

**QUARTERLY REPORT OF THE
SRI LANKA LABOUR FORCE
SURVEY**

THIRD QUARTER - 2009

**DEPARTMENT OF CENSUS & STATISTICS
MINISTRY OF FINANCE AND PLANNING**

ISSBN 978 – 955 – 577 – 693 - 6

Preface

In the past, information on labour force characteristics, employment and unemployment etc. were collected through labour force and socio - economic surveys conducted at five yearly time intervals. However, the employment and unemployment data are required at very short intervals to monitor the programs made in the employment generating policies of the government. Therefore, to satisfy this need, the Department of Census and Statistics (DCS) designed a labour force survey on a quarterly basis, to measure the levels and trends of employment, unemployment and labour force in Sri Lanka on a continuous basis. This survey was commenced from the first quarter of 1990 and this report is the seventy fifth in the series of quarterly reports published so far.

Current survey concepts and methods are very similar to those introduced at the beginning of the survey in 1990. However, some changes were made over the years to improve the accuracy and usefulness of the data. The significant revisions were made on the labour force survey questionnaire in 2006, and the revised version was introduced for the survey conducted in 2006 first quarter, and it will be used in future as well.

The field work of the survey for the third quarter 2009 was done in July, August and September in year 2009. Even though it was planned to conduct the survey in Northern province, the survey was not conducted fully due to the prevailing uncertain conditions in districts of Northern province. In third quarter 2009 the survey was conducted all the provinces other than Northern province. However for comparison purposes related tabulations have been done (i) excluding Northern and Eastern provinces and (ii) excluding Northern province, separately in this report.

A nationally representative annual sample of about 22,500 housing units have been selected for the survey in 2009. However as mentioned above, the survey was not conducted properly in Northern province as scheduled, so this report is based on a quarterly sample of 5,050 housing units, excluding Northern province providing national level estimates with a stipulated standard errors of labour force characteristics as reported in the reference period of the third quarter 2009.

Acknowledgements

This report is seventy fifth in the series of the Quarterly Labour Force Survey which was commenced from the first quarter 1990 and is being continued by the Department of the Census and statistics.

Sample Survey Division implemented the Sri Lanka Labour Force Survey programme, under the direction of Mr. G.Y.L. Fernando, Director (2).

Planning and the execution of the survey was done by the staff of the Sample Surveys Division under the supervision of Mr.W.W.M.A.S.Premakumara, Director, Sample Surveys Division.

Field operation activities were organized by Mr. R.A.P. Kumarasinghe, Statistician of the Sample Surveys Division.

The supervision activities were carried out by Mr. Lucky Thangarathnam, Senior Statisticians, and Mr. R.A.P. Kumarasinghe, Mr. I.L.Sherifdeen, Mr. P.A.Subawickrama, Mrs. Chandani Wijebandara and Mr. W. Gnanathilaka, Statisticians, of the sample surveys division and Heads of statistics divisions in each district.

The computer data processing and final tabulations were done by Mrs. W.A.S.M.P. Gunasekara, Mr.T. Thirugnanatheepan Statistical Officers and Mr. M.B.M. Shiras, Statistical Assistant of the Sample Surveys Division, under the supervision of Mr. P.A. Subawickrama, Statistician using Microcomputers.

Developing of sample selection programme and it's related computer software was done by Mr. K.M.R. Wickramasinghe, System Analyst/ Programmer of the sample survey division.

This publication was organized and prepared by Mrs. Chandani Wijebandara, Statistician Sample Surveys Division, assisted by Mrs. W.A.S.M.P. Gunasekara, Statistical officer.

The Data Processing Division, under the direction of Mr. S.A.S. Bandulasena, Deputy Director and under the supervision of Mr. Migara Fernando and Mr. Wasantha Weerasiri, Senior System Analyst/Programmers, was responsible for the survey data entry and preparation of data entry and computer edits programmes. Data entry was decentralized and manual editing, coding & data entry were done by responsible officers at district kachcheries in districts Gampaha, Kalutara, Kandy, Matale, Galle, Matara, Kurunegala, Puttalam, Anuradhapura, Badulla, Ratnapura & Kegalle.

