Validation Error Correction Manual

Contents   Page

Introduction

Introduction

This manual documents all the errors detected by the CWIQ data validation program. It shows the error code, the error message, a detailed explanation of the error message, and the correction procedure for every error in error code sequence.

The general procedure for validation error correction is to first compare the responses recorded in the questionnaire to the values printed in the validation error list in order to identify scanning or verification errors. If the response in the questionnaire is different from the response in the listing, the error may be corrected by simply changing the response to the reponse in the questionnaire.

If the response in the questionnaire is incorrect, the error was made by the interviewer. Try to determine the correct response based on other information in the questionnaire. The following examples illustrate this method.

> If the question causes a skip and the destination of the skip is obvious based on responses in the questionnaire, then change the response to be consistent with the skip.

> If the interviewer failed to ask a question or to record the response in the questionnaire, change the response to missing (one or more "?" depending on the question).

> If the interviewer recorded a response for a question that should not have been asked based on the responses to skip questions, change the response to not applicable (one or more "." depending on the question)

Keep the following general principles in mind when making corrections.

1. Always check the responses in the questionnaire.

2. Make changes based on other information in the questionnaire. NEVER INVENT DATA.

3. Apply the correction procedures in the manual consistently.

4. Make the minimum number of changes necessary to correct the error.

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
A1-1	A1 (número da área) não é um número válido

Description of error
A1 (cluster number) was not found in the cluster master table (ClusterMaster).

Correction procedure
Change A1 to the correct cluster number, as recorded on page 1 of the questionnaire. THIS ERROR MUST BE CORRECTED!

Code	Message
A2-1	A2 (N° Agregado Familiar) não é número

Description of error
A2 (household number) is not a valid three digit number.

Correction procedure
Change A2 to the correct household number, as recorded on page 1 of the questionnaire. THIS ERROR MUST BE CORRECTED!

Code	Message
A3-1	A3 (número do entrevistador) não é um número válido

Description of error
A3 (interviewer number) was not found in the interviewer master table (Interv).

Correction procedure
Check the interviewer name written on page 1 of the questionnaire. Determine the interviewer number for that interviewer from the interviewer master list. If the wrong interviewer number was used, correct it. If the interviewer's name does not appear on the master list, the interviewer must be add to the interviewer master table (Interv). If the interviewer name is not written on the questionnaire contact the field supervisor to try to determine the name of the interviewer who performed the interview. As a last resort, change the interviewer number to missing (???).

Code	Message
A4-1	A4 não é uma data válida

Description of error
The date of interview recorded in A4 is not a valid date.

Correction procedure
Check the questionnaire to determine the correct date of interview. If the date of interview was not recorded, check the other questionnaires for the EA or the field work records to determine when the interview took place. THIS ERROR MUST BE CORRECTED.

Code	Message
A4-2	A4 é uma data anterior ao início do inquérito ou posterior à data actual

Description of error
The date of interview recorded in A4 is outside the limits defined for the survey.

Correction procedure
Check the questionnaire to determine the correct date of interview. If the date of interview was not recorded, check the other questionnaires for the cluster or the field work records to determine when the interview took place. THIS ERROR MUST BE CORRECTED.

Code	Message
A5-1	A5 (hora do início) é antes da hora mínima fixada para o início (0600)

Description of error

Correction procedure
Check the interview start time recorded on page 1 of the questionnaire. Compare the hand printed numbers and the shaded bubbles.

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
A5-2	A5 (hora do início da entrevista) não é um número

Description of error
A5 (interview start time) is not a valid four digit number.

Correction procedure
Check the interview start time recorded on page 1 of the questionnaire. Compare the hand printed numbers and the shaded bubbles. The interview start time should be four digits, including leading zeroes if necessary. If any digits were dropped from the interview start time, determine if any of the following responses were shifted to the left.

Code	Message
A5A9-1	Verifique as horas de início e fim da entrevista

Description of error
The interview start time (A5) or the interview end time (A9) is not a valid time, is outside the range defined for the survey or the end time is before the start time.

