Data Collection Organization:

ARS Research AB / Intervjubolaget IMRI

Fieldwork Period:

04-02-2011 - 29-04-2011.

Universe:

National Population, Both sexes, 18 to 85 years

Sample size:

1206

Sample:

The sample was by computer selected randomly in the different PSU. Step two was to add telephone numbers to the sample and make sure that we have used all possible ways of doing this we have used three different suppliers of phone number services, and also made manual checks. This has given a sample of 2456 respondents with phone numbers divided in the different PSU areas. To those who we could not find telephone numbers we sent letters and asked for their participation and to contact us. No hard quotas were used, quotas were used for keeping track of the sample, both for gender, age and area. This is mainly used for quality checks so that we can monitor the progress of the sample and make sure that we have a good representation of the randomly selected sample.

Survey procedure:

Personal Face to Face Interview

Response rate:

Total number of starting names/addresses: 2456 - addresses which could not be traced at all: 130 - selected respondent too sick/incapacitated to participate: 121 - selected respondent away during survey period: 204 - selected respondent had inadequate understanding of language of survey: \* - no contact at selected address: 47 - personal refusal by selected respondent: 640 - other type of unproductive (please write in full details in the box below): 22 - full productive interview: 1208 - partial productive interview: 0

### Weighting:

The data was weighted according to the specifications in question V.258 Statistics is provided by Statistics Sweden, and are from 2010, the statistical data can be viewed in the attached file “SCB be0101tab2helar10.xls”

**V69.-** I'm going to read out a list of various changes in our way of life that might take place in the near future. Please tell me for each one, if it were to happen, whether you think it would be a good thing, a bad thing, or don't you mind?: "Greater respect for authority"

Sweden 2011(N=1206)

Jag ska nu nämna några olika förändringar i vårt sätt att leva som kan tänkas äga rum i den närmaste framtiden.

Om dessa förändringar skulle inträffa, tycker Du att det skulle vara bra eller dåligt, eller tycker Du att det inte

spelar någon roll? (LÄS UPP DE OLIKA FÖRÄNDRINGARNA EN I TAGET)

Tycker Du att det vore bra eller dåligt...:

- om vi fick större respekt för auktoriteter?

**Y003.-** Autonomy Index is a computed variable based on the Children qualities battery. It uses only four variables: V19= Important Child Qualities: Religious Faith V21= Important Child Qualities: Obedience V12= Important Child Qualities: Independence V18= Important Child Qualities: Determination, Perseverance Only variables with answers to all v19,v21,v12,18 have an index. The SPSS like formula is: Compute Y003=-5. if v19>=0 and v21>=0 and v12>=0 and v18>=0 then Y003=(v19 + v21)-(v12 +v18).
