Questionnaire:

The WVS questionnaire was translated from the English questionnaire. It was used a Spanish questionnaire translated from Mexico. There have not been any country-specific questions included in the survey. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample.

Sample:

Sampling There were different stages in the sampling procedure: Modified probabilistic sample, random in the first and second stage, by age and sex quota on the last stage. Sample is drawn from units of 2.000 inhabitants from selected cities. It has 29 cities from Arica to Puerto Montt. First stage: Random selection of sample units of selected cities. One sample unit is selected for a group of 10 interviews or fraction. Second stage: Selection of household within sample unit, according to random selection along a route, same procedure for all sample units. Approximately two households are needed to have a valid interview (50% refusal rate). Third Stage: Interviewee is selected by quota sample of age and sex controlled by passive sector and students. Quota is built on Census data and its projection. Substitution was permitted. In the third stage if selected person in household was not

found at the third time, interviewer must select another household and interviewee. .
