programme of Agriculture Census, 2010-11 in States/UTs and at Central level.

I would specifically like to place on record my appreciation to the large number of functionaries of State/UT Governments for their contribution in Census work without whose efforts this mammoth exercise would not have been completed. I would also like to commend the efforts of officers and staff of the Agriculture Census Division in this Department who worked sincerely and tirelessly to monitor census operations and provide administrative and technical support to the States/UTs.

The data would also be made available on the Departments' website <http://agcensus.nic.in>

## Technical Notes

### 1. Definitions

#### **Operational Holding:**

All land which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

#### **Technical Unit:**

An unit of land which is under the same management and has the same means of production such as labour force, machinery and animals.

#### **Operated area:**

Operated area includes both cultivated and uncultivated area, provided part of it is put to agricultural production during the reference period. If, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-agricultural uses, the total area of the operational holding will be equal to the total geographical area of all the four survey numbers.

#### **Operational holder:**

A person who has the responsibility for the operation of the agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The operational holder may be Individual/Joint/Institutional.

- i) *Individual:* If the holding is being operated either by one person or by a group of persons who are the members of the same household, such holding will be considered as an individual holding.
- ii) *Joint:* If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an agricultural holding, such holding will be considered as joint holding.
- iii) *Institutional:* Holdings such as government farms, farms of sugarcane factories, cooperative farms, lands managed by trusts would be treated as institutional holdings.

### Size classes and Size groups of Holdings:

The data are presented at All India level and for all States and Union Territories in the following size classes and size groups of operational holdings

S.No.	Group	S.No.	Classes (in ha.)
I.	Marginal	1.	Below 0.5 ha.
		2.	0.5 – 1.0 ha.
II.	Small	3.	1.0 – 2.0 ha.
III.	Semi-medium	4.	2.0 – 3.0 ha.
		5.	3.0 – 4.0 ha.
IV.	Medium	6.	4.0 – 5.0 ha.
		7.	5.0 – 7.5 ha.
		8.	7.5 – 10.0 ha.
V.	Large	9.	10.0 – 20.0 ha.
		10.	20.0 and above.

## 2. Sampling design

The Agriculture Census data is collected following two broad approaches; in States where comprehensive land records exist (Land Record States), for Phase-I of the Census, the data on primary characteristics of operational holdings are collected and compiled on complete enumeration basis through re-tabulation of information available in the Village Land Records. For other States (Non-Land record States), this data is collected on sample basis following household enquiry.

In land record States, data on Agriculture Census is pooled for all the parcels of an operational holding irrespective of its location. However, for operational convenience, the outer limit for pooling is restricted to taluka. This pooling is done for each operational holder in the village of his residence. In the non-land record States, the data is collected through sample survey in 20 per cent of villages in each block. These villages are selected through simple random sampling method and all the operational holdings in the selected villages are enumerated following household enquiry approach.

In smaller UTs, like Lakshadweep, Daman & Diu etc., no sampling is done. i.e. all holdings in all the villages are surveyed for collection of data.

### **3. Attributes of disaggregation**

This report contains the number and area of operational holdings distributed with reference to the following variables:

- Size category (Marginal, Small, Semi-medium, Medium and Large)
- Social groups (SC, ST and Others)
- Types of Holding (Individual, Joint, Institutional)
- Gender (Male, Female)
- States (all states and Union Territories of Indian Union)

\*\*\*\*\*

## **All India Report on Number and Area of operational holdings – 2010-11**

### **1. Introduction**

The Department of Agriculture and Cooperation, Ministry of Agriculture, Government of India conducts Agriculture Census, quinquennially, to collect data on operational holdings in the country. The reference period for Agriculture Census is the Agricultural year (July-June). Being the ultimate unit for taking agriculture-related decisions, operational holding has been taken as statistical unit at micro-level for data collection.

The first Agriculture Census in the country was conducted with reference year 1970-71. So far, eight Agriculture Censuses have been conducted in the country. The current Agriculture Census with reference year 2010-11 is ninth in the series.

