# Contents

Foreword.....	ix
Executive summary.....	vi

## Chapter 1: Introduction

1.1 Background.....	1
1.2 Objectives.....	2
1.3 Methodology.....	2
1.3.1 Business Register as a sampling frame.....	2
1.3.2 Broad groups of economic activity.....	2
1.3.2.1 Mining and Quarrying.....	2
1.3.2.2 Manufacturing.....	3
1.3.2.3 Electricity and Water Supply.....	3
1.3.2.4 Construction.....	3
1.3.3 Method of collecting and processing data.....	3
1.3.4 Grossing up to National Level.....	4
1.3.5 Principal indicators.....	4

## Chapter 2: Characteristics of the establishments

2.1 Introduction.....	7
2.2. Definition of terms.....	7
2.2.1 Institutional unit.....	7
2.2.2 Establishment.....	7
2.2.3 Type of economic organization.....	7
2.2.4 Type of legal organization and ownership.....	7
2.2.4.1 Incorporated enterprises.....	8
2.2.4.1.2 Other incorporated entities.....	8
2.2.4.1.2.1 Cooperatives.....	8
2.2.4.1.2.2 Limited liability partnerships.....	8
2.2.4.2 Non-profit institutions.....	8
2.2.4.3 Unincorporated enterprises.....	8
2.2.5 Type of ownership.....	8
2.2.5.1 Public units.....	8
2.2.5.2 Privately owned units.....	9
2.3 Results.....	9
2.3.1 Number of establishments and response rates.....	9
2.3.2 Tables.....	10

## Chapter 3: Employment

3.1 Introduction.....	18
3.2 Definition of terms.....	18
3.2.1 Functional categories.....	18
3.2.1.1 Working proprietors and active business partners.....	18
3.2.1.2 Unpaid family workers.....	18

3.2.1.3 Production employees engaged in production work.....	18
3.2.1.4 Production employees engaged in Research & Development .....	18
3.2.1.5 Production employees engaged in mineral exploration & evaluation.....	19
3.2.1.6 Production employees engaged in software & database development.....	19
3.2.1.7 Production employees engaged in production of entertainment, literary and artistic originals.....	19
3.2.1.8 Production employees engaged in own account fixed asset Formation & mmajor repair.....	19
3.2.1.8 Other employees .....	19
3.2.1.1 Leased employees .....	19
3.2.2 Remuneration of employees.....	19
3.2.2.1 Wages and salaries in cash and in kind.....	20
3.2.2.2 Social insurance contributions payable by employers.....	20
3.3 Results.....	20
Tables.....	22

## **Chapter 4: Costs of production raw materials used**

4.1 Introduction.....	54
4.2 Definition of terms.....	54
4.2.1 Intermediate consumption.....	54
4.2.2 Purchases or receipts of raw materials and supplies from other enterprises.....	54
4.2.3 Cost of raw materials and supplies delivered by other Establishments Of the same enterprise.....	54
4.2.4 Cost of materials for own-account fixed assets formation or major repair.....	55
4.2.5 Cost of solid and liquid fuels, gas and electricity purchased.....	55
4.2.5.1 Solid fuels: coke, coal and charcoal.....	55
4.2.5.2 Liquid fuels: petrol, diesel, lubricants & oils, other liquid fuels and gas.....	55
4.2.5.3 Electricity.....	55
4.2.6 Cost of water, wastewater and sewerage services.....	55
4.2.7 Cost of industrial services purchased and also delivered by other establishments of the same enterprise.....	56
4.2.7.1 Maintenance, repair and installation (except construction) services.....	56
4.2.7.2 Contract and commission work .....	56
4.2.7.3 Maintenance and repair of buildings and structures.....	56
4.2.8 Cost of non-industrial services purchased.....	56
4.2.8.1 Communication services.....	56
4.2.8.2 Transport services.....	56
4.2.8.3 Advertising and promotional services.....	57
4.2.8.4 Financial services.....	57
4.2.8.5 Other non-industrial services.....	57
4.2.8 Purchases of goods and services for resale in the same condition as received.....	57
4.2.10 Rental payments for machinery and equipment.....	57
4.2.11Rental payments for dwellings and structure.....	57

