

Important notes:

- All text in blue indicate formulas generated by ERF

- All text in green represent a recommendation

- All cells shaded in orange indicate country specific information, standard values generated by ERF or values of a scale variable

- All cells shaded in green, blue or purple indicates different levels of expenditure/income aggregates

- Under column "Key":

-A: indicates a variable that is available in/can be generated from the survey dataset

-/: indicates a variable that is not available in/cannot be generated from the survey dataset

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
FILE LEVEL: ALL										
IDEAL UNIVERSE: ALL OBSERVATIONS										
CATEGORY: IDENTIFICATION (FILE INFORMATION)										
COUNTRY	Unique country	String variable representing the country name	This variable exists both in the household and the person file and is necessary when concatenating files from different datasets. Use this variable when concatenating files from different datasets.	String variable			All HHS	A		Generated by ERF
YEAR	Survey Year	Year during which the survey was performed	This variable exists both in the household and the person file and is necessary when concatenating files from different datasets. Use this variable when concatenating files from different datasets.	Ordered discrete variable			All HHS	A		Generated by ERF
CASESER	Unique unit identifier	Sequential anonymous household identifier usually provided in the dataset	This variable exist both in the household and person file and is necessary when merging the two files. This identifier is unique only within each country/year dataset; when combining different countries or years it is necessary to use it in combination with the variables COUNTRY and YEAR in order to uniquely identify households. When merging household and individual level files from the same dataset, use this variable to link each individual to the right household.	Ordered discrete variable			All HHS	A	gov, dist, sub, cis_num, hh_num	A unique HH identifier is generated using the variables, gov, dist, sub, cis_num, and hh_num

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
HOUSEHOLD COMPOSITION AND CHARACTERISTICS Gives information on the household composition and characteristics such as the number of children, their age and gender.. The dwelling conditions the access to public facilities ...										
FILE LEVEL: HOUSEHOLD										
IDEAL UNIVERSE: ALL HOUSEHOLDS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: FILE INFORMATION										
HWEIGHT	Household weight	Data provider household weight	The household weight can correct just for sample bias, or also for non-sampling errors (such as response bias and adjustment to population distribution). In many cases, the weight is a population weight, which means that the weight will inflate the result to reflect the total population. We strongly recommend that all statistical analysis be performed using the data weights	Continuous variable			All HHS	A	wt	
REG	Region	Region of residence		Categorical variable			All HHS	A	gov	
AREA	Area	Second geographical variable identifying another aspect of the location of the unit not described in REG such as city or village		Categorical variable			All HHS	/		
RURURB	Urban/Rural residence	Indicate whether the region is urban/rural	In case the country has refugee camps (as in Palestine), the "refugee camp" category is coded "2"	Harmonized categorical/dummy variable	0 Rural 1 Urban 2 Refugee camps	2 Rural 1 Urban	All HHS	A	ur_rl	
HNUM	Number of persons	Total number of persons in the household (including children or any other individuals not included in individual-level survey for any reason)	In general Σ over all individuals in household If the individual file does not include all household members, the variable is constructed directly from household level original information FEMLNUM+MALNUM = HNUM	Ordered discrete variable			All HHS	A	q506	Generated by ERF
MALNUM	Number of Males	Total number of Males in the household (including children)						A	q506	Generated by ERF
FEMLNUM	Number of Females	Total number of females in the household (including children)						A	q506	Generated by ERF
CH14	Number of persons under age 14	Number of persons under age 14 living in the household	This includes (ever) married children as well as heads and spouses under fourteen. If the individual file does not include all household members, the variable is constructed directly from household level original information					A	q508	Generated by ERF
NUM65	Number of persons aged 65 or more	Number of household members aged 65 or more including head and spouse.	If the individual file does not include all household members, the variable is constructed directly from household level original information					A	q508	Generated by ERF
HCOMP	Household composition	Indicates the composition of the household with the number of adults and of children using standardized family models: 2 adults no children, 2 adults 1-2 children etc.. This variables might not exist in all surveys and can be constructed using the information in the household and person files. In case the variable is generated, the adult is defined as either a: - HH member aged 18 years or older - HH head even if aged less than 18 years - a married HH member even if aged less than 18 years		Harmonized categorical variable	1 1-2 adults, no children 2 1-2 adults, 1-2 children 3 1-2 adult, 3 or more children 4 3 or more adults, 0-1children 5 3 or more adults, 2-3 children 6 3 or more adults, 4 or more children		All HHS	A	q505, q508, q527	Generated by ERF
MARRIED	Head living in couple	Standardized code that indicates whether the head of the household has a partner and the type of partnership	The head may cohabit with his mother or sister and in this case the concept of No couple applies. Another possible status is when the head has several spouses. Here a problem should exist if the spouses live in different houses so two different households may have the same head. Generated from individual files	Harmonized categorical variable	0 No couple present in household 1 Married couple head and spouse 2 Several cohabiting spouses		All HHS	A	q505	Generated by ERF
EARN	Number of earners	Number of household members who receives any earnings.	All individuals who have received any earnings during the reference period, only a subset may have been in employment at the time of the survey. If the individual file does not include all household members, or if incomes are not available at the individual level, the variable is constructed either from other individual level variables (e.g. employment status), or directly from household level original information. Pensioners and any individual receiving any kind of income is considered as earner.	Ordered discrete variable			All HHS	A	N_Break	In 24 households representing 0.8%, the number of earners exceeds the number of household members, this might be due to income contributors living outside the household at the time of the survey while counted in the variable.

