Aim and use of the survey

The aims of the Victims of Crime Survey is to:

- Provide information about the dynamics of crime from the perspective of households and the victims of crime.
- Explore public perceptions of the activities of the police, prosecutors, courts and correctional services in the prevention of crime and victimisation.
- Provide complimentary data on the level of crime within South Africa (SA) in addition to the statistics published annually by the South African Police Service (SAPS).

The survey is conducted annually in all nine provinces and the data will be used for the development of policies and strategies, as well as crime prevention and public education programmes.

The survey design

A representative national sample of approximately 30 000 Dwelling Units (DUs) has been drawn from the 3 080 Primary Sampling Units (PSUs) that form the current master sample. The master sample is based on the 2001 Population Census Enumeration Areas (EAs) and approximately 1 - 15 dwelling units have been randomly sampled from each PSU and all the households residing within these sampled dwelling units will be enumerated.

Write figures very carefully

Close the zeros (0) so that they will not be mistaken for the sixes (6).

When there is more than one zero (0), as for instance in the value 1 000, do not connect the zeros on top, which is very common. Don't write the figures sideways or diagonally. Never use decimal points (or decimal commas).

Your figures should be written like this:

1	2	3	4	5
6	7	8	9	0

Your crosses should not touch the sides:

FLAP This section covers particulars of each person in the household

The following information must be obtained for every person who is considered to be a member of the household.

Only add persons who had stayed here for at least four nights on average per week for the last four weeks. **Do not forget babies.**

If there are more than 10 persons in the household, use a second questionnaire.