The provisional results for first Phase of the current Census were released at State and all India level in October, 2012. After, scrutinizing the results at District/Tehsil level, this database has now been finalized and is being published in the form of an All India Report on number and area of operational holdings.

### **2. Methodology**

Agriculture Census is conducted in three distinct Phases. **In Phase-I** of the Census, data on primary characteristics like number of operational holdings and area operated by different size classes (marginal, small, semi-medium, medium and large), social groups (SC, ST, Others), gender (male/female), types of holding (individual, joint and institutional), is collected. This operation covers all villages in land record States and 20 per cent of the villages in non-land record States.

In land record States, data for Phase-I of the Census is retabulated from the existing land records maintained by the Revenue Agency of the State. In other States (non-land record States) and UTs viz. Kerala, Meghalaya, Manipur, Nagaland, Orissa, Tripura, Sikkim, West Bengal, Arunachal Pradesh, Goa, Daman & Diu, Lakshadweep and Mizoram, data is collected on household enquiry approach from the selected 20 percent sample villages which are same as those selected for the scheme Establishment of an Agency for Reporting of Agricultural Statistics (EARAS) for the reference year of the Census. Punjab, though a land

record State follows the procedure for data collection as in case of non-land States.

In the Land Record States, the data on the number and area of holdings is collected in the specified schedules using the land records as benchmark. However, as per the concepts and definitions followed in the Census, effort is made to obtain the de facto position rather than de jure position. A number of parcels of land scattered within a tehsil but operated by an individual or a single household are clubbed together to make a single holding. Similarly, such holdings on which partitions had taken place in practice, though not legally, are counted as separate holdings. The list of operational holdings is manually sorted according to social groups, viz. SCs, STs and others, of the holder and size of the holding at village level. Since, 1995-96 Census, data on gender of the holder are also collected. Various tables prepared at village level are then aggregated at Taluka, District, State and finally at all India level.

**During Phase-II** of the Census, holding schedule is canvassed in selected 20 percent villages in each tehsil for collecting detailed data on characteristics of operational holdings such as irrigation status, tenancy particulars, cropping pattern, dispersal of holdings etc. **In Phase - III**, popularly known as Input Survey, relates to collection of data on the pattern of input use across various crops, regions and size groups of holdings. This survey is conducted in 7 percent of villages selected in each tehsil. The sampling procedure, however, varies from State to State, depending upon the size and other relevant characters of the State/UT.

### **3. Highlights of the Report on Number and Area of Operational Holdings, 2010-11:**

3.1 As per the Agriculture Census, 2010-11, the total number of operational holdings in the country has increased from 129.22 million in 2005-06 to 138.35 million 2010-11 i.e. an increase of 7.06 %.

3.2 There is a marginal increase in the operated area from 158.32 million ha. in 2005-06 to 159.59 million ha. in 2010-11 showing an increase of 0.80%. The operated area has primarily increased because the State of Jharkhand participated for the first time in Agriculture Census operation in 2010-11 after the State came into being in the year 2000.

3.3 The average size of operational holding has declined to 1.15 ha. in 2010-11 as compared to 1.23 ha. in 2005-06.

3.4 The percentage share of female operational holders has increased from 11.70 in 2005-06 to 12.78 in 2010-11 with the corresponding operated area of 9.33 to 10.34.

3.5 The small and marginal holdings taken together (below 2.00 ha.) constituted 85.01 percent in 2010-11 against 83.29 in 2005-06 and the operated area at 44.58 percent in the current Census as against the corresponding figure of 41.14 percent in 2005-06.

3.6 The semi-medium and medium operational holding (2.00 ha. – 10.00 ha.) in 2010-11 were 14.29 percent with the operated area at 44.88 percent. The corresponding figures for 2005-06 Census were 15.86 percent and 47.05 percent.

3.7 The large holdings (10.00 ha. & above) were 0.70 percent of total number of holdings in 2010-11 with a share of 10.59 percent in the operated area as against 0.85 percent and 11.82 percent respectively in 2005-06 Census.