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
INCS	Source of income	Main income source of the household	This variable may not exist in most of the surveys but can be constructed from the individual files	Harmonized categorical variable	1 Household business	q913 Total rental income q922 Total property income	All HHS	A	q905 q906 q907 q908 q909 q910 q911 q912 q913 q914 q915 q916 q917 q918 q919 q920 q921 q922 q923 q924 q925 q926 q927 q928 q929 q930 q931 q932 q933 q934 q936 q937 q938 q939	Main source of Income for the household was generated using variables indicating income per household by source of income, assuming that the maximum value of income by sources indicated is the main source of income, i.e., if the household income from wages is higher than that from household business, then the main source of income is assumed to be wages and salaries.
					2 Salaries and wages	q908 Total income of employment q909 Total income for self-employed workers and employers				
					3 Remittances from country or abroad	q930 Government transfers q931 Transfers from families q932 Transfers from non-profit institutions q933 Other transfers q934 Transfers from non-residents				
					4 Pensions	q923 Pensions q924 Social security benefits q925 Accrued compensation insurance q928 Subsidies from the National Aid Fund q929 Subsidies from other government agencies				
					5 Other	q926 Cash gifts q927 In-kind gifts q937 Cash prizes q938 Other incomes				
HHTYPE	Household type	Identifying collective and non-collective households	Collective households are composed of a number of non-residents, having the same gender, living together, and are all employed. No head is identified for collective households, and the relationship to head variable will be recoded missing for all household members Non-collective households are mostly residents having the regular structure of a family (Head, spouse, ....etc)	Dummy variable	0 Non-collective		All HHS	/		
					1 Collective					
DWLTYP	Type of dwelling	Type of the dwelling	This variable mainly distinguishes between villa, apartments and others "House" includes traditional, modern or Arabic house etc. "Villa" includes palace, villa or a floor in a villa, duplex etc. "Other" includes clay/reed house, primitive house, caravan etc.	Harmonized categorical variable	1 House	2 House	All HHS	A	q202	
					2 Villa	1 Villa				
					3 Apartment	3 Apartment				
					4 Others	4 Barakia 7 Other				
DWLTEN	Tenure of dwelling	Type of tenure	This variable distinguishes between owned or rented living quarters.	Harmonized categorical variable	1 Rented	2 Rented	All HHS	A	q205	Provided for work was considered other since the employee either pays part of the rent or the total rent is deducted from the salary as a benefit therefore it is considered not to be provided for free
					2 Owned	1 Owned				
					3 Provided free	4 Provided free				
					4 Others	3 Provided for work 7 Other				
ROOM	Number of rooms	Number of rooms excluding bathroom and kitchen	In some surveys there is no indication whether the bathroom and kitchen are counted in the number of rooms or not, we assume they are excluded	Ordered discrete variable			All HHS	A	q207_6	
ELECT	Electrified	Indicates if the dwelling is electrified or not	This variable is often generated from the source of lighting. Using private generator is considered as electrified.	Dummy variable	0 No		All HHS	/		
					1 Electrified					
SLIGHT	Source of energy for lighting	Distinguish between public and private sources of electricity and other sources of lighting	Private electricity includes community and private generators and cooperative networks "Others" may include sources that are presented independently in the standardized value if the survey is not enough detailed (example it may include gas and kerosene)	Harmonized categorical variable	1 Public network	1 Public network	All HHS	/		
					2 Private	2 Private generator				
					3 Gas	3 Gaz				
					4 Kerosene	4 Kerosene				
					5 Others	7 Other				
SCOOK	Source of energy for cooking	Distinguish between different sources of energy for cooking		Harmonized categorical variable	1 Electricity	3 Electricity	All HHS	A	q208	
					2 Gas	1 Gaz				
					3 Kerosene	2 Kerosene				
					4 Wood & coal	4 Wood/coal				
					5 Others	7 Other				
WAT	Water facilities	Indicates from where the household get its drinking water	This variable indicates the main source of drinking water. Piped supply includes public and private networks; public tap includes fountains and springs; wells are either with or without pumps private or public etc. Tanker includes purchased water indoor or outdoor; other includes lakes, rivers, rainwater etc.	Harmonized categorical variable	1 Piped supply	1 Public network	All HHS	A	q213	
					2 Public tap	7 Fountain				
					3 Well	2 Well collecting rain water 4 Well				
					4 Tanker	5 Tank 6 Mineral water				
					5 Other	8 Other				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
TFACIL	Transportation facilities	Indicates the proximity to public transportation	This variable indicates the distance range to public transportation In case we have different ordinal variables indicating proximity different transportation means (separately) such to taxi, bus, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km	1 Less than 500m 2 500m-1000m	All HHS	A	q231_27	Proximity to facilities is computed as a rounded average of distances provided. The categories over which the questions are designed only allows to code the harmonized variable: less than 1 KM; 1-4 KM; more than 4 KM; which represents a deviation compared to similar questions in other data sets, however the variables will be generated since available.
					2 1-5 km	3 1 Km - < 2 Km 4 2 Km - < 4 Km				
					3 More than 5 km	5 4 Km - < 7 Km 6 7 Km - < 10 Km 7 10 Km - < 20 Km 8 20 Km +				
SFACIL	Schooling facilities	Indicates the proximity to schools/universities	This variables is a summary of variables indicating the distance to elementary school, university etc. In case we have different ordinal variables indicating proximity to different education establishments (separately) such to elementary schools, secondary schools, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km	1 Less than 500m 2 500m-1000m	All HHS	A	q231_2 to q231_9	
					2 1-5 km	3 1 Km - < 2 Km 4 2 Km - < 4 Km				
					3 More than 5 km	5 4 Km - < 7 Km 6 7 Km - < 10 Km 7 10 Km - < 20 Km 8 20 Km +				
HFACIL	Health facilities	Indicates the proximity to health centers and hospitals	This variables is a summary of variables indicating the distance to health centre and hospital In case we have different ordinal variables indicating proximity to different health establishments (separately) such to private doctors, hospitals health centers, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km	1 Less than 500m 2 500m-1000m	All HHS	A	q231_10 to q231_14 & q231_16	
					2 1-5 km	3 1 Km - < 2 Km 4 2 Km - < 4 Km				
					3 More than 5 km	5 4 Km - < 7 Km 6 7 Km - < 10 Km 7 10 Km - < 20 Km 8 20 Km +				
TOIF	Toilet facility	Indicates whether the household has access to toilet facility	In case we don't have information on the connection to sewage system but we do know if the toilet is inside or outside the dwelling we can consider toilets outside the dwelling as not connected to sewage (option 2).	Harmonized categorical variable	1 Yes and connected to sewage	q212_1=1 Toilet with flush q212_2=1 Toilet with no flush q212_3=1 Bathroom & q211=1 sewage network	All HHS	A	q211 q212_1 q212_2 q212_3	The variable will be generated using q212 questions indicating type of toilet and sewage and will be validated using q211 indicating type of sewage connection
					2 Yes but not connected to sewage	q212_1=1 Toilet with flush q212_2=1 Toilet with no flush q212_3=1 Bathroom & q211=2 Pit q211=3 Other sewage mean q211=4 No sewage				
					3 No facility	Those not identified in 1 & 2				
CAR	Has car/truck/tractor	Indicates if the household owns or has free access to car, scooter, taxi, boat, tractor etc..		Dummy variable	0 None	2 No	All HHS	A	q331, q332	
					1 Own one or many	1 Yes				