District field staff of the Department who worked on the survey deserve a special word of thanks. They include District Deputy Directors/ Senior Statisticians/ Statisticians and field Statistical Officers, who worked hard at the data collection stage, to make this survey a success.

Printing of the report was done at the Printing Division, under the supervision of Mr. W.C. Weerawansa, Senior Statistician.

Finally, I wish to express my appreciation to all the respondents of the survey for their valuable co-operation.

Appendix 3: Survey schedule

Introduction

Sri Lanka Labour Force Survey is designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990.

The field work of the survey for the third quarter 2009 was done in July, August and September in year 2009. Even though it was planned to conduct the survey in Northern province, the survey was not conducted fully due to unsettled conditions in districts of Northern province, hence this bulletin consists of summary statistics computed by excluding Northern province.

Labour force participation rate

Labour Force: Number of persons who were employed or unemployed during the reference week

Labour force participation rate: Labour force expressed as a percentage of population age 10 yr. & over

Table 1: Economically active population by sex and sector - Third Quarter 2009

Sector	Economically active population					
	Total	%	Male	%	Female	%
Total	8121637	100.0	5198633	64.0	2923004	36.0
Urban	872526	100.0	575906	66.0	296619.9	34.0
Rural	7249111	100.0	4622727	63.8	2626384	36.2

Table 2: Economically Inactive population by sex and sector - Third Quarter 2009

Sector	Economically inactive population					
	Total	%	Male	%	Female	%
Total	8545659	100.0	2652936	31.0	5892722	69.0
Urban	1071154	100.0	323468	30.2	747686	69.8
Rural	7474505	100.0	2329469	31.2	5145036	68.8

The survey results revealed that (Table 1), the estimated economically active population (or labour force) was about 8.1 million in third quarter 2009. Of which 64.0 percent were males and 36.0 percent were females. Of the economically inactive population 31.0 percent were males and 69.0 percent were females (Table 2).

Figure 1: Distribution of Economically active/Inactive population

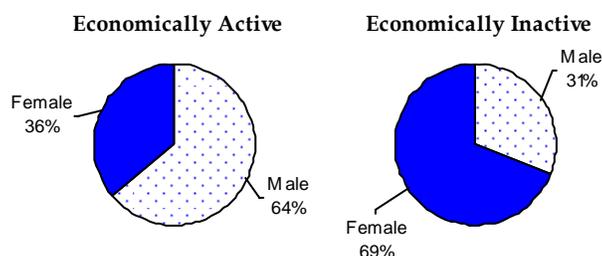

Table 3: Labour Force Participation Rate by sex & year

Year	Labour force participation rate		
	Total	Male	Female
2000	50.3	67.2	33.9
2001	48.8	66.2	31.9
2002	50.3	67.9	33.6
2003	49.7	67.5	32.6
2004	49.6	67.2	33.0
2005	49.3	67.3	32.6
2006	51.2	68.1	35.7
2007	49.8	67.8	33.4
2008	50.2	67.9	34.3
2009 Q1	49.9	67.4	34.3
2009 Q2	48.7	66.5	32.8
2009 Q3	49.3	66.3	34.3

Table 3 provides the information on labour force participation rates since year 2000. As can be seen from this table, male participation rate for the third quarter 2009 was about 66.3 percent and it was 34.3 percent for females. It was important to note that, male participation to the labour force was as twice as that of females.

* Excluding Northern & Eastern provinces

Table 4: Labour Force Participation Rate by age group & by sex - Third Quarter 2009

Age group	Sex		
	Total	Male	Female
Total	48.7	66.2	33.2
15 - 19	19.9	25.8	14.1
20 - 24	58.0	77.2	42.2
25 - 29	64.7	90.4	42.6
30 - 34	68.6	94.9	45.0
35 - 39	69.6	96.0	48.1
40 - 44	70.5	95.3	49.5
45 - 49	71.9	95.2	50.6
50 - 54	67.2	89.9	47.7
55 - 59	58.6	80.7	38.0
60+	26.7	42.5	13.3

The distribution of labour force participation rate by age groups and by sex depicts more male participation compared to female in all age groups.