3.8 Out of 35 States/UTs in the country it was found that 13 States viz. Andhra Pradesh, Bihar, Chhattisgarh, Gujarat, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal accounted for about 91% in terms of number of operational holdings with a share of about 88% in operated area in 2010-11.

3.9 In a total of 138.35 million operational holdings in the country, the highest one belonged to Uttar Pradesh (23.33 million) followed by Bihar (16.19 million), Maharashtra (13.70 million), Andhra Pradesh (13.18 million), Madhya Pradesh (8.87 million), Tamil Nadu (8.12 million), Karnataka (7.83 million), West Bengal (7.12 million), Rajasthan (6.89 million), Kerala (6.83 million) etc. with the lowest of only 714 operational holdings in U.T. of Chandigarh.

3.10 Out of a total of 159.59 million hectares operated area in the country in 2010-11, the highest contribution was made by Rajasthan (21.14 million ha.) followed by Maharashtra (19.77 million ha.), Uttar Pradesh (17.62 million ha.), Madhya Pradesh (15.84 million ha.), Andhra Pradesh (14.29 million ha.), Karnataka (12.16 million ha.), Gujarat (9.90 million ha.) etc. with the lowest operated area of 923 hectares in U.T. of

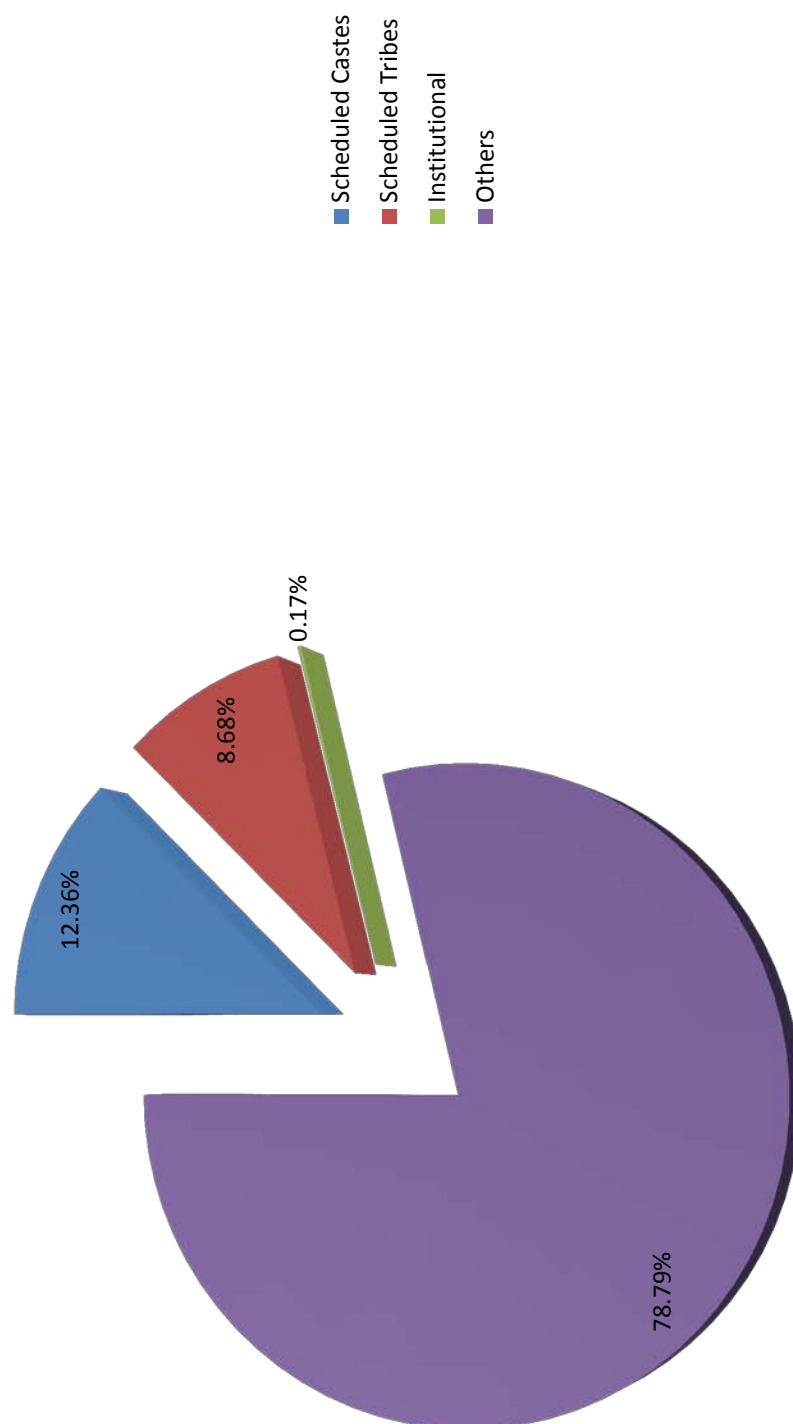

Chandigarh. The U.T. of Chandigarh, thus, constituted the lowest number of operational holdings as well as the operated area in the country in 2010-11.

3.11 As compared to 2005-06, percentage increase in number of operational holdings in 2010-11 was the highest in case of Goa (47.71 percent) followed by Madhya Pradesh (12.19 percent), Rajasthan (11.35 percent), Bihar (10.47 percent), Daman & Diu (9.60 percent), Andhra Pradesh (9.39 percent), Chhattisgarh (8.26 percent), Odisha (7.14 percent), Puducherry (5.56 percent), Nagaland (5.41 percent), Jammu & Kashmir (5.20 percent), etc. However, operated area showed declining trend in most of the States.

3.12 A set of tables giving all India distribution of number of operational holdings and area operated and the state-wise breakup of distribution of the number of operational holdings and area operated by major size groups is presented in the tables that follow.