Correction procedure
Check the questionnaire to determine the correct start and end times. If a time is not recorded, try to determine the correct time from other questionnaires in the EA. If this is not possible, change the incorrect time to missing (????).

Code	Message
A5A9-2	Confirme que a entrevista durou mais de 120 minutos

Description of error
The calculated interview time is more than 90 minutes.

Correction procedure
Verify that the correct start and end times were recorded on the questionnaire and that the interview did last longer than 90 minutes. Correct any mistakes.

Code	Message
A6	A6 (número do membro inquirido) não é um número de membro válido

Description of error
The member number of the respondent recorded in A6 must be the number of a member of the household.

Correction procedure
Verify that the respondent's member number was recorded on the questionnaire. If no respondent is indicated, change A6 to missing (??).

Code	Message
A6-2	O número do membro inquirido não é um número

Description of error
A6 (respondent member number) is not a valid two digit number.

Correction procedure
Check the respondent member number recorded on page 1 of the questionnaire. Compare the hand printed numbers and the shaded bubbles. The respondent member number should be two digits, including leading zeroes if necessary. If any digits were dropped from the respondent member number, determine if any of the following responses were shifted to the left.

Code	Message
A6B5	A idade do inquirido < 15

Description of error
The age of the respondent indicated in A6 is under 15.

Correction procedure
Verify that the correct member number is recorded in A6. If the age of the respondent is highly unlikely (under 5), change A6 to missing (??).

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
A7-1	O número de membros deve ser <= 10 x A7 (número de questionários)

Description of error
The number of members depends on the number of questionnaires. The maximum number of members per questionnaire is 10, so the number of members cannot be greater than 10 times the number of questionnaires.

Correction procedure
Verify that all members recorded in the questionnaire(s) are listed. Data for missing members must be entered manually. Any duplicate or extraneous members must be deleted. If the number of questionnaires is not correct, then change A7.

Code	Message
A7-2	O número de membros deve ser > 10 x A7 (número de questionários - 1)

Description of error
The number of members depends on the number of questionnaires. The minimum number of members per questionnaire is 1, so the number of members cannot be less than 10 times the number of questionnaires - 10.

Correction procedure
Verify that all members recorded in the questionnaire(s) are listed. Data for any missing members must be entered manually. Any duplicate or extraneous members must be deleted. If the number of questionnaires is not correct, then change A7.

Code	Message
A8-1	O resultado da entrevista está fora dos parâmetros

Description of error
A8 (result of interview) is not a valid code.

Correction procedure
Check the interview result recorded on page 1 of the questionnaire. Compare the hand printed number and the shaded bubble. If the result is other 1 (completed with selected household), the reason should be recorded as a comment. If no comment is recorded, contact the field supervisor to determine the correct result.

Code	Message
A8-2	Questionário incompleto com dados nas Secções F, G ou H

Description of error
The result of the interview was recorded as incomplete, but there is some data in the household section of the questionnaire.

Correction procedure
Check the result recorded on page 1 of the questionnaire and the data recorded in Sections F, G, and H on pages 6 and 7 of the questionnaire. If the interview is truly incomplete, change any responses recorded in Sections F, G, or H to not applicable (one or more "." as appropriate). If the data indicate that the interview was completed, then change the result to complete.

Code	Message
A8-3	Questionário incompleto com dados nas Secções B, C, D ou E

Description of error
The result of the interview was recorded as incomplete, but there is some data in the household member section of the questionnaire.

Correction procedure
Check the result recorded on page 1 of the questionnaire and the data recorded in Sections B, C, D, and E on pages 2 through 5 of the questionnaire. If the interview is truly incomplete, delete all members of the household. If the data indicate that the interview was completed, then change the result to complete.

Code	Message
A8-4	Questionário incompleto com dados na Secção I

Description of error
The result of the interview was recorded as incomplete, but there is some data in the child section of the questionnaire.