Highest male participation rate was reported from age group (35 - 39) while in female highest participation rate was reported from age group (45 - 49).

Employment

Employed: Persons who are engaged in some kind of work for pay or profit or family gain during the reference week.

Table 5 : Distribution of Employed population by main industry, (Third quarter 2008 – Third Quarter 2009)

Year	Total	Major industry group		
		Agriculture	Industries	Services
July-Aug-Sept. 3rd Qtr - 2008	7735132 100.0	2665917 34.5	2000537 25.9	3068678 39.7
Oct-Nov-Dec 4th Qtr – 2008	7712943 100.0	2617910 33.9	1960544 25.4	3134489 40.6
Jan-Feb-Mar 1st Qtr – 2009	7709784 100.0	2613350 33.9	1894279 24.6	3202155 41.5
April-May-June 2nd Qtr - 2009	7465030 100.0	2382913 31.9	1913893 25.6	3168224 42.4
July-Aug-Sept. 3rd Qtr - 2009	7641730 100.0	2426113 31.7	1912169 25.0	3303448 43.2

Note: The tabulation groups based on ISIC (Rev.3) are indicated as A,B,C.....Q..

Agriculture	Services
1. Agriculture (A)	1. Wholesale and Retail Trade, Repair of Motor Vehicles, Motorcycles and Personal and Household Goods (G)
2. Forestry and Fishery (B)	2. Hotels and Restaurants (H)
Industries	3. Transport, Storage and Communication (I)
1. Manufacturing (D)	4. Financial Intermediation and Real Estate, Renting and Business Activities (J,K)
2. Construction (F)	5. Public Administration and Defence, Compulsory Social Security (L)
3. Mining & Quarrying (C)	6. Education (M)
4. Electricity, Gas and Water supply (E)	7. Health and Social work (N)
	8. Other Community, Social and Personal Service Activities (O)
	9. Private Households with Employed Persons (P)
	10. Miscellaneous Labour work
	11. Extra Territorial Organizations & bodies (Q)
	12. Industries not adequately described

Table 5 shows the percentage distribution of employed population by main industry from third quarter 2008 to third quarter 2009. The total number of employed persons in Sri Lanka was estimated as about 7.6 million in third quarter 2009. Of which, about 43.2 percent engaged in services sector, 31.7 percent in agriculture sector, and 25.0 percent in Industries sector.

Table 6 : Percentage distribution of employed population by employment status and Agriculture/ non- agriculture sector – Third Quarter 2009

Employment Status	Total		Sector			
	No.	%	Agriculture		Non Agriculture	
			No.	%	No.	%
Total	7641730	100.0	2426113	31.7	5215617	68.3
Employee	4491301	100.0	794126	17.7	3697175	82.3
Public	1219097	100.0	179229	14.7	1039867	85.3
Private	3272204	100.0	614897	18.8	2657307	81.2
Employer	211577	100.0	34436	16.3	177141	83.7
Own account worker	2143753	100.0	1106607	51.6	1037146	48.4
Unpaid family worker	795099	100.0	490944	61.7	304155	38.3

Table 6 shows that, more than 82 percent of employees both in private & public sector engage in non-agricultural activities. Also more employers were in non agriculture sector than in agriculture sector. But own account workers and unpaid family workers concentrated more in agriculture sector than in non-agriculture sector.

Note (1): Please see the explanatory note under 'labour force' link in the DCS web site www.statistics.gov.lk for detailed concepts & definitions.