4.2.12 Non-life insurance premiums payable on establishment property .....	58
4.2.13 Environmental protection expenditure.....	58
4.3.0 Quantity of individual fuels, lubricants and gas purchased.....	58
4.3.1 Quantity of electricity purchased.....	58
4.3.2 Quantity of electricity generated.....	58
4.3.3 Quantity of electricity sold.....	58
4.3.4 Quantity of electricity consumed.....	58
4.3.5 Quantity of water purchased .....	58
4.3.6 Quantity of water abstracted for own use.....	58
4.3.7 Quantity of water sold.....	58
4.3.8 Quantity of water consumed.....	58
4.3.8 Quantity of wastewater treated on site prior to discharge.....	59
4.3.10 Quantity of wastewater discharged without treatment.....	59
4.4 Results.....	59
4.5 Tables.....	61

## **Chapter 5: Receipts and goods produced**

5.1 Introduction.....	106
5.2 Definition of terms.....	106
5.2.1 Value of shipments/sales/turnover, produced by the establishment.....	106
5.2.2 Value of shipments/sales/turnover of goods produced to other enterprise.....	106
5.2.3 Transfers of goods produced to other establishments of the same enterprise.....	106
5.2.4 Value of goods exported to customers and affiliated foreign branches.....	106
5.2.5 Value of sales of all goods and services purchased for resale in the same condition as received.....	107
5.2.6 Receipts for industrial work done or industrial services rendered to others.....	107
5.2.6.1 Contract and commission work.....	107
5.2.6.1.1 Value of contract and commission work from units not resident in the country.....	107
5.2.7 Other revenue.....	107
5.2.8 Receipts from work of own-account fixed assets.....	108
5.2.8 E-commerce sales/turnover/value of shipments/receipts for services or other revenues.....	108
5.2.10 Capacity Utilization.....	109
5.3 Results.....	109
5.4 Tables.....	110

## **Chapter 6: Gross fixed capital formation**

6.1 Introduction.....	129
6.2 Definition of terms.....	129
6.2.1 Value item.....	129
6.2.1.1 Gross value of fixed assets (at acquisition cost) at the beginning of the year.....	129

6.2.1.2 Capital expenditure on new and used fixed assets (acquisitions) during the period.....	129
6.2.1.3 Gross value of fixed assets, retired and scrapped (disposal) during the period.....	129
6.2.1.4 Depreciation .....	129
6.2.1.5 Gross value of fixed stock at the end of the period.....	129
6.2.2 Classification by type of fixed asset.....	129
6.2.2.1 Dwellings.....	129
6.2.2.2 Other buildings and structures.....	130
6.2.2.3 Machinery and equipment.....	130
6.2.2.4 Transport equipment.....	130
6.2.2.5 ICT equipment.....	130
6.2.2.6 Other machinery and equipment.....	130
6.2.2.7 Intellectual property products.....	130
6.2.3 Classification of intellectual property products by type.....	131
6.2.3.1 Research and development.....	131
6.2.3.2 Mineral exploration and evaluation.....	131
6.2.3.3 Computer software and databases.....	131
6.2.3.4 Entertainment, literary and artistic originals.....	131
6.3.4 Results.....	132
6.3.5 Tables.....	133