Correction procedure
Check the result recorded on page 1 of the questionnaire and the data recorded in Section I on page 8 questionnaire. If the interview is truly incomplete, delete all children in the household. If the data indicate that the interview was completed, then change the result to complete.

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
A9-1	A9 (hora do fim da entrevista) é depois da hora máxima para o fim das entrevista

	Description of error

	Correction procedure
	Check the interview end time recorded on page 1 of the questionnaire. Compare the hand printed numbers and the shaded bubbles.

Code	Message
A9-2	A9 (hora do fim da entrevista) não é um número

	Description of error
	A9 (inteview end time) is not a valid four digit number.

	Correction procedure
	Check the interview end time recorded on page 1 of the questionnaire. Compare the hand printed numbers and the shaded bubbles. The interview end time should be four digits, including leading zeroes if necessary. If any digits were dropped from the interview end time, determine if any of the following responses were shifted to the left.

Code	Message
B1-1	B1 tem de ser 1, 2 ou ?

	Description of error
	The value recorded for B1 is not a valid response.

	Correction procedure
	Check the questionnaire to determine how B1 was marked. If B1 was not correctly marked and the gender of the person can be determined unambiguously from their name, correct B1 accordingly otherwise change B1 to missing (?).

Code	Message
B1B4	O(a) cônjuge do chefe do agregado familiar deve ser do sexo oposto

	Description of error
	The spouse of a male head of household must be female and the spouse of a female head of household must be male.

	Correction procedure
	Check the codes recorded for B1 for the head and the spouse and correct one or the other.

Code	Message
B2-1	B2 tem de ser 1, 2, 3 ou ?

	Description of error
	The value recorded for B2 is not a valid response.

	Correction procedure
	Check the questionnaire to determine how B2 was marked. If B2 was not correctly marked change B2 to missing (?).

Code	Message
B3-1	B3 tem de ser 1, 2 ou ?

	Description of error
	The value recorded for B3 is not a valid response.

	Correction procedure
	Check the questionnaire to determine how B3 was marked. If B3 was not correctly marked and the person has a paying job recorded in E6 (codes 1,2 or 4), change B3 to yes (1), otherwise change B3 to missing (?).

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
B4-1	B4 tem de ser 1-6 ou ?

Description of error
The value recorded for B4 is not a valid response.

Correction procedure
Check the questionnaire to determine if question B4 was marked. If B4 was not marked correctly change B4 to missing (?).

Code	Message
B4-2	O membro número 1 deve ser o(a) chefe do agregado familiar (B4 = 1)

Description of error
The person listed as member 1 is not the head of household.

Correction procedure
Check the questionnaire to determine which member is the head. If the head was not recorded as member 1, change the member numbers of member 1 and the head as described in Annex 1 of this manual.

Code	Message
B4-3	Um membro com um número diferente de 1 não deve ser o(a) chefe do AF

Description of error
The head of household must be listed as member 1.

Correction procedure
Check the questionnaire to determine which member is the head. If the head was not recorded as member 1, change the member numbers of member 1 and the head as described in Annex 1 of this manual.

Code	Message
B4B5-1	O(a) chefe do agregado familiar não deve ter menos de 15 anos de idade

Description of error
Normally, the head of household is an adult.

Correction procedure
Check the questionnaire to verify the age of the head of household. If you are satisfied that the head is less than 15 years old, no correction is necessary. If there is evidence that the age of the head was not correctly recorded, change B5 to missing (??).

Code	Message
B4B5-2	A idade do(a) filho(a) deve ser pelo menos 12 anos menor do que a idade do chefe

Description of error
The difference in age between the head and the child of the head should be at least 12 years.

Correction procedure
Check B5 for the head and the child and correct any errors. If there are no obvious errors, change the least likely age to missing (??).

Code	Message
B4B5-3	A idade do pai/mãe deve ser pelo menos 12 anos maior do que a idade do chefe

Description of error
The difference in age between the head and the parent of the head should be at least 12 years.

Correction procedure
Check B5 for the head and the parent and correct any errors. If there are no obvious errors, change the least likely age to missing (??).

