United Kingdom	58

Version Notes, ESS9 Appendix A1 Education

ESS9 edition 1.1 (published 30.01.20):

Section 3.1 corrected, explanation for 2nd and 3rd digit added.

The measurement of educational attainment in the ESS

1. Background

In October 2009, the ESS convened a Quality Enhancement Meeting (QEM) on Comparative and Harmonised Measurement of Educational Qualification in the ESS. International experts in the area of comparative education research met with key members of the ESS Core Scientific Team (CST) in order to develop recommendations with regard to improvements of the measurement of educational attainment.

Based on recommendations from this QEM, the Core Scientific Team (CST) subsequently decided to introduce new target harmonised educational attainment measures for respondent, partner, father and mother, as well as new procedures for bridging of country specific variables into these measures as of ESS Round 5 (ESS5 - 2010). As the new target measures have become more detailed, new instruments have been developed for all participating countries.

2. The new educational attainment measures in the ESS

Dr. Silke Schneider, GESIS - Leibniz Institute for the Social Sciences, Germany, who is an expert on international education classification, has acted as an expert consultant for the ESS centrally, as well as for the national teams, in the construction and implementation of the new educational attainment measures in the ESS Round 5. For following rounds new instruments have been developed for countries that did not participate in Round 5 using the same procedure.

Prior to ESS Round 6 a process of reviewing the data from round 5 was completed, which resulted in changes in the instrument and/or bridging for some countries. Further, prior to each round all countries go through a consultation process between the national teams, Silke Schneider and CST where any suggested changes are discussed and decided upon in cooperation.

The harmonised measures introduced in ESS5 attempt to accommodate for future changes in the ISCED standard and have thus been modelled along the developments of the 2011 revision of ISCED as it was documented in May 2010. Since official ISCED 2011 mappings were not yet available at the time, ISCED 97 mappings were used as a starting point. While Eurostat has published official ISCED 2011 mappings for EU and EFTA countries in 2015, this happened after finalizing the education instruments. Therefore, there may be discrepancies between the official ISCED 2011 and ESS data. Deviations from ISCED 97 are however documented in the country specific reports item 2.2.3 as in previous ESS rounds.

As of round 5 the following two cross-national harmonised target variables have been constructed:

1) EDULVLB.

From Round 5, a more detailed ISCED variable with 26 codes (EDULVLB) replaces the 7 category variable (EDULVL) that has been used in previous ESS rounds. However, not all the 26 codes apply in all countries. The EDULVLB variable contains a 3-digit hierarchical coding framework, which allows for the derivation of purpose built educational measures/variables

As in previous rounds, this variable is generated from country specific variables. These country specific measures have consequently changed to meet the more detailed requirements of the new harmonised target variable EDULVLB. As a result of the new approach, bridging specifications have been produced for all participating countries.

2) EISCED. The European Survey version of ISCED (EISCED) is a 7 category harmonised variable constructed on the basis of the detailed EDULVLB. The aim is to replace the EDULVL variable used in previous rounds, by a variable of better analytical value (EISCED).

3. New harmonised variables for educational attainment

3.1 Highest level of education, EDULVLB

Code	Label
0	Not completed ISCED level 1
113	ISCED 1, completed primary education
129	Vocational ISCED 2C < 2 years, no access ISCED 3
212	General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational
213	General ISCED 2A, access ISCED 3A general/all 3
221	Vocational ISCED 2C >= 2 years, no access ISCED 3
222	Vocational ISCED 2A/2B, access ISCED 3 vocational
223	Vocational ISCED 2, access ISCED 3 general/all
229	Vocational ISCED 3C < 2 years, no access ISCED 5
311	General ISCED 3 >=2 years, no access ISCED 5 *
312	General ISCED 3A/3B, access ISCED 5B/lower tier 5A
313	General ISCED 3A, access upper tier ISCED 5A/all 5
321	Vocational ISCED 3C >= 2 years, no access ISCED 5
322	Vocational ISCED 3A/3B, access 5B/lower tier 5A
323	Vocational ISCED 3A, access upper tier ISCED 5A/all 5
412	General ISCED 4A/4B, access ISCED 5B/lower tier 5A
413	General ISCED 4A, access upper tier ISCED 5A/all 5
421	ISCED 4 programmes without access ISCED 5
422	Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
423	Vocational ISCED 4A, access upper tier ISCED 5A/all 5
510	ISCED 5A short, intermediate/academic/general tertiary below
520	ISCED 5B short, advanced vocational qualifications
610	ISCED 5A medium, bachelor/equivalent from lower tier tertiary
620	ISCED 5A medium, bachelor/equivalent from upper/single tier
710	ISCED 5A long, master/equivalent from lower tier tertiary
720	ISCED 5A long, master/equivalent from upper/single tier tertiary
800	ISCED 6, doctoral degree
5555	Other

* This code does not exist in ISCED.

Digit 1:

The first digit of the code represents the 8 ISCED11 levels:

- 0.Less than primary
- 1.Primary
- 2.Lower secondary
- 3.Upper secondary
- 4.Post-secondary non tertiary
- 5.Short-cycle tertiary
- 6.Bachelor or equivalent
- 7.Master or equivalent
- 8.Doctoral or equivalent

The second and third digit distinguishes educational programmes within levels, according to a set of complementary dimensions as specified below:

Digit 2:

The second digit reflects programme orientation (1: general and 2: vocational) at ISCED levels 2 to 5 programmes (programmes below the degree level).

A similar kind of differentiation is more difficult to achieve within higher education above level 5. EDULVLB thus contains an additional distinction: in countries with a binary or diversified system of higher education with different tertiary education institutions providing more selective academic or research oriented programmes on the one hand and less selective vocational or application oriented programmes

on the other, code 1 on the second digit is used to denote vocationally oriented or applied programmes and degrees/qualifications ('lower tier'), and code 2 to denote academically oriented degrees/qualifications ('upper tier'). In countries with a unified system of higher education, all programmes are coded 2 on the second digit ('single tier'); code 1 is irrelevant in those countries.

Digit 3:

The third digit reflects combinations of the complementary dimensions 'programme destination' and 'programme duration' at ISCED levels 2 to 4.

1. Qualifications from educational programmes that do not give access to a higher ISCED level, but are sufficiently long to be considered as completion of this level (terminal programmes).
2. Qualifications from educational programmes that give access to vocational (technical/applied/lower tier) programmes at a higher ISCED level, but not to general (academic/upper tier) programmes (e.g. pre-vocational programmes).
3. Qualifications from educational programmes that give access to general (academic/upper tier) or all, i.e. vocational and general or single tier programmes at a higher ISCED level (academically oriented or comprehensive programmes).
9. Qualifications from short educational programmes classified at the next higher level that are however too short for the resulting qualification to be considered as completion of that level (i.e. enrolment in the programme is counted at the next higher level, but completion of the programme is not considered as completion of that level). For example, a qualification from a vocational one-year programme following completion of ISCED level 2 is not advanced enough to be considered as completion of ISCED level 3 and thus classified at ISCED level 2, despite the fact that it requires completion of ISCED level 2 for entry.

At levels 1 and 5 - 8 (ISCED 1997 levels 1, 5 and 6), the third digit is not used or has no variation.

3.2 Highest level of education, EISCED

(European survey version of ISCED, ES-ISCED)

0	Not possible to harmonise into ES-ISCED
1	ES-ISCED I, less than lower secondary
2	ES-ISCED II, lower secondary
3	ES-ISCED IIIb, lower tier upper secondary
4	ES-ISCED IIIa, upper tier upper secondary
5	ES-ISCED IV, advanced vocational, sub-degree
6	ES-ISCED V1, lower tertiary education, BA level
7	ES-ISCED V2, higher tertiary education, >= MA level
55	Other

Conceptual clarifications related to EISCED:

ES-ISCED builds on the concepts and mappings of country-specific to international categories provided by ISCED but incorporates the differentiation of types of educational programmes or certificates within levels of education. In order to derive this information, ES-ISCED uses the complementary dimensions provided by ISCED, namely 'programme orientation', 'programme destination', 'programme duration' and 'order in the national degree and qualification structure'. In turn, ES-ISCED suppresses distinctions that are less relevant for European countries today, e.g. the levels 'less than primary education' and 'primary completed, but less than secondary education' are merged since both are very small in European countries today, where compulsory education usually lasts until the completion of ISCED level 2 (lower secondary education).

4. Construction of EISCED on the basis of EDULVLB

EDULVLB	EISCED
	0 Not possible to harmonise into ES-ISCED
0 Not completed ISCED level 1	1 ES-ISCED I, less than lower secondary
113 ISCED 1, completed primary education	
129 Vocational ISCED 2C < 2 years, no access ISCED 3	
212 General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational	2 ES-ISCED II, lower secondary
213 General ISCED 2A, access ISCED 3A general/all 3	
221 Vocational ISCED 2C >= 2 years, no access ISCED 3	
222 Vocational ISCED 2A/2B, access ISCED 3 vocational	
223 Vocational ISCED 2, access ISCED 3 general/all	
	229 Vocational ISCED 3C < 2 years, no access ISCED 5
311 General ISCED 3 >=2 years, no access ISCED 5 *	3 ES-ISCED IIIb, lower tier upper secondary
312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A	
313 General ISCED 3A, access upper tier ISCED 5A/all 5	
321 Vocational ISCED 3C >= 2 years, no access ISCED 5	
322 Vocational ISCED 3A/3B, access 5B/lower tier 5A	
323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5	4 ES-ISCED IIIa, upper tier upper secondary
412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A	5 ES-ISCED IV, advanced vocational, sub-degree
413 General ISCED 4A, access upper tier ISCED 5A/all 5	
421 ISCED 4 programmes without access ISCED 5	
422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A	
423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5	
510 ISCED 5A short, intermediate/academic/general tertiary below	
520 ISCED 5B short, advanced vocational qualifications	6 ES-ISCED V1, lower tertiary education, BA level
610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary	
620 ISCED 5A medium, bachelor/equivalent from upper/single tier	
710 ISCED 5A long, master/equivalent from lower tier tertiary	7 ES-ISCED V2, higher tertiary education, >= MA level
720 ISCED 5A long, master/equivalent from upper/single tier tertiary	
800 ISCED 6, doctoral degree	
5555 Other	55 Other

5. Terminology

Programme orientation:

The complementary dimension programme orientation distinguishes between vocational and general education in secondary education:

Vocational education is defined as educational programmes that are designed for learners to acquire the knowledge, skills and competencies specific for a particular occupation or trade or class of occupations or trades. Such programmes may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications which are acknowledged as occupationally oriented by the relevant national authorities and/or the labour market.

General education is defined as educational programmes that are designed to develop learners' general knowledge, skills and competencies and literacy and numeracy skills, often to prepare participants for more advanced educational programmes at the same or a higher ISCED level and to lay the foundation for lifelong learning. These programmes are typically school- or college-based. General education includes educational programmes that are designed to prepare participants for entry into vocational educational programmes but do not prepare for employment in a particular occupation or trade or class of occupations or trades, nor lead directly to a labour market relevant qualification.

Lower tier and upper/single tier:

The ESS specific complementary dimension lower tier and upper/single tier distinguishes tertiary education programmes above level 5 as follows:

Lower tier: Lower tier institutions of higher education (in countries with a binary or diversified system of higher education) are often called polytechnics, 'universities of applied science' or 'higher education colleges'. They provide tertiary education in vocational, applied and semi-professional fields. Programmes are thus vocationally, application and practice oriented. Typical fields of study are engineering, social work or management. The aim is to enable graduates to enter high-skill technical and service occupations. The providing institutions

typically do not have full university status, i.e. cannot grant doctorates.

Upper tier: Upper tier institutions of higher education (in countries with a binary or diversified system of higher education) are traditionally research or technical universities. They provide tertiary education in academic and professional fields. Programmes are usually theoretically oriented and designed to lead participants to comprehensive conceptual, theoretical and methodological knowledge and a high level of understanding in one specific subject or field, or a group of subjects or fields. They conclude with either an academic degree or an equivalent professional qualification. The aim is to enable graduates to conduct research in the respective field or group of fields (e.g. humanities, natural, social and engineering sciences) or become professionals (e.g. medicine, law). For the latter, an additional practical training period may be required for obtaining the final qualification.

