### Additional information

2.1 Data does not match the questionnaire beginning question 8. This is likely due to having the wrong questionnaire. The questionnaire was attempted to be located but all attempts failed. Data was not dropped in case questionnaire was located. If it is not located, it is recommended not to use this data.

2.2 Value label mismatches: Data was imported from an excel file. This caused there to be neither variable names nor labels to be attached. In cleaning the data, I had to name the variables.