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
B4B6-1	A(o) cônjuge do(a) chefe do AF (B4 = 2) deve ser casada(o) (B6 =2-4)

Description of error
B6, marital status, for a spouse of the head must be married (codes 2 or 3).

Correction procedure
Check the questionnaire to verify the relationship to head (B4) and marital status (B6) of the person. If the person is indeed the spouse of the head, change the marital status to match the head (monogamous, polygamous). If the relationship cannot be corrected, change it to missing (?).

Code	Message
B5-1	A idade não é um número

Description of error
B5, the age of household member, must be a number.

Correction procedure
Check the questionnaire to determine if B5 was marked properly. If B5 was not marked, change it to missing (99).

Code	Message
B5-2	B5 deve ser 0-95, 99

Description of error
B5, the age of household member, must be 0 to 95 or 99. 95 is used for age 95 and above and 99 is to record missing age.

Correction procedure
Check the questionnaire to determine if B5 was marked properly. If B5 was not marked, change it to missing (99). If B5 was marked with 96, 97 or 98, change B5 to 95.

Code	Message
B5B6-1	Com uma idade menor de 12 anos deveria ser solteiro(a) (B6 = 1)

Description of error
Household members under age 12 should normally be single.

Correction procedure
Check the questionnaire to verify the age (B5) and marital status (B6) of the person. If the person is actually under 12 years of age and there is no other evidence of marriage, change the marital status to single (1).

Code	Message
B5B7-1	Idade < 15, B7 deve ser 1-3 ou ?

C2C9g-2	Se C2 = não ou C5 = sim, C9g não deveria estar marcado

Description of error
C9g is marked when the response to C2 is no (2) or the response to C5 is yes (1).

Correction procedure
If C2 and C5 are correctly recorded, then change C9g to not applicable (.). If either C2 or C5 have been incorrectly recorded, the response should be corrected.

Code	Message
C2C9h-2	Se C2 = não ou C5 = sim, C9h não deveria estar marcado

Description of error
C9h is marked when the response to C2 is no (2) or the response to C5 is yes (1).

Correction procedure
If C2 and C5 are correctly recorded, then change C9h to not applicable (.). If either C2 or C5 have been incorrectly recorded, the response should be corrected.

Code	Message
C2C9i-2	Se C2 = não ou C5 = sim, C9i não deveria estar marcado

Description of error
C9i is marked when the response to C2 is no (2) or the response to C5 is yes (1).

Correction procedure
If C2 and C5 are correctly recorded, then change C9i to not applicable (.). If either C2 or C5 have been incorrectly recorded, the response should be corrected.

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
C3C6	O grau de ensino mais alto que completou é superior ao grau de ensino actual

Description of error
The highest grade completed recorded in C3 is higher than the current grade recorded in C6.

Correction procedure
Check the responses recorded for C3 and C6. If the responses have been properly recorded, then change C3 to the response recorded for C6 and change C6 to the response recorded for C3.

Code	Message
C5C6-1	Se C5 = 1, C6 tem de ser um grau válido ou ??

Description of error
The response to C5, currently in school, is yes (1), but the answer to C6, current grade, is not valid.

Correction procedure
Check the questionnaire to determine how C6 was recorded. If it was not marked or was marked improperly, change C6 to missing (??). Note that it may be possible to infer the correct response to C6 from C3 (highest grade completed).

Code	Message
C5C7-1	Se C5 = 1, C7 tem de ser 1-5 ou ?

Description of error
The response to C5, currently in school, is yes (1), but the answer to C7, who runs the school, is not valid.

Correction procedure
Check the questionnaire to determine how C7 was marked. If it was not marked or was marked improperly, change C7 to missing (?).

Code	Message
C8a	C8a tem de ser sim (1) ou não aplicável (.), ou omitida (?)

Description of error
The response to C8a is not a valid response.