Single tier: Countries with a unified system of higher education offer all types of higher education in one institutional setting - a 'single tier'.

Programme destination:

The complementary dimension programme destination distinguishes educational programmes at ISCED level 2 – 4:

A: Educational programmes giving access to non-terminal (typically general) programmes at a higher level of education.

B: Educational programmes giving access to terminal (typically vocational) programmes at a higher level of education and do not ultimately lead to a Doctoral degree or equivalent.

C: Educational programmes not giving access to a higher level of education.

Program duration:

Complementary dimension 'programme duration' (ISCED levels 2 and 3) in the ESS:

short: shorter than 2 years

long: 2 years or longer

Complementary dimension 'programme duration' (ISCED level 5 - 7) in the ESS:

short: 2 years of study

medium: 3-4 years of study

long: >4 years of study

1. Educational system

Short description of educational system:	<p>Mandatory education starts at the age of six years and last for nine years. Since 2009, the attendance of a pre-primary institution (Kindergarten) is mandatory in the year before mandatory education starts.</p> <p>The main programme in primary education is the Primary school (ISCED 1), in lower secondary education the General secondary school and the New secondary school (which will replace the General secondary school until 2018/19), and the lower cycle of the General academic school (Unterstufe an Gymnasien, ISCED 2). The last year of mandatory schooling can be completed in the one-year pre-vocational school (Polytechnical School) at grade 9, which belongs to lower secondary education (ISCED 3C). This programme is designed to bridge General secondary schools and Apprenticeship training (ISCED 3B), which starts at grade 10 after compulsory schooling and is still the most important programme of upper secondary education for males. Education at ISCED-levels 1 and 2 is supplemented by schools for special education needs students.</p> <p>However, most students switch to other upper secondary programmes immediately after grade 8, also a good part of those who plan to start an apprenticeship programme. Normally, the latter begin a secondary technical or vocational school (ISCED 3B) at grade 9 and switch to apprenticeship training after one year (resulting in a dropout in the secondary technical or vocational school). Secondary technical schools usually have a duration of four years, and secondary vocational schools usually have a duration of three years.</p> <p>Colleges for higher vocational education start after grade 8 and cover 5 years (grades 9 - 13, ISCED 3A, grade 13 and diploma coded as ISCED 4A). They impart a higher-level general and vocational education which qualifies students to exercise a higher-level occupation in the fields of engineering, trade, arts and crafts, commerce, domestic science and others, and at the same time lead to university-entrance qualifications. The education culminates in a matriculation and diploma examination.</p> <p>Most students of the lower cycle of the general academic school switch to the upper cycle (Oberstufe an Gymnasien, ISCED 3A) after grade 8. The upper cycle covers four years (grades 9 to 12) and imparts a comprehensive and in-depth general education, and lead to university entrance qualifications. The education culminates in a matriculation examination.</p> <p>Kollegs are post-secondary VET courses for holders of a higher education entrance qualification. They provide theoretical, subject-related knowledge and practical skills and competence equivalent to colleges for higher vocational education in 4 to 6 semesters of vocational training and lead to a final diploma examination.</p> <p>The tertiary sector is mainly made up of (public) universities, university colleges of teacher education and universities of applied sciences. Universities are state-maintained higher-education institutions at the highest academic or artistic level which run bachelor's, master's, diploma and doctoral programmes. Universities of applied sciences are university-level higher education institutions that have been authorised by the Agency for Quality Assurance and Accreditation Austria to run bachelor's, master's and diploma programmes as well as continuing education courses. University colleges of teacher education are tertiary education establishments for initial, in-service and continuing teacher training in each federal province. Private universities which have been authorised by the Accreditation Council to run higher-education study programmes play a minor role.</p> <p>The major ongoing reform is the implementation of the new secondary school (NMS), which is designed as a comprehensive school for the 10 to 14-year-olds and was introduced in the 2008/09 school year. The plan is that all general secondary schools will be replaced by the NMS until 2018/19. All lower cycles of academic secondary school (AHS) are invited to join, however they are reluctant to do so. Thus, from a current point of view, the NMS will not be a comprehensive school for 10 to 14-year-olds because AHS will remain in parallel at the lower secondary level, attended by approx. one third of the 10 to 14-year olds.</p> <p>In 2014 The federal government has decided to extend mandatory education until 18 years (Ausbildungspflicht bis 18), beginning in July 2017. Young people are then obliged to continue schooling or start an apprenticeship training programme after nine years of schooling.</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>The doctorate as a tertiary degree has been abandoned in most studies in past decades (prior to the implementation of the Bologna cycles), with the exemption of physicians (human and veterinary) who still attain a doctorate as a first degree.</p> <p>Diploma degrees has been abandoned with the implementation of the Bologna system, again with the exemption of medicine.</p> <p>The former Academies of teacher education has been upgraded to University colleges of teacher education. Thus the Academies of teacher training ceased to exist in 2007. Some observations in our sample might have attended the predecessor of the Academies of teacher training, which used to be the Colleges of teacher education until the 1970ies.</p>
Description of how qualifications from abroad have been coded into EDULVLB	<p>People who attained a qualification abroad were asked to assign the national qualification that corresponds best to their own qualification.</p>

2. Education variables

2.1 Country specific education variables

Respondent: Question number(s), Country specific variable name(s)	F15 EDLVDAT
Partner: Question number(s), Country specific variable name(s)	F44 EDLVPDAT
Father: Question number(s), Country specific variable name(s)	F52 EDLVFDAT

Mother: Question number(s), Country specific variable name(s)	F56 EDLVMDAT
---	--------------

2.2.1 Country specific variables for the construction of EDULVLB

Question number and variable name:	F15 EDLV DAT
Categories and category labels	01. Kein Abschluss
	02. Volksschulabschluss
	03. Abschluss der Hauptschule, Neuen Mittelschule oder Volksschuloberstufe (8. Schulstufe)
	04. Abschluss der Polytechnischen Schule bzw.einer einjährigen mittleren Schule (9. Schulstufe)
	05. Abschluss der AHS-Unterstufe (8. Schulstufe an einem Gymnasium)
	06. Lehrabschluss
	07. Abschluss einer Berufsbildenden mittleren Schule (min. 2-jährig, z.B. Handelsschule, Fachschule)
	08. AHS-Matura (Gymnasium, inkl. Sonderform oder Studienberechtigungsprüfung)
	09. Diplom in Gesundheits- und Krankenpflege oder im medizinisch-technischen Fachdienst
	10. BHS-Matura (HAK, HTL, HLW, BAKIP, inkl. Sonderformen und Berufsreifeprüfung)
	11. Kolleg-Diplom, Meister-Prüfung (Werkmeister, Bauhandwerker), Abschluss eines Universitätslehrgangs
	12. Diplom an pädagogischer Akademie, medizinischer Akademie, Sozialakademie
	13. Bachelor/Bakkalaureat an einer Fachhochschule oder pädagogischen Hochschule
	14. Bachelor/Bakkalaureat an einer Universität
	15. Diplomstudienabschluss/Master an einer Fachhochschule
	16. Diplomstudienabschluss/Master an einer Universität (inkl. Doktorat als Erstabschluss)
	17. Postgraduale Universitätslehrgänge (aufbauend auf Diplomstudienabschluss, z.B. MBA)
	18. Abschluss mit Doktorat (aufbauend auf Diplomstudienabschluss: Dr., PhD)
	19. Andere (Ausfüllen)

2.2.2 Construction of EDULVLB on the basis of country specific variables specified in section 2.1	
Country specific categories	EDULVLB
F15 (EDLVEAT) = 1	0 Not completed ISCED level 1
F15 (EDLVEAT) = 2	113 ISCED 1, completed primary education
	129 Vocational ISCED 2C < 2 years, no access ISCED 3
F15 (EDLVEAT) = 3, 4	212 General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational
F15 (EDLVEAT) = 5	213 General ISCED 2A, access ISCED 3A general/all 3
	221 Vocational ISCED 2C >= 2 years, no access ISCED 3
	222 Vocational ISCED 2A/2B, access ISCED 3 vocational
	223 Vocational ISCED 2, access to ISCED 3 general/all
	229 Vocational ISCED 3C < 2 years, no access ISCED 5
	311 General ISCED 3 >=2 years, no access ISCED 5
	312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A
F15 (EDLVEAT) = 8	313 General ISCED 3A, access upper tier ISCED 5A/all 5
	321 Vocational ISCED 3C >= 2 years, no access ISCED 5
F15 (EDLVEAT) = 6, 7	322 Vocational ISCED 3A/3B, access 5B/lower tier 5A
	323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5
	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
	413 General ISCED 4A, access upper tier ISCED 5A/all 5
	421 ISCED 4 programmes without access ISCED 5
F15 (EDLVEAT) = 9	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
F15 (EDLVEAT) = 10	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
	510 ISCED 5A short, intermediate/academic/general tertiary below
F15 (EDLVEAT) = 11	520 ISCED 5B short, advanced vocational qualifications
F15 (EDLVEAT) = 12, 13	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
F15 (EDLVEAT) = 14	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
F15 (EDLVEAT) = 15	710 ISCED 5A long, master/equivalent from lower tier tertiary
F15 (EDLVEAT) = 16, 17	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
F15 (EDLVEAT) = 18	800 ISCED 6, doctoral degree
F15 (EDLVEAT) = 19	5555 Other
Applies to:	Respondent (EDULVLB), partner (EDULVLPB), father (EDULVLFB) and mother (EDULVLMB)

2.2.3 Intended deviations from the official ISCED mapping
212: F15 (EDLVEAT) = 4 is classified as ISCED 3c in official ISCED97 mappings. However, because of its short duration and compulsory character, it is classified as ISCED 2A (code 212) in EDULVLB in ESS. (This is in line with the official ISCED11 mappings).
423: "Berufsreifeprüfung", contained in F15 (EDLVEAT) = 10, is classified at ISCED level 4 in ISCED 2011, while it was classified at ISCED level 3 and 4 in ISCED 1997, and regarded as ISCED 3 in the ESS. From ESS round 7, it is regarded as ISCED level 4.
610: F15 (EDLVEAT) = 12 is classified as ISCED 5B in official ISCED97 mappings. However, because these programmes take three years, require 3A for entry and are in the process of being transformed to Bachelor level programmes, it is classified as ISCED 5A medium, lower tier (code 610) in EDULVLB in ESS.