TELV	Has television/radio	Indicates if the household owns or has free access to a television, video, radio, dish, receiver, CD player etc.		Dummy variable	0 None	2 No	All HHS	A	q312, q313, q314, q315, q316, q327	
					1 Own one or many	1 Yes				
TELPH	Has telephone	Indicates if the household owns or has free access to a telephone, cell phone, fax machine, internet line, computer etc.		Dummy variable	0 None	2 No	All HHS	A	q317, q318, q319, q320, q321, q329	
					1 Own one or many	1 Yes				
REFRG	Has refrigerator/ Freezer	Indicates if the household owns or has free access to a refrigerator, freezer, water cooler.		Dummy variable	0 None	2 No	All HHS	A	q304, q305	
					1 Own one or many	1 Yes				
COOKER	Has Cooker/ food processor	Indicates if the household owns or has free access to a gas or electric cooking stove, microwave, etc.		Dummy variable	0 None	2 No	All HHS	A	q306, q307, q308, q309	
					1 Own one or many	1 Yes				
WASH	Has washing machine	Indicates if the household owns or has free access to a washing machine, dryer, dishwasher, etc.		Dummy variable	0 None	2 No	All HHS	A	q303, q310	
					1 Own one or many	1 Yes				
COND	Has air conditioner	Indicates if the household owns or has free access to an air conditioner, electric fan, etc.		Dummy variable	0 None	2 No	All HHS	A	q322, q323	
					1 Own one or many	1 Yes				
WAHEAT	Has water heater	Indicates if the household owns or has free access to a solar, gas, electric, etc. water heater		Dummy variable	0 None	2 No	All HHS	A	q324, q325	
					1 Own one or many	1 Yes				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
ODUR	Has other durables	Indicates if the household owns or has free access to a sewing machine, iron, vacuum, and any other household appliance		Dummy variable	0 None	2 No	All HHs	A	q302, q311, q326, q328	
					1 Own one or many	1 Yes				
LIVESTOK	Has cattle/sheep/poultry	All kinds of livestock, donkey, horses, etc...		Dummy variable	0 None		All HHs	/		
					1 Own one or many					
OLAND	Own land	Indicates whether the household owns land or not		Dummy variable	0 None		All HHs	/		
					1 Own one or many					
ALAND	Area of Own land	Indicates the area of the owned land	ALAND=0 IF OLAND=0 (do not own a land), hence this variable should be complete for all households except those for which OLAND is missing. The area of land should be reported in m²	Continuous variable			All HHs	/		
FLAND	Free access to land	Indicates the area of the accessed land		Continuous variable			All HHs	/		

Variable Name		Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
							Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
DEMOGRAPHIC INFORMATION OF HEAD AND SPOUSE											
Information on Head and Spouse are constructed from the person-level files. For more information about a specific variable, refer to the person-level variable referred to in "Contents".											
FILE LEVEL: HOUSEHOLD											
IDEAL UNIVERSE: ALL HOUSEHOLDS											
IDEAL REFERENCE PERIOD: AT PRESENT											
CATEGORY: DEMOGRAPHIC INFORMATION OF HEAD AND SPOUSE											
AGEHD	Age - head	Age in years.	In some datasets, age may be calculated at a certain reference date (e.g., 31 December of last year). When the original dataset has only age categories, age is calculated as the midpoint of the range provided. In some datasets, AGE is top coded by the data provider (e.g., a value of 95 represents 95 years of age or over).	Ordered discrete variable				All Heads	A	q508	
AGESP	Age - spouse		In case the head has multiple spouses a variable for each spouse will be generated, and named AGESP_# where # is the spouse number					All Spouses			
SEXHD	Gender - head	Gender	Indicator for gender of individual.	Harmonized categorical variable		1 Male	Structured the same as PSEX	All Heads	A	q506	
SEXSP	Gender - spouse		In case the head is male and has multiple spouses a variable for each spouse will be generated and will be named SEXSP_# where # is the spouse number. For all spouses except the first spouse, gender will be always 2 (female)					All Spouses			
MARTHD	Marital status - head	Legal administrative status concerning marriage	Should not be imputed, it can be generated only for those to whom the question was asked (in other words, the youngest age at which information is collected may differ depending on the survey). Married refers to only formal marriages (including legally married). Polygamous unions includes males with multiple spouses. Number of spouses in household can be applied to compute polygamy.	Harmonized Categorical variable		1 Never married 2 Married monogamous 3 Married polygamous 4 Divorced/Separated 5 Widowed 99 Not stated	Structured the same as PMART	Heads aged 15+	A	q527	
PARTHD	Partnership and parenthood status - head	ERF recode that allows users to identify heads as having a partner (either married or unmarried) versus not having a partner, as well as parents as opposed to non-parents, using a single variable.	Partnership status for head may be restricted to civic status, parenthood status assumes that the children of the head are also children of the spouse.	Harmonized categorical variable		1 Head with partner or head's partner, with no children 2 Head with partner or head's partner, with children, youngest child < 18 3 Head with partner or head's partner, with children, youngest child 18+ 4 Single head, with no children 5 Single head, with children, youngest child < 18 6 Single head, with children, youngest child 18+		All Heads	A	q505 q508 q527	Generated by ERF. Single head is defined as never married, divorced, separated or widowed. Head with partner is defined as married head.
NATHD	Ethnicity/ nationality - head	Ethnicity or nationality	The content of this variable is not uniform. In many datasets where information on ethnicity or nationality is not available in the original survey, it can also contain country of birth, race, ancestry or mother tongue.	Categorical variable				All Heads	A	q509	
NATSP	Ethnicity/ nationality - spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named NATSP_# where # is the spouse number.					All Spouses			
IMMIGRHD	Immigration status - head	Ideally indicates whether an individual is born in the country or has an immigrant background, and if possible, how recently he/she arrived. Other migration status information may be included if available.	The content of this variable is not uniform. By other migration status we tempt to capture those who migrate from one region to another inside the country (if the place of birth is different from the place of residence inside the country)	Harmonized categorical variable		1 Immigrant (from abroad)  2 Migrant (from another region inside the country)	Structured the same as PIMMIGR	All Heads	/		
IMMIGRSP	Immigration status - spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named IMMIGRSP_# where # is the spouse number.					3 No			All Spouses
BIRHD	Is the head born in his residence place	This variable indicates whether the person is born in his place of residence		Dummy variable		0 No	Structured the same as PBIR	All Heads	/		
BIRSP	Is the spouse born in her residence place		In case the head has multiple spouses a variable for each spouse will be generated and will be named BIRSP_# where # is the spouse number.					1 Yes			All Spouses
BIRPLHD	Place of Birth of the head	This variable includes either the region, the area or the country of birth	Very few surveys contain this information	Categorical variable				All Heads	/		
BIRPLSP	Place of Birth of the Spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named BIRPLSP_# where # is the spouse number.					All Spouses			
LITHD	Literacy status of the head	This variable indicates whether the person is literate (can read and write) or not	see PLIT If there are no questions about the read and write ability but the educational attainment is elementary or upper the individual is considered literate	Dummy variable		0 No	Structured the same as PLIT	Heads aged 4+	A	q516 q524	
LITSP	Literacy status of the spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named LITSP_# where # is the spouse number.					1 Can read & write			Spouses aged 4+