## List of Tables

Table 1 a	Weights for grossing up figures: CIP Zimbabwe 2010.....	4
Table 1 b	Principal indicators- Gross output, intermediate consumption and Value added classified by industrial group: CIP Zimbabwe 201.....	5
Table 2.1a	Number of corporations classified by industrial group and ownership: CIP: Zimbabwe 2010.....	10
Table 2.1b	Number of cooperatives classified by industrial group and ownership: CIP Zimbabwe 2010.....	12
Table 2.1c	Number of non-profit institutions and unincorporated enterprises classified by industrial group and type of Ownership: CIP Zimbabwe 2010.....	14
Table 3.1	Number of employees classified by industrial group and gender: CIP Zimbabwe 2010.....	22
Table 3.1a	Number of production and Research & Development Employees classified by gender and industrial group: CIP 2010 Zimbabwe.....	24
Table 3.1b	Number of mineral Exploration & Evaluation and Software & Database Development employees classified by industrial group and gender: CIP 2010 Zimbabwe.....	26
Table 3.1c	Number of employees of production of artistic originals and Own account fixed assets formation & major repairs classified by industrial group and gender: CIP 2010 Zimbabwe.....	28
Table 3.1d	Number of leased and other employees classified by Industrial group and gender: 2010:Zimbabwe.....	30
Table 3.1e	Number of working proprietors and unpaid family workers classified by industrial group and gender: CIP 2010 Zimbabwe.....	32
Table 3.2a	Wages and Salaries for Production and Research & Development employees classified by industrial group and gender: CIP Zimbabwe 2010: USD.....	34
Table 3.2b	Wages and Salaries for Mineral Exploration & Evaluation and Software & Database Development employees classified by industrial group and Gender: CIP 2010 Zimbabwe: USD.....	36
Table 3.2c	Wages and Salaries for artistic originals and own account fixed assets formation & major repairs employees classified by industrial group and gender; CIP 2010 Zimbabwe: USD.....	38
Table 3.2d	Wages and Salaries for leased and other employees classified by industrial group and gender: CIP 2010 Zimbabwe: USD.....	40
Table 3.2e	Wages and Salaries for working proprietors and unpaid family workers classified by industrial group and gender: CIP 2010 Zimbabwe: USD .....	42

Table 3.3a	Social insurance contributions paid by employers for Production and R & D employees classified by industrial group and gender; CIP Zimbabwe 2010: USD.....	44
Table 3.3b	Social insurance contributions paid by employers for Mineral Exploration & Evaluation and Software & Database Development employees classified by industrial group and gender; CIP 2010 Zimbabwe: USD.....	46
Table 3.2c	Social insurance contributions payable by Employers For artistic originals and own account fixed assets Formation & major repairs employees classified by industrial group and gender :CIP 2010 Zimbabwe: USD.....	48
Table 3.3d	Social insurance contributions payable by employers for other employees And leased employees Classified by industrial group and gender: CIP; Zimbabwe: USD.....	50
Table 3.3e	Social insurance contributions paid by employers for working proprietors and all other workers classified by industrial group and gender: CIP Zimbabwe: USD.....	52
Table 4.1a	Cost of materials, supplies and services classified by Industrial group; CIP Zimbabwe 2010: USD.....	61
Table 4.1b	Value of net inventories and intermediate consumption Classified by Industrialgroup;CIPZimbabwe2010: USD.....	63
Table 4.2a	Cost of raw materials and supplies classified by industrial group.....	65
Table 4.2b	Cost of raw materials and supplies own account capital Formation classified by industrial group and type.....	67
Table 4.2c	Cost of solid fuels classified by industrial group and type of fuel.....	69
Table 4.2d	Cost of liquid fuels classified by industrial group and type of fuel.....	71
Table 4.2e	Cost of lubricants, oils, gas and electricity classified by industrial group and type.....	73
Table 4.2f	Cost of water and sewerage services classified by industrial group and type.....	75
Table 4.2g	Cost of industrial services classified by industrial group and Type of service.....	77
Table 4.2h	Cost of non-industrial services classified by industrial group and type of service.....	79
Table 4.2i	Cost of goods purchased for resale, rent, non-life insurance and environmental protection classified by industrial group.....	82
Table 4.3a	Value in (US\$) of inventories - Material & supplies and coke classified by industrial group in Zimbabwe 2010.....	84
Table 4.3b	Value in (US\$) of inventories - Coal and charcoal classified by industrial group in Zimbabwe 2010.....	86
Table 4.3c	Value in (US\$) of inventories - Petrol and diesel classified by industrial group in Zimbabwe 2010.....	88
Table 4.3d	Value in (US\$) of inventories - Lubricants & oils and gas classified by industrial group in Zimbabwe 2010.....	90
Table 4.3e	Value of inventories of other liquid fuels and total classified by industrial group in Zimbabwe 2010.....	92