3. National education expert	
Name of national education expert	Stefan Vogtenhuber
Institutional affiliation	Institute for Advanced Studies

Belgium

1. Educational system

Short description of educational system:	<p>In Belgium there are three stages of education that are the same in the Flemish and French communities:</p> <ol style="list-style-type: none"> 1. Basic education (Dutch: basisonderwijs; French: enseignement fondamental), consisting of <ul style="list-style-type: none"> - pre-school (kleuteronderwijs; enseignement maternel): 2.5 - 6 years (not mandatory but customary) - primary school (lager onderwijs; enseignement primaire): 6 - 12 years 2. Secondary education (secundair onderwijs; enseignement secondaire): 12 - 18 years. Secondary education consists of three cycles of two years. Pupils have more choice in what they study as they enter a higher cycle. <ul style="list-style-type: none"> - phase 1 (observation) provides a broad general basis; most pupils follow the A-stream and choose from a limited number of options (e.g. Latin, exact sciences, trade), pupils who experienced difficulty in basic education follow the B-stream. - phase 2 (orientation) offers four possible streams: general secondary education, technical secondary education, vocational secondary education, and art secondary education. A fairly large number of programs are offered. - phase 3 (determination) offers the same four possible streams. A diploma secondary education is obtained if the sixth year of general, technical or art secondary education, or the seventh year of vocational secondary education, is successfully completed. 3. Higher education (hoger onderwijs; enseignement supérieur). Students can choose between university (universiteit; université) and polytechnic/vocational higher education (hogeschool; haute école).
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<ul style="list-style-type: none"> - In the past secondary education was divided into two cycles of three years. Today secondary education is divided into three cycles of two years. What is now called "Getuigschrift van de eerste graad secundair onderwijs" (after two years of secondary education) corresponds to the old "Diploma van het lager algemeen secundair onderwijs", "Lager beroepsonderwijs", "Lager technisch onderwijs". Similarly, what is now called "Diploma van het hoger algemeen secundair onderwijs" corresponds to the old "Diploma van het secundair onderwijs (ASO)"; what is now called "Diploma van het hoger secundair beroepsonderwijs" corresponds to the old "Studiegetuigschrift van secundair onderwijs (na 6e jaar BSO)"; what is now called "Diploma van het hoger secundair technisch (of kunst) onderwijs" corresponds to the old "Diploma van het secundair onderwijs (TSO of KSO)". - The higher education programmes from before the bachelor-master structure were compared to the programs in new structure and brought together in the categories 610, 620, 710 and 720.
Description of how qualifications from abroad have been coded into EDULVLB	<p>With the bachelor-master structure many qualifications in higher education from abroad can be interpreted and coded straightforwardly. If the respondent and interviewer are unable to categorize the qualification from the respondent into the list, the 'other' option can be selected. Here the interviewer has the opportunity to write down in detail which education level the respondent completed. The verbatim answers are post-coded using the available list of qualifications.</p>

	18. Doctoraat; post-doctoraat / Doctorat avec thèse

2.2.2 Construction of EDULVLB on the basis of country specific variables specified in section 2.1	
Country specific categories	EDULVLB
F15 (EDLVEBE) = 1	0 Not completed ISCED level 1
F15 (EDLVEBE) = 2	113 ISCED 1, completed primary education
	129 Vocational ISCED 2C < 2 years, no access ISCED 3
	212 General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational
F15 (EDLVEBE) = 4	213 General ISCED 2A, access ISCED 3A general/all 3
	221 Vocational ISCED 2C >= 2 years, no access ISCED 3
F15 (EDLVEBE) = 3	222 Vocational ISCED 2A/2B, access ISCED 3 vocational
	223 Vocational ISCED 2, access to ISCED 3 general/all
	229 Vocational ISCED 3C < 2 years, no access ISCED 5
	311 General ISCED 3 >=2 years, no access ISCED 5
	312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A
F15 (EDLVEBE) = 9	313 General ISCED 3A, access upper tier ISCED 5A/all 5
F15 (EDLVEBE) = 5	321 Vocational ISCED 3C >= 2 years, no access ISCED 5
	322 Vocational ISCED 3A/3B, access 5B/lower tier 5A
F15 (EDLVEBE) = 8	323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5
	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
F15 (EDLVEBE) = 10	413 General ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLVEBE) = 6	421 ISCED 4 programmes without access ISCED 5
	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
F15 (EDLVEBE) = 7	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLDBE) = 11	510 ISCED 5A short, intermediate/academic/general tertiary below
	520 ISCED 5B short, advanced vocational qualifications
F15 (EDLVEBE) = 12	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
F15 (EDLVEBE) = 13	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
F15 (EDLVEBE) = 14, 15	710 ISCED 5A long, master/equivalent from lower tier tertiary
F15 (EDLVEBE) = 16, 17	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
F15 (EDLVEBE) = 18	800 ISCED 6, doctoral degree
	5555 Other

2.2.3 Intended deviations from the official ISCED mapping
323: F15 (EDLDBE) = 8, technical and artistic education is classified as ISCED 3A general in official ISCED mappings. Because it prepares for specific occupations, it is classified as ISCED 3A vocational (code 323) in EDULVLB in ESS instead of ISCED 3A general (code 313).
610: F15 (EDLDBE)= 12 is classified as ISCED 5B in official ISCED mappings. However, because it takes 3 years to complete, just like other programmes in 610 and 620, it is classified as ISCED 5A medium (code 610) in EDULVLB in ESS instead of ISCED 5B (code 520).

1. Educational system	
Short description of educational system:	<p>Early Childhood Education:</p> <p>Kindergartens are institutions within the pre-school and school education system for raising, education, and socialization of children from age of 3 up to the age of 7 (entering first class) in line with the state pre-school education standard. Children aged 2 can also enter kindergarten in line with the conditions and rules of the Law on Pre-School and School Education.</p> <p>School Education:</p> <p>School education is mandatory from age of 7 on or from age of 6 according to parents' assessment to age of 16. It provides for education and up-bringing of students according to their individual needs and in line with the requirements and expectations for a successful realization in civic society.</p> <p>The school is an institution in the system of pre-school and school education, which train, educate and socialize students and provide the conditions for the completion of grade and stage and / or to acquire education. As specified in the Law on pre-school and school education cases, the school provides conditions for acquisition of a vocational qualification.</p> <p>Schools may provide compulsory preschool education of children in the terms and conditions of state educational standards for pre-school education and state educational standard for physical environment and information and library provision of kindergartens, schools and centers of support for personal development.</p> <p>Schools are state, municipal, private or religious. According to the type of training schools are non-specialized and specialized.</p> <p>According stage or level of education non-specialized schools are:</p> <ol style="list-style-type: none"> 1. primary (I - IV class inclusive); 2. main (I - VII class inclusive); 3. schools (VIII - XII class inclusive); 4. united (I - X including class); 5. secondary (I - XII class inclusive). <p>Higher Education:</p> <p>The Republic of Bulgaria is also among the first countries which signed in 1999 in Bologna the Joint Declaration for European Higher Education Area.</p> <p>The higher education governance is performed at state and institutional level. The state is responsible for the development and the implementation of a long-term national policy and establishment of conditions, which guarantee the academic autonomy of higher education institutions, the quality of education, and the provision of adequate conditions for performing scientific research.</p> <p>The institutional management is performed according to the rights for an academic autonomy of the higher education institutions, but the state assists for development of modern institutional governance through distribution of resources on a competitive basis. Bulgaria works actively towards building up of a favorable environment for modernization of higher education, in line with the needs of the society and of the business. Good practices are studied and multiplied. Possibilities for introduction of new models, which are related to application of modern approaches for institutional governance leading to better financial management, are studied.</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>The educational categories in questionnaire have been designed to cover simultaneously new and old educational programmes in the most popular and understandable way from respondents.</p> <p>Category 7: "Professional-technical school" is outdated type of schools (programmes);</p> <p>Category 8: "Техникум" is outdated type of schools (programmes);</p> <p>Category 11: "a specialist in or semi-higher" is outdated type and name of programme.</p>
Description of how qualifications from abroad have been coded into EDULVLB	<p>According to the national legislation for all qualifications from abroad are set out different specialized procedures for a national recognition. Thus, those qualifications have been coded to the corresponding ones of the national recognized level of education (qualification).</p>

Cyprus

1. Educational system

Short description of educational system:	In the Republic of Cyprus, the educational attendance in public primary and secondary public schools is free for all students. The official language of instruction in all secondary public schools is Greek. In private schools the language of instruction is English. It is mandatory that all children from the age of 5 ½ -6 attend the first grade of Primary School. The 'compulsory educational' system also requires students to attend schools until the age of 15. After the completion of primary school all students proceed to public Secondary school which is another six educational years (3 years of lower secondary and another 3 years of upper secondary education). The transition from primary to the secondary public schools depends primarily on the school certificate obtained from the primary schools or on the entrance exam for private schools. The ministry of education determines the compulsory curriculum that students must follow during the course of their studies in the lower secondary school and the 1st year of the upper secondary education. In the second year of students' attendance in the upper secondary school, students have the opportunity to select courses of their interest along with the few mandatory courses given. Tertiary education in Cyprus is provided by colleges and Universities. There is high attendance to higher education both in Cyprus and universities abroad. Around 80% of secondary school leavers proceed to some form of tertiary education.
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	na
Description of how qualifications from abroad have been coded into EDULVLB	Most qualifications obtain from abroad are from Greece which has a similar education system with Cyprus

Czechia

1. Educational system

Short description of educational system:	<p>Primary or first stage of basic education consists in first five grades of elementary school. Average age of children is from 6 to 10 years.</p> <p>Then follows lower secondary or second stage of basic education - 6. to 9. grade of elementary school. Average age of children is from 11 to 15 years. These first nine years are mandatory.</p> <p>Upper secondary education offers following possibilities:</p> <ul style="list-style-type: none"> • Apprenticeship – two to three years of study some area of craft, ends by a report on a vocational certificate stating professional capability. Graduates usually do not continue in the classical education system and go to work in the selected branch. Average age 15-17. • Lower secondary without graduation – one to two years of technical or skilled study. Student gets a report on a final exam. Average age 15-17. • Apprenticeship with graduation – four-years study of some area of craft, student at the end passes the exams and gets a Secondary School Leaving Certificate. A leaving examination consists of several smaller exams - an exam of the Czech language and other exams according to study specialization and also the student's choice. By getting this certificate student is competent to apply for entrance tests for universities. Average age 15-19. • Upper secondary with graduation – four years of study technical or skilled subjects, ends with a Secondary School Leaving Certificate. Average age 15-19. • Grammar school with graduation – within the eight-year, six-year or four-year grammar schools pupils can complete elementary education and continue straight to the general secondary education, ending with Secondary School Leaving Certificate. Students from Grammar schools are most likely to continue to the tertiary educational level. Average age 11-19, 13-19 or 15-19. <p>Post secondary, non-tertiary upper education – three-year study of specialized areas, includes compulsory working experiences. Study is finished by a certificate, a specific exam on selected subjects, a practical exam and the defense of a graduate examination paper. Students are awarded the title of certified specialist (the abbreviation DiS. is added after a name). Average age 19-22.</p> <p>Higher education:</p> <ul style="list-style-type: none"> • First stage of tertiary – bachelor education – three-year study, student gets an elementary knowledge of highly specialized areas. Students complete it by a leaving exam including the defense of a bachelor's thesis. Average age 19-22. • Second stage of tertiary – master education – operates either as five-year (or six-year) study, or as two-year programs following bachelor's studies. The program culminates with students taking required state leaving exams of subject of highly specialized areas and defending their diploma thesis. Average age 19-24, 19-25 or 22-24. • Tertiary – post-gradual education – at least two years study, conditioned with working on the science projects, publication work and sometimes also by training university students.

1. Educational system

Short description of educational system:	<p>Compulsory secondary education was replaced by compulsory nine-year basic education (Grades 1 – 9) following the Law on Education in 1992. Estonian general education is divided into basic education (Estonian: põhiharidus) (Grades 1-9) and general secondary education (Estonian: üldkeskharidus) (Grades 10-12).</p> <p>The secondary education is not compulsory in Estonia. It is divided into general (Estonian: üldkeskharidus or gümnaasiumiharidus) and vocational secondary education (Estonian: kutsekeskharidus). General secondary education is determined by the national curriculum (Põhikooli ja gümnaasiumi riiklik õppekava, 2002; Gümnaasiumi riiklik õppekava, 2010, 2011, 2014), whereas vocational secondary education is determined by the vocational education standard (Kutseharidusstandard, 2006; 2013) and the national vocational curricula for certain professions. There are two main options after completing basic school: a general secondary school (Estonian: gümnaasium) or a vocational education institution (Estonian: kutseõppeasutus).</p> <p>Since the mid-1990s vocational education in Estonia has gone through extensive reforms. The framework of the desired developments and goals was determined in the Government regulations "The Conceptual Framework of Vocational Education" (Estonian: Kutsehariduse kontseptuaalsed lähtekohad, 1998) and "Action Plan for Development of Vocational Education System 2001-2004" (Estonian: Tegevuskava kutseharidussüsteemi arendamiseks Eestis aastatel 2001-2004, 2001). The main goal was to increase the attractiveness of vocational education among basic school graduates as well as to improve the quality of vocational education and to better respond to the labour market demands.</p> <p>The general access requirement for higher education studies is the Certificate of General Secondary Education (Estonian: gümnaasiumi lõputunnistus; until 1995, keskkooli lõputunnistus) or a corresponding qualification. The Certificate of General Secondary Education is awarded after 12 years of study, including 9 years of basic education and 3 years of general secondary education. In the 1988/1989 school year, the transition from 8-year to 9-year basic school, as well as from 11-year to 12-year secondary school took place at schools where the language of instruction was Estonian. Accordingly, the first graduates, who have completed the 12-year secondary education programme, finished school in 1998. Since 1997 the Certificate of General Secondary Education has been issued together with the State Examination Certificate (Estonian: riigieksamitunnistus). Effective 2009, the State Examination Certificate is not issued in paper format but the certificate is available in electronic format through the official state portal eesti.ee. Since 2003 graduation, the Certificate of General Secondary Education and the transcript of grades (Estonian: hinneteleht) are issued as two separate credentials. General secondary education can also be obtained at a vocational secondary school (Estonian: kutseõppeasutus) where it is combined with vocational education. Those who have finished basic school and completed a programme leading to vocational secondary education are awarded Certificate of Vocational Secondary Education (Estonian: Kutsekeskhariduse lõputunnistus). Studies for obtaining vocational secondary education on the basis of basic education last a minimum of three years and include general secondary education courses).</p> <p>Higher education is primarily regulated by Universities Act (Estonian: Ülikooliseadus, 1995), Institutions of Professional Higher Education Act (Estonian: Rakenduskõrgkooli seadus, 1998), Private Schools Act (Estonian: Erakooliseadus, 1998), and Standard of Higher Education (Estonian: Kõrgharidusstandard, 1996; 2002; 2008). The purpose of the Universities Act is to provide the procedure for the establishment, termination of the activities of universities, the bases for the activities, principles of management of universities, the forms of and conditions for acquiring higher education, the legal status of the assets of universities, the procedure for financing universities, the basic rights and obligations of students, and state supervision over the activities of universities.</p> <p>Institutions of Professional Higher Education Act lays down the grounds for the establishment of state institutions of professional higher education, the principles of management of such institutions, the conditions for acquiring higher education, the grounds for the organisation of studies, the basic rights and obligations of students, and the grounds for the budget, financing and state supervision of institutions of professional higher education. Finland