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
EDUHD	Educational level - head	Highest level of education attained.	see PEDUC	Harmonized categorical variable	1 None	Structured the same as PEDUC	Heads aged 4+	A	q516 q517_s q524	
EDUSP	Educational level - spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named EDUSP_# where # is the spouse number.		2 Primary		Spouses aged 4+			
					3 Lower secondary					
					4 Secondary					
					5 Post secondary or equivalent					
					6 University					
					7 Postgraduate					
					99 Not stated					
MASHD	Main activity status -Head	Main activity status during the survey period	See PCMAS	Harmonized categorical variable	1 Employed	Structured the same as PCMAS	Heads aged 15+	A	q531 q532 q541 q542 q543	
MASSP	Main activity status - Spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named MASSP_# where # is the spouse number.		2 Unemployed		Spouses aged 15+			
					3 Homemaker (Housewife)					
					4 Student					
					5 Pensioners/retired/disabled					
					6 Others					
					99 Not stated					
EMSHD	Status of Employment of the head	Detailed description of the employment status	See PCEMS	Harmonized categorical variable	1 Employee	Structured the same as PCEMS	Active Heads aged 15+	A	q536	
EMSSP	Status of Employment of the spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named EMSSP_# where # is the spouse number.		2 Employer		Active Spouses aged 15+			
					3 Own account, self-employed					
					4 Contributing (unpaid) family workers					
					5 Member of producers cooperatives					
					6 Workers not classifiable by status (other)					
					99 Not stated					
OCCHD	Classification of Occupations for main job of the Head	International Standard Occupational classification of the main (current or last held) job, with as much detail as possible (ideally 4-digit ISCO-88 or 08 if available in original survey)	See POCC	Harmonized categorical variable	1 Legislators, senior officials and managers	Structured the same as POCC	Active Heads aged 15+	A	q535	
OCCSP	Classification of Occupations for main job of the Spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named OCCSP_# where # is the spouse number.		2 Professionals		Active Spouses aged 15+			
					3 Technicians and associate professionals					
					4 Clerks					
					5 Service workers and shop and market sales					
					6 Skilled agricultural and fishery workers					
					7 Craft and related trades					
					8 Plant and machine operators and assemblers					
					9 Elementary occupations					
					10 Armed Forces					
					11 Other/unspecified					
					99 Not stated					
INDHD	International Standard Industrial Classification of main job of the Head	Industry classification of the main (current or last held) job, with as much detail as possible.	See PIND	Harmonized categorical variable	1 Agriculture and Fishing	Structured the same as PIND	Active Heads aged 15+	A	q534	
INDSP	International Standard Industrial Classification of main job of the Spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named INDSP_# where # is the spouse number.		2 Mining		Active Spouses aged 15+			
					3 Manufacturing					
					4 Electricity and Utilities					
					5 Construction					
					6 Commerce					
					7 Transportation, Storage and Communication					
					8 Financial, Insurance and Real Estate					
					9 Public Administration					
					10 Other Services					
					11 Unspecified					
					99 Not stated					
TYPEWKHD	Sector of employment of the head	Sector of employment	see PTYPEWK	Harmonized categorical variable	1 Government	Structured the same as PTYPEWK	Active Heads aged 15+	A	q533	
TYPEWKSP	Sector of employment of the spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named TYPEWKSP_# where # is the spouse number.		2 Public sector		Active Spouses aged 15+			
					3 Private sector					
					4 Joint/Cooperative					
					5 Foreign sector					
					6 Other					
					99 Not stated					

						JORDAN, 2010				
Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
HOUSEHOLD EXPENDITURES		Including annual amounts of consumption expenditures; if possible split following the COICOP international standard classification).	All expenditure variables are recorded as yearly amounts. Amounts are annualized if not provided as such in original data. Due to lack of detail in many datasets, ERF constructs the expenditure variables, even if not all of the items are available. Any taxes included in the expenditure variables are deducted if possible. Some expenses/per month may be very high due to exceptional conditions (such as health care) and are not multiplied by 12 to be annualized (may be by 6). All corresponding survey documentation should be checked for expenditure periodicity reference <b>Annual</b> Expenditure amounts should be reported in <b>country national currency</b>							
FILE LEVEL: HOUSEHOLD										
IDEAL UNIVERSE: ALL HOUSEHOLDS										
IDEAL REFERENCE PERIOD: INCOME REFERENCE PERIOD										
CATEGORY: EXPENDITURES										
FOODEXP	Food and non-alcoholic beverages	Expenses on food and non-alcoholic beverages. Ideally, corresponds to Code 01 of the COICOP classification (SUM of 01).	All food expenditures include also own grown products expenses and gifts/in-kind received food. Expenses on take away food and meals taken in restaurants are included under code 11 TOTPFOOD+TOTOWNP+TOTGIKD	Continuous variable			All HHs	A		Since the period over which expenditure data is collected is not identified in the data file, a check on average expenses on food, non food and total expenditure was done and compared to the figures provided by DOS. It was found that amounts provided are already annualized.  Items aggregated under each expenditure type are identified in "Expenditure Aggregates" sheet.
RICE	Rice expenditures	Expenditures on rice in all forms	Purchased only	Continuous variable			All HHs	A		
GRAIN	Grains and flour expenditures	Wheat, Maize, Barely and all cereals in the grain or flour form	Purchased only	Continuous variable			All HHs	A		
BREAD	Bread and cakes	Bread in all forms, biscuits, cakes pizza..	Purchased only	Continuous variable			All HHs	A		
PAST	Pasta expenditures	Macaroni, Noodles, Couscous..	Purchased only	Continuous variable			All HHs	A		
CERPRE	Cereal preparation	Cornflakes, malt, tapioca..	Purchased only	Continuous variable			All HHs	A		
CEREXP	Purchased Bread and Cereals		RICE+GRAIN+BREAD+PAST+CERPRE	Continuous variable			All HHs	A		
CEROWN	Own-Produced Bread and Cereals			Continuous variable			All HHs	A		
SMEAT	Sheep and goats Meat expenditures	Fresh frozen and tinned goats and sheep meat	Purchased only	Continuous variable			All HHs	A		
CMEAT	Cow meat expenditures	Fresh frozen and tinned cow meat	Purchased only	Continuous variable			All HHs	A		
OMEAT	Other meat expenditures	Fresh frozen and tinned camel, rabbit, pork etc. meat	Purchased only	Continuous variable			All HHs	A		
CHMEAT	Chicken meat expenditure	Fresh frozen and tinned chicken, turkey, birds etc. meat	Purchased only	Continuous variable			All HHs	A		
LMEAT	Luncheon and Tinned meat	Fresh and frozen luncheon, tinned and others meat	Purchased only	Continuous variable			All HHs	A		
MEATEXP	Purchased Meat and Poultry		SMEAT+CMEAT+OMEAT+CHMEAT+LMEAT	Continuous variable			All HHs	A		
MEATOWN	Own-Produced Meat and Poultry			Continuous variable			All HHs	A		
FISH	Fish expenditures	Fresh and frozen fish expenditures, Tuna, sardines and tinned fish also smoked, salted, dried and processed fish	Purchased only	Continuous variable			All HHs	A		
SEAF	Seafood expenditures	Fresh, frozen and proceed seafood	Purchased only	Continuous variable			All HHs	A		
FSHSEAEXP	Purchased Fish and Seafood		FISH+SEAF	Continuous variable			All HHs	A		
FSHSEAOWN	Own-Produced Fish and Seafood			Continuous variable			All HHs	/		
MILK	Milk expenditures	Fresh, powder, condensed and infant powder milk expenses	Purchased only	Continuous variable			All HHs	A		
YOGH	Yogurt expenditures	Yogurt liquid, tinned, paste etc. cream, milk based deserts, milk based beverages	Purchased only	Continuous variable			All HHs	A		
CHES	Cheese expenditures	Processed, home made, tinned etc. cheese	Purchased only	Continuous variable			All HHs	A		
EGG	Eggs expenditures	Eggs and wholly made egg products	Purchased only	Continuous variable			All HHs	A		
DAIRYEXP	Purchased Dairy Products		MILK+YOGH+CHES+EGG	Continuous variable			All HHs	A		
DAIRYOWN	Own-Produced Dairy Products			Continuous variable			All HHs	A