Table 4.4a	Quantities of solid fuels and gas purchased classified by Industrial group and type: CIP Zimbabwe 2010.....	94
Table 4.4b	Quantities of solid fuels purchased classified by industrial group and type: CIP Zimbabwe 2010.....	96
Table 4.4c	Quantity of electricity (KWh) purchased, generated, sold and consumed classified by industrial group; CIP Zimbabwe 2010: USD.....	98
Table 4.4d	Value of water purchased, abstracted for own use, sold and consumed classified by industrial group: CIP Zimbabwe 2010.....	100
Table 4.4e	Value of taxes on production classified by industrial group and type : CIP Zimbabwe 2010: USD.....	102
Table 4.5	Cost of raw materials and supplies classified by source and industrial group: CIP Zimbabwe 2010: USD.....	104

Table 6.2f	Total gross fixed capital formation classified by industrial Group: CIP Zimbabwe 2010: USD.....	155

## Foreword

The Census of Industrial Production (CIP) 2010 Report is a publication prepared by the Zimbabwe National Statistics Agency (ZIMSTAT). It is based on the results of a census of establishments in mining, manufacturing, construction and electricity & water supply carried out in 2010.

Gross output, intermediate consumption and value added were used in 2010 as preliminary results to estimate gross domestic product (GDP) which in turn was used in the national budget estimates for 2011.

Each chapter consists of an introduction, definition of terms and results presented mainly in tables. The section on definition of terms in each chapter is to assist the user of statistics to understand the figures.

The report also contains volumes (quantities) of electricity, water, solid and liquid fuels, and lubricants and oils used in the production of goods and services. This information is provided in chapter 4. Capacity utilization is covered in Chapter 5. This has been done to fulfill ZIMSTAT's obligation to provide demand-driven statistics. With such statistical information, performance indicators such as output or value added per person employed can be easily be derived for analysis.

The report also covered research and development (R&D); mineral exploration and evaluation; computer software and database; and entertainment, literary and artistic originals as intellectual property products.

ZIMSTAT is grateful for the financial and material assistance offered by the African Development Bank (AfDB). ZIMSTAT would also want to thank all persons who were engaged in the operations of the project and the business community for their cooperation in the data collection exercise.

M. Dzinoizei  
Director General, ZIMSTAT

## Executive Summary

---

The Census of Industrial Production (CIP) 2010 was carried out to obtain information on the structure and development of the mining, manufacturing, electricity and water and construction industries in Zimbabwe. Such statistical information is useful in economic planning, monitoring and evaluation and decision-making. The census was carried out at a critical time when interventions to turnaround the economy were being intensified. Economic blueprints like the Medium Term Plan 2010-2015 (MTP) will benefit greatly from evidence based policy formulation for planning and decision-making.

The results of the CIP exercise were compiled using International Recommendations for Industrial Statistics (IRIS) definitions and concepts published by the United Nations Statistics in 2008. The classification of economic activities for establishments was done using the International Standard Industrial Classification of All Economic Activities Revision 3 (ISIC Rev3) of the United Nations.

The main objective of the census was to produce statistics on principal indicators such as gross output, intermediate consumption and value added, gross fixed capital formation, cost of production and raw materials; value of volumes of goods produced; inventories, distribution of establishments by economic activity, type of ownership and industry of ownership; employment size and earnings.

The four industries recorded a total of 178,090 employees in 2010 up from 125,607 in 2009. The manufacturing industry had the highest number 132 245 representing 74 percent while mining had 14 percent, electricity had 5 percent and construction contributed 7 percent. Out of the 178 090 employees, only 21 196 were females representing 7 percent.

About US\$706 million was spent on wages & salaries and US\$63.5 million on social insurance contribution. On average, males received lower wages and salaries of US\$3 900 per annum when compared to females whose average was US\$4 900. Females in manufacturing had a higher average than males.

About US\$1.178 billion was spent on materials and supplies; gas, fuel and electricity; water and sewerage services; services and rental payments. Of the US\$1.178 billion, US\$1.111 billion or (94 percent) was spent on materials and supplies only. The least expenditures were on rental payments, US\$39.87 million; and water and sewerage services, US\$54.64 million. Manufacturing industry had the highest expenditure of US\$913 million or (78 percent) while construction had the least US\$39 million or (3 percent).

Taking inventories into account, manufacturing industry contributed US\$1.127 billion or 44 percent, mining US\$1.478 billion or (48 percent), electricity US\$114 million or (6 percent) and construction US\$47 million or (2 percent) to the gross output.