1. Educational system

Short description of educational system:	<p>The Finnish education system is composed of:</p> <p>(1) Nine-year basic education (comprehensive school) for the whole age group, preceded by one year of voluntary pre-primary education.</p> <p>(2) Upper secondary education, comprising general as well as vocational education and training (vocational qualifications and further and specialist qualifications). (3) Higher education, provided by universities and universities of applied sciences.</p> <p>In Finland, pre-primary education, basic education and upper secondary education and training, complemented by early childhood education and before- and after-school activities, form a coherent educational track that supports children's growth, development and well-being. The Finnish education system has no dead-ends. Students always have the option to continue their studies on an upper level of education, whatever choices between vocational and academically oriented educational tracks they have made previously. The practice of recognition of prior learning is widely used in order to avoid unnecessary overlapping of studies. Both general and vocational upper secondary certificates provide eligibility for higher education.</p> <p>Finland follows a dual system of higher education is offered by universities and universities of applied sciences. Universities emphasise scientific research and instruction where as the UAS sector is more vocationally oriented. Both tracks offer degree programmes at master's level, but the UAS Master's degree programmes require a minimum 3 years of work experience between bachelor's and master's programmes.</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>8 Ammatillinen opistoasteen tutkinto (Vocational college education) = ISCED 5B short, advanced vocational qualifications comprises vocational college education with duration of 2 to 3 years after upper secondary education. Examples of vocational college qualifications include Technician Engineer (tekniikko in Finnish), Diploma in Business and Administration (merkonomi in Finnish) and Diploma in Nursing (sairaanhoitaja in Finnish).</p> <p>Vocational college level education has been replaced in 1997 mainly by bachelor or equivalent level UAS degree programmes depending on qualification.</p>
Description of how qualifications from abroad have been coded into EDULVLB	All education-related activities that lead to recognised diplomas or are officially regarded as part of the national education system are included, such as a primary education, high school diploma, a bachelor's degree, etc. If respondent has a qualification from abroad he/she is asked to indicate which level in Finnish national education system corresponds most closely with the level of this qualification.

France

1. Educational system

Short description of educational system:	The French educational system is structured by five main stages : 3 years of 'école maternelle' (pre-school) from 3 to 6; 5 years of 'école élémentaire' (primary school) from 6 to 10; 4 years of "collège" (secondary school) from 11 to 14; 3 years of "lycée" (highschool) from 15 to 18; and finally the university degrees. Vocational training is mainly at the level of CAP and BEP, during or after secondary school.
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	
Description of how qualifications from abroad have been coded into EDULVLB	Respondents with qualifications from abroad were asked to find an equivalent in the list of French equivalent. If unsure or unable to find it, they were invited to answer 'other'

	229 Vocational ISCED 3C < 2 years, no access ISCED 5
	311 General ISCED 3 >=2 years, no access ISCED 5
	312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A
F15 (EDLVDFR) = 10, 11	313 General ISCED 3A, access upper tier ISCED 5A/all 5
F15 (EDLVDFR) = 07, 08	321 Vocational ISCED 3C >= 2 years, no access ISCED 5
	322 Vocational ISCED 3A/3B, access 5B/lower tier 5A
F15 (EDLVDFR) = 09	323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5
	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
F15 (EDLVDFR) = 12	413 General ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLVDFR) = 13	421 ISCED 4 programmes without access ISCED 5
	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLVDFR) = 14	510 ISCED 5A short, intermediate/academic/general tertiary below
F15 (EDLVDFR) = 15, 16	520 ISCED 5B short, advanced vocational qualifications
F15 (EDLVDFR) = 17	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
F15 (EDLVDFR) = 18	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
F15 (EDLVDFR) = 19, 20	710 ISCED 5A long, master/equivalent from lower tier tertiary
F15 (EDLVDFR) = 21, 22, 23, 24, 25	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
F15 (EDLVDFR) = 26	800 ISCED 6, doctoral degree
F15 (EDLVDFR) = 5555	5555 Other
Applies to:	Respondent (EDULVLB), partner (EDULVLPB), father (EDULVLFB) and mother (EDULVLMB)

2.2.3 Intended deviations from the official ISCED mapping
321:F15 (EDLVDFR)=7 Some of these programmes have a duration of one year only. For the ESS it was decided to treat them all as long and classify them as ISCED 3C vocational long, code 321 in EDULVLB in ESS, instead of splitting this category across 229 and 321.
323: "Baccalauréat professionnelle", contained in F15 (EDLVDFR) = 9, is classified as ISCED 3B in the official ISCED mappings. Since this category gives access to university studies, it is probable that this category will be classified in a "successor" category of ISCED 3A vocational in ISCED 2011 (code 323), which is the code used in EDULVLB in ESS instead of ISCED 3B (code 322). "Brevet technician" is an outdated qualification and as such not covered by the official ISCED mappings.
421: "Brevet professionnel", contained in F15 (EDLVDFR) = 13, is classified as ISCED 3C long in official ISCED mappings. Since it requires completion of ISCED 3C, it is classified as ISCED level 4C, code 421 in EDULVLB in ESS, instead of ISCED 3C long (code 321).

Germany

1. Educational system	
Short description of educational system:	In Germany, there is 4 years of primary school (Grundschule). After 4 years children can decide between three types of secondary school depending on their grades: additional 5 years (Hauptschule) or additional 6 years (Realschule) or additional 8/9 years (Gymnasium). Exceptions (due to the federal system in Germany there are some differences in the school system depending on the respective federal state): Grundschule: Some states require 6 years of education; Hauptschule: Some states require 6 years of education; Gesamtschule: Some states offer the concept of a Gesamtschule (comprehensive school) in addition to the tripartite school system (no distinction between Hauptschule, Realschule and Gymnasium); Gymnasium: used to be 9-years in most German states but was replaced or supplemented by an eight-year alternative (reduction of one school year) between 2012 and 2015. Some states have returned to 9-years of Gymnasium.
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	"Polytechnische Oberschule" and "erweiterte Oberschule" existed in the former GDR, so these kinds of schools do not exist any longer. Due to the Bologna Reform Process degrees like "Magister" or "Diplom" also run out largely.
Description of how qualifications from abroad have been coded into EDULVLB	It depends on the respondents. If they coded themselves into a category, because they consider it equivalent to a German degree, they are coded in the German degree they chose. coding of verbatim "other" answers: Open answers were coded according to what seemed the true equivalent after investigation. In some cases, the number of schooling years in the same variable has been used, so that if somebody said "10 years of schooling in Italy", we coded it "Realschule", since this is 10 years in Germany. As far as possible, we have recoded open responses into national variables also for questions of vocational training and university degrees.

2. Education variables

2.2.2 Construction of EDULVLB on the basis of country specific variables specified in section 2.1	
Country specific categories	EDULVLB
EDUBDE1=0 and EDUADE3=0 and EDUADE2=0 (check showcars /questionnaire for country specific categories)	0 Not completed ISCED level 1
(EDUBDE1=1 and EDUADE3=0 and EDUADE2=0) or (EDUBDE1=2 and EDUADE3=0 and EDUADE2=0)	113 ISCED 1, completed primary education
	129 Vocational ISCED 2C < 2 years, no access ISCED 3
EDUBDE1=3 and EDUADE3=0 and EDUADE2=0	212 General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational
EDUBDE1=4 and EDUADE3=0 and EDUADE2=0	213 General ISCED 2A, access ISCED 3A general/all 3
	221 Vocational ISCED 2C >= 2 years, no access ISCED 3
	222 Vocational ISCED 2A/2B, access ISCED 3 vocational
	223 Vocational ISCED 2, access to ISCED 3 general/all
EDUBDE1<5 and EDUADE3=2 and EDUADE2=0	229 Vocational ISCED 3C < 2 years, no access ISCED 5
	311 General ISCED 3 >=2 years, no access ISCED 5
EDUBDE1=5 and EDUADE3=0 and EDUADE2=0	312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A
EDUBDE1=6 and EDUADE3=0 and EDUADE2=0	313 General ISCED 3A, access upper tier ISCED 5A/all 5
EDUBDE1<5 and EDUADE3=1 and EDUADE2=0) or (EDUBDE1<5 and EDUADE3=3 and EDUADE2=0) or (EDUBDE1<5 and EDUADE3=8 and EDUADE2=0)	321 Vocational ISCED 3C >= 2 years, no access ISCED 5
(EDUBDE1<5 and EDUADE3=6 and EDUADE2=0) or (EDUBDE1<5 and EDUADE3=7 and EDUADE2=0) or (EDUBDE1<5 and EDUADE3=4 and EDUADE2=0)	322 Vocational ISCED 3A/3B, access 5B/lower tier 5A
	323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5
	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
	413 General ISCED 4A, access upper tier ISCED 5A/all 5
	421 ISCED 4 programmes without access ISCED 5
(EDUBDE1<5 and EDUADE3=9 and EDUADE2=0) or (EDUBDE1=5 and range(EDUADE3,1,8) and (EDUADE2=0 or EDUADE2>10))	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
EDUBDE1=5 and range(EDUADE3,1,8) and (EDUADE2=0 or EDUADE2>10)	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
(EDUADE3=<9 or EDUADE3>10) and EDUADE2=1	510 ISCED 5A short, intermediate/academic/general tertiary below
(EDUADE3=5 and EDUADE2=0) or (EDUADE3=10 and (EDUADE2<2 or EDUADE2>10)) or (EDUADE2=2)	520 ISCED 5B short, advanced vocational qualifications
EDUADE2=3 or EDUADE2=5 or EDUADE3=11	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
EDUADE2=4	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
EDUADE2=6	710 ISCED 5A long, master/equivalent from lower tier tertiary
EDUADE2=8 or EDUADE2=7	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
EDUADE2=9	800 ISCED 6, doctoral degree
(F15=5555 and F15a=5555 and F15b=5555)	5555 Other
Applies to:	Respondent (EDULVLB), partner (EDULVLPB), father (EDULVLMB) and mother (EDULVLMB)
2.2.3 Intended deviations from the official ISCED mapping	
113: For Germany, code 113 in EDULVLB in ESS is coded differently than official ISCED mappings. ESS codes these to ISCED 1 (code 113) in EDULVLB instead of ISCED 2 (code 213) as getting access to ISCED 3 will be highly difficult with this qualification.	
229: For Germany, code 229 in EDULVLB in ESS is coded differently than official ISCED mappings. ESS codes these to ISCED 3C short (code 229) instead of ISCED 3B (code 322) as they do not give access to ISCED level 5B and are, in cumulative terms, too short for ISCED level 3 completion.	