<u>HOUSEXP</u>	Housing and utilities	Expenses on housing (actual and imputed rentals and maintenance and repair of the dwelling), water (water supply and miscellaneous services relating to the dwelling), electricity, gas and other fuels. Renovation costs as well as expenditure on furniture are excluded, as well as expenditure on mortgage (both the capital and interest part). Ideally, corresponds to Code 04 of the COICOP classification.	ARHOUS+ IMPREN+REPDW+WDWE+EDWE	Continuous variable			All HHS	A		
ARHOUS	Actual rentals for housing	Actual rentals paid by tenants and other actual rentals	Rentals include payment for the use of the land on which the property stands, the dwelling occupied, the fixtures and fittings for heating, plumbing, lighting, etc., and, in the case of a dwelling let furnished, the furniture.	Continuous variable			All HHS	A		
IMPREN	Imputed rentals for housing	Imputed rentals of owners occupying their main residence and other imputed rentals	Includes also imputed rentals for secondary residences and imputed rentals of households paying a reduced rental or housed free.	Continuous variable			All HHS	A		
REPDW	Maintenance and repair for the Dwelling	Materials and services for the maintenance and repair of the dwelling	Only expenditures which tenants and owner-occupiers incur on materials and services for minor maintenance and repair are part of individual consumption expenditure of households. Renovation costs as well as expenditure on materials and services for major maintenance and repair are excluded, as well as expenditure on mortgage (both the capital and interest part). Considered as expenses on non-durables	Continuous variable			All HHS	A		
WDWE	Water supply and miscellaneous services relating to the dwelling	Water supply, refuse collection, sewage collection and others	Includes also co-proprietor charges for caretaking, gardening, heating and lighting, etc. in multi-occupied buildings; security services	Continuous variable			All HHS	A		
EDWE	Electricity, gas and other fuels	Electricity, Gas, Liquid and solid fuels, Heat energy		Continuous variable			All HHS	A		
<u>EQUIPEXP</u>	Furniture & Housing equipment	Expenses on furnishings (furniture and furnishings, carpets and other floor coverings), household equipment (household textiles, household appliances, glassware, tableware and household utensils, tools and equipment for house and garden) and goods and services for routine household maintenance. Ideally, corresponds to Code 05 of the COICOP classification.	HSFUR+FURREP+HSTEX+MHAPL+SHAPL+RAPPL+HUST+MHOPE+SHOPE+HSGS	Continuous variable			All HHS	A		
HSFUR	Housing furnishings and furniture	Furniture and furnishings, carpets and other floor coverings	Beds, sofas, couches, tables, chairs, etc., lighting equipment, pictures, sculptures, screens, loose and fitted carpets, etc. Durables	Continuous variable			All HHS	A		
FURREP	Housing furnishings and furniture repair	Furniture and furnishings repair	This variable includes repair of furniture and furnishings Non-Durable	Continuous variable			All HHS	A		
HSTEX	Household textiles	Furnishing fabrics, bedding, bed linen table linen and bathroom linen and repair of such articles.	Non durables	Continuous variable			All HHS	A		
MHAPL	Major Household appliances	Major household appliances whether electric or not	Refrigerators, freezers and fridge-freezers; - washing machines, dryers, drying cabinets, dishwashers, ironing and pressing machines; - cookers, spit roasters, hobs, ranges, ovens and microwave ovens; - air-conditioners, humidifiers, space heaters, water heaters, ventilators and extractor hoods; - vacuum cleaners, steam-cleaning machines, carpet shampooing machines and machines for scrubbing, waxing and polishing floors; - other major household appliances such as safes, sewing machines, knitting machines, water softeners, etc. Includes: delivery and installation of the appliances when applicable. Excludes: such appliances that are built into the structure of the building Considered as expenses on durables	Continuous variable			All HHS	A		
SHAPL	Small Household appliances	Small electric appliances	Coffee mills, coffee-makers, juice extractors, can-openers, food mixers, deep fryers, meat grills, knives, toasters, ice cream makers, hotplates, irons, electric blankets, etc. Excludes: small non-electric household articles and kitchen utensils etc. Non-durables	Continuous variable			All HHS	A		
RAPPL	Repair of appliances		Total value of the service (that is, both the cost of labor and the cost of materials are covered); charges for the leasing or rental of major household appliances. Excludes: separate purchases of materials made by households with the intention of undertaking the repair themselves Non-durables	Continuous variable			All HHS	A

						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
MISCEXP	Miscellaneous goods and services	Expenses on miscellaneous goods and services, such as personal care, personal effects n.e.c., social protection, insurance, financial services n.e.c., other services n.e.c. Ideally, corresponds to Code 12 of the COICOP classification.	Some surveys may report information on taxes and remittances without clear specification of the nature of the tax expenses... these expenditures are included in this part. PCEXP+SPEXP+FEXP+FEES+PTRANSF	Continuous variable			All HHS	A		
PCEXP	Personal care and personal effects	Hairdressing salons and appliances for personal care, Jewellery, clocks and miscellaneous personal articles	Electric razors, hairdryers, electric toothbrushes etc. are included in this subgroup	Continuous variable			All HHS	A		
SPEXP	Social protection	Covers assistance and support services provided to persons who are elderly, disabled, unemployed, homeless, low-income earners, immigrants, refugees, etc. It also covers assistance and support services provided to families and children.		Continuous variable			All HHS	/		
FEXP	Insurance and financial services	Service charges for insurance such as life insurance and non-life insurance (that is, insurance in connection with the dwelling, health, transport, etc.). Service charges for multi-risk insurance covering several risks should be classified on the basis of the cost of the principal risk if it is not possible to allocate the service charges to the various risks covered. Actual charges for the financial services of banks	Service charge for insurance is defined as the difference between claims due and premiums earned and premium supplement	Continuous variable			All HHS	A		
FEES	Penalties and other fees	Financial penalties, traffic violation fees etc., fees for issuing passport ID cards, visas, birth certificate, driving license etc. membership fees.. And other non specified fees		Continuous variable			All HHS	A		
PTRANSF	Private transfers given	Remittances inside and outside the country, gifts to relatives cash or in-kind, charities, zakat, Alimony etc.		Continuous variable			All HHS	/		
TOTFOOD	Total food expenditures		In case where the own produced food items are also included in code 01 we need to abstract from OWNP FOODEXP+CATSER+SCHRST	Continuous variable			All HHS	A		
INFOOND	Total expenditures on non-food and non-durables		Alcoholic and tobacco expenditures are included here TOTEXP-(FOODEXP+TDUR+THOUS)	Continuous variable			All HHS	A