Table 7 : Distribution of Employed population by main industry & by sex – Third Quarter 2009

Major industry group	Total	Sex	
		Male	Female
Total	100.0	100.0	100.0
Agriculture	31.7	29.7	35.5
Industry	25.0	24.8	25.5
Services	43.2	45.5	39.0

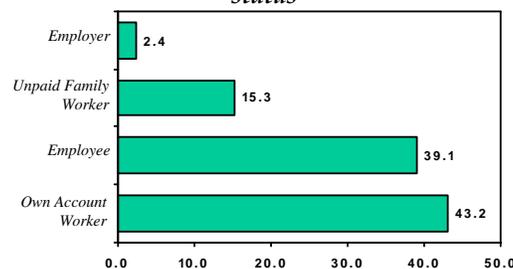

Table 7 depicts the distribution of male and female employed population by main industries. Highest employment concentrated in service sector for both male and female. Further among employed women about 35.5 percent was in agriculture sector while this share was 29.7 percent for males.

Table 8 : “Informal sector” employment by Agriculture/ Non-agriculture sector – Third Quarter 2009

Sector	Total	Agriculture	Non-agriculture
Total	100.0	100.0	100.0
Formal	38.7	16.6	48.9
Informal	61.3	83.4	51.1

It is also important to see the distribution of the employed population according to the formal and informal sector classification. Table 8 shows that, 61.3 percent of the total employment was in the informal sector. Further 83.4 percent of the agriculture sector employment was in informal sector, while it was 51.1 percent for non agriculture sector. Further, 43.2 percent of those employed in the informal sector were own account workers, while 39.1 percent of them were paid employees. (Figure 2).

Figure 2 : Percentage Distribution of Informal sector employment by Employment status

Underemployment (1)

Table 9 : Underemployment rate by sex – Third Quarter 2009

Rate	Sex		Economic sector		Total
	Male	Female	Agriculture	Non-agriculture	
Underemployment rate	3.6	4.6	6.2	2.9	3.9

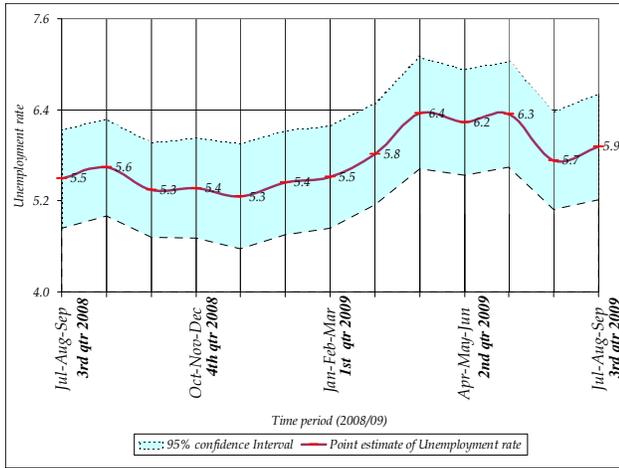

Table 9 reveals that, underemployment rate was higher for females (4.6%) than males (3.6%). And also it was higher in the agriculture sector (6.2%) than as that percentage in non-agriculture sector (2.9%).

Unemployment

Unemployment Rate : The number of unemployed persons as a percentage of the labour force

Unemployed : Persons who are seeking and available for work, but had no employment during the reference period

Figure 3 : Unemployment rates and its 95% confidence intervals (2008 July - 2009 September)

The number of unemployed persons was estimated as about 480,000 during the third quarter 2009.

The unemployment rate for the third quarter 2009 was reported as 5.9 percent.

As seen in figure 4, it is very important to note that, there were no statistically significant difference between the unemployment rates reported in different time periods of 2008/2009, when sampling error⁽²⁾ was considered.

Table 10 : Unemployment rate by level of education - Third Quarter 2009

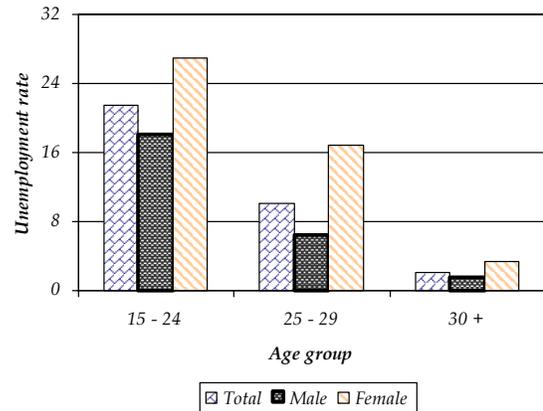

Level of Education	Unemployment rate		
	Total	Male	Female
Total	5.9	4.4	8.6
Below G.C.E. (O/L)	4.0	3.3	5.5
G.C.E. (O/L)	9.1	7.0	13.0
G.C.E. (A/L) & above	10.2	6.8	13.8

