The following is the list of concepts that we had problems with in the Kyrgyz version of the Questionnaire.

V31 – Volunteer; V42, V57 – Labour unions; V45, V60 – Third World Countries; V48, 63 – Scouts; V76 – Homosexuals; V92 – Holidays; V124, V125 – progress; V134 – Petition; V135 – Boycott; V139 – 'left wing' and 'right wing'; V149 – press; V160 – CIS; V161 – NATO; V162 – UN; V180 – Refugees; V197 – Comfort; V210 – Abortion.

Population: Total population of the Kyrgyz Republic, 18 years old and older. Five – stage probability sampling. In the beginning the country is divided into eight strata. In each stratum the number of respondents is selected proportional to the size of population. 1) In each stratum 22 primary sampling units are randomly selected proportional to size. 2) In each primary sampling unit secondary sampling units (cities and villages) are randomly selected. 3) In each secondary sampling unit third sampling units (streets) are selected. 4) In each third sampling unit households are systematically selected. 5) In each household the respondent is randomly selected using the Kish-selection method. All adults (18 and older) are listed in a certain order – first, males from the eldest to the youngest; second, females from the eldest to the youngest – afterward, the respondent is selected by a selection key which is randomly composed for each possible type of household composition.
