INDEKS_ARL : Coefficient for inflating the annual income in respect with year 2017

<u>DATA TYPE: ESTIMATE VARIABLES</u>	
Format :	Numeric, 5 digits
Reference period :	Current
Unit :	Individual
Coverage :	All members in the household
Method :	Through calculation

VALUES:
0..9,999

Explanation:

- Since a period of “last 12 months” is taken as the reference period of annual incomes, it defers for each month’s households during 2017. Annual incomes are inflated with consumer price index to be restated as 2016 income due to the survey methodology in terms of moving reference period during 2017.