The total value of sales of goods produced was US\$2.312 billion of which mining had the highest value of US\$1.126 billion followed by manufacturing with US\$1.007 billion. Out of the US\$1.008 billion in manufacturing, US\$214 million was exported to customers affiliated to foreign branches of the establishments.

Out of the US\$40.06 million realised by the construction industry, building construction accounted for US\$37.76 million or 94 percent and the remaining US\$2.31 million or 6 percent was for civil engineering work of which about US\$9.17 million was on own account.

Capacity utilization for the mining industry alone was 50.9 percent in 2010 compared to 46.6 percent for 2009. This shows a decline in the capacity utilization of the mining industry. Capacity utilization for the manufacturing industry was 40.7 percent in 2009 and 44.2 percent in 2010. Capacity utilization for electricity and water was 89.8 percent in 2010 up from 91.7 percent in 2009.

Gross value for the fixed assets at the end of 2010 was valued at US\$2.605 billion of which other machinery and equipment accounted for 49 percent or US\$1.276 billion. Mining had the highest gross value for other machinery and equipment of US\$758 million while construction had none.

Gross value for intellectual property products at the end of 2010 was valued at US\$125.3 million and manufacturing had the largest share of US\$120.2 million.

Out of the 1, 131 establishments in the register, 246 responded. Of these, 3 were owned by Central Government, 6 by Local Government, 15 foreign controlled 222 were national private.

# Chapter 1: Introduction

---

## 1.1 Background

Census of Industrial Production (CIP) 2010 was carried out to obtain information on the structure and development of industry in Zimbabwe. Statistical information on the structure and development status of industry is useful in economic planning, monitoring, evaluation and decision making. The 2010 CIP covered the mining, manufacturing, electricity, and water and construction sectors. However at the time of writing the report, efforts to follow-up on non-respondents was in progress.

The CIP 2010 report used concepts and definitions contained in the International Recommendations for Industrial Statistics (IRIS) published by the United Nations Statistics in 2008<sup>[3]</sup>. The last published CIP report was for the year 2009.

## 1.2 Objective

The main objective of the CIP was to produce statistics that include gross output, intermediate consumption and value added for use in estimating Gross Domestic Product (GDP). More specific objectives were to obtain:

- the number of employees and their remuneration by functional category and gender
- cost of material inputs and industrial services
- quantities of fuels, electricity and water used in production
- value of shipments, receipts for services and other revenues
- capacity utilisation
- gross fixed capital formation

## 1.3 Methodology

### 1.3.1 Business Register

Companies registered by the Registrar of Companies constitute the business register. The Registrar of Companies continuously updates the ZIMSTAT with information about company closures, registration of new ones and any other amendments to those in existence.

Using addresses extracted from the Registrar of Companies, new companies were sent a simple questionnaire to supply information concerning their main economic activities. Establishments that responded to the questionnaire were classified into their industrial activity groups according to the International Standard Industrial Classification (ISIC Rev 3) <sup>[4]</sup> of the United Nations.

Local business directories were used to find physical addresses for establishments. All registered establishments whose economic activity and physical addresses were known were included in the register.

### **1.3.2 Broad groups of economic activity**

The system of classification by industrial groups has four major divisions: Mining and Quarrying, Manufacturing, Electricity & Water Supply and Construction.

#### **1.3.2.1 Mining and Quarrying**

This division is defined as consisting of: underground and surface mining and quarrying; all supplementary operations, such as drilling, breaking, milling, cleaning and grading; and establishments operating on a mining site as refineries/smelters of non-ferrous or precious metals. Excluded, however, are mines and quarries operated by manufacturers as a source of their raw materials, such as limestone mines operated by cement manufacturers. These form part of the manufacturing sectors.

#### **1.3.2.2 Manufacturing**

Manufacturing division is defined as: the mechanical or chemical transformation of materials into new product; the assembly of component parts of manufactured products, except in cases where the activity is more appropriately classified as construction. Establishments primarily engaged in repair work for industry and commerce were also classified under manufacturing according to the type of product repaired. Those primarily engaged in repair work for private persons are excluded. Establishments operating on a mining site as refiners/smelters of non-ferrous or precious metals are also excluded.

#### **1.3.2.3 Electricity and Water Supply**

Included in this division are those establishments whose main activity is the generation and/or distribution of electricity and/or the purification and distribution of water.