Table 11: Unemployment rate by age group and sex – Third Quarter 2009

Age group	Total	Sex	
		Male	Female
Total	5.9	4.4	8.6
15 - 24	21.5	18.1	26.9
25 - 29	10.1	6.5	16.9
30 +	2.2	1.5	3.4

Figure 4 : Unemployment rate by age group and sex – Third quarter 2009

As can be seen from table 11, overall the unemployment rate reported for females was 8.6 percent and 4.4 percent for males. Youth unemployment rate (15 - 24 yrs) reported for third quarter 2009 was 21.5. Highest unemployment rate was reported from age group (15 - 24 yrs), for both males (18.1) and females (26.9). Further the survey results revealed that the unemployment was severe among females than that of males, in all age groups.

The highest unemployment rate was reported from the G.C.E(A/L) and above group which was about 10.2 percent. There were 6.8 percent and 13.8 percent for males and females respectively. This shows the problem of unemployment is more acute in the case of educated females than educated males (Table 10).

Table 12: Literacy rate by sex & sector

Sex & sector	3 rd quarter 2008	3 rd quarter 2009
Total	90.3	91.6
Male	92.1	92.8
Female	88.7	90.5
Urban	91.5	95.5
Rural	91.1	91.9
Estate	73.2	76.6

Literacy ⁽³⁾

Table 12 shows that, during the third quarter of 2009, the literacy rate was about 91.6, and also the male literacy rate (92.8) was higher than that of females (90.5). Further, the survey results revealed that literacy level of estate sector (76.6) was relatively lower than urban (95.5) and rural (91.9) sectors.

⁽²⁾ Sampling error :

When a sample, rather than the entire population, is surveyed, estimates differ from the true population values they represent. This difference, or sampling error, occurs by chance, and its variability is measured by the standard error of the estimate. **For more details, please refer the explanatory note on the labour force link in the DCS website.**

⁽³⁾ Please see the explanatory note under 'labour force' link in the DCS web site www.statistics.gov.lk for detailed concepts & definitions.

Note: The normal Labour Force Survey programme was not implemented in 2005 due to the Tsunami - 2004. However a special labour force survey was conducted in August 2005 and the estimates based on this special survey are given under year 2005.

(Up to 2002 fourth quarter, both Northern & Eastern provinces are excluded from the estimates.)

* - Including Eastern province but Excluding Northern province

** - Excluding Mulathivu, Kilinochchi districts.

*** - All the districts are included

- Excluding Northern & Eastern provinces

| 6 Transport, Storage and Communication (I) | 13 Miscellaneous Labour work |
| 7 Financial Intermediation and Real Estate,
Renting and Business Activities (J,K) | 14 Industries not adequately described |

Note: The tabulation groups based on ISIC (Rev.3) are indicated as A,B,C.....Q. Due to the limitations on reliability (based on CV),some of these groups have been combined.

* - Excluding Northern and Eastern provinces

** - Including Eastern province but Excluding Northern province

*** - Excluding Mulathivu,Kilinochchi districts.

**** - All the districts are included

 These figures are to be treated with caution as the corresponding CV (Coefficient of variation) values are high.

Occupation group

1 Senior Officials and Managers

2 Professionals

3 Technical and Associate Professionals

4 Clerks

5 Proprietors and Managers of Enterprises

6 Sale and Service workers

7 Skilled Agricultural and Fishery workers

8 Craft and Related workers

9 Plant and Machine operators and Assemblers

10 Elementary occupations

0 Unidentified

These figures are to be treated with caution as the corresponding CV (Coefficient of variation) values are high.