Correction procedure
Check the questionnaire to determine the responses to C5 and C8a through C8f. If C5 is NO, then none of C8a through C8f should be marked and all should be changed to not applicable (.). If C5 is yes then either C8a or any of C8b through C8f should be marked. If none have been marked, then change C8a to missing (?).

Code	Message
C8ab	C8a =1 (não há problema) e C8b = 1

Description of error
The response to C8a, no problem with school or satisfied, is yes (1) and the response to C8b, problem with books/supplies, is also yes (1).

Correction procedure
Check the responses to C8a and C8b. If C8a is Yes, then no problems should be cited. If any problems are cited, change the response to C8a to not applicable (.). If no problems are cited, change C8b to not applicable (.).

Code	Message
C8ac	C8a = 1 (não há problema) e C8c = 1

Description of error
The response to C8a, no problem with school or satisfied, is yes (1) and the response to C8c, problem with poor teaching, is also yes (1).

Correction procedure
Check the responses to C8a and C8c. If C8a is Yes, then no problems should be cited. If any problems are cited, change the response to C8a to not applicable (.). If no problems are cited, change C8c to not applicable (.).

E9-1	Se E1 ou E2 = sim, E9 não deveria estar marcada

Description of error
E1, did member do any type of work last week, or E2, was member absent from work last week, is yes (1), but there is no response for E8, what is the main activity at member's job.

Correction procedure
Check the responses to E1, E2 and E8 in the questionnaire. If E1 or E2 = yes (1), then change E8 to missing (?).

Code	Message
E9-2	Se E1 e E2 = não, E9 não deveria estar marcada

Description of error
E1, did member do any type of work last week, and E2, was member absent from work last week, are no (2), but there is a response for E8, what is the main activity at member's job.

Correction procedure
Check the responses to E1, E2 and E8 in the questionnaire. If E1 and E2 = no (2), then change E8 to not applicable (.).

Code	Message
E9-3	E9 não deveria estar marcada para pessoas com menos de 6 anos de idade

Description of error
E8, what is the main activity at the place of the member's main job, must not be marked for persons under age (B5) 5.

Correction procedure
Check the questionnaire to determine the age of the member (B5). If the age is under 5, change E9 and any other responses in Section E to not applicable (.).

QUIBB Mensagens de Erros de Edição e Consistência

Head-0	Não existe chefe do agregado familiar

Description of error
No member has been identified as the head of household (B4 = 1).

Correction procedure
The head of household normally is recorded as member 1. Check member 1 in the questionnaire to determine if that person is the head of household. A non-resident (B2 = 3) if accepted by other members, may by definition be the head of the household. Check to see if any members have been recorded with B2 = 3 for a potential head of household. If the problem can not be resolved by reference to the questionnaire, contact the field supervisor or the interviewer. If you have to change member numbers, consult Annex 1 of this manual.

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
Head-2	Há mais de um(a) chefe do agregado familiar

	Description of error
	Two or more members have been identified as the head of household (B4 = 1).

	Correction procedure
	The head of household normally is recorded as member 1. If one of the members identified as the head is member 1, then change B4 for the other member(s) to missing (?) if there is no further information available. If you have to change member numbers, consult Annex 1 of this manual.

Code	Message
Head-3	Existe 1 conjuge, chefe deve ser casado

	Description of error
	The marital status (B6) of the head indicates that the head is not married, but at least one household member has B4 (relationship to the head of household) as spouse (2).

	Correction procedure
	Check Section B of the questionnaire to identify the head and the member(s) identified as spouse. If the relationship spouse(s) is correctly coded, change the marital status of the head to married, monogamous or polygamous depending on the number of spouses.

Code	Message
Head-4	Existe 2 ou + conjuge, chefe deve ser poligamo

	Description of error
	There are two or more household members with relationship to the head of household as spouse (B4 = 2), but the marital status (B6) of the head of household is Married (polygamous) (2).

	Correction procedure
	Check Section B of the questionnaire to identify the head and the member(s) identified as spouse. If the relationship spouse(s) is correctly coded, change the marital status of the head to married (polygamous) (3).