#### **1.3.2.4 Construction**

This division includes establishments whose predominant activity is the construction and/or repair of buildings, roads, bridges, sewers, railroads, dams, airports, swimming pools, communication systems and all other construction work. Special trade contractors in the field of construction such as carpenters, plumbers, plasterers and electricians are also included in this group. Own account construction undertaken as an ancillary activity by an establishment in another industry is included.

These broad definitions are international statistical concepts as given and recommended in the International Standard Industrial Classification Revision 3.

While economic activities of enterprises/establishments in the manufacturing sector are classified in detail at 4-digit level of the ISIC Rev3, this report publishes the results at sector subdivisions of industrial groups at 3-digit level as per recommendations of IRIS. In cases where one or two establishments are in a group, such groups are combined with others as a way of maintaining confidentiality.

### **1.3.3 Data collection, cleaning and processing**

Data collection was through self-administered questionnaires dispatched by trained enumerators to all the establishments in the register. Completed questionnaires were collected by the same enumerators. Questionnaires were edited and checked for completeness before data capture. In cases of item non-response, a situation where some sections of the questionnaire are not completed, respondents were phoned or revisited for completeness of data. Where missing data could not be readily available, imputations were made.

Computer software called CSPro was used for data capture. As a data cleaning procedure at data entry stage, each questionnaire was captured by two independent data entry personnel. Data points captured from each questionnaire that were at variance at each other were treated as incorrect and the questionnaire in question was referred to for correction.

Tables were generated using the Statistical Analysis System (SAS). Subjective treatment was used to impute erroneous and missing values in the case of item non-response. Follow-ups of non-respondents ran concurrently with data editing and capture.

### **1.3.4 Grossing up to National Level**

At report writing stage, a response rate of 22 percent had been achieved and data for the outstanding 78 percent had to be estimated for. Establishments within the same ISIC at 3-digit level were considered a stratum as they are assumed to be homogeneous within. The number of establishments,  $n_i$  within a stratum that responded expressed as a percentage of the total in the stratum  $N_i$ , provided response rate for that stratum. The inverse or reciprocal of the response rate for each stratum provided a grossing up factor. Hence the grossing up factor for each stratum multiplied by the stratum aggregate from the survey produced the national estimate for that particular variable at 3-digit level.

Outliers were detected using gross output at establishment level. Any value of gross output greater than  $Q_3 + 1.5(IQR)$  was considered an outlier where  $Q_3$  is the upper quartile and IQR is the inter-quartile range of the gross output. Grossing up in the presence of outliers yields very high variances which in turn result in overestimating. Thus, the grossing up factor was applied to non-outliers and outliers added at each 3-digit level to gross up figures to national level.

In the case of employment figures in chapter 3, the same method was applied to identify outliers, but using total number of employees, instead as a variable for stratification.

### 1.3.5 Principal Indicators

Table 1 shows gross output, intermediate consumption and value added as principal indicators.

Gross output illustrates the result of the overall production activity of establishments (i.e. industrial units) and it corresponds to the sum of the value of all goods or services that are actually produced within an establishment and become available for use outside that establishment plus any goods and services produced for own final use. The value of production is given by:

Gross output = value of sale/turnover/shipments of all goods or services produced by the establishment + value of sale/turnover/shipments of all goods and services purchased for resale in the same condition as received - purchases of goods and services for resale in the same condition as received + receipts for industrial work done or industrial services rendered to others + other revenues + value of own-account fixed assets + change in work-in-progress + change in inventories of finished goods + change in inventories of goods purchased for resale in the same condition as received.

Intermediate consumption consists of the value of goods and services consumed as inputs in the process of production, excluding fixed assets. The goods or services may be either transformed or used up in the production process and is calculated as follows:

Intermediate consumption = Cost of raw materials and supplies except gas, fuels and electricity + cost of gas, fuel and electricity purchased + purchases of services except rentals + rental payments + changes in inventories of materials, fuels and supplies.

Hence value added = gross output – intermediate consumption

## Chapter 2: Characteristics of the establishments

---

### 2.1 Introduction

This chapter looks at the institutional unit, the establishment, type of economic organization, type of legal organization and ownership, incorporated enterprises, response rates and the results.

