I. Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Vietnam perceive the WBG. The survey explored:

- *General Issues Facing Vietnam*
- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Effectiveness and Results*
- *The World Bank Group's Knowledge Work and Activities*
- *Working with the World Bank Group*
- *The Future Role of the World Bank Group in Vietnam*
- *Communication and Information Sharing*
- *Background Information*

II. Methodology

From March to April 2017, 1478 stakeholders of the WBG in Vietnam were invited to provide their opinions on the WBG's work in the country by participating in a country opinion survey. Participants were drawn from the Office of the President, Prime Minister; office of a minister; National Assembly Office/Committee; ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; bilateral/multilateral agencies; private sector organizations; the financial sector/private banks; NGOs/community based organizations; the media; mass organizations; youth groups; academia/research institutes/think tanks; the judiciary branch; and other organizations. A total of 632 stakeholders participated in the survey (43% response rate).

Some respondents received and returned the questionnaires via email. Other respondents responded to the survey on an independent online survey platform. Respondents were asked about: general issues facing Vietnam; their overall attitudes toward the WBG; the WBG's effectiveness and results; the WBG's knowledge work and activities; working with the WBG; the WBG's future role in Vietnam; and the WBG's communication and information sharing.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

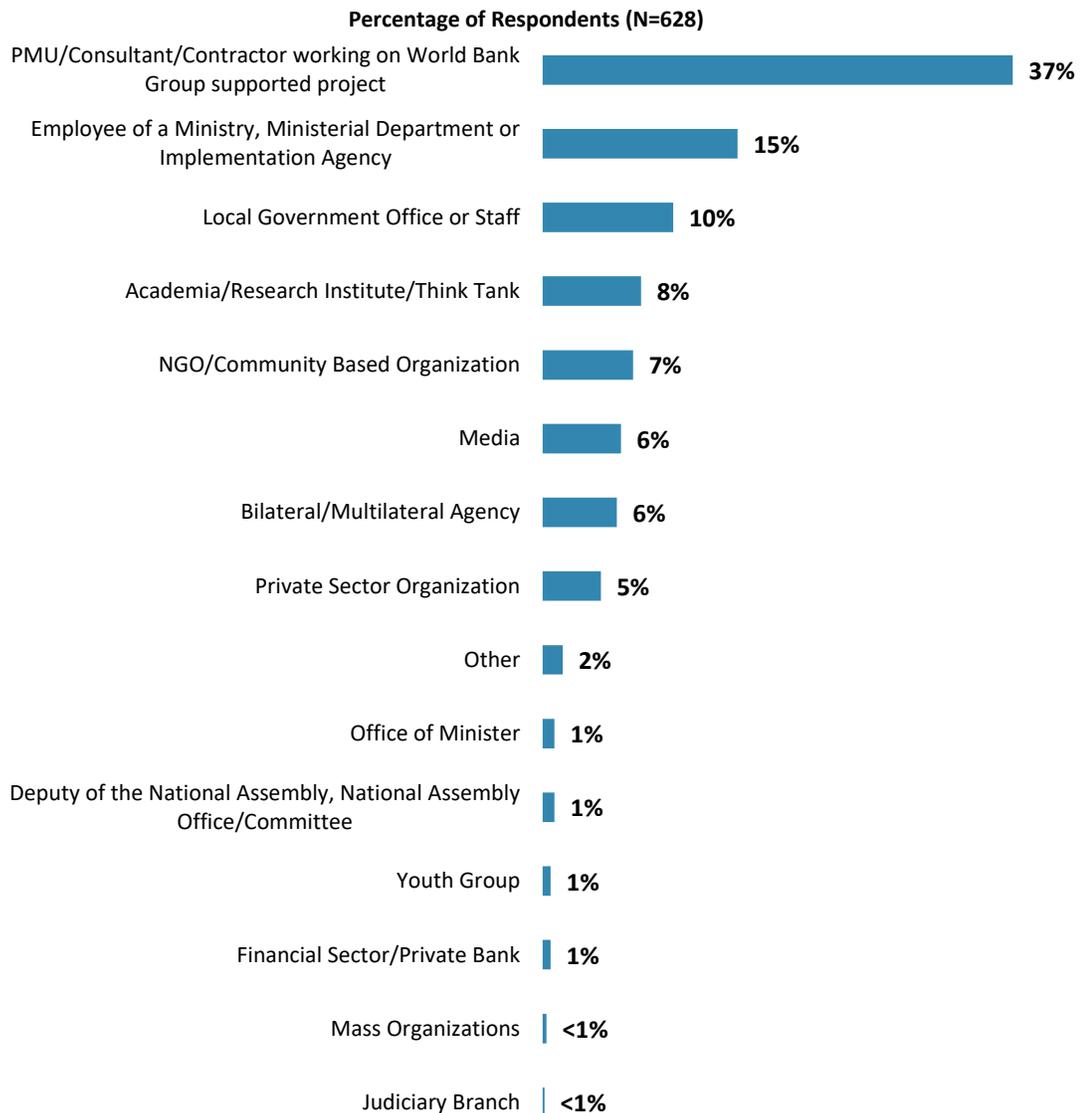

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'14 (response rate was 49%, N=501). Data were weighted to reach the same stakeholder composition in two years, which allows for year comparisons. Stakeholder groups which were not present in both fiscal years were not included in the comparison. Respondents who belonged to the "other" stakeholder category were not included either. As a result, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY'14 COS report and the non-weighted data presented in appendices A, B, C, D, and F. For the weighted stakeholder breakdown and year comparison results, please refer to Appendix E (page 88).

III. Demographics of the Sample

Current Position

- For further analyses, respondents from the financial sector/private banks were combined with those from private sector organizations; respondents from NGOs/community based organizations, mass organizations, and youth groups were combined in the “CSO” category; and the small number of respondents from the office of a minister, National Assembly Office, the judiciary branch, and other organizations were included in the “Other” category. There were no respondents from the Office of the President/Prime Minister.

