ENUMERATORS' REMARKS

Module 1 : Basic characteristics of the household members

Respondent : Head of the household or any other competent adult at home at the time of the visit

Respondent's name: _____

q10000: Respondent's HH Member ID Code: |_|_|

Read the following to the respondent.

Good morning/afternoon, my name is _____. I am an enumerator for the Integrated Household Living Conditions Assessment which is currently being conducted in all of Myanmar by the Ministry of National Planning, United Nations Development Program and UNICEF. The objective of this survey is to gain a better understanding of household living conditions in the country.

For that purpose, your address was randomly selected to be included in this survey, one of thousands of households that are being interviewed in all regions of the country. I would appreciate if you and your household members participated in this survey, answering to a group of questions on different topics. The interview will take around two hours.

We would ask for your cooperation in two rounds, this one and the other one in May 2010 (After Myanmar New Year 2010).

First, I would like to make a complete list of all the members of this household, that is, all the persons who usually sleep in this dwelling, eat most of their meals here and share expenses together. Include all the members of your family, including any children or other persons who may be away for study or work but who consider this their permanent residence. Also include any other persons not related to you but who normally sleep, eat most of their meals and share expenses here (for example, servants, lodgers or other persons who are not relatives).

**** Indicates that the question has a skip.**

ENUMERATORS' REMARKS

Module 1 : Basic characteristics of the household members

Respondent : Head of the household or any other competent adult at home at the time of the visit

Respondent's name: _____

q10000: Respondent's HH Member ID Code: |_|_|

Read the following to the respondent:

Good morning/afternoon, my name is _____. I am an enumerator for the Integrated Household Living Conditions Assessment which is currently being conducted in all of Myanmar by the Ministry of National Planning, United Nations Development Program, UNICEF and SIDA. The objective of this survey is to gain a better understanding of household living conditions in the country.

For that purpose, your address was randomly selected to be included in this survey, one of thousands of households that are being interviewed in all regions of the country. I would appreciate if you and your household members participated in this survey, answering to a group of questions on different topics as in the first round. The interview time will not be long as in the previous interview. We will ask only some questions again as we've requested.

First, I would like to make a complete list of all the members of this household, that is, all the persons who usually sleep in this dwelling, eat most of their meals here and share expenses together. Include all the members of your family, including any children or other persons who may be away for study or work but who consider this their permanent residence. Also include any other persons not related to you but who normally sleep, eat most of their meals and share expenses here (for example, servants, lodgers or other persons who are not relatives).

Instructions:

1) The community price questionnaire should be asked in the market where most households in the ward/village buy the majority of their food and non-food commodities (as directed by the key informant of the community . questionnaire of the same ward /village) . If there is no market in the village/ward , it should be asked to the shops directed by the key informant .

2) The questionnaire should be completed by the field supervisor (a lady if possible) coming from the same local area, in order to minimise potential biases in respondents' answers.

3) Since prices can vary depending on types of shops and service provider the prices should be collected by price questionnaire from all types of shops (eg permanent shops/stalls in the market, vendors in or outside the market, shop in a house, shop in a building with a series of shops etc) and types of service provider (e.g public and private)