Note: It is to be noted here that these occupation groups are based on ISCO - 88, but they are not necessarily the **Major Groups** of ISCO - 88 classification

* - Excluding Northern and Eastern provinces

** - Including Eastern province but Excluding Northern province

*** - Excluding Mulathivu, Kilinochchi districts.

**** - All the districts are included

Explanatory Notes

Coverage

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990.

This quarterly survey of households is conducted through a scientifically selected sample designed to represent the civilian non-institutional population. Respondents are interviewed to obtain information about the employment status etc. of each member of the household 10 years of age and older.

The field work of the survey is done during the third week of the each month, Monday through Sunday. This is known as the "survey week". The inquiry relates to activity or status are referred in the preceding week of the survey week; referred to as the "reference week".

The concepts and definitions underlying labour force data are as follows.

Concepts and definitions

1. ***Labour force*** : The labour force is composed of the economically active population 10 years of age and over.
2. ***The Economically Active Population*** : is defined as those persons who are/were employed or unemployed during the reference period of the survey.
3. ***Employed*** : Persons, who during the reference period, worked as paid employees, employers, own account workers (self employed), or unpaid family workers are said to be employed. This includes persons with a job but not at work during the reference period.
4. ***Unemployed*** : Persons who are seeking and available for work, but had no employment during the reference period.
5. ***Currently Economically Active*** : A person who was employed or unemployed during the current reference period is considered to be currently economically active.
6. ***Not in the Labour Force (not economically active)*** : Persons who were neither working not available/looking for work are classified as "not in the labour force". Persons are not in the labour force for such reasons as: full time care of the household, full - time students, retired or old age, infirmed or disabled, or are not interested in working for one reason or another. Current and Usual definitions apply.
7. ***Criteria for classification of underemployment***

In order to classify an employed persons as visibly underemployed,

(i) If the person has worked less than the normal duration in his/her main activity

In Sri Lanka scenario, 35 hours per week is taken as the cut-off point applicable to all workers, except government teachers. As in practice, though teachers do have a normal duration of work which is below the general cut-off point, they should be on a full time schedule according to the nature of their job. Further, those who do have a secondary job, or those who are employers, were considered as having worked the normal duration in their respective activity.

Therefore, if the person has worked less than the normal duration in his/her activity (as described above), then the person is further questioned to ascertain whether he/She is prepared and available for further work if provided. Such persons are considered underemployed in their respective employment.

(ii) If the person has worked more than the normal duration in his/her activity

If the person has worked even more than 35 hours as usually, but he has worked less than 35 hours actually in the reference period, only due to the off season or bad weather, such persons were also further questioned to check their underemployment situation, considering them as a special category.

8. Informal Sector Employment

In order to classify a person to be employed in informal sector employment, following information were used.

- (i) Registration of the organization
- (ii) Accounts keeping practices of the organization
- (iii) Total number of regular employees of the organization.

Reliability of the estimates

Statistics based on the quarterly labour force data are subject to both sampling and non-sampling errors. When a sample rather than the entire population is surveyed, there is a chance that the sample estimates may differ from the "true" population values they represent.

The exact differences, or sampling error, varies depending on the particular sample selected, and this variability is measured by the standard error of the estimate. There is about a 95 percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.96 standard errors from the "true" population value, because of sampling error. Analyses relating to the Labour Force Survey are generally conducted at the 95 percent level of confidence.

For example, the confidence interval for the quarterly unemployment rate is on the order of ,

Estimated value *(of the unemployment rate)* \pm (standard error) * (1.96)

