AUSTRALIA 2005

Geographical scope:

Australia

Principal investigator(s):

Timothy Phillips and Deborah Mitchell. Centre for Social Research Research School of Social Sciences The Australian National University ACT 0200 Canberra, Australia Phone (6162) 6125-8510 E-mail: timothy.phillips@anu.edu.au Rachelle Graham Survey Manager (Fieldwork) Australian Social Science Data Archive 18 Balmain Crescent (Building #66) The Australian National University CANBERRA ACT 0200 Phone: +61 2 6125 3850 Fax: +61 2 6125 0627 Web: http://assda.anu.edu.au/ Email: Rachelle.Graham@anu.edu.au Antoine Bilodeau, The Australian National University Shaun Wilson, Macquarie University Rachel Gibson, The Australian National University Gabrielle Meagher, University of Sydney David Denemark, University of Western Australia Mark Western, University of Queensland

Data Collection Organization:

Australian Social Science Data Archive

Fieldwork Period:

14-09-2005 - 21-12-2005.

Universe:

Missing, Both sexes,18 and more years

Sample size:

1421

Questionnaire:

English questionnaire There are two versions of page 19, the difference being the inclusion of V170-v174 (Q53a-e). These versions were alternated in the fieldwork. Split ballot B contains v170-v174, split ballot A does not. V43 (Q8j) Optional: minority group relevant to country Aboriginal people V146 (Q44p) ASEAN was substituted for the European Union V239 (q93) All values above 30 were checked for correctness.

Sample:

The sample was stratified by Australian states and territories using population counts based on Australian Electoral Commission (AEC) statistics as at 29th July 2005. The selection of individuals within the stratified sample was random using the Electoral Roll for Australia produced by the AEC. This frame includes all registered voters who must be citizens of Australia (or a British subject on a Commonwealth electoral roll as at 25 January 1984). Since voting in Australia is compulsory, there is a very high proportion of the adult Australia population covered by this frameapproximately 92 percent in 2003. A systematic random sample from each state and territory list was drawn by taking

every nth name starting with a random start point of size proportional to the population of registered voters. The sampled units were named individuals.

Remarks about sampling:
Gross sample Using a sampling frame derived from the AEC Electoral Roll (2005) excludes permanent and temporary residents of Australia (who are not citizens) and any other adults in Australia who are non-citizens except for British subjects on a Commonwealth electoral roll as at 25 January 1984. These exclusions amount to approximately 8 percent of the adult population. Net sample The sample demographics were compared with statistics available from the Australian Bureau of Statistics (ABS) including the 2001 Census. The major biases are: age (median age is older than the Census population), education (over-representation of persons with post-secondary school qualifications), and gender (slight over-representation of women). Non-citizens of Australia were not included in the sample.

Survey procedure:
Self-compl,pap a pencil,mailed to,hold for pick up

Fieldwork:
Self-completion, paper and pencil, mailed to, mailed back by respondent

Response rate:
3500 A Total issued 227 B Not eligible (ill, dead, non-English speaking, not at this address) 3273 C Total eligible 1421 D Total questionnaires received 1852 E - non-responses (including non-contact; see note above under sample type) 183 F Refusals (including questionnaires less than half filled in) 1669 G Non-contact (included in E) 0 H Other non-response (included in E)

Remarks about non-response:
Too sick includes people with language problems No contact at selected address contains questionnaires that were returned marked Return To Sender Other includes the following: - Questionnaire filled in by someone other than he respondent (3 cases) - Partial unproductive interview (7 cases) - Respondent deceased (5 cases)

Weighting:
The weight variable, weight, is a post-stratification weight that reproduces the population distribution for educational attainment for adults aged between 20 and 64 years. The weight variable is the quotient of the relevant population marginal proportion divided by the relevant sample marginal proportion. Respondents outside the age range, or who were missing on age and/or education are assigned a weight of 1.0. The weighted sample distribution is identical to the population distribution for in-scope respondents. The resulting weight variable does not change the overall sample size. The reference for the population distribution is Table 10.36, Australian Bureau of Statistics 2004. Year Book Australia, 1301.0. Commonwealth of Australia: Canberra.

V151.- I'm going to describe various types of political systems and ask what you think about each as a way of governing this country. For each one, would you say it is a very good, fairly good, fairly bad or very bad way of governing this country? (Read out and code one answer for each): Having a democratic political system

Australia 2005(N=1421)

Here's a list of various types of political systems. For each one, would you say it is a very good, fairly good, fairly bad or very bad way of governing this country?
Having a democratic political system

	TOTAL	Sex			Age

V161.- Many things may be desirable, but not all of them are essential characteristics of democracy. Please tell me for each of the following things how essential you think it is as a characteristic of democracy. Use this scale where 1 means "not at all an essential characteristic of democracy" and 10 means it definitely is "an essential characteristic of democracy" (read out and code one answer for each): Women have the same rights as men.

Australia 2005(N=1421)

For each of the following things, how essential do you think it is as a characteristic of democracy. Use the scale below where 1 means "not an essential characteristic of democracy" and 10 means "an essential characteristic of democracy".
Women have the same rights as men.

	TOTAL	Sex			Age			
		Male	**Female**	**No answer**	**Up to 29**	**30-49**	**50 and up**	**No answer**
Not an essential characteristic of democracy	1.7	1.6	1.6	19.3	0.3	1.3	2.0	18.2