321: For Germany, code 321 in EDULVLB more specifically for health sector programmes "Abschlusszeugnis für medizinische Assistenten, Krankenschwestern/ -pfleger (Schulen des Gesundheitswesens, 2+3 jährig)" has been coded to level 3 in ESS, but is in official ISCED mapping coded to level 5. Since only completion of ISCED level 2 is required for entry and duration is 3 years, they are classified in ISCED 3C long (code 321) in EUDLVLB in ESS instead of ISCED 5B (code 520).

For Germany, code 321 in EDULVLB in ESS contains some outdated programmes, "Anlernzeit" and "Teilfacharbeiter", that are not covered by the official ISCED mappings.

1. Educational system

Short description of educational system:	<p>According to a change of the education act in 2014 compulsory school age starts at the age of 5 with the last year of kinder garden and lasts till the age of 16. (earlier compulsory education age lasted till the age of 18). Another important reform in the education system was initiated in 2013/2014 in which the formerly decentralized schools system maintained by local authorities was centralized. As a result a huge central institution (KLIK) is the maintainer of all schools and the employer of all employees who work in education. According to researchers (but even governmental politicians) the reform has not resulted in the expected positive outcomes (increase of equity and decrease of costs) but became overbureaucratic and caused a lot of difficulties in the everyday work of schools and teachers. The centralization affected also the curricula: formerly schools and teachers were given a rather large scope and autonomy in their pedagogy and curricula, while the present system very rigidly rules the curriculum. In addition, the former free market for textbooks was ceased and now a very strictly controlled system of producing and distributing textbooks exists.</p> <p>Kindergarden starts at the age of 3 and all children from socially disadvantaged families are expected to attend. Kindergardens are public institutions with no fees for parents and free meal for socially disadvantaged children. The last year of kinder garden (school preparatory classes) are compulsory for all. Primary and lower secondary school is a single structure divided into 2 stages (lower stage from grade 1-4 and upper stage from grade 5-8). It starts at the age of 6 (under certain conditions at age 7) and lasts till the age of 14/15. There are three types of upper secondary academic tracks: the 4 year gymnasium starting at age of 14/15, the 6 year gymnasium (starting after grade 6 in school) and 8-year gymnasium (starting after grade 4 of primary school). 6 and 8 year gymnasia are extremely selective and enrol only the best performing students. All gymnasia lead to maturity exam. Upper secondary education has also a vocational track (szakközépiskola) lasting for 3 years, starting after grade 8 of regular school leading to vocational qualification, and a mixed vocational-academic track (szakgimnázium) leading to maturity exam as well as vocational qualification. Students who are not accepted to any upper secondary school after they graduated from regular school after grade 8 but are still in their compulsory education age (younger than 16) are directed to 2 year special educational programs called Híd (bridge).</p> <p>Higher education is divided between colleges and universities. College education generally lasts for 4 years, while university education lasts for 4 to 6 years depending on the course undertaken. Vocational curriculum usually last 2 years: they are opened to secondary vocational school's graduates, and eventually vocational school students (after 5 years of work in the desired field or after a two-year program leading to a "secondary school leaving certificate").[9] University PhD courses usually take 3 years to complete. Before students get their degree, they must pass an intermediate level language exam in the foreign language of their choice.</p> <p>Private education is not prevalent in Hungary, mostly a few international schools belong to this sector. The sector of semi-private education - meaning that parent make monthly contribution, while the school is also entitled by the state per/capita support - is growing intensively. Most typically schools offering alternative and innovative pedagogical approaches, such as Montessori, Waldorf etc. are maintained in such schemes. The sector of faith school is another intensively growing part of the Hungarian educational system. These schools are funded by the state at a higher per/capita funding from the state than public schools (!), and thus are better equipped with infrastructural and human resources. In the same time the system of catchment areas do not apply to them, and thus, they became the escape for middle class families from deteriorating public schools.</p>
Description of how qualifications from abroad have been coded into EDULVLB	none

1. Educational system

Short description of educational system:	<p>Education system: Formal education is compulsory from six years old to sixteen years old or until completion of three years of secondary-level education. In practice, however, the norm is to start school at age 4, and 99% of all children are in school by age 5.</p> <p>The education system is made up of primary, second, third-level and further education. About 90% complete the upper secondary education. All children are entitled to free primary and post-primary education.</p> <p>Children normally attend primary schools for 8 years from age 4 to 12. They transfer to a second level school of their choice and follow on the following three options:</p> <p>i) A 3 year programme of lower secondary education, for students generally aged 12-15, leading to the award of the Junior Certificate. (This is a national examination overseen by the State Examinations Commission.) With effect from 2017, the title of this award has been changed to a Junior Cycle Programme of Achievement, combining both school based and State examinations assessment;</p> <p>ii) An optional one year programme called the Transition Year – an estimated 68% follow this option), which forms part of upper secondary education. Those who do not follow this programme may move directly into (iii);</p> <p>iii) A two year Leaving Certificate programme culminating in a national Leaving Certificate examination operated by the State Examinations Commission. This marks the end of upper secondary education. Leaving Certificate students are generally aged 16 -18 years.</p> <p>Early school leavers may enter a 2 year Youthreach programme in the Further Education Sector.</p> <p>Following completion of the Leaving Certificate programme, the majority of students enter Higher Education (c 55%) or Further Education or Training (c 28%), following certificate, diploma and/or degree programmes of varying lengths.</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	Different terms are used to make reference to old equivalent qualifications, but the categories are based on current programmes and qualifications.
Description of how qualifications from abroad have been coded into EDULVLB	Respondents were provided with the levels of the National Framework Qualification and a brief description of each level.

Italy

1. Educational system

Short description of educational system:	<p>The Italian education system is organized in three main cycles:</p> <ul style="list-style-type: none"> • pre-primary school (scuola dell'infanzia) for children between 3 and 6 years of age; • first cycle of education lasting 8 years, made up of: <ul style="list-style-type: none"> - primary education (scuola primaria), lasting 5 years, for children between 6 and 11 years of age; - lower secondary school (scuola secondaria di I grado), lasting 3 years, for children between 11 and 14 years of age; • second cycle of education offering two different pathways: <ul style="list-style-type: none"> - State upper secondary school (scuola secondaria di II grado), lasting 5 years for students from 14 to 19 years of age. It is offered by licei, technical institutes and vocational institutes; - three and four-year vocational training courses (IFP). It is organised by the Regions; • higher education offered by universities, polytechnics included, institutes of the Higher Education in Art and Music system (Alta Formazione Artistica e Musicale, AFAM) and Higher Technical Institutes (Istituti Tecnici Superiori, ITS). <p>Education is compulsory for ten years between the ages of 6 and 16. This covers the whole of the first cycle of education, which lasts eight years (five years of primary school and three years of lower secondary school), and the first two years of the second cycle. After completion of the first cycle of education, the final two years of compulsory education (from 14 to 16 years of age) can be undertaken at a State upper secondary school (liceo, technical institute or vocational institute), or on a three- or four-year vocational education and training course which is within the jurisdiction of the Regions (Law 296 of 2006). Source: http://eurydice.indire.it/wp-content/uploads/2016/06/quaderno_eurydice_30_per_web.pdf</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>"Avviamento professionale" no longer exists. It was a vocational training programme to attend after primary education that was abolished in 1962 in favour of a unified system of the first level of secondary education.</p> <p>"Diploma universitario di 2-3 anni, Scuola diretta ai fini speciali, Scuola parauniversitaria" were short academic courses within tertiary education which no longer exist. There are not new entrants since 2005/2006.</p> <p>"Diploma di Accademia (Belle Arti, Nazionale di arte drammatica, Nazionale di Danza), Istituto Superiore Industrie Artistiche, Conservatorio di musica statale, Istituto Musicale Pareggiato (Vecchio ordinamento)" which were Higher Education in Art and Music system, no longer exist.</p>

	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
	413 General ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLVEIT) = 10	421 ISCED 4 programmes without access ISCED 5
	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
	510 ISCED 5A short, intermediate/academic/general tertiary below
F15 (EDLVEIT) = 11	520 ISCED 5B short, advanced vocational qualifications
	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
F15 (EDLVEIT) = 12, 13, 14, 15, 16	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
	710 ISCED 5A long, master/equivalent from lower tier tertiary
F15 (EDLVEIT) = 17, 18, 19, 20	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
F15 (EDLVEIT) = 21	800 ISCED 6, doctoral degree
F15 (EDLVEIT) = 5555	5555 Other
Applies to:	Respondent (EDULVLB), partner (EDULVLPB), father (EDULVLFB) and mother (EDULVLMB)

2.2.3 Intended deviations from the official ISCED mapping
610: F15 (EDLVDLT) = 12, Officially classified as 5B but since it takes 3-4 years, to improve comparability we decided to regard this as belonging to the Bachelor's level and classified it as ISCED 5A medium, corresponding to EDULVLB code 610.

Netherlands

1. Educational system

Short description of educational system:

Primary education in the Netherlands comprises general primary education, special primary education and (advanced) special education for children with learning and behavioural difficulties and children with learning disabilities. Primary education is intended for all children aged four to approximately twelve years. Children with learning difficulties can go to a special school for primary education. Special education may be the best option for children who need more support. Since August 2014 schools have a duty of care to offer all pupils an appropriate place. This is referred to as appropriate education.

There are around 700 secondary schools in the Netherlands, both publicly and privately run. Secondary education encompasses schools providing pre-university education (VWO; 6 years, age 12-18), senior general secondary education (HAVO; 5 years; age 12-17), pre-vocational secondary education (VMBO; 4 years, age 12-16) and Practical Training (PRO; age 12-18). All four types of secondary education are for children aged twelve and over and all begin with a period of basic secondary education. Secondary education paves the way for vocational or higher education. In the lower years of secondary school, pupils follow a broad curriculum. Pupils in the upper years of HAVO and VWO choose one of four subject combinations. Pupils in the upper years of VMBO-T choose one of four sectors, while those in other VMBO programmes choose one profile from a total of 10.

Secondary vocational education (MBO) prepares students for a wide range of occupations, from franchise manager to mechanic or nursing assistant. Demand for skilled workers is expected to increase sharply on the Dutch job market in the future.

Higher education comprises higher professional education (HBO) and university education (WO). These types of education are provided by HBO institutions ("hogescholen") and universities respectively. HBO institutions provide theoretical and practical training for occupations for which a higher vocational qualification is either required or useful. Graduates find employment in various fields, including middle and high-ranking jobs in trade and industry, social services, health care and the public sector. Universities combine academic research and teaching. University education focuses on training in academic disciplines, the independent pursuit of scholarship and the application of scholarly knowledge in the context of a profession and aims to improve understanding of the phenomena studied in the various disciplines and generate new knowledge. The higher education system aims to provide top-quality teaching and training at professional or academic level.