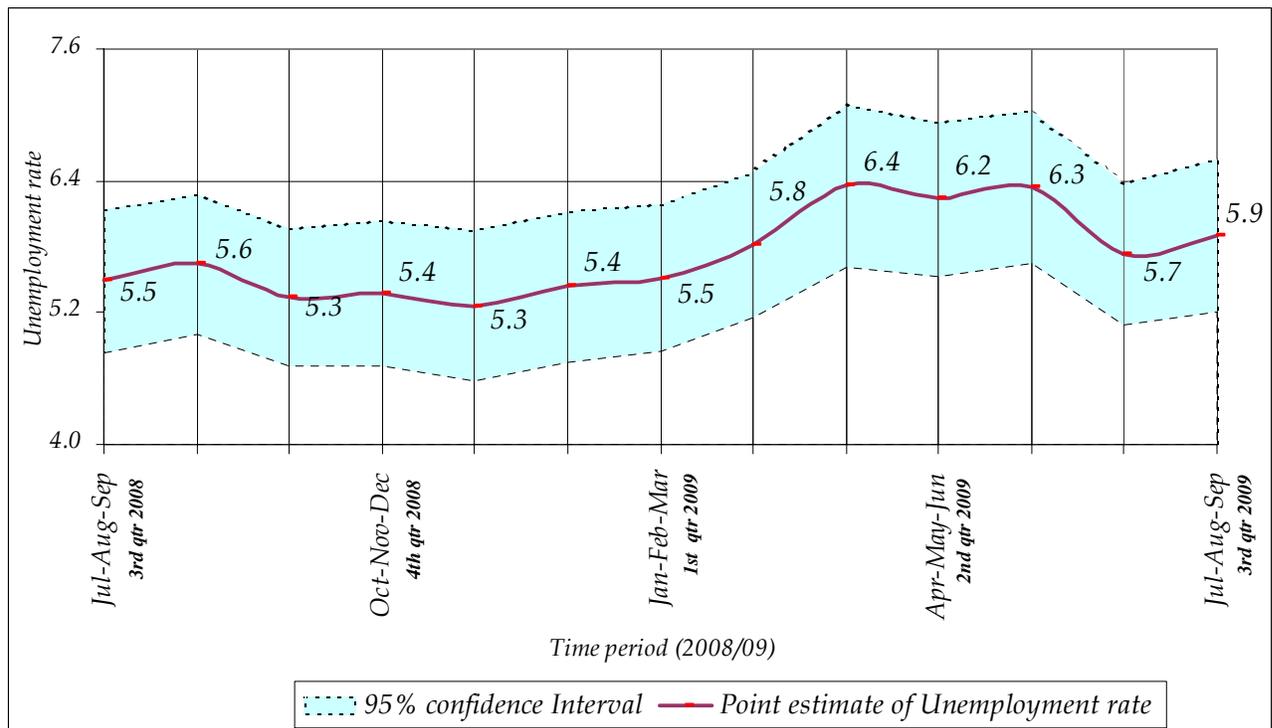

6.4 \pm (0.4) * (1.96)

(6.4 \pm 0.784)

This means, the 95 percent confidence interval on the quarterly unemployment rate could range from (5.6 to 7.2) . This implies that there is about 95 percent chance that the "true" unemployment rate lies within this interval. This range includes all the values range from 5.6 to 7.2 . When the comparison of this estimate is done between two quarters, if any of the value within the 95 percent confidence interval of one quarter overlaps with the confidence interval of the other , it means that the estimates of this two quarters *are not significantly different*.

Therefore, in each quarterly labour force report, a separate table is given including proximate standard errors for some selected variables, so that users could understand this statistical scenario clearly.

Unemployment rates and it's lower and upper limits (2008 Jul/2009 September)

As shown in the given figure, it is very clear that, there is no statistical significant differences between the quarterly unemployment rates reported in 2006, (since all the 95 percent confidence intervals overlap) when sampling error is considered.

Change in survey schedule

Current survey concepts and methods are very similar to those introduced at the beginning of the survey in 1990. However, some changes have been made over the years to improve the accuracy and usefulness of the data.

Beginning in January 2006, some improvements were made to the labour force survey schedule in order to fulfill the requirements of it's users and also to provide additional information for the planning purposes. This revision was made focusing on literacy, household economic activities, and informal sector employment and under employment etc.

