- ## CODING

- ### EXAMPLE

We have filled out part of a time allocation chart. In this case, the child wakes up at 06:30, and prays for 1 hour. He then plays for ½ an hour. He then does housework for 2 ½ hours. For housework, you have to fill in the type of housework—in this case, the child cleans. Finally, the child does PAID WORK from 10:30 to 15:00; the type of PAID WORK is household industry. You also have to write down how much the child earns, which is recorded in the last row. **THIS TIME SHEET IS NOT COMPLETE.** To complete the time-sheet, you then have to ask the child's activities from 15:00 onwards, until you come back to 06:30. The last time-slot should usually be Sleeping (Code 1).

This section is completely new, and is designed to see what children and families are receiving from the government education program. The programs that we are asking about are (a) the female stipend program, (b) the LEAPS report card program and (c) the free textbook program. These programs are **not** in place in all districts and villages, so you will get a lot of answers that are NO. It is very important to explain to the respondent before beginning this section that the government and our project has a number of schemes in different places, and the household may or may not be eligible to take part in these schemes. We need to make sure that households do not get upset if they have not been part of any of these schemes, and we keep asking them questions.

The questionnaire is designed in the following way: Q1, Q2, Q5 and Q6 check the eligibility of the child—i.e., whether the child can receive the program under the government's rules. Q12 and Q13 then ask a general question about whether parents think that government and private education has improved or not over the last year.

Q1. If there is no child enrolled in formal school, SKIP the entire section.

Q2. Ask whether there is any *female* child enrolled between Class 6 to Class 8. These are the only children eligible for the female stipend program.

Q3. If there is a female child enrolled in Class 6- Class 8, ask whether the household receives any money for the child.

Q4. Note the money received for the child. Be very careful that you note the *per month* amount received.

Q5 and Q6 checks whether the household had a child who was tested this year, and whether they received the LEAPS report card. Note that only half the villages received these cards. The child must be in either Class III, CLASS IV or Class IV (he/she will be in Class III if he/she was not promoted this year).

Q7. This question checks if the household still has the card. The surveyor *must* ask to see the card, and fill in 1 (“YES”) if he physically checks that the card is there; 2 (YES, but cannot find it) if the household says that they have the card, but cannot find it and 3 (NO) if the household does not have the card anymore.

Q8 and Q9 ask the family whether the card has been useful for them, and if YES, then how it has been useful. Remember that you must ask Q9 even if the family says that the card has NOT been useful for them.

Q10 and Q11. The government is also providing free textbooks for primary school going children. Q10 checks whether there is an eligible child, and Q11 asks whether they received the free textbooks.

Q12 and Q13. Both these questions ask how the schooling system is in the current year compared to the previous year. These are both questions of perception.

Please note that in cases where the respondent does not know, there is a code–99 that should be used. THIS CODE SHOULD ONLY BE USED IN EXCEPTIONAL CIRCUMSTANCES, after the surveyor has probed for an answer in at least 3 different ways. For example, in the case of the LEAPS card, the code–99 should be entered only if the surveyor has asked the question, describe the card and asked the respondent to check with any other family member who is in the house at the time of the survey.
