BRAZIL 2006

Geographical scope:

Brazil

Principal investigator(s):

Henrique Carlos de O. de Castro Universidade de Brasília Brasilia Brazil E-mail: henrique@unb.br

Data Collection Organization:

Universidade de Brasilia

Fieldwork Period:

01-11-2006 - 26-12-2006.

Universe:

Missing, Both sexes, 18 and more years

Sample size:

1500

Questionnaire:

Difficulties in occupation coding (V242 e V250) occurred. The coding of these questions was made by the fieldwork coordination team, because the interviewer was oriented to write the name of declared occupation, not to code the answer. Examples of coding difficulties: 1) possibility of double coding cases like the electrician worker can be coded as semi-skilled manual worker (code 8) and also as never had a job (code 13), if it is an informal worker or if he doesn't work for a company or firm; 2) teachers in Brazil could be a middle level (technician) or a superior formation (college/university) person, and all were coded in the same category (code 3).

Sample:

1. 104 interviewers worked in 150 clusters (census sectors of IBGE, the Brazilian organ responsible by population statistics in our country), 28 rural and 122 urban, in 119 counties. 2. 19 sub-coordinators were responsible by regions around the country. 3. Interviewers followed instructions of Manual do Entrevistador (Interviewer Manual see annex, in Portuguese). 4. Seven clusters were substituted by similar ones, due to impossibility of accessing because: 1) in Amazonic region one county was accessible only by boat and in rare days (one case); 2) access roads with no conditions for traffic (two cases); 3) rich population in high criminality locations at big cities forbade interviewer entrance (four cases). 5. The substitutive clusters were randomly selected in the same county, maintaining the situation, urban or rural. 6. In some regions, mostly rural, a bigger concentration than expected of female population occurred, due to bigger literacy among women in Brazil.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

1. The field supervision was fixed to 20% of each interviewer work. However, the supervision reached 16% of questionnaires, in average. Most of it due to difficulties of accessing clusters or interviewed people. 2. One interviewers work was rejected because he didnt observe the inclusion criterion. It was remade in the same cluster. 3. A specific computer software was developed to enter the data. Four people were hired to do the data entering. An extensive checking was made to assure data quality, including logical criticism. In 10% of questionnaires the data entering was completely checked, and very few mistakes were found.

V153.- Many things may be desirable, but not all of them are essential characteristics of democracy. Please tell me for each of the following things how essential you think it is as a characteristic of democracy. Use this scale where 1 means “not at all an essential characteristic of democracy” and 10 means it definitely is “an essential characteristic of democracy” (read out and code one answer for each): Religious authorities interpret the laws.

Brazil 2006(N=1500)

Para a democracia muitas coisas são desejáveis, mas nem todas são consideradas fundamentais. Para cada uma das afirmativas, diga em que medida o(a) Sr(a) acha que são características fundamentais da democracia. Use esta escala, em que 1 significa que “não é uma característica fundamental da democracia” e 10, que “é uma característica fundamental da democracia”. (leia e assinale uma resposta para cada item)

Autoridades religiosas interpretam as leis.

Brazil 2006(N=1500)

Alguns acreditam que certos tipos de problemas deveriam estar sob a responsabilidade da ONU (Organização das Nações Unidas) ou de organizações regionais tais como União Européia, NAFTA ou MERCOSUL, ao invés de serem tratadas por cada governo nacional separadamente. Outros acreditam que esses problemas deveriam ser deixados sob a responsabilidade de seus respectivos governos. Eu vou falar alguns problemas. Para cada um, diga se o Sr(a) acredita que políticas nessas áreas devem ser decididas pelo governo nacional, organizações regionais ou pela ONU. (leia e assinale uma resposta para cada item)