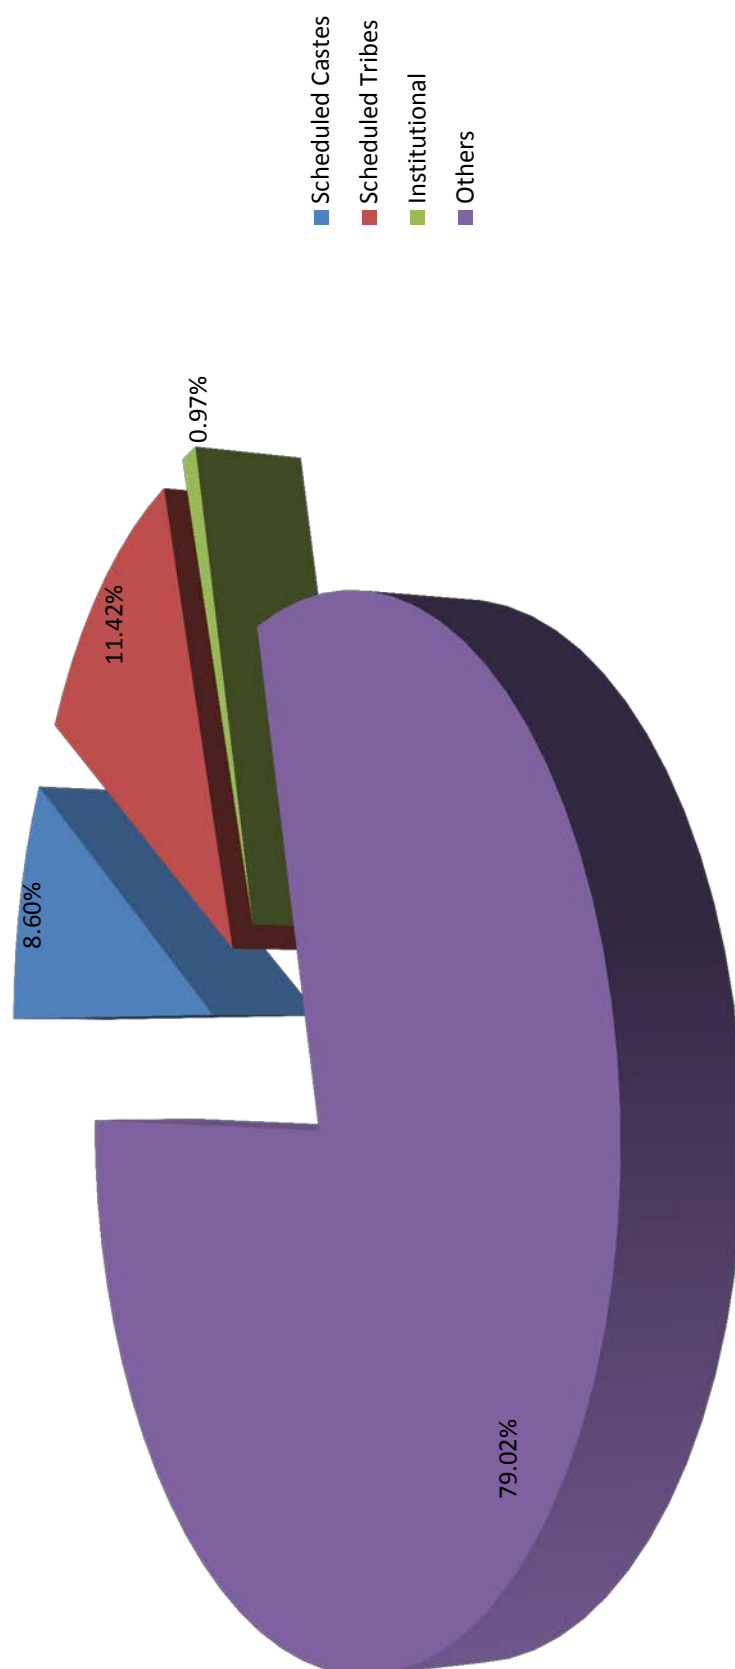

\*\*\*\*\*

**Percentage share of different social groups in number