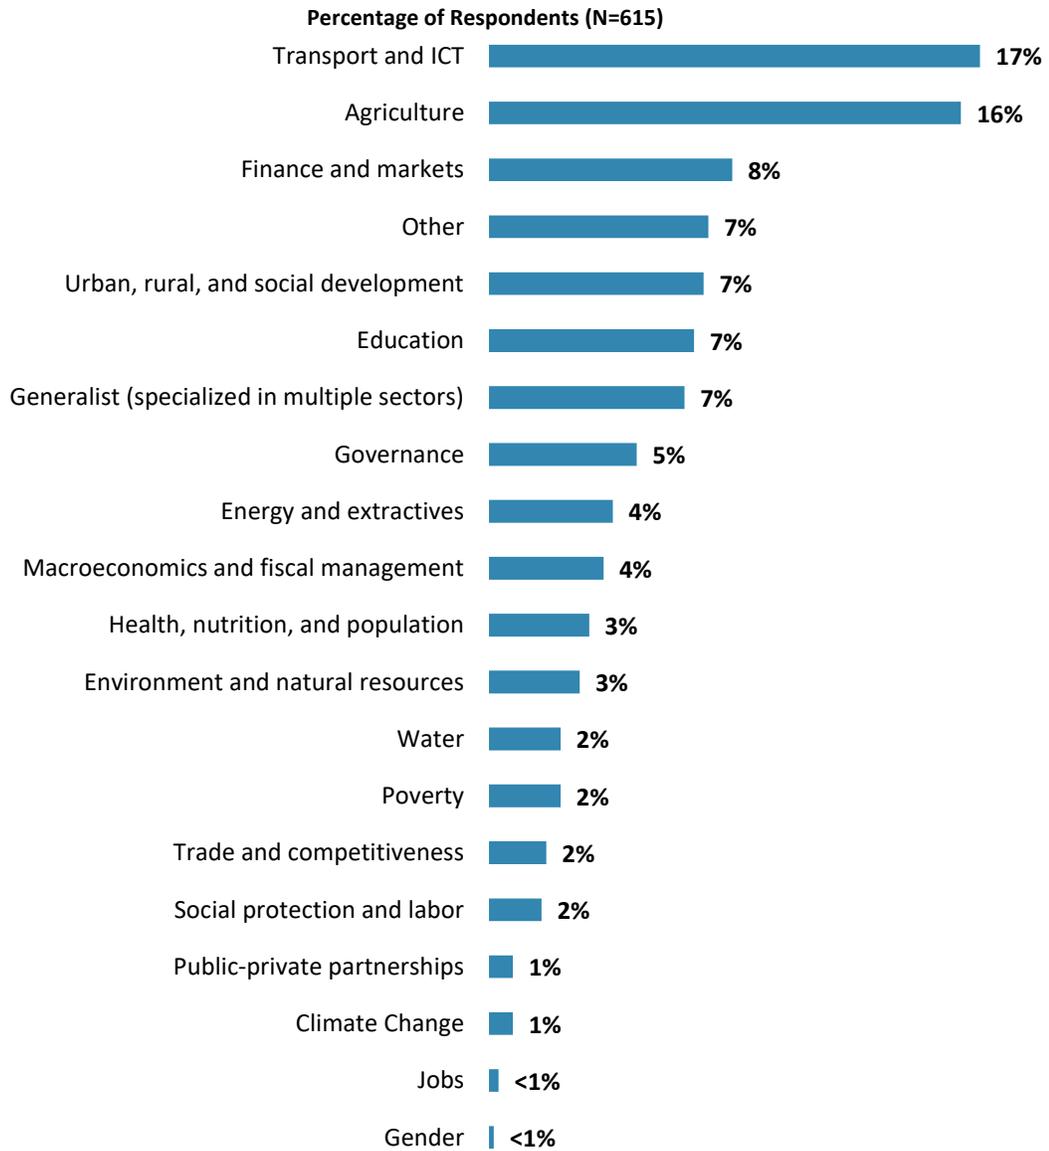

“Which of the following best describes your current position?” (Respondents chose from a list.)

Familiarity with the World Bank Group

- **Year comparison:** Respondents in this year's Country Survey and the FY14 Country Survey had statistically similar levels of familiarity with the WBG (weighted mean in FY'17 = 6.6; weighted mean in FY'14 = 6.7)¹.
- **Stakeholder difference:** Respondents from ministries, PMUs, and consultants working on WBG projects were significantly more familiar with the WBG compared to respondents from other stakeholder groups this year.
- Respondents' levels of familiarity with the WBG were significantly, strongly correlated with their ratings of the WBG's overall effectiveness in Vietnam, and significantly, moderately correlated with the extent to which the WBG plays a relevant role in development in Vietnam, and the extent to which the WBG contributes to the country's development results.

"How familiar are you with the work of the World Bank Group in Vietnam?"

VI. Sectoral Effectiveness (continued)

Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the World Bank Group's overall effectiveness and ratings of its ability to help achieve development results in Vietnam, bivariate correlational analyses were conducted using respondents' ratings of the twenty seven specific areas of effectiveness.

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the World Bank Group's overall effectiveness or ratings of its ability to help achieve development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the WBG's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the WBG's ability to help achieve development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the WBG's overall effectiveness or perceptions of the WBG's ability to help achieve development results.

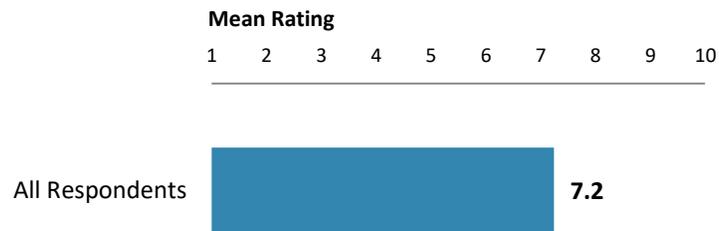

- Overall Effectiveness: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's overall effectiveness in Vietnam. The areas determined to be key drivers from these analyses were:
 - The WBG's effectiveness at public sector governance/reform;
 - The WBG's effectiveness at energy; and
 - The WBG's effectiveness at climate change.

- Achieving Development Results: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's ability to help achieve development results in Vietnam, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's ability to help achieve development results. The area determined to be key driver from these analyses was:
 - The WBG's effectiveness at climate change;
 - The WBG's effectiveness at natural resource management; and
 - The WBG's effectiveness at urban development.

Appendix E: Responses to Selected Questions by Year¹⁸

All data presented in this appendix are weighted. As a result, means of the FY 2017 data and the total number of respondents indicated will be slightly different from the aggregated responses in Appendix A. Similarly, responses from FY 2014 respondents and the total number of respondents indicated may differ from those reported in the FY 2014 COS report.

FY 2014 Number of comparable respondents = 480 • FY 2017 Number of comparable respondents = 605

By weighting, the FY 2014 data is weighted against the FY 2017 data by using the question about stakeholders 'current position (H1), so that the two samples have the same stakeholder composition and thus are comparable. The office of the president, prime minister, office of minister, the National Assembly, the judiciary branch are not included in the year comparison analysis, because some of the groups have only one respondent, or they are represented in only one year. Please note that the "other" group was not included in the comparison. The "national government" in the FY14 is re-named as "employee of a ministry" for comparing with the corresponding group in FY17. The weighted stakeholder breakdown is presented below:

Percentage of Respondents	FY 2017	FY 2014
Employee of a Ministry	16.0%	16.0%
PMU/ Contractor	38.7%	38.7%
Local Government	10.7%	10.7%