THOUS	Actual and imputed rentals for housing		ARHOUS+IMPREN	Continuous variable			All HHS	A		
TOTEXP	Total expenditures	Individual consumption expenditure of household. Ideally, corresponds to Codes 01 to 12 of the COICOP classification	In cases where the original survey provides expenditures according to the COICOP classification, this variable is the sum over the expenditure variables above. Otherwise, it is either derived from the "total expenditures" variable in the original survey (if available) or is left blank. FOODEXP+ALCOEXP+APPEXP+HOUSEXP+EQUIPEXP+MEDEXP+TRANEXP+COMMEXP+CULTEXP+EDUCEXP+RESTOEXP+MISCEXP	Continuous variable			All HHS	A		
LUMP	Lumpy expenses	Expenses on marriage, dowries, mahr, funeral, birth etc lump sum divorce (excluding alimony) payment and any other occasional expenses		Continuous variable			All HHS	A		
INTER	Interests paid on consumption and loans	Interest paid on loans for the purchase of consumption or durable goods	These expenses should not be part of consumption aggregates	Continuous variable			All HHS	/		
TAX	Expenditures on taxes and levies	Taxes on consumption and durable goods, property taxes etc.	Taxes should be included in consumption aggregates only if they are closely related to services provided such as households that are paying more tax are receiving more services. In that latter case (if there is enough detail in the survey about taxes) this category should be disaggregated according to the nature of taxes paid.	Continuous variable			All HHS	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
HOUSEHOLD INCOME		Including when possible annual amounts of earnings from labor and the contributions paid on them, capital income and property, taxes, social insurance benefits, social assistance benefits and other (private) transfers	All income variables are recorded as yearly amounts. ERF annualizes the amounts, if not provided as such in original data. <b>Annual</b> Income amounts should be reported in <b>country national currency</b>  As a rule, household-level income amounts are derived by summing the individual-level values for all individuals in the household. When individual data are not available, reported household amounts are used and these cases will be noted in the country-specific documentation. Where the household income variables are directly calculated from person-level income variables, these formulations are shown below, as are those instances when the variable is created by summing sub-categories within the household data.							
FILE LEVEL: HOUSEHOLD										
IDEAL UNIVERSE: ALL HOUSEHOLDS										
IDEAL REFERENCE PERIOD: ONE YEAR										
CATEGORY: INCOME										
GWAG	Gross wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), gross of employee social insurance contributions/taxes but net of employer social insurance contributions/taxes.	When employer-provided sick pay can not be separated, it is included in the wages. In case there is no precision about whether the wage is net or gross we classify it under gross wage If incomes are not available at the individual level, the variable is constructed directly from household level original information.	Continuous variable			All HHs	A	q905	
NWAG	Net wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), net of employer and employee social insurance contributions and taxes.		Continuous variable			All HHs	A	q906	
IKEAR	In-kind earnings	In-kind income as a substitute or complement for cash wages. Includes, for example, the value of company cars, meals, housing, electricity, medical expenses, child care etc. paid or partly paid by the employer.	It does not exist on its own at the person level.	Continuous variable			All HHs	A	q907	
SINC	Self-employment income	Profit/loss from unincorporated enterprises. The income is recorded gross of social insurance contributions (but net of expenses).	Self-employment income is often collected with a different reference period than other more regular incomes; for example, it could refer to the last financial year for which business accounts for the purposes of taxation were prepared. Includes imputed income from owner occupied dwellings and own produced food for home consumption If farm and non-farm self-employment income are not supplied separately, users can try to split them at the individual level	Continuous variable			All HHs	A	q909	
RENTAL	Income less expenses from rentals	Rentals from dwellings, business buildings, vehicles, equipment, etc excludes rent from land		Continuous variable			All HHs	A	q913	
PROINC	Property income	Interest received less interest paid Dividends Rent from land		Continuous variable			All HHs	A	q922	
TRANSF	Current transfers received	Social insurance, assistance, inter-household transfers, regular support received such as charities, remittances received, gifts received Disability pensions, allowances, benefits etc. Child/family benefits		Continuous variable			All HHs	A	q936 q937 q938	
TRPAID	Current transfers paid	Employers' social insurance contributions Employees' social insurance contributions Taxes on income less refund Regular taxes on wealth Regular inter-household cash transfers Regular cash transfers to charities	In some datasets mandatory social insurance contributions are recorded together with the taxes and are, therefore, included here. If the original data only has one tax variable with all the taxes lumped together, the variable is included here. If the original survey only asked for net incomes, this variable usually remains empty. In many datasets, income taxes are not asked directly to the respondents but simulated through a taxation micro simulation model.	Continuous variable			All HHs	/		
TOTDINC	Total disposable income		GWAG+SINC+RENTAL+PROINC+TRANSF	Continuous variable			All HHs	A		
TOTINC	Total income		TOTDINC+TRPAID	Continuous variable			All HHs	/

PERSONS										
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: IDENTIFICATION										
PNUM	Person identifier	Person identification number (usually the person line number in the household)	This identifier is unique within each household. In order to uniquely identify an individual, both CASENUM and PNUM are required.	Ordered discrete variable			All INDs	A	q504	
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: FILE INFORMATION										
PWEIGHT	Person weight	Data-provider person weight.	Very few data providers construct a different weight for each member of the household. If a person weight exists in the original dataset, we do report it here (even though it turns out to be the same for all household members in most cases), otherwise we assign the household weight to all household members. All statistical analysis performed should use the appropriate weight.	Continuous variable			All INDs	/		
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: DEMOGRAPHICS										
PAGE	Age	Age in years.	In some datasets, age may be calculated at a certain reference date (e.g., 31 December of last year). When the original dataset has only age categories, age is calculated as the midpoint of the range provided. In some datasets, AGE is top coded by the data provider (e.g., a value of 95 represents 95 years of age or over).	Ordered discrete variable			All INDs	A	q508	
PSEX	Gender	Indicator for gender of individual.		Harmonized Categorical variable	1 Male	1 Male	All INDs	A	q506	
					2 Female	2 Female				
PMART	Marital status	Legal administrative status concerning marriage & partnership (even if not married, a person can be still legally recognized as being in a relationship).	There is no Polygamous status for females. Generally the information about polygamous status is available only for the head (male). For the other individuals we consider those having the status married as monogamous.	Harmonized Categorical variable	1 Never married	1 Never married	INDs aged 15 +	A	q527	
					2 Married monogamous	2 Married				
					3 Married polygamous					
					4 Divorced/Separated	3 Divorced 5 Separated				
					5 Widowed	4 Widowed				
					99 Not stated					
PREL	Relationship to head	Relationship to the head of household, where the value '1' always stands for the head of the household him/herself. The value "Other relatives " includes Nephew and Niece, Grandparents, son/daughters in law etc...		Harmonized Categorical variable	1 Head of household	0 Head of the household	All INDs	A	q505	
					2 Spouse	1 Spouse				
					3 Son/Daughter	2 Son/Daughter				
					4 Father/mother (parents)	3 Father/Mother				
					5 Brother/sister	5 Brother/Sister				
					6 Grandchildren	4 Grandchildren				
					7 Other relatives	6 Grandparents 7 Other relatives				
					8 Other non-relatives	8 Servants 9 Others

CATEGORY: FATHER AND MOTHER INFORMATION										
PFPRES	Father present at home	Indicates whether the father is present at home, not a household member or dead.	In case there is no information available about whether the father is dead or not we just use code 2 (not a HH member). In case, the relationship to head variable indicates that the brother of the head is living in the HH with nephews/nieces of the head we assume that these last are the sons/daughters of the head's brother.	Harmonized categorical variable	1 Yes		All INDs	A	q505	• All parents related variables were generated by ERF including the presence status generated using the relationship to head variable, therefore those dead could not be identified.
					2 Father is not a household member					
					3 Father is dead					
PMPRES	Mother present at home	Indicates whether the mother is present at home, not a household member or dead.	There might be a problem identifying the mother from the Roster in case of multiple spouses. This variable can be clearly identified only in the fathers'/mothers' ID is provided in the dataset. In case of only one spouse she is assumed to be the mother, unless the age checking is could identify those living with their step mother (mother died or divorced).	Harmonized categorical variable	1 Yes		All INDs	A	q505	• Father's and Mother's variables were generated for head of the household's children, the head him/herself whenever his/her parent(s) are household members, for head's siblings if parents' data is available, and for head's grandchildren if he/she has married sons/daughters or in laws living in the household. In some cases, children were linked to their parents based on the HH data entry order.
					2 Mother is not a household member					
					3 Mother is dead					
PFATHID	ID of the father	Indicates the PNUM (the line number in the HH) of the father	This information is available for the son/daughter of the head, partially available for the head and brother/sister of the head and is missing for the other individuals (exception for Iraq). In case we have the brother of the head living in the HH with the nephew/niece of the head we assume that these last are the son (daughter) of the head's brother. Since very few surveys report this information. Value can be imputed from the roster (or individual file) but might be available only if PFPRES = 1.	Ordered discrete variable			All INDs	A	q504	
PMOTHID	ID of the Mother	Indicates the PNUM (the line number in the HH) of the mother	Same as PMPRES Since very few surveys report this information. Value can be imputed from the roster (or individual file) but might be available only if PMPRES = 1.	Ordered discrete variable			All INDs			
PFAGE	Age of the father			Ordered discrete variable			All INDs	A	q508	• Since the relationship to the head variable did not include the son/daughter in law category, to generate the in-laws' characteristics, we assumed that the son in law is a married male recoded as other relative in the relationship to head variable where the number of married female daughters in the household >=1. The same technique was applied to the daughter in law , a married female recoded as other relative in the relationship to head variable where the number of married male sons >=1 is considered a daughter in law.
PMAGE	Age of the mother									
PFMART	Marital status of the father			Harmonized categorical variable	1 Never married 2 Married monogamous 3 Married polygamous 4 Divorced/Separated 5 Widowed 99 Not stated	Structured the same as PMART	All INDs	A	q527	• In case the head has multiple spouses, the identification of the children's mothers among different spouses is judgmental whether on age basis, or on members order in the household.
PMMART	Marital status of the mother									
PFEDUC	Educational level of the father			Harmonized categorical variable	1 None 2 Primary 3 Lower secondary 4 Secondary 5 Post secondary or equivalent 6 University 7 Postgraduate 99 Not stated	Structured the same as PEDUC	All INDs	A	q516 q517_s q524	
PMEDUC	Educational level of the mother									
PFMAS	Main activity of the father			Harmonized categorical variable	1 Employed 2 Unemployed 3 Homemaker (Housewife) 4 Student 5 Pensioners/retired/disabled 6 Others 99 Not stated	Structured the same as PCMAS	All INDs	A	q531 q532 q541 q542 q543	
PMMAS	Main activity of the mother									
PFCEMS	Employment status of the father			Harmonized categorical variable	1 Employee 2 Employer 3 Own account, self-employed 4 Contributing (unpaid) family workers 5 Member of producers cooperatives 6 Workers not classifiable by status (other) 99 Not stated	Structured the same as PCEMS	All INDs	A	q536	
PMCEMS	Employment status of the mother									