Code	Message
J1b	J1b não está marcada

Description of error
I1b, member number of mother, is not marked.

Correction procedure
Check the questionnaire to determine the response to I1b. If no response is marked, change I1b to missing (??).

Code	Message
J1b-0	J1b (número de membro da mãe) não é um número

Description of error
The member number in I1b (member number of mother) is not a valid number.

Correction procedure
Verify that the child entry is valid, if not then delete the entry. Otherwise, identify potential mothers (women age 13 and above, at least 13 years older than the child) in Section B of the questionnaire. If the mother cannot be unambiguously identified, change I1b to missing (??).

Code	Message
J1b-1	J1b (número de membro da mãe) não é um número de membro válido

Description of error
The member number in I1b (member number of mother) is not a valid member number for the household.

Correction procedure
Identify potential mothers (women age 13 and above, at least 13 years older than the child) in Section B of the questionnaire. If the mother cannot be unambiguously identified, change I1b to missing (??).

Code	Message
J1b-2	A mãe tem de ser do sexo feminino

Description of error
The member identified as the child's mother in I1b is not a female according to B1 (gender) in Section B.

Correction procedure
Identify potential mothers (women age 13 and above, at least 13 years older than the child) in Section B of the questionnaire. If the mother cannot be unambiguously identified, change I1b to missing (??).

Code	Message
J1b-3	A mãe deve ter 13 anos de idade ou mais

Description of error
The member identified as the child's mother in I1b is not age 13 or above according to B5 (age) in Section B.

Correction procedure
Identify potential mothers (women age 13 and above, at least 13 years older than the child) in Section B of the questionnaire. If the mother cannot be unambiguously identified, change I1b to missing (??).

Code	Message
J1MNo-1	Não há dados para esta criança

Description of error
The member number in I1a (member number of child) is not a valid member number for the household.

Correction procedure
Identify potential children (under age 5) in Section B of the questionnaire. If the child cannot be unambiguously identified, delete the child from the CHData table in the database.

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
J1Seq	A criança não está em sequência

	Description of error
	The children in Section I of the questionnaire are not listed in member number sequence.

	Correction procedure
	Compare the member numbers in Section I with the member numbers in Section B. If there are any discrepancies, correct the member numbers recorded in the CHData table in the questionnaire database. See Annex 1 of this manual to change child member numbers.

Code	Message
J2-1	J2 não está marcada

	Description of error
	I2, child's date of birth, is not marked.

	Correction procedure
	Check the questionnaire to determine the response to I2. If no response is marked, change I2 to missing (??????).

Code	Message
J2-2	J2 não é uma data válida

	Description of error
	The value recorded for I2, child's date of birth, is not a valid date. The date must be within five years of the date of interview.

	Correction procedure
	Check the questionnaire to determine the response to I2. Check the age (B5) recorded for the child in Section B. If the correct date of birth cannot be determined, change I2 to missing (??????).

Code	Message
J2-3	J2 é uma data posterior à data da entrevista

	Description of error
	The value recorded for I2, child's date of birth, is after the date of interview.

	Correction procedure
	Verify that both the date of interview and the child's date of birth have been correctly marked. Check the age (B5) recorded for the child in Section B. If the correct date of birth cannot be determined, change I2 to missing (??????).

J2Age	A idade calculada a partir da data de nascimento é de 5 anos ou mais
	Description of error
	The calculated age is 60 months or more. The age is calculated by determining the number of months between the date of birth and the date of interview and taking into account the day of birth and the day of interview.
	Correction procedure
	Verify that both the date of interview and the child's date of birth have been correctly marked. Check the age (B5) recorded for the child in Section B. If the correct date of birth cannot be determined, change I2 to missing (??????).

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
J2B5	Idade da criança tem uma diferença de + de 1 ano em relação em B5

Description of error
The calculated age differs from the age (B5) recorded in Section B by more than one year. The age is calculated by determining the number of months between the date of birth and the date of interview and taking into account the day of birth and the day of interview.