of operational holdings as per Agriculture Census 2010-11**

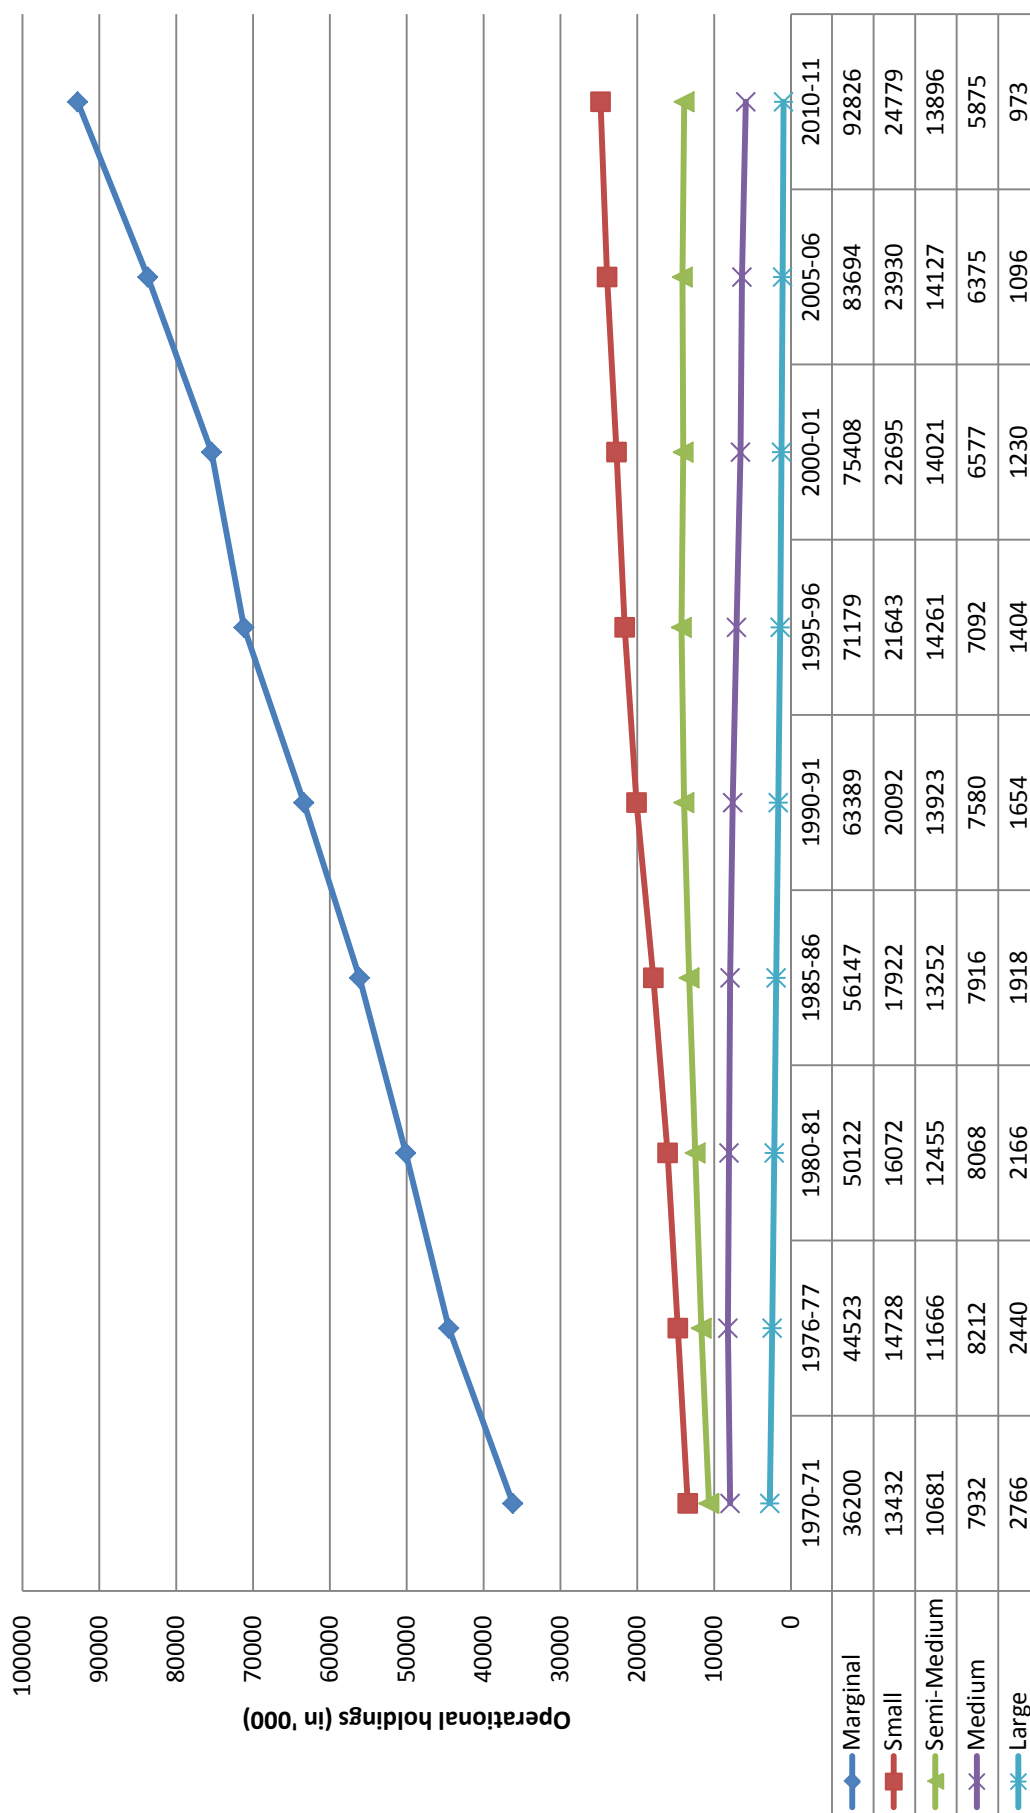

**Percentage share of different social groups in area operated by holdings as per Agriculture Census 2010-11**