2. Education variables

2.1 Country specific education variables

Respondent: Question number(s), Country specific variable name(s)	F15 EDLVENL - Highest level of education, NL
Partner: Question number(s), Country specific variable name(s)	F44 EDLVPENL - Partner's highest level of education NL
Father: Question number(s), Country specific variable name(s)	F52 EDLVFENL - Father's highest level of education NL
Mother: Question number(s), Country specific variable name(s)	F56 EDLVMENL - Mother's highest level of education NL

2.2.1 Country specific variables for the construction of EDULVLB

2.2.2 Construction of EDULVLB on the basis of country specific variables specified in section 2.1	
Country specific categories	EDULVLB
1. Basisschool niet afgemaakt	0 Not completed ISCED level 1
2. Alleen basisschool afgemaakt	113 ISCED 1, completed primary education
	129 Vocational ISCED 2C < 2 years, no access ISCED 3
3. LBO, VBO, LEO, LTS ambachtsschool, huishoudschool, LHNO, VMBO (niveaus 1-3 basisberoepsgericht, kaderberoepsgericht, gemengd) afgemaakt	212 General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational
4. MULO, ULO, MAVO, VMBO (niveau 4; theoretische leerweg), HAVO jaar 3-4; VWO jaar 3-5 afgemaakt	213 General ISCED 2A, access ISCED 3A general/all 3
	221 Vocational ISCED 2C >= 2 years, no access ISCED 3
	222 Vocational ISCED 2A/2B, access ISCED 3 vocational
	223 Vocational ISCED 2, access to ISCED 3 general/all
5. MBO niveau 1 afgemaakt (duur <2 jaar)	229 Vocational ISCED 3C < 2 years, no access ISCED 5
	311 General ISCED 3 >=2 years, no access ISCED 5
6. HAVO, MMS, MSVM afgemaakt	312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A
7. VWO, HBS, atheneum, gymnasium afgemaakt	313 General ISCED 3A, access upper tier ISCED 5A/all 5
8. KMBO, leerlingwezen, MBO, MEAO, MTS afgemaakt (duur 2-3 jaar) 9. MBO niveau 2 en 3 afgemaakt (duur 2-3 jaar)	321 Vocational ISCED 3C >= 2 years, no access ISCED 5
10. MBO niveau 4 afgemaakt (duur 4 jaar)	322 Vocational ISCED 3A/3B, access 5B/lower tier 5A
	323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5
11. MBO-plus voor havisten	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
	413 General ISCED 4A, access upper tier ISCED 5A/all 5
	421 ISCED 4 programmes without access ISCED 5
	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
12. Propedeuse WO, OU-certificaat	510 ISCED 5A short, intermediate/academic/general tertiary below
13. Korte HBO-opleiding einddiploma (2 of 3 jaar)	520 ISCED 5B short, advanced vocational qualifications
14. Bachelor HBO, kweekschool, PABO, conservatorium, MO-akten afgemaakt	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
15. Bachelor universiteit afgemaakt	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
16. HBO: Master's degree, tweede fase opleidingen, Post HBO- opleidingen, pre-master onderwijs voor HBO	710 ISCED 5A long, master/equivalent from lower tier tertiary
17. WO/universiteit: Master's degree, tweede fase opleidingen, ingenieur, meester, doctorandus	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
18. Doctoraat / gepromoveerd	800 ISCED 6, doctoral degree
5555 (Anders)	5555 Other

2.2.3 Intended deviations from the official ISCED mapping

Norway

1. Educational system

Short description of educational system:	<p>Primary and lower secondary education: 7 years compulsory since 1989, from 1969 increased to 9 years, and in 1997 to 10 years.</p> <p>Upper secondary education and training: All young people between the ages of 16 and 19 have a right to upper secondary education and training leading either to admission to higher education, to vocational qualifications or to basic skills. Since 1976 Norway has had a unified upper secondary structure that coordinates general studies and vocational studies. The education and training normally takes three years, divided into three levels: Vg1, Vg2 and Vg3 (in a few cases four years with a Vg4). General studies take three years and lead to general university admissions certification. It is possible for pupils who have finished their vocational education at Vg1 and Vg2 to take Vg3 supplementary programme for general university admissions certification.</p> <p>Tertiary education: At present The Norwegian Ministry of Education and Research classifies all tertiary education as 'general/academic' and the distinction 'lower tier/upper tier' does not apply. However, the higher educational system consists of 10 universities and 11 university colleges. They share the same grade system: Bachelor (3 years), Master (5 years, and PhD (8 years), although the profile is somewhat different with the more focus on the Master and the PhD degrees in the universities and more on the Bachelor level in the university colleges. The universities also have the longer professional educations (such as physicians), while the university colleges have the shorter ones (such as education of nurses)</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>Before 1969, the compulsory education was 7 years of primary school, often supplemented by a 8th year (Framhaldsskole), and a voluntary lower secondary school (Realskole) which qualified for the upper secondary schools (Gymnas).</p> <p>Before 1976 Norway had separate vocational tracks with 1-2 years duration.</p> <p>At the tertiary level, the main grades were "cand. mag." (4 years) and "hovedfag" (6 years), now replaced by Bachelor degree (3 years), and Master degree (5-6 years).</p> <p>The university colleges also had separate degrees in addition, such as the "høgskolekandidat" (2 years).</p>
Description of how qualifications from abroad have been coded into EDULVLB	There were no written interviewer instruction on this, but the general advice is to use common sense and when in doubt, make a note so that the code could be evaluated centrally at Statistics Norway.

Poland

1. Educational system	
Short description of educational system:	<p>From 1950 to 2000, the school system in Poland consisted of 4 levels: primary, secondary, post-secondary, and tertiary. Primary schools ('podstawowa' in Polish; corresponding to ISCED level 2 in ISCED-2011 classification) lasted 8 years (7 before 1967). The paths for further education were divided into: (a) 2-3 year basic vocational schools ('zasadnicza zawodowa'; ISCED-2), which in most cases were a dead-end educational path; (b) 4-year full-term general secondary schools ('liceum ogólnokształcące'; ISCED-3); (c) 4- or 5-year secondary vocational schools ('technikum' or 'liceum zawodowe'; ISCED-3A). Secondary school graduates who received a maturity diploma could continue their education in 4- to 6-year single-cycle universities or colleges that, in most cases, lead to an MA/MSc degree (ISCED-7). Secondary school graduates both with and without a maturity diploma could also continue their education in 2-year postsecondary vocational schools ('policealna' or 'pomaturalna'; ISCED-4). The educational reform in 2000 introduced a 3-year intermediate level of schooling, called gymnasium ('gimnazjum'; ISCED-2), located between the previous primary and secondary levels. The reform shortened primary schools programmes to 6 years (ISCED-1), and the full-term secondary schools to 3 years (ISCED-3). This way, the age of secondary school completion remained unchanged. However, as a consequence of introducing gymnasiums in 2000, the age of completion of basic vocational school was extended by one year, so after the reform these schools were to be classified as ISCED-3. According to the Bologna process, tertiary education programmes were divided into two cycles: bachelor's (ISCED-6) and Master's (ISCED-7). However, this is a relatively new reform, so most of the ESS respondents had graduated from a single-cycle tertiary institution.</p> <p>The most recent school system reform in Poland started in 2017. Four elements of the reform are most important: (1) the three-year gymnasium was closed down; (2) the programmes of primary schools were extended from 6 to 8 years; (3) the upper secondary schools (liceum ogólnokształcące, technikum) were extended by one year; (4) the duration of education in basic vocational schools (their names were changed from 'zasadnicza' to 'branzowa') was left unchanged (3 years), so the age of graduation from these schools was moved down by one year.</p> <p>Although the 2017 reform has fundamentally changed the organization of the Polish school system, the necessary changes in survey questions on education basically boil down to small changes to the previous research tools. Most elements of the new organization of the school system are similar to the solutions before 1999, such as the 8-year primary school, which existed in the years 1967–1999.</p> <p>For a more detailed description of the current structure and changes of the Polish educational system, see the Eurydice website: https://eacea.ec.europa.eu/national-policies/eurydice/content/poland_en</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	No such programmes in ESS 9.
Description of how qualifications from abroad have been coded into EDULVLB	Very few respondents in ESS 9 received their education abroad. In such cases, we asked the respondents to classify their education into the most closely corresponding level of the Polish school system.

2. Education variables	
2.1 Country specific education variables	
Respondent: Question number(s), Country specific variable name(s)	F15 EDLVGPL
Partner: Question number(s), Country specific variable name(s)	F44 EDLVPGPL
Father: Question number(s), Country specific variable name(s)	F52 EDLVFGPL

	11. Świadectwo ukończenia szkoły policealnej lub pomaturalnej
	12. Dyplom ukończenia kolegium lub studium nauczycielskiego
	13. Licencjat lub dyplom inżyniera
	14. Tytuł magistra lub dyplom lekarza
	15. Doktorat
	5555. Other

2.2.2 Construction of EDULVLB on the basis of country specific variables specified in section 2.1	
Country specific categories	EDULVLB
F15 (EDLVGPL) = 01	0 Not completed ISCED level 1
F15 (EDLVGPL) = 02	113 ISCED 1, completed primary education
	129 Vocational ISCED 2C < 2 years, no access ISCED 3
	212 General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational
F15 (EDLVGPL) = 03, 04	213 General ISCED 2A, access ISCED 3A general/all 3
	221 Vocational ISCED 2C >= 2 years, no access ISCED 3
	222 Vocational ISCED 2A/2B, access ISCED 3 vocational
	223 Vocational ISCED 2, access to ISCED 3 general/all
F15 (EDLVGPL) = 05	229 Vocational ISCED 3C < 2 years, no access ISCED 5
F15 (EDLVGPL) = 07	311 General ISCED 3 >=2 years, no access ISCED 5
	312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A
F15 (EDLVGPL) = 08	313 General ISCED 3A, access upper tier ISCED 5A/all 5
F15 (EDLVGPL) = 06, 09	321 Vocational ISCED 3C >= 2 years, no access ISCED 5
	322 Vocational ISCED 3A/3B, access 5B/lower tier 5A
F15 (EDLVGPL) = 10	323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5
	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
	413 General ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLVGPL) = 11	421 ISCED 4 programmes without access ISCED 5
	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
	510 ISCED 5A short, intermediate/academic/general tertiary below
F15 (EDLVGPL) = 12	520 ISCED 5B short, advanced vocational qualifications
	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
F15 (EDLVGPL) = 13	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
	710 ISCED 5A long, master/equivalent from lower tier tertiary
F15 (EDLVGPL) = 14	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
F15 (EDLVGPL) = 15	800 ISCED 6, doctoral degree
F15 (EDLVGPL) = 16	5555 Other
Applies to:	Respondent (EDULVLB), partner (EDULVLPB), father (EDULVLFB) and mother (EDULVLMB)

2.2.3 Intended deviations from the official ISCED mapping
229: F15 (EDLVGPL) = 5 is classified in ISCED 3C short (229) in EDULVLB in ESS if left school before 2005, and in ISCED 3C long (321) if left school after 2004, due to educational reforms. Educational reforms are, however, not considered by ISCED mappings, and hence all are coded to ISCED 3C long in official mappings.
311: F15 (EDLVGPL) = 7 is in EDULVLB coded to ISCED 3C general long (code 311) instead of ISCED 3A general (code 313) as they do not end in matriculation certificate and do not give access to ISCED level 5, a combination not foreseen by ISCED 1997. This specific case is not covered in the ISCED mappings.
321: F15 (EDLVGPL) = 06, 09 is classified in code 321 in EDULVLB in ESS. Profiled schools like 'Liceum profilowane without matura' is classified as ISCED 3A general (code 313) in official ISCED mappings. Because it is more comparable to vocational programmes and without matura there is no access to ISCED 5, it is classified in ISCED 3C vocational (code 321) in EDULVLB in ESS instead of ISCED 3A general (code 313).
323: F15 (EDLVGPL) = 10 is classified in code 323 in EDULVLB in ESS. Profiled schools like 'Liceum profilowane with matura' is classified as ISCED 3A general (code 313) in official ISCED mappings. Because it is more comparable to vocational programmes, it is classified in ISCED 3A vocational (code 323) in EDULVLB in ESS.

