## ROMANIA 2005

Geographical scope:

Romania

Principal investigator(s):

Bogdan Boicu Visiting professor, CEPS/INSTEAD Luxembourg Senior researcher, Romanian Academy of Science, Research Institute for Quality of Life Associate professor, Department of Sociology, 'Lucian Blaga' University of Sibiu E-mail: [bogdan.voicu@ceps.lu](mailto:bogdan.voicu@ceps.lu) Website: <http://www.bogdanvoicu.ro>

Data Collection Organization:

Research Institute for the Quality of Life. Data collecting by The Gallup Organization Romania, with financial support from Soros Foundation

Fieldwork Period:

15-09-2005 - 15-10-2005.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1776

Estimated Error:

2,4

Questionnaire:

Romanian Questionnaire

Sample:

Stratified, multistage sample, with random selection on each stage, according to the standard sampling procedure (elaborated by Dumitru Sandu) usually employed by the Romanian social researchers. (The same sampling procedure as in the case of the 1999 wave). The stratification criteria are: a.the socio-cultural area (18 areas identified starting from their level of economic and human development and their administrative organization), and the size of the locality for towns (under 10000, 10-50000, 50-200000, and 200000+ inhabitants) [the respective 18 areas are geographically compact (each county within a certain area is contiguous with at least another one from the same area)] b.the level of socio-economic development, according to the aggregate index computed by D.Sandu (2004) for rural areas (the level of development is recoded in three categories: lower, average, higher).

#### Remarks about sampling:

1. the selection of the localities. Randomly selected from the 18\*7 resulting strata after crossing the two above criteria. The strata containing less than 7 cases are combined with the closer ones that come from the same socio-cultural area. 2. Determining the number of interviews for each locality: proportional with the distribution of the population in the 18\*7 strata obtained by combining the two criteria mentioned above). 2. the selection of the election sections (in each locality were interviewed people from 1, 2, 3, 4 or 5 election sections, randomly selected on the voting lists - the lists with the people of voting age from each locality are organized by sections. The selection of these sections is random) 3. determining the number of subjects to be interviewed from each voting section: proportionally with the size of the respective section as reported to the total size of the selected voting sections from the respective locality. 4. the selection of the subjects for each voting section, randomly from the voting lists for the respective section. The selected number of potential subjects is 50% higher than the targeted number of interviews to be carried out. The minimum number of call-backs is 3 (in at least 2 different days, at different hours). Non-citizens have a lower probability to be selected than their share in the Romanian population. However, the respective proportion is so low, that, considering the volume of the sample (2000), maximum one interview would be carried out with non-citizens.

#### Survey procedure:

Personal Face to Face Interview

#### Fieldwork:

September-October 2005

#### Response rate:

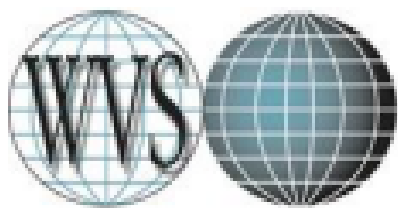

Total number of starting names/addresses 3729 addresses which could not be traced at all 182 addresses established as empty, demolished or containing no private dwellings 34 selected respondent too sick/incapacitated to participate 408 other type of unproductive (please write in full details in the box below) 1170 full productive interview 1776 selected respondent away during survey period 658\* no contact at selected address no contact with selected person refusal at selected address 445 proxy refusal (on behalf of selected respondent) personal refusal by selected respondent other type of unproductive (please write in full details in the box below) 67

#### Remarks about non-response:

Non-Romanian citizens. (there are very few, and the sampling procedure is not allowing their selection). \* the data collecting agency did not differentiate among those missing from home, which may be hospitalized, (international) circulatory migrant, left for studies - in another locality, in the army, etc. or simply not being at home in three different days at three different hours, when the interview operator tried to contact them \*\* disabled people or too drunk to be able to answer in three different days at three different hours

#### Weighting:

-The socio-cultural area (18 areas) -The size of the locality (4 type of towns, 2 types of villages)

Please tell me which comes closest to your view on this scale on which 1 means "everything in life is determined by fate," and 10 means that "people shape their fate themselves." (Code one number):

Romania 2005(N=1776)

Unii oameni cred că fiecare poate decide propria soartă, alții zic că destinul ne este hotărât de la bun început. Vă rugăm să ne spuneți ce credeți dvs., dând o notă de la 1 la 10, unde 1 înseamnă că „totul în viață e determinat de soartă”, iar 10 că „fiecare își hotărăște singur destinul”.

**V149.-** I'm going to describe various types of political systems and ask what you think about each as a way of governing this country. For each one, would you say it is a very good, fairly good, fairly bad or very bad way of governing this country? (Read out and code one answer for each): Having experts, not government, make decisions according to what they think is best for the country

Romania 2005(N=1776)

Cât de bine credeți că ar fi pentru România ...

Experții, nu guvernul, să ia deciziile, conform cu ce cred ei că e mai bine pentru țară

Romania 2005(N=1776)

Dați o notă de la 1 la 10 pentru măsura în care fiecare din următoarele caracterizează în opinia dvs. democrația

Autoritățile religioase să își spună părerea despre cum trebuie înțelese legile.

### Comments

*In “v153 Religious authorities interpret the laws”, which should be the closer meaning of “interpret: “approve, agree with” or “give a translation/explanation of”?*

*We have used “approve, agree with” for the Romanian translation.*

**V183.-** Some people believe that certain kinds of problems could be better handled by the United Nations or regional organizations rather than by each national government separately. Others think that these problems should be left entirely to the national governments. I'm going to mention some problems. For each one, would you tell me whether you think that policies in this area should be decided by the national governments, by regional organizations, or by the United Nations? (Read out and code one answer for each problem): Human Rights

Romania 2005(N=1776)

Cine credeți că ar trebui să se ocupe în principal de următoarele probleme, guvernele fiecărei țări în parte, organizațiile regionale (precum Uniunea Europeană) sau ONU?

Drepturile omului

	TOTAL	Sex		Age		
		Male	Female	Up to 29	30-49	50 and up
National governments	42.7	43.8	41.9	40.7	44.2	42.4
Regional Organization	10.4	12.4	8.7	14.0	11.2	8.5