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PFOCC	Occupation of the main job of the father			Harmonized categorical variable	1 Legislators, senior officials and managers 2 Professionals 3 Technicians and associate professionals 4 Clerks 5 Service workers and shop and market sales 6 Skilled agricultural and fishery workers 7 Craft and related trades 8 Plant and machine operators and assemblers 9 Elementary occupations 10 Armed Forces 11 Other/unspecified 99 Not stated	Structured the same as POCC	All INDs	A	q535	
PMOCC	Occupation of the main job of the mother									
PFIND	Industry of the main job of the father			Harmonized categorical variable	1 Agriculture and Fishing 2 Mining 3 Manufacturing 4 Electricity and Utilities 5 Construction 6 Commerce 7 Transportation, Storage and Communication 8 Financial, Insurance and Real Estate 9 Public Administration 10 Other Services 11 Unspecified 99 Not stated	Structured the same as PIND	All INDs	A	q534	
PMIND	Industry of the main job of the mother									
PFTYPEWK	Sector of employment of the father			Harmonized categorical variable	1 Government 2 Public sector 3 Private sector 4 Joint/Cooperative 5 Foreign sector 6 Other 99 Not stated	Structured the same as PTYPEWK	All INDs	A	q533	
PMTYPEWK	Sector of employment of the mother									
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: NATIONALITY AND IMMIGRATION STATUS										
PETHNAT	Ethnicity/ nationality	Ethnicity or nationality	The content of this variable is not uniform. In many datasets where information on ethnicity or nationality is not available in the original survey, it can also contain country of birth, race, ancestry or mother tongue.	Harmonized Categorical variable	0 Non-citizen	2 Egyptian 3 Syrian 4 Iraqiian 5 Other Arab countries 6 Other non-Arab countries	All INDs	A	q509	
					1 Citizen	1 Jordanian				
PIMMIGR	Immigration status	Ideally indicates whether an individual is born in the country or has an immigrant background, and if possible, how recently he/she arrived. Other migration status information may be included if available.	The content of this variable is not uniform. By other migration status we tempt to capture those who migrate from one region to another inside the country (if the place of birth is different from the place of residence inside the country)	Harmonized categorical variable	1 Immigrant (from abroad)		All INDs	/		
					2 Migrant (from another region inside the country)					
					3 No					
PBIR	Is the individual born in his residence place	This variable indicates whether the individual is born in his place of residence		Dummy variable	0 No		All INDs	/		
					1 Yes					
PBIRPL	Place of Birth	This variable includes the region, the area or the country of birth of the person	Very few surveys contain this information	Categorical variable			All INDs	/

						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: EDUCATION										
PLIT	Literacy status	This variable indicates whether the person is literate (can read and write) or not	A person is considered literate if they can both read and write and not just one or the other. A semi-literate person (one who can read, but cannot write) is said to be illiterate. In the case where the survey asks only whether a person can read but does not ask if they can write, and in case there no information in the questionnaire about the reading and writing ability literacy cannot be determined, these are coded as missing. If there are no questions about the read and write ability but the educational attainment is elementary or upper the individual is considered literate	Dummy variable	0 No	q524=1 Illiterate  q516=3 Never enrolled in school (aged4-14 years)	INDs aged 4+	A	q516 q524	Generated using the education status (q524) for those ever enrolled and left school or never enrolled (aged 15+), while for those currently enrolled and aged 4+, they were all assumed to be able to read and write. Those who never attended school and aged 4-14 years were considered illiterate. While for those ever attended and left and aged 4-14 years, the literacy status is recoded missing since no information for this sub-sample is available.
					1 Can read & write	q524=2 Read and write q524=3 Primary q524=4 Preparatory q524=5 Elementary q524=6 Professional education q524=7 Secondary q524=8 Intermediate diploma q524=9 Bachelor q524=10 High diploma q524=11 Masters q524=12 PhD  q516=1 Currently attending school				
EVERATTD	Ever attended school	This variable indicates whether the individual have ever attended school, academic, "Coranic" or any other formal or informal school	All persons of pre-primary school age or above. Primary school age will vary by country. Value must be missing for others. This is country-specific and depends on how school attendance is defined. Pre-school is included here. Also, in some countries, ever attended is yes only if the person attended for some minimum amount of time. The differences need to be carefully documented. One is not required to have completed any level of education to answer this question positively. By logic, EVERATTD, PEDUC and PATSCH have the following relationship: If PATSCH=1, EVERATTD=1 If PEDUC>=2 (and ≠ 99), EVERATTD=1 If PEDUC=99 & PATSCH=0, EVERATTD=0	Dummy variable	0 No	3 Never enrolled	INDs aged 4+	A	q516	Generated using question indicating current enrollment status
					1 Yes	1 Currently enrolled 2 Ever enrolled and left				
					99 Not stated	(members aged >=4 years for whom q516=missing)				
TYPSCH	What type of school	Type of school attended by the individual		Harmonized categorical variable	1 Coranic		INDs aged .....	/		
					2 Academic					
					3 Adult education or literacy program					
					4 Vocational or other					
PEDUC	Educational level	Highest level of education attained.	Primary corresponds to elementary, and lower secondary to preparatory/second stage of basic education In case there is no distinction in the survey between primary and preparatory education level and the individual is not currently enrolled in school we consider his education level primary If there is no information on highest level of education completed, the variable can be constructed using diploma level and/or years of education. The selection of the variable must be based on a careful review of the data. When using currently attending information (level or grade) to construct the variable, it must correspond to the grade (or level) presently attending minus one (1). This is country specific- not all countries require the same number of school years to complete a given level. The value "None" does not mean that the person never attended school it means that the individual did not complete the first level of education (elementary) None corresponds either to those currently enrolled in primary but didn't get the diploma or those illiterate, Read and Write, in informal school such as Coranic school, traditional, vocational training or adult etc.(cross tabulation with type of school will allow to identify those without education level) If there is no question on highest level of education completed for those not attending school and there is no information on diploma and/or years of education completed, then the variable cannot be constructed. University education level refers to any higher education after successfully completing secondary level of education regardless of whether this was completed. Not stated is for cases where no education level is stated- this should be checked and avoided as much as possible. This classification should be documented. If no information on the completeness of the education level, classify as incomplete and add specific comment to documentation. If person is illiterate and there is no information on school level, cases are coded 1 "None". If there is no information on the literacy status all levels other than formal education grades and not stated can be coded 1 "None".	Harmonized categorical variable	1 None	q524=1 Illiterate q524=2 Read and write q516=3 Never attended school q517_s=1 KG q517_s=2 & q517_c<=6 Elementary in grade 6 or below	INDs aged 4+	A	q516 q517_s q517_c q524	Generated using the education status (q524) for those who were enrolled in the past and left school (q516=2) or were never enrolled (q516=3), while for those currently enrolled (q516=1), the grade currently attending (q517_s) will be used to indicate the highest level achieved (normally this level should be the level below that the student currently attending)
					2 Primary	q524=3 Primary q517_s=2 & q517_c>6 Elementary above grade 6				
					3 Lower secondary	q524=4 Preparatory q524=5 Elementary q524=6 Professional education q517_s=3 Vocational q517_s=4 Secondary q517_s=5 Intermediate diploma				
					4 Secondary	q524=7 Secondary q517_s=6 Bachelor				
					5 Post secondary or equivalent	q524=8 Intermediate diploma				
					6 University	q524=9 Bachelor q517_s=7 High diploma q517_s=8 Masters				
					7 Postgraduate	q524=10 High diploma q524=11 Masters q524=12 PhD q517_s=9 PhD				
					99 Not stated	(members aged>=4 years for whom q524=missing)				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PTYPSEC	Type of secondary school attended		Only individuals who answered codes 4 in PEDUC are eligible. For all others, it will be missing. If there is no indication about the type of secondary school the variable will be missing	Harmonized categorical variable	1 Academic		INDs aged .....+	/		
					2 Technical or vocational					
PYEDUC	Number of effective years of schooling	This is a continuous variable of the number of years of formal schooling completed.	The lower age cut-off at which information is collected will vary from country to country. If no grade level information exists, this variable will be missing. The variable does not take into account the actual number of years required to reach this level, in other words, first grade repeated three times still only counts as 1 year of schooling. If a person has completed a BA/BSc, MA/MSc or PhD, but no number of years is known, use country specific information for the number of years.	Ordered discrete variable			INDs aged 4+	A	q516 q517_s q517_c q523	Variable provided only for those enrolled in the past and left school. Years of education were replaced by "0" for those who never attended school (q516=3) and for those currently enrolled, years of education will be computed using grade currently attending
PATSCH	School attendance status	Indicates whether the individual is currently attending school	If person on short school holiday when interviewed, he or she is considered to be at school. However, if the person is on the holiday between two years of schooling, one cannot assume that he/she will continue schooling into the next year. Variable can be created using either attendance or enrolment question (since typically just one of them is available in each survey). In the case that both questions were available, attendance question MUST be used. This variable must ALWAYS have a note specifying which question (attendance/ enrolment) had been used to create it. Does not include pre-school or kindergarten programs. Value must be missing for others. Does not require one to have completed any level. Adults currently attending literacy programs are considered as attending school (PATSCH = 1) In case the person is not currently attending school but there is no information on whether he attended school and left or never attended school use information from PEDUC to impute the right value.	Dummy variable	0 No	2 Ever enrolled and left 3 Not currently enrolled	INDs aged 4+	A	q516	
					1 Yes	1 Currently enrolled				
PENROL	Level of schooling presently attending	PENROL ideally provides information on the level of education in which the individual is enrolled.	For persons presently attending school (PATSCH=1), value missing for others. For secondary school, if not specified in the questionnaire, it is assumed that it is an academic secondary school. For the surveys where is no distinction between university and post university they are considered as university As with PEDUC, we recommend that PENROL be restructured as a categorical variable appropriate to the analysis.	Harmonized Categorical variable	1 Primary	2 Basic if q517_c<=6	Currently enrolled INDs aged 4+	A	q517_s q517_c	
					2 Lower secondary	2 Basic if q517_c> 6 3 Vocational education				
					3 Higher secondary- academic	4 Secondary				
					4 Higher Secondary-technical/vocational					
					5 Post secondary technical	5 Intermediate diploma				
					6 University	6 Bachelor				
					7 Postgraduate	7 High diploma 8 Masters 9 PhD				
					8 Other	1 KG				
ATYPSCH	Type of school attending	Provides information on the type of school the person is currently attending	Only for persons currently at school (PATSCH=1). Value must be missing for others. Public includes fully government owned as well as semi-public organization. Private are facilities run by non-governmental organizations (e.g. NGOs, religious institutions) or by private entities. Other refers to schools that cannot be categorized in the above classification such as community schools run by local parent groups. Does not include pre-school or kindergarten. For adults attending literacy programs use "Other"	Harmonized Categorical variable	1 Public	1 Public	Currently enrolled INDs aged 4+	A	q519	
					2 Private	2 Private sector				
					3 Coranic					
					4 Adult literacy					
					5 Other	3 UNRWA 4 Outside Jordan 7 Other

FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: LABOUR STATUS										
PCLFS	Labor force status in the current period	Current labor force status that distinguishes between the employed, the unemployed, and those not in the labor force.	Variable is constructed for all persons administered this module in each questionnaire. For this reason the lower age cut-off (and perhaps upper age cut-off) at which information is collected will vary from country to country. All persons are considered active in the labor force if they presently have a job (formal or informal, i.e. are employed) or do not have a job but are actively seeking work (i.e. unemployed). Variable is constructed for all persons administered this module in each questionnaire. For this reason the age cut-offs at which information is collected will vary from country to country.	Harmonized Categorical variable	1 Active	q531=1 Employed during last week q532=1 Temporary absent from work  q541=1 Searching for a job q542=1 Waiting to go back to previous job q542=2 found a job and waiting to start	INDs aged 15+	A	q531 q532  q541 q542 q543	To generate the labor force status variable (PCLFS), both who are currently working and who are reported working but not in the last 7 days prior to the interview (temporary absent) were considered economically active. It is worth noting that another question addressed unemployed whether they are actively seeking work during the month prior to the interview and those who said yes are also considered economically active, in addition to those, individuals who are reported waiting to be back to their previous job or found a job and waiting to start in Q.542 are also considered economically active. While those who are reported unemployed and not seeking work are considered economically inactive (students, homemakers, has income, out of labor force, other).
					2 Inactive	q543=1 Student q543=2 Homemaker q543=3 have income q543=4 III/Disabled/Old q543=5 Other activity status				
					99 Not stated	(members aged >=15 years for whom all employment related variables=missing)				
PCMAS	Main activity status in the current period	Main activity status with respect to the labor force, that distinguishes between the employed and the not employed. The employed are those for whom work is the main activity, while for all the others, the main activity should attempt to distinguish between pensioners, students, and homemakers.	The reference period might be the last 12 months or the current time period. Unlike PCLFS, the main distinction in PCMAS is between: - "Employed" -those who, during the reference period, carried out ANY employment (any type or any extent) - even just one occasional hour of paid work or irregular unpaid family work (ILO definition). Among the employed, the variable should distinguish, if available, between those employed at work and those on leave - "Not Employed". The rationale is that individuals do not generally spend their time "being unemployed", but use the time in unemployment to participate in other activities (e.g., attending school or being a housewife). Unemployment will generally be considered the primary activity only if the individual states that unemployment is his/her primary activity (e.g., unemployed and actively searching for a job) or if the individual is registered as unemployed and does not indicate significant participation in any other activity. In these cases, the individuals will be assigned to their own category among the "Not Employed". Accordingly, "Not Employed" are classified into: - Unemployed - individuals who are not employed according to the definition above, and who report that they are unemployed. - Not in Labor Force / Inactive – individuals identifiable as being neither employed nor unemployed, by the definitions above. If possible, the inactive category should distinguish between the retired, students, and homemakers. - Not Employed / Unemployed or Not in Labor Force - In some cases, it is not possible to distinguish between those who are unemployed and those who are inactive, but it is possible to determine that they are not employed. In those cases where it is not feasible to determine unemployed versus inactive status, these individuals will be coded as "Not Employed". In some surveys individuals are classified as employed students (or employed housewives) in that case they are considered as active in PCLFS and classified student (or housewives) in PCMAS. A cross tab between the two variables will permit to distinguish employed students (or housewives) from inactive ones. A proper documentation should particularly be done for those cases during harmonization process	Harmonized Categorical variable	1 Employed	q531=1 Employed during last week q532=1 Temporary absent from work  q542=1 Waiting to go back to previous job q542=1 found a job and waiting to start	INDs aged 15+	A	q531 q532 q541 q542 q543	To generate the PCMAS, those who are currently working or who are reported to be temporary out of their jobs together with those who are reported waiting to be back to their previous job or found a job and waiting to start in Q542 are considered employed. Those who are actively seeking a job are considered unemployed (Q540). While those who are not seeking a job and currently not working represent the inactive sample (students, homemakers, has income, out of labor force, other) and were identified in Q543.
					2 Unemployed	q541=1 Searching for a job				
					3 Homemaker (Housewife)	q543=2 Homemaker				
					4 Student	q543=1 Student				
					5 Pensioners/retired/disabled	q543=4 III/Disabled/Old				
					6 Others	q543=3 have income q543=5 Other activity status				
					99 Not stated	(members aged >=15 years for whom all employment related variables=missing)				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PCEMS	Status of Employment	Detailed description of the employment status (employee, own-account workers, employer, unpaid family worker, etc.) in (current or last held) job, ideally following the <b>ICSE</b> classification.	The lower age cutoff (and perhaps upper age cutoff) at which information is collected will vary from country to country. Definitions taken from the International Labor Organizations Classification of Status in Employment with some revisions to take into account the data available. Employee includes anyone whose basic remuneration is not directly dependent on the revenue of the unit they work for, typically remunerated by wages and salaries but may be paid for piece work or in-kind. The continuous criteria used in the ILO definition is not used here as data are often absent and due to country specificity. Public includes quasi-government organizations. Employer is a business owner (whether alone or in partnership) with employees. If the only people working in the business are the owner and contributing family workers, the person is not considered an employer (as has no employees) and is, instead classified as own account. Own account or self-employment: jobs are those where remuneration is directly dependent from the goods and service produced (where home consumption is considered to be part of the profits) and have not engaged any permanent employees to work for them on a continuous basis during the reference period. Members of producers cooperatives are workers who hold a self-employment job in a cooperative producing goods and services. Contributing family workers are those workers who hold a self-employment job in a market-oriented establishment operated by a related person living in the same households who cannot be regarded as a partner because of their degree of commitment to the operation of the establishment, in terms of working time or other factors, is not at a level comparable to that of the head of the establishment. Workers not classifiable by status (code 6) include those for whom insufficient relevant information is available and/or who cannot be included in any of the preceding categories. The variable should generally cover the active sample (employed and unemployed). Active sample reported as "not stated (code 99)" should normally include employed for whom the status was not identified and unemployed if status in last job is not reported.	Harmonized Categorical variable	1 Employee	1 Waged employee	Active INDs aged 15+	A	q536	Q536 indicating the work status was reported only for those employed in the sample while for the unemployed, and for whom the last status before being unemployed should have been completed- compared to other surveys, and for those temporarily unemployed because either they are waiting to resume previous work or found a job and waiting to start, the question was not completed, therefore variable for those cases is recoded not stated.
					2 Employer	2 Employer				
					3 Own account, self-employed	3 Self-employed				
					4 Contributing (unpaid) family workers	4 Unpaid family worker				
					5 Member of producers cooperatives					
					6 Workers not classifiable by status (other)	5 Unpaid worker				
					99 Not stated	(active members aged >=15 years for whom q536=missing)				
POCC	Classification of Occupations for main job	International Standard Occupational classification of the main (current or last held) job, with as much detail as possible (ideally 4-digit ISCO-88/08 if available in original survey).	The lower age cut-off (and perhaps upper age cut-off) at which information is collected will vary from country to country. Classifies the main job of any individual with a job (EMPLOYED=1) and is missing otherwise. As most surveys collected detailed information and then coded it using national classifications, and the original data is not in the data bases, no attempt has been made to correct or check the original coding. The variable should generally cover the active sample (employed and unemployed). Active sample reported as "not stated (code 99)" should normally include employed for whom the occupation was not identified and unemployed if occupation in last job is not reported.	Harmonized Categorical variable	1 Legislators, senior officials and managers	111 thru 199	Active INDs aged 15+	A	q535	Methodology indicates that the occupation coding follows the 2008 international standard classification for occupations (ISCO-08)
					2 Professionals	211 thru 299				
					3 Technicians and associate professionals	311 thru 399				
					4 Clerks	411 thru 499				
					5 Service workers and shop and market sales	511 thru 599				
					6 Skilled agricultural and fishery workers	611 thru 699				
					7 Craft and related trades	711 thru 799				
					8 Plant and machine operators and assemblers	811 thru 899				
					9 Elementary occupations	911 thru 999				
					10 Armed Forces					
					11 Other/unspecified					
					99 Not stated	(active members aged >=15 years for whom q535=missing)				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PIND	International Standard Industrial Classification of main job	Industry classification of the main (current or last held) job, with as much detail as possible.	In many datasets national classifications are used. The variable should generally cover the active sample (employed and unemployed). Active sample reported as "not stated (code 99)" should normally include employed for whom the industry was not identified and unemployed if industry of last job is not reported.	Harmonized categorical variable	1 Agriculture and Fishing	11 thru 21	Active INDs aged 15+	A	q534	The methodology indicates that the industry coding follows standard international classification for industries- (ISIC4)
					2 Mining	81 thru 89				
					3 Manufacturing	101 thru 321				
					4 Electricity and Utilities	351 thru 360				
					5 Construction	410 thru 433				
					6 Commerce	451 thru 479 & 551 thru 563				
					7 Transportation, Storage and Communication	491 thru 532				
					8 Financial, Insurance and Real Estate	641 thru 682				
					9 Public Administration	841 thru 843				
					10 Other Services	581 thru 639 & all other codes				
					11 Unspecified					
					99 Not stated	(members aged >=15 years for whom q534=missing)				
PTYPEWK	Sector of employment	Sector of employment (i.e. private versus public sector workers) of the (current or last held) primary job.	Cooperative includes also employee in joint ventures. Other include workers in national NGOs and in private households Foreign includes workers in international NGOs Quai public sectors are considered as public. In case there is no distinction between Government and public (the survey mixes both categories) we use the classification used in the original data. The variable should generally cover the active sample (employed and unemployed). Active sample reported as "not stated (code 99)" should normally include employed for whom the sector was not identified and unemployed if sector of last job is not reported.	Harmonized categorical variable	1 Government		Active INDs aged 15+	A	q533	
					2 Public sector	1 Public sector				
					3 Private sector	2 Private sector				
					4 Joint/Cooperative					
					5 Foreign sector	3 International organizations				
					6 Other	4 Outside Jordan				
					99 Not stated	(members aged >=15 years for whom q533=missing)				
PTENURE	Tenure in current job	Duration of time worked in main (current or last held) job.	PTENURE may be provided directly in the data or may be calculated from calendar data or a combination of questions. The variable should generally cover the active sample (employed and unemployed).	Semi-standardized continuous variable when information is provided in continuous years			Active INDs aged .....+	/		
PWEEKTL	Total weeks worked	Number of weeks worked in a year	PWEEKTL provides the number of weeks worked in any job (full- or part-time) during the reference period. The variable should generally cover the active sample (employed and unemployed).	Semi-standardized continuous variable when provided weeks are continuous			Active INDs aged .....+	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	JORDAN, 2010				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
FILE LEVEL: PERSON			1) All income variables are recorded as yearly amounts. Amounts are annualized, if not provided in original survey.							
IDEAL UNIVERSE: ALL INDIVIDUALS			2) All income variables are recorded in national currency amounts.							
IDEAL REFERENCE PERIOD: ONE YEAR			3) Non-existing social benefits or other income sources are recorded as 0.							
CATEGORY: ANNUAL INCOME			As a rule, household-level income amounts are derived by summing the individual-level values for all individuals in the household. When individual data are not available, reported household amounts are used. In these cases, the person-level variables will not be available and these cases will be noted in the country-specific documentation.							
			Where the household income variables are directly calculated from LIS person-level income variables, these are noted below.							
			Annual Income amounts should be reported in country national currency							
PGWAG	Gross wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), gross of employee social insurance contributions/taxes but net of employer social insurance contributions/taxes.	When employer-provided sick pay can not be separated, it is included in the wages. In case there is no precision about whether the wage is net or gross we assume it is gross wage If incomes are not available at the individual level, the variable is constructed directly from household level original information.	Continuous variable			Income earners	/		
PNWAG	Net wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), net of employer and employee social insurance contributions and taxes.		Continuous variable			Income earners	/		
PIKEAR	In-kind earnings	In-kind income as a substitute or complement for cash wages. Includes, for example, the value of company cars, meals, housing, electricity, medical expenses, child care etc. paid or partly paid by the employer.	It does not exist on its own at the person level.	Continuous variable			Income earners	/		
PSINC	Self-employment income	Profit/loss from unincorporated enterprises. The income is recorded gross of social insurance contributions (but net of expenses).	Self-employment income is often collected with a different reference period than other more regular incomes; for example, it could refer to the last financial year for which business accounts for the purposes of taxation were prepared. Includes imputed income from owner occupied dwellings and own produced food for home consumption If farm and non-farm self-employment income are not supplied separately, users can try to split them at the individual level	Continuous variable			Income earners	/		
PRENTAL	Income less expenses from rentals	Rentals from dwellings, business buildings, vehicles, equipment, etc excludes rent from land		Continuous variable			Income earners	/		
PPROINC	Property income	Interest received less interest paid Dividends Rent from land		Continuous variable			Income earners	/		
PTRANSF	Current transfers received	Social insurance, assistance, inter-household transfers, regular support received such as charities Disability pensions, allowances, benefits etc. Child/family benefits		Continuous variable			Income earners	/		
PTRPAID	Current transfers paid	Employers' social insurance contributions Employees' social insurance contributions Taxes on income less refund Regular taxes on wealth Regular inter-household cash transfers Regular cash transfers to charities	In some datasets mandatory social insurance contributions are recorded together with the taxes and are, therefore, included here. If the original data only has one tax variable with all the taxes lumped together, the variable is included here. If the original survey only asked for net incomes, this variable usually remains empty. In many datasets, income taxes are not asked directly to the respondents but simulated through a taxation micro simulation model.	Continuous variable			Income earners	/		
PTOTDINC	Total disposable income		PGWAG+PSINC+PRENTAL + PPROINC+PTRANSF	Continuous variable			Income earners	/		
PTOTINC	Total income		PTOTDINC+PTRPAID	Continuous variable			Income earners	/