Serbia

1. Educational system

Short description of educational system:	<p>The current Law on pre-school, primary and secondary education and Law on higher education have been passed in 2017. Mandatory education lasts 1+8 years (pre-school + elementary school education). Secondary education is not mandatory. Stages of education system in Serbia are:</p> <p>1. Early childhood education: education programmes for children under 3 years of age and pre-primary education / not compulsory</p> <p>- Pre-school education (in duration of one year /mandatory)</p> <p>2. Primary education:</p> <p>a. Initial primary education - the first stage of basic education (in duration of 4 years / mandatory - refers to ISCED level 1) and</p> <p>b. Formal education in the upper grades of elementary school (in duration of 4 years / mandatory - refers to ISCED level 2a). Primary education lasts 8 years.</p> <p>- Art education at primary level (in duration of 6- 8 years - ISCED level 2a)</p> <p>- Primary adult education (in duration of 4 years - ISCED level 2a)</p> <p>3. Secondary education:</p> <p>- Vocational training programmes for adult persons that enable access to labour market, and which do not lead to continuation of education (in duration of 1 year). In order to access this level person has to successfully complete level 2a - this programme refers to ISCED level 2b.</p> <p>- Vocational highschool (2 years completed) - refers to ISCED level 3b</p> <p>- Vocational highschool (3 years completed) - refers to ISCED level 3b</p> <p>- Vocational highschool - 4 years (including ballet or music schools) - refers to ISCED level 3b (gives access to level 4 or 5a)</p> <p>- Grammar school (general highschool education, 4 years) - refers to ISCED level 3a (preparing for level 5a)</p> <p>- Vocational specialization after finished 4 years of highschool (5th grade of highschool) - refers to ISCED level 4</p> <p>4. Tertiary education:</p> <p>4.a Undergraduate studies</p> <p>- Vocational tertiary certificate (2 -3 years duration, achieved vocational tertiary certificate below bachelor's level - refers to ISCED 4 level</p> <p>- Professional undergraduate studies (college degree after 3 or 4 years of study) - refers to ISCED level 5.1b</p> <p>4.b Graduate studies</p> <p>- Bachelors degree (3 or 4 years of academic studies) - refers to ISCED level 5.1a</p> <p>- Specialist vocational studies (in duration of 1 year, after finished bachelors studies) - refers to ISCED level 5.2b</p> <p>4.c Postgraduate studies</p> <p>- Master degree (in duration of 1-2 years after finished bachelors degree) - refers to ISCED level 5.2</p> <p>- Integrated bachelor and master programmes in total duration of 5 years - refers to ISCED level 5.2</p> <p>- Specialist academic studies (in duration of 1 year, after finished bachelors studies) - refers to ISCED level 5.2</p> <p>- Specialization (for medical students) - refers to ISCED level 5.2a</p> <p>- Doctoral degree (in duration of 3 years, after finished master studies) - refers to ISCED level 5.2</p> <p>Outdated programmes:</p> <p>- Vocational highschool (4 years)[present within the highschools reforms during the 1978-1988 period]</p> <p>- Certificate for finished 2-3 years of academic studies (below bachelor level - for the students that studied under the pre-Bologna programme)</p> <p>- Master degree (2 years of master studies - for the students studies under the pre-Bologna programme),</p> <p>- Medical studies (in duration of 6 years - pre-Bologna programme).</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>Vocational highschool reform from 1978-1988 period were colloquially called "Šuvarice" according to its creator Stipe Šuvar. The reform envisaged a system of secondary education that consisted of two-year general education and two-year vocational training within different professions. The reform abolished grammar schools, while all secondary schools turned into vocational schools.</p> <p>Prior to "Bologna reforms" of higher education (introduced in 2005), the system of higher education envisaged a system in which tertiary education consisted of the following stages: 1. bachelor's degree (in duration of 4 years; exceptions were technical faculties - machine engineering, electrotechnical engineering, construction engineering, technology and metallurgy, but also dentistry, pharmacy, veterinary medicine, where studies lasted 5 years, and medical studies that lasted 6 years); 2. master degree in duration of 2 years and 3. doctor studies in duration of 3 years. Technical faculties were giving certificates on finished 2-3 years of the 4 or 5 year studies, that were recognized at the labor market, but were not providing entrance to the masters or doctoral level.</p>

1. Educational system

Short description of educational system:

EDUCATION SYSTEM IN SLOVENIA

- Pre-school education
- Compulsory basic education
- Upper secondary education
- general upper secondary education
- vocational and technical upper-secondary education
- Tertiary education
- list of public and private institutions
- Adult education

Short summary of "National summary sheets on education systems in Europe and ongoing reforms"
(http://www.eurydice.si/images/stories/slovenski_izobrazevalni_sistem/National_System_Overview-July2010.pdf)

Pre-primary education: Pre-primary education (1-5 year) is an integral part of education system. Pre-primary provision integrates centre-based child care and early general pre-school education. The programmes are carried out by public and private pre-school institutions (vrtci), pre-school units attached to basic schools (vrtci pri osnovnih šolah) and private pre-school teachers at a childminder's (vzgojno-varstvene družine). The Ministry of Education and Sport is in charge of the formation of staff, programmes and aids to particular groups of children. The municipalities are the main founders, funders and direct providers of services. Attendance is optional. Children can be admitted from the age of 11 months until they enter compulsory education at the age of 6 (that is from 5 years and 8 months to 6 years and 8 months). The basis for the parental payment is the cost of the programme attended by the child, which must include the costs of education, child care and nutrition. Parents' payments are set by the local community according to the family income in comparison with the average salary in Slovenia. Parents pay 0 to 80 % of costs of preschool education, depending on the level of their income. In the case of more than one child attending preschool institution the law guarantees parents a lower price according to family income for the older children.

Compulsory education:

(i) Phases

Pupils aged 6 enter the 9-year compulsory school.

Osnovna šola (basic school or single structure of primary and lower secondary education) 9-year compulsory education

Prvo obdobje (First cycle 1-3) (ISCED level 1) Age 6-8

Drugo obdobje (Second cycle 4-6) (ISCED level 1) Age 9-11

Tretje obdobje (Third cycle 7-9) (ISCED level 2) Age 12-14

Compulsory basic education takes 9 years to complete.

(ii) Admission criteria

Compulsory education is free for all children whose sixth birthday occurs in the calendar year of entry into the first grade. Parents have a statutory duty and a right to choose a public or private school or they may educate their child in a home situation. The school located in the school district of the family residence is obligated to enrol their children, but parents are free to choose another basic school of their preference with the school's approval. If parents choose so, a child's readiness to start school may be assessed when the child enrolls into basic school: dependant on that assessment the commencement of schooling can be brought forward or postponed.

(iii) Length of school day/week/year

The school year comprises 175 to 190 days of teaching (depending on holidays) between 1 September and 31 August of the following year. The school year is divided into two assessment periods. Schools are open five days a week, and the minimum number of lessons (45 minutes) varies from 20 per week (1st grade) to 30 (9th grade) (or from 22 to 32 in bilingual and Italian-speaking schools; and in SEN – Special Education Needs – classes/schools) depending on the grade and the number of optional and extracurricular subjects taken. Pupils are allowed to take 5 days of additional holidays during the school year.

Post-compulsory education/upper secondary and post-secondary level:

(i) Types of education

Splošno srednje izobraževanje – Gimnazija (general upper secondary education) 15-18 years of age (four years)

Srednje tehniško in strokovno izobraževanje (technical upper secondary education) 15-18 years of age (four years)

Poklicno izobraževanje (short and medium length vocational upper secondary education) 15-17 years of age

Maturitetni tečaj (preparatory classes for the matura examination, classified as ISCED level 4) 19 or more (one year)

Poklicni tečaji (vocational courses, classified as ISCED level 4) 19-20 years of age (one year)

(ii) Admissions criteria

Upper secondary education is free and caters for young people between 15 and 19 years of age. Students may enrol in gimnazija, vocational or technical schools after they acquire basic school certificate. Subject grades from their basic school education are the most important criteria for enrolment, although schools may specify additional admission criteria (art talent tests, sports achievements). The transition from compulsory to upper secondary education is regulated at the national level through the national joint application system. Schools with a limited number of places (reputable gimnazije mainly) take into account the grades from compulsory subjects obtained in the last three years of compulsory education (grades 7, 8 and 9).

Higher education:

Tertiary education in Slovenia comprises higher vocational college education and higher academic and professional education.

Higher vocational education is provided by higher vocational colleges (višje strokovne šole) that

	<p>offer two-year vocational education (120 ECTS) at the sub-degree level (short-cycle, ISCED level 5B). Higher vocational colleges issue a diploma, stating the field of education, and a Diploma Supplement in the Slovene language and in one of the EU languages. Joint study programmes are also possible. The traditional higher education study programmes are offered by public or private universities and single higher education institutions (samostojni visokošolski zavodi).</p> <p>(i) Structure of higher education</p> <p>By the academic year 2010/11, all higher education institutions have introduced the three-cycle structure of three degrees: Bachelor, Master and Doctorate. Bachelor programmes can be academically or professionally oriented accredited by 180 or 240 ECTS. Typical cumulative length of a Bachelor + Master degree is 300 ECTS. Long programmes exist in medicine, veterinary medicine and dentistry (6 years); and in pharmacy, architecture, teacher education in mathematics and theology (5 years).</p>
Description of how qualifications from abroad have been coded into EDULVLB	No such case

Switzerland

1. Educational system

Short description of educational system:	<p>(see also http://www.sbf.admin.ch/index.html?lang=en and http://www.cdip.ch/dyn/16833.php)</p> <p>Switzerland provides various schools at different levels. Because responsibilities for educational services are located on the level of cantons names, programs, subjects, duration, starting age and numbers of students vary significantly. Therefore, an overall classification of Switzerland's education system is somewhat challenging. The general features of the Educational System are the following:</p> <p>Kindergarten is voluntary and free. Compulsory schooling, which lasts 9 years, begins with primary school (between the ages of 6 and 7) and ends with secondary level I. Again, since there are, in fact, 26 slightly different educational systems, the length of study at each level may vary slightly. In 2009, a harmonisation process of the compulsory schooling has begun (called HarmoS), turning among others Kindergarten (at age 4 and 5) into compulsory schooling and beginning the numbering of the classes at this level. However, in 2015 (date of the last report) only 15 Cantons out of 26 adopted this new system, and Cantons are free on how to implement the rules.</p> <p>Although a growing interchangeability of the elements of the educational program leading to a certain degree can be observed, the secondary level I of compulsory school is organized by separate schools or sections according to the division of education and professions at the further levels of education or in the world of work. Depending on their section during the last years at the secondary I level, students either choose to go on to a vocational training, to a vocational school, to diploma schools or secondary schools („Maturitätsschulen"). The latter allows entrance into the public university system. Besides attending university, other paths in higher education include attending advanced vocational training („Fachhochschule/ école technique supérieure") or a Teachers' Training Colleges. In the last decade, the status of many of the certificates of the vocational training education has been changed to the tertiary level and the admittance and the programs of these departments are still in a changing process. This is also true for the curricula and the programs of the secondary education level schools.</p> <p>An important part of the students chooses to start the career with an apprenticeship. The vocational training is completed by different types of schooling. Options range from one day per week to full time vocational school. To further develop the study part of this training, it is possible to start an academic career via shortened access to baccalaureate and university or via technical or vocational schools leading to a higher technical or vocational degree.</p> <p>Important historical changes: Vocational training is the most frequent post-compulsory education in Switzerland. More than two thirds of young people choose to begin a vocational training after their compulsory schooling. During the first half of the 1990ies, apprenticeships declined for general training schools. However, this trend was related to economical recession. In the second half of the 1990s, enrolment in general training school decreased, while apprenticeships met a new development. Since 2002, admissions in vocational training have been on the decrease, while those in school preparing for university or vocational baccalaureate have increased. More recently, the Bologna declaration has put in motion a series of reforms needed to make the Swiss educational system more compatible to European higher Education. The implementation of the new system has been launched in 2005, simultaneously to the revision of the High educational training's law. Since 1990, the population holding a tertiary degree has more than doubled (Swiss Federal Statistical Office, 2018 data: https://www.bfs.admin.ch/bfs/en/home/statistics/education-science.assetdetail.7886040.html).</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>8 H. Ecole normale, Etudes pédagogiques (niveau préscolaire et primaire) This education for Kindergarten and primary school teachers is outdated since in 2005 because of the creation of the HEP (a tertiary level education). As for this category, there are several other educations which recently moved or are now being moved from ISCED 5B (swiss code 15 O), such as "social work" and some health educations (infirmières, sage-femme, etc.). But not the whole category is concerned.</p> <p>19 S. Hautes écoles universitaires, demi-licence, certificat propédeutique Since the Bologna-reform (2005), this diploma is no longer attainable from Swiss Universities.</p>
Description of how qualifications from abroad have been coded into EDULVLB	If coding was not clear to interviewers, they coded string in the category "other". Where possible, recoding according to the national grid was done.