Note :

It is important to note that, all the data published here are the estimates based on a sample survey and these are subject to sampling errors. These sampling errors can be statistically evaluated from the survey results. Therefore, sampling error is normally measured in terms of the standard error of the particular variable. Standard error could be used to calculate the confidence limits with a prescribed accuracy where the true value of the estimates lies.

Further reliability of the estimates can be expressed in terms of Coefficient of Variation (CV). The CV is a relative measure of the sampling error and is calculated as sampling error divided by the expected value of the given characteristic.

In view of this, following table is given to show the estimates for some selected variables, its standard error, CV and 95% Confidence interval.

It is also important to note that all the estimates we publish in this report are subject to sampling error and one should be cautious in the interpretation of results, especially with respect to the trends over time.

Estimate of Confidence Intervals for some selected characteristics

** - Excluding Mulathivu and Kilinochchi districts.

***- All the districts are included

- Excluding Northern & Eastern provinces

Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

◆ Official employment, unemployment and labour force characteristics are estimated at the Sri Lanka Labour Force Survey, based on the internationally comparable concepts and definitions recommended by the ILO. However the validity of the concepts and definitions used at the survey is questioned very often in some forums, for the appropriateness of these concepts and definitions in the Sri Lankan context.

The concepts and definitions, which were found to be controversial are as below.

(1) Number of Hours of Work :

A person who work **at least one hour** during the reference week, is considered **employed**, under these definitions.

(2) Working Age Population :

All persons of **age 10 years and over** are considered to be in the working age.

(3) Employment Status :

All, a) Paid employees, (those who work for wages/salaries).

b) Employers (who have at least one paid employee under them).

c) Own account workers (who carry out the economic activity without having any paid employees).

d) Unpaid family workers (who make their contribution to the economic activities carried out by their own household, without wages/salaries).

The validity of the above concepts and definitions is raised due to the following reasons.

(1) **Number of hours of Work** : Some point out that **one hour per week** is too low, to consider a person to be employed.

(2) **Working age Population** : Some point out that persons in the age group 10-14 yrs. are too young to consider to be in the working age.

(3) **Employment Status** : Some point out that 'unpaid family workers' may work in the family enterprise **without payment** because they have no other work, and so it is not appropriate to consider them as **employed**.

An attempt has been made to produce '**Alternative estimates of Employment, Unemployment and Labour Force Characteristics**,' by revising the original concepts and definitions so that the above issues are addressed as explained below.

The revisions made are,

(1) Number of Hours of Work :

Persons who work **20 hours or more per week only** are considered to be employed.

(2) Working Age Population :

Persons who are **over 15 yrs of age only** are considered to be in the working age.

(3) Unpaid Family Worker :

Unpaid family workers are **not** considered as employed. Those unpaid family workers who were reported to be seeking some other work are considered as **unemployed** and the rest of the unpaid family workers are considered as **economically inactive** (not in the labour force) so only, **a) paid employees b) employers and c) own account workers are considered to be employed.**

Following tables are based on the above alternative concepts and definitions.

Industry group

1 Agriculture Forestry and Fishery (A,B)	8 Public Administration and Defence, Compulsory Social Security (L)
2 Manufacturing (D)	9 Education (M)
3 Construction, Mining & Quarrying , Electricity, Gas and Water supply (C,E,F)	10 Health and Social work (N)
4 Wholesale and Retail Trade, Repair of Motor Vehicles, Motorcycles and Personal and Household Goods (G)	11 Other Community, Social and Personal Service Activities; Extra Territorial Organizations & bodies (O,Q)
5 Hotels and Restaurants (H)	12 Private Households with Employed Persons (P)
6 Transport, Storage and Communication (I)	13 Miscellaneous Labour work
7 Financial Intermediation and Real Estate, Renting and Business Activities (J,K)	14 Industries not adequately described

Note: The tabulation groups based on ISIC (Rev.3) are indicated as A,B,C,.....Q. Due to the limitations on reliability (based on CV), some of these groups have been combined.

* - Excluding Northern and Eastern provinces

** - Including Eastern province but Excluding Northern province

*** - Excluding Mulathivu, Kilinochchi districts.

**** - All the districts are included
