Puerto Rico 1995_v20180912

PUERTO RICO 1995

Geographical scope:

Puerto Rico

Principal investigator(s):

Prof. Angel Rivera-Ortiz Department of Political Science University of Puerto Rico Rio Piedras,
00931-3345 Puerto Rico F+ 809-763-5599

Data Collection Organization:

College of Social Science, University of Puerto Rico (Rio Piedras)

Fieldwork Period:

15-09-1995 - 31-10-1995.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1164

Estimated Error:

2,9

Questionnaire:

The WVS questionnaire was in Spanish. There have been included some special variable labels such as: V56 Neighbours: North American and V149 Institution: NAFTA o TLC. Special categories labels are: V 179 Least liked groups and V203/ V204: Geographical affinity. Country Specific variables included are: V208: Ethnic identification; V209 Language at home; The variables political parties V210 a V212; Ethic group: V 233 and Region: V 234 are also included as country specific variables. The V 206 Born in this country is also different in Puerto Rico.

Sample:

The sample was designed to be representative of the entire adult population, i.e. 18 years and older, of your country. The lower age cut-off for the sample was 18 and there was not an upper age cut-off for the sample. 1,164 questionnaires were effectively administered among able persons 18 years old and older, using the Kish selection method in each household (date of next birthday) and planning up to two more visits in different time schedules or by previous appointment in order to reach the selected person. The obtained sample was similar to the population universe in educational, economic and demographic terms, according to the data provided by the Federal Census Bureau and the Commonwealth Planning Board. The questionnaires were administered in a face to face basis using a structured random sample model in three stages (multi-stage structured random sample).

First, all Puerto Rican towns and cities were organized and classified according to their geographical position and population density. Accordingly, the Island was divided in six sections: north, south, central highlands, east, west and San Juan metropolitan region. Three towns or cities were randomly selected in each section. Second, all residential communities in each of the selected towns or cities were classified in three socio-educational categories (upper, middle and low) using schooling and family income data from the last population census of 1990, and one community was randomly selected in each category. In a third stage, after conducting a thorough "block listing process" in which commercial and inhabited residences were crossed out, random samples were conducted among the households in each selected community using a criterion of p.01, for a total sample of 1,650 (intended contacts).

Survey procedure:

Personal Face to Face Interview

Fieldwork:

A standardized public opinion survey research questionnaire was developed in two stages. First, in order to obtain an adequate conceptualization and definition of the variables included in the internationally designed interview, in agreement with the Puerto Rican political culture, three focus groups were conducted in February of 1995; one in the metropolitan area of San Juan, one in the central highlands and one in the western region of the Island. Second, a pre-test was conducted in the metropolitan area of San Juan, distributing the questionnaire among 100 subjects according their availability and using age and sex as selection criteria. Interviews were never held on Sundays nor on holidays, nor at any time which would violate the visiting time rules established by tradition and culture (between 8:00 a.m. till 8:00 p.m. in urban settings and between 7:30 a.m. until 7:30 p.m. in rural zones).

V178.- Here are two statements which people sometimes make when discussing good and evil. Which one comes closest to your point of view? A. There is absolutely clear guidelines about what is good and evil. These always apply to everyone, whatever the circumstances. B. There can never be absolutely clear guidelines about what is good and evil. What is good and evil depends entirely upon the circumstances at the time.

Y001.- Materialism/Postmaterialism (12-item index) The MatPMat12 values index used here is created as follows from V104 to V109: V104. People sometimes talk about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. Would you please say which one of these you, yourself, consider the most important? CODE ONE ANSWER ONLY UNDER "First Choice." V105. And which would be the next most important? CODE ONE ANSWER ONLY UNDER "Second Choice." First ChoiceSecond Choice 1 A high level of economic growth11 Making sure this country has strong defense forces22 *Seeing that people have more say about how things are done at their jobs and in their communities 33 Trying to make our cities and countryside more beautiful 44 Don't know [DO NOT READ OUT] 99 V106. If you had to choose, which one of the things on this card would you say is most important? CODE ONE ANSWER ONLY V107. And which would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice Maintaining order in the nation11 *Giving people more say in important government decisions22 Fighting rising prices 33 *Protecting freedom of speech44 Don't know [DO NOT READ OUT] 99 V108. Here is another list. In your opinion, which one of these is most important? CODE ONE ANSWER ONLY V109. And what would be the next most important? CODE ONE ANSWER ONLY First ChoiceSecond Choice A stable economy 11 *Progress toward a less impersonal and more humane society22 *Progress toward a society in which ideas count more than money 33 The fight against crime44 Don't know [DO NOT READ OUT] 99 MatPMat12 index is constructed by summing the number of Postmaterialist items chosen as either first or second choice in its group (these five items are designated with an asterisk above). This produces an index that runs from 0 (no Postmaterialist items are given high priority) to 5 (all five Postmaterialist items are given high priority). SPSS code used to build V1000 is as follows: COMPUTE V1001=0. COMPUTE V1002=0. COMPUTE V1003=0. COMPUTE V1004=0. COMPUTE V1005=0. IF (V104=3 OR V105=3) V1001=1. IF (V106=2 OR V106=4) V1002=1. IF (V107=2 OR V107=4) V1003=1. IF (V108=2 OR V108=3) V1004=1. IF (V109=2 OR V109=3) V1005=1. COMPUTE V1010=9. IF NOT (V104=0 & V105=0 & V106 =0 & V107=0 & V108=0 & V109=0) V1010=V1001+V1002+V1003+V1004+V1005.

Y003.- Autonomy Index is a computed variable based on the Children qualities battery. It uses only four variables: V22= Children qualities: Religious Faith V24= Children qualities: Obedience V15= Children qualities: Independence V21= Children qualities: Perseverance Only variables with answers to all v22,v24,v15,v21 have an index. The SPSS like formula is: Compute Y003=-5. if v22>=0 and v24>=0 and v15>=0 and v21>=0 then Y003=(v22 + v24)-(v15 +v21).