	413 General ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLVDCH) = 13	421 ISCED 4 programmes without access ISCED 5
F15 (EDLVDCH) = 10	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
F15 (EDLVDCH) = 7	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
F15 (EDLVDCH) = 19	510 ISCED 5A short, intermediate/academic/general tertiary below
F15 (EDLVDCH) = 14, 15, 16	520 ISCED 5B short, advanced vocational qualifications
F15 (EDLVDCH) = 17	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
F15 (EDLVDCH) = 20	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
F15 (EDLVDCH) = 18	710 ISCED 5A long, master/equivalent from lower tier tertiary
F15 (EDLVDCH) = 21, 22	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
F15 (EDLVDCH) = 23	800 ISCED 6, doctoral degree
F15 (EDLVDCH) = 5555	5555 Other
Applies to:	Respondent (EDULVLB), partner (EDULVLPB), father (EDULVLFB) and mother (EDULVLMB)

2.2.3 Intended deviations from the official ISCED mapping
229: F15 (EDLVDCH) = 11 is classified as ISCED 3C long in official ISCED mappings. Because this category contains programmes shorter than 2 years, it has been classified as ISCED 3C short (code 229) in EDULVLB in ESS instead of ISCED 3C long (code 321).
322: F15 (EDLVDCH) = 9 is classified as ISCED 3A general in the official ISCED mappings. Since it contains apprenticeship training and is thus occupationally specific, this category has been classified as ISCED 3A vocational (code 322) in EDULVLB in ESS (like "baccalauréat professionnel" in France) instead of ISCED 3A general (code 313).
323: F15 (EDLVDCH) = 8 is classified as ISCED 3A general in the official ISCED mappings. Since it prepares for specific occupations, this category has been classified as 3A vocational (code 323) in EDULVLB in ESS instead of ISCED 3A general (code 313).

United Kingdom

1. Educational system

Short description of educational system:	<p>The educational system differs between England/Wales, Scotland and Northern Ireland. Furthermore, it has also been reorganised a number of times over the period in which our respondents will have been of school age. We therefore aim at functional equivalence.</p> <p>Compulsory schooling starts at age 5 (4 in Northern Ireland) although the majority of children start aged 4. School leaving age is currently 16. It has been 14-15 in the past. In England & Wales, young people were required to remain in some form of education or training (which would include apprenticeships and traineeships) until aged 17 from 2013 and then 18 from 2015. In England, Wales and Northern Ireland, examinations currently known as GCSEs are taken at about age 16. However, these are not compulsory and some students leave school with no paper qualifications. This was particularly the case in the past. After GCSE level, students may go on to study AS-levels (usually taken at 16-17 after one year of study) and A2-levels (commonly known as A-levels, usually taken at 17-18 after 2 years of study). There are also a variety of vocational qualifications which are recognised as equivalent to GCSEs and A-levels (e.g. GNVQ, BTEC). A-levels or equivalent are required for entry into higher education.</p> <p>Scotland has a separate qualification framework to England, Wales and Northern Ireland. Students aged 15-16 may take the Scottish Certificate of Education (SCE) at Standard Grade level. At 17-18 students can take their Intermediates, Highers or Advance Highers. Highers are required for entry into higher education. As in the rest of the UK, there are a variety of vocational qualifications which are recognised as equivalent (e.g. GSVQ, SCOTVEC)</p>
Short description of any outdated programmes referred to in the categories in the of the country-specific education variables:	<p>O-level: taken at age 15-16, replaced by GCSEs in 1988, equivalent to GCSE grade A-C</p> <p>CSE: taken at age 15-16, replaced by GCSEs in 1988, equivalent to GCSE grades D and below.</p> <p>From 2017 a new grading system was introduced to GCSEs. The system goes from 1-9 with 9 being the highest. 1-3 is equivalent to the old D-G; 4 to 6 equivalent to B and C and 7-9 equivalent to the old A and A*. Maths and English switched to this system in 2017, 20 more subjects (most subjects) in 2018 and the remainder in 2019.</p> <p>School Certificate or Matriculation: equivalent of 5 O-level passes</p> <p>S-level: additional papers taken with an A-level for advanced A-level candidates</p>

2. Education variables

2.1 Country specific education variables

Respondent: Question number(s), Country specific variable name(s)	F15a - EDUGB1 F15b - EDUGB2 F15c - EDAGEGB
Partner: Question number(s), Country specific variable name(s)	F44a - EDUPGB1 F44b - EDUPGB2 F44c - EDAGEPGB
Father: Question number(s), Country specific variable name(s)	F52a - EDUFGB1 F52b - EDUFGB2 F52c - EDAGEFGB
Mother: Question number(s), Country specific variable name(s)	F56a - EDUMGB1 F56b - EDUMGB2 F56c - EDAGEMGB

2.2.1 Country specific variables for the construction of EDULVLB

Question number and variable name:	F15a EDUCGB1
Categories and category labels	<p>1. 2 or more A-levels, S-levels, A2-level; Scottish Highers, Scottish SCE/SLC/SUPE at Higher Grade; Scottish Higher School Certificate; Certificate of Sixth Year Studies/Advanced Higher Grade; Scottish Baccalaureate; Welsh Advanced Baccalaureate; Irish Leaving Certificate; International Baccalaureate</p> <p>2. GNVQ or GSVQ Intermediate</p> <p>3. Vocational GCSE; SCOTVEC/SQA National Courses, BTEC First/General Certificate, Technical Award</p> <p>4. 5 or more GCSEs A*-C or 4-9, CSE Grade 1, GCE O-level Grades A-C or 1-6, Scottish SCE Ordinary Bands A-C or pass, Scottish Standard Grades 1-3 or Pass; School Certificate or Matriculation; Scottish School Leaving certificate Lower Grade; SUPE Ordinary; Scottish Intermediate 1 grade A; Scottish Intermediate 2; Intermediate/National Welsh Baccalaureate; Irish Junior Certificate; 1 A-level or equivalent</p> <p>5. 1 to 4 GCSEs A*-C or 4-9; GCSE Grades D-G or 1-3; Short course GCSE; CSE Grades 2-5; GCE O-level Grades D-E or 7-9; Scottish (SCE) Ordinary Bands D-E; Scottish Standard Grades 4-7; Scottish School Leaving Certificate - no grade; Scottish Access 1-3; Scottish Intermediate 1 Below A grade; GNVQ or GSVQ Foundation level; Foundation Welsh Baccalaureate</p> <p>6. Skills for Life (including Basic Skills, Key Skills, Entry Level Certificates)</p> <p>7. None of these</p>
Question number and variable name:	F15b EDUGB2
Categories and category labels	1. Ph.D, D.Phil or equivalent

	2. Masters Degree, M.Phil, Post-Graduate Diplomas and Certificates
	3. 5 year University/CNAA first Degree (MB, BDS, BV etc)
	4. 3-4 year University/CNAA first Degree (BA, BSc., BEd., BEng. etc)
	5. Nursing certificate, Teacher training, HE Diploma, Edexcel/BTEC/BEC/TEC - Higher National Diploma (HND), OCR/RSA - Higher Diploma, City and Guilds - Level 4/Full Technological/Part IV, NVQ/SVQ Level 4 or 5 or equivalent
	6. Foundation Degree (FdA, FdSc etc)
	7. Edexcel/BTEC/BEC/TEC - Higher National Certificate (HNC) or equivalent; Certificate of Higher Education
	8. HE Access
	9. Vocational A-level (AVCE), GCE Applied A level, NVQ/SVQ Level 3, GNVQ/GSVQ Advanced, Edexcel/BTEC/BEC/TEC (General/Ordinary) National Certificate or Diploma (ONC/OND); City and Guilds Advanced (Level 3/Part III); Tech level
	10. (Modern) Apprenticeship, Advanced (Modern) Apprenticeship, SVQ/NVQ/Key Skills Level 1 and 2, City and Guilds Craft/Intermediate (Levels 1 to 2/Parts I - II), RSA/OCR Vocational or First Certificate/Diploma, Advanced Diploma, Edexcel/BTEC First/General Diploma; Technical Certificate; SCOTVEC/SQA National certificate modules
	11. None of these
Question number and variable name:	F15c EDAGEGB
Categories and category labels	0-94. Age when completed full time education
	95. Still at school
	96. Still at college or university

2.2.2 Construction of EDULVLB on the basis of country specific variables specified in section 2.1	
Country specific categories	EDULVLB
F15a=7 AND F15b=11 AND F15C<11	0 Not completed ISCED level 1
If{(F15A=7) AND (F15B=11) AND (F15C>=11 OR 95 OR 96 OR 8888)} OR {(F15A=6) AND (F15B=11)}	113 ISCED 1, completed primary education
	129 Vocational ISCED 2C < 2 years, no access ISCED 3
(F15A=5) AND (F15B=11)	212 General/pre-vocational ISCED 2A/2B, access ISCED 3 vocational
(F15A=4) AND (F15B=11)	213 General ISCED 2A, access ISCED 3A general/all 3
	221 Vocational ISCED 2C >= 2 years, no access ISCED 3
(F15A=3) AND (F15B=11)	222 Vocational ISCED 2A/2B, access ISCED 3 vocational
	223 Vocational ISCED 2, access to ISCED 3 general/all
(F15A=2) AND (F15B=11)	229 Vocational ISCED 3C < 2 years, no access ISCED 5
	311 General ISCED 3 >=2 years, no access ISCED 5
	312 General ISCED 3A/3B, access ISCED 5B/lower tier 5A
(F15A=1) AND (F15B=11)	313 General ISCED 3A, access upper tier ISCED 5A/all 5
If F15b=10	321 Vocational ISCED 3C >= 2 years, no access ISCED 5
	322 Vocational ISCED 3A/3B, access 5B/lower tier 5A
If F15b=9	323 Vocational ISCED 3A, access upper tier ISCED 5A/all 5
	412 General ISCED 4A/4B, access ISCED 5B/lower tier 5A
If F15b=8	413 General ISCED 4A, access upper tier ISCED 5A/all 5
	421 ISCED 4 programmes without access ISCED 5
	422 Vocational ISCED 4A/4B, access ISCED 5B/lower tier 5A
If F15b=7	423 Vocational ISCED 4A, access upper tier ISCED 5A/all 5
If F15b=6	510 ISCED 5A short, intermediate/academic/general tertiary below
If F15b=5	520 ISCED 5B short, advanced vocational qualifications
	610 ISCED 5A medium, bachelor/equivalent from lower tier tertiary
If F15b=4	620 ISCED 5A medium, bachelor/equivalent from upper/single tier
	710 ISCED 5A long, master/equivalent from lower tier tertiary
If (F15b=3 OR F15b=2)	720 ISCED 5A long, master/equivalent from upper/single tier tertiary
If F15b=1	800 ISCED 6, doctoral degree
If F15b=5555	5555 Other
Applies to:	Respondent (EDULVLB), partner (EDULVLPB), father (EDULVLMB) and mother (EDULVLMB)

2.2.3 Intended deviations from the official ISCED mapping
113: For the United Kingdom, code 113 in EDULVLB is coded differently than ISCED. In official data, individuals without educational qualifications who left school after age 14 are classified in ISCED 2A (code 213 in EDULVLB). In the ESS, these cases were classified as ISCED 1 (code 113) because they do not in fact have access to ISCED level 3.
212: For the United Kingdom, code 212 in EDULVLB is coded differently than ISCED. These programmes are classified as 3C short (code 229) in official ISCED mappings. Because they are more comparable to ISCED 2A prevocational programmes in other countries and do not fulfil ISCED criteria for classification in ISCED 3C, they are classified as ISCED 2A prevocational (code 212) in EDULVLB in ESS instead of ISCED 3C short (code 229).
213: For the United Kingdom, code 213 in EDULVLB is coded differently than ISCED. These programmes are classified as 3C long (code 321) in official ISCED mappings. Because they are more comparable to ISCED 2A general programmes in other countries and do not fulfil ISCED criteria for coding in ISCED 3C, they classify as ISCED 2A general (code 213) in EDULVLB in ESS instead of 3C long (code 321).
222: For the United Kingdom, code 222 in EDULVLB is coded differently than the ISCED official mappings as ISCED classifies these categories as ISCED level 3 whereas ISCED level 2 is used in EDULVLB in ESS.
229: For the United Kingdom, code 229 in EDULVLB is coded differently than the official ISCED mappings, as ISCED classifies these categories as ISCED level 3 whereas ISCED level 2 is used in EDULVLB in ESS.
423: For the United Kingdom, code 423 in EDULVLB is coded differently than official ISCED mappings. The mappings classify this category in ISCED level 5B (code 520). Because these programmes do not fulfil ISCED criteria for classification in ISCED 5B of 2 years duration, they are classified as ISCED 4A vocational (code 423) in EDULVLB in ESS instead of ISCED 5B (code 520)."
