Technical Record

Study #

Croatia 1996_v20180912

CROATIA 1996

Geographical scope:

Croatia

Principal investigator(s):

Prof. Vesna Pusic Dept. of Sociology Faculty of Philosophy I. Lucica 3 10000 Zagreb Croatia F+ 385-1-615-6879 E-mail: vpusic@filozof.ffzg.hr

Data Collection Organization:

Institute for the Culture of Democracy, Erasmus Guild (Zagreb)

Fieldwork Period:

05-12-1996 - 15-12-1996.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1196

Estimated Error:

2,9

Questionnaire:

The WVS questionnaire was in Croatian. There have been included some special variable labels such as: V56 neighbors: Muslims and V149 Institution: The European Union. Special categories labels are V203/V204 Geographical affinity. Country Specific Variables are: V210 a V212 Political Parties. The variable 206 born in this country is also different. The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not any upper age cut-off for the sample. The ethnic group of the respondent was not asked in the interview. In the cases of Eastern Europe Countries where the ethnic group is missing the language chosen for interview is the only indicator available to control the ethnic composition of the samples. Nevertheless, native language indicated in the census of 1989 and language chosen for interview are not exactly the same, since the first is rather differentiated whereas for the last the alternatives to choose between were only the national language or Russian.

Sample:

For the purpose of this survey research the design of stratified random sampling was applied. First, the territory of the Republic of Croatia was divided into 7 distinct geographic regions or sets of regions, and these were: 1. Istra; 2. Rijeka and surrounding; 3. Dalmacija; 4. Slavonija and Podravina;

5. Zagreb, Zagorje and Prigorje; 6. Medimurje and Moslavina; 7. Zumberak, Kordun, Banija and Lika. Each of the regions covers various number of small, medium, and large cities/settlements (small with less than 2000 inhabitants; medium with 2000-30.000; and large with more than 30.000 inhabitants). So, two-way stratification: by region, and by size of cities/settlements, was used. By the data from the Census 91 outside of ex-occupied regions of The Republic of Croatia there live 4.390.651 of inhabitants. The geographic distribution of all the inhabitants is supposed to be know from the Census. The people live in 5979 cities/settlements of Croatia: 1.703.962 of them live in large cities, 967.621 live in medium size cities/settlements, and the rest of 1.719.068 live in small ones. It is obvious that 39% of inhabitants live in large, 22% in medium, and 39% in small cities. In each region the number of inhabitants, as well as the number of cities of a certain size varies, and the distribution of inhabitants by size of city for many reasons differs a lot. But, the population to be sampled for this survey consists only of adult persons (older than 18) and is of the size $N=3.590.366$. There is the assumption that the geographic distribution of adult persons is the same as the distribution of all the persons. The planned fixed size of the entire stratified sample was $N=1200$ of adult persons, for what the proportionate allocation of units, according to the Census data, was constructed. The cities were sampled at random using random digit generator with probabilities proportionate to the size (the measure of size being the number of inhabitants) to ensure that in the further stage of the sampling procedure every person has got the same probability of selection. The number of cities sampled was determined considering the relevant traveling costs. It was decided that every large city (with more than 30.000 inhabitants) has to be included in the sample by imperative. In the regions without such cities, the same rule for the medium size of city/settlement was applied.

Survey procedure:

Personal Face to Face Interview

Response rate:

The interviewers contacted 1495 persons and 306 of them refused to participate in the survey. The refusal rate was 20.4%, which is an approximately usual rate in such kind of survey in Croatia.

Weighting:

The post-stratification technique was used for the variable "education" combined by variable "sex". The basis for forming of the weights were Census 1991 data corrected by the exclusion of the population from the occupied territories, as well as by the application of the trend method using Census data from 1971 and 1981. The education level was divided in three categories: 1 primary school or less 2 secondary school 3 graduates (2 or 4 years) and more Weights for the three educational levels: male female total 1 0.191573 0.281446 0.473019 2 0.234819 0.179323 0.414142 3 0.062980 0.049714 0.112694

Y001.- Materialism/Postmaterialism (12-item index) The MatPMat12 values index used here is created as follows from V104 to V109: V104. People sometimes talk about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. Would you please say which one of these you, yourself, consider the most important? CODE ONE ANSWER ONLY UNDER "First Choice." V105. And which would be the next most important? CODE ONE ANSWER ONLY UNDER "Second Choice." First ChoiceSecond Choice 1 A high level of economic growth11 Making sure this country has strong defense forces22 *Seeing that people have more say about how things are done at their jobs and in their communities 33 Trying to make our cities and countryside more beautiful 44 Don't know [DO NOT READ OUT] 99 V106. If you had to choose, which one of the things on this card would you say is most important? CODE ONE ANSWER ONLY V107. And which would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice Maintaining order in the nation11 *Giving people more say in important government decisions22 Fighting rising prices 33 *Protecting freedom of speech44 Don't know [DO NOT READ OUT] 99 V108. Here is another list. In your opinion, which one of these is most important? CODE ONE ANSWER ONLY V109. And what would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice A stable economy 11 *Progress toward a less impersonal and more humane society22 *Progress toward a society in which ideas count more than money 33 The fight against crime44 Don't know [DO NOT READ OUT] 99 MatPMat12 index is constructed by summing the number of Postmaterialist items chosen as either first or second choice in its group (these five items are designated with an asterisk above). This produces an index that runs from 0 (no Postmaterialist items are given high priority) to 5 (all five Postmaterialist items are given high priority). SPSS code used to build V1000 is as follows: COMPUTE V1001=0. COMPUTE V1002=0. COMPUTE V1003=0. COMPUTE V1004=0. COMPUTE V1005=0. IF (V104=3 OR V105=3) V1001=1. IF (V106=2 OR V106=4) V1002=1. IF (V107=2 OR V107=4) V1003=1. IF (V108=2 OR V108=3) V1004=1. IF (V109=2 OR V109=3) V1005=1. COMPUTE V1010=9. IF NOT (V104=0 & V105=0 & V106 =0 & V107=0 & V108=0 & V109=0) V1010=V1001+V1002+V1003+V1004+V1005.

Y003.- Autonomy Index is a computed variable based on the Children qualities battery. It uses only four variables: V22= Children qualities: Religious Faith V24= Children qualities: Obedience V15= Children qualities: Independence V21= Children qualities: Perseverance Only variables with answers to all v22,v24,v15,v21 have an index. The SPSS like formula is: Compute Y003=-5. if v22>=0 and v24>=0 and v15>=0 and v21>=0 then Y003=(v22 + v24)-(v15 +v21).