Correction procedure
Verify that both the date of interview and the child's date of birth have been correctly marked. Check the age (B5) recorded for the child in Section B. If the date of birth appears to be correct change the child's age (B5) in Section B to the calculated age, otherwise change the child's date of birth to missing (??????).

Code	Message
J2I5a	O peso está fora dos parâmetros para a idade e o sexo

Description of error
I5a (weight of the child) is outside the limits defined by the child's age and sex.

Correction procedure
The weight limits are printed in Annex 2 of this manual. Check the weight recorded in the questionnaire with the appropriate entry in the table. If the weight is very low, the interviewer may have forgotten to record the decimal place. If the weight is obviously incorrect, change it to missing (???).

Code	Message
J2I5b	A altura está fora dos parâmetros para a idade e o sexo

Description of error
I5b (height of the child) is outside the limits defined by the child's age and sex.

Correction procedure
The height limits are printed in Annex 2 of this manual. Check the height recorded in the questionnaire with the appropriate entry in the table. If the height is very low, the interviewer may have forgotten to record the decimal place. If the height is obviously incorrect, change it to missing (????).

Code	Message
J3-1	J3 tem de ser 1-3 ou ?

Description of error
The value recorded for I3, place of delivery, is not a valid response.

Correction procedure
Check the questionnaire to determine the response to I3. If no response is marked, change I3 to missing (?).

Code	Message
J4-1	J4 tem de ser 1-5 ou ?

Description of error
The value recorded for I4, who delivered the child, is not a valid response.

Correction procedure
Check the questionnaire to determine the response to I4. If no response is marked, change I4 to missing (?).

Code	Message
J5a-1	J5a (peso da criança) não é um número

Description of error
I5a is not a valid three digit number.

Correction procedure
Check I5a for the child in the questionnaire. Compare the hand printed numbers and the shaded bubbles. I5a, the child's weight, should be three digits with one decimal place and leading zeroes if necessary. If any digits were dropped from I5a, determine if any of the following responses were shifted to the left.

QUIBB Mensagens de Erros de Edição e Consistência

Code	Message
J5b-1	J5b (altura da criança) não é um número

Description of error
I5b is not a valid four digit number.

Correction procedure
Check I5b for the child in the questionnaire. Compare the hand printed numbers and the shaded bubbles. I5b, the child's height, should be four digits with one decimal place and leading zeroes if necessary. If any digits were dropped from I5b, determine if any of the following responses were shifted to the left.

Code	Message
J6a-1	J6a tem de ser 1, 2 ou ?

Description of error

MNo-1	Os números dos membros não sãs consecutivos começando por 1
	Description of error
	Member numbers are assigned consecutively starting from 1. If the numbers are not consecutive, then one or more members are missing.
	Correction procedure
	Compare the members in Sections B, C, D, and E of the questionnaire to the members printed in the validation listing. If any legitimate household members are missing from the listing, they must be added to the INData table in the database, otherwise the member numbers in the database should be updated to be consecutive starting from 1 (correct any member number references such as A6 respondent member number, F17 member who contributes most to household income and I1b mother's member number). See Annex 1 of this manual to change member numbers.

Annex 1: Changing household member or child member numbers

Some corrections are made by changing the household member and child numbers in the questionnaire database tables: InData and ChData. This is necessary when the head of household was not recorded as member 1 or when children's member numbers are mixed up. To reverse the member numbers for two members:

1. Change the first line number to an unused number, such as 99.
2. Change the second line number to the first line number.
3. Change the unused number to the second line number.

Example: Members 1 and 2 are reversed: 1 is the spouse and 2 is the head.

1. Change member number 1 to member number 99.
2. Change member number 2 to member number 1.
3. Change member number 99 to member number 2.

Annex 2: Height and weight limits for children age 0-72 months

Age in months		Male - height		Female - height		Male - weight		Female - weight	
From	To	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum
0	2	36	74	36	72	0.5	10	0.5	9
3	5	45	83	44	80	1	13	1	12