### 2.2 Definition of terms

#### 2.2.1 *Institutional unit*

According to [IRIS p31], institutional units are the core unit of the System of National Accounts. All subsequent definitions embody the definition of this basic unit. An institutional unit may be defined as an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and transactions with other entities.

#### 2.2.2 *Establishment*

An establishment is an enterprise or part of an enterprise which independently engages in one, or predominantly one, kind of economic activity at or from one location or within a geographical area, for which data are available, or can meaningfully be compiled, that allow the calculation of value added.

#### 2.2.3 *Type of economic organization*

The type of economic organization indicates whether an establishment is a single-establishment enterprise i.e. the sole establishment of the enterprise of immediate ownership or part of a multi-establishment enterprise. For multi-establishment enterprises, the number of establishments was required.

#### 2.2.4 *Type of legal organization and ownership*

The kind of legal organization is the legal form of the economic entity which owns the enterprise or establishment described in detail below.

#### *Incorporated enterprises*

##### 2.2.4.1.1 *Corporations*

These are legal entities that are incorporated for the purpose of producing goods and services for the market, which may be some source of profit or other financial gain to its owner(s) and are collectively owned by shareowners that have authority to appoint directors responsible their general management

#### ***2.2.4.1.2 Other incorporated entities***

These are legal entities created for the purpose of engaging in market production of goods and services for profit but incorporated in other forms such as:

##### ***2.2.4.1.2.1 Cooperatives***

Enterprises set up by producers for purposes of production and marketing their collective output in which each owner has an equal share of ownership

##### ***2.2.4.1.2.2 Limited liability partnerships***

In these enterprises, partners are both owners and managers and have legally limited liability

#### ***2.2.4.2 Non-profit institutions***

Legal entities that are set up for the purpose of producing goods and services, but their profits cannot be the source of income for the units that own them

#### ***2.2.4.3 Unincorporated enterprises***

These are set up for producing goods or services which are not incorporated as legal entities separately from their owners. They may include public agencies which are part of general government or sole proprietorships and partnerships owned by households. Some unincorporated enterprises may behave in much the same way as corporations and such entities are treated as quasi-corporations if they have complete sets of accounts, including balance sheets.

#### ***2.2.5 Type of ownership***

Establishments were also classified according to type of ownership as private and various forms of public ownership.

##### ***2.2.5.1 Public units***

These are defined as those units that are owned or controlled by government. To be classified as a public corporation, an institutional unit must not only be controlled by another public unit, but it also must sell most of its output at economically significant prices. Control is defined as the ability to determine the general policy or program of an institutional unit. Government is in a position to exercise control over many kinds of units; miscellaneous extra-budgetary agencies, non-profit institutions and corporations (non-financial or financial)

The publicly owned units were further differentiated into two groups:

- Central government ownership
- Local government ownership (Local authorities)

### **2.2.5.2 Privately owned units**

By contrast, the privately owned units are those owned or controlled by private parties. The public authorities or private parties are considered to be owners of a given enterprise if they own all, or a majority, of the unit's shares, or of its other forms of capital participation. The control over a unit means the ability to determine the unit's policy by appointing appropriate directors if necessary.

The privately owned units are further differentiated into two groups:

- National ownership
- Foreign controlled

## **2.3 Results**

### **2.3.1 Number of establishments and response rates**

A total of 1 131 questionnaires were dispatched to mining, manufacturing, electricity & water and construction sectors. The highest response rate of 25% was achieved in the electricity & water sector.

Table 2.1 shows a summary of establishments classified by Legal Organisation and Ownership in Zimbabwe 2010

**Table 2.1: Summary of establishments classified by Legal Organisation and Ownership in Zimbabwe in 2010.**

<b>Legal organisation</b>	<b>Central Government</b>	<b>Local Government</b>	<b>National Private</b>	<b>Foreign Controlled</b>	<b>Total</b>
Corporations	2	4	189	12	207
Cooperative	-	2	24	2	28
Non-profit institution	1	-	9	1	11
<b>Total</b>	<b>3</b>	<b>6</b>	<b>222</b>	<b>15</b>	<b>246</b>

Of the 207 corporations, 189 were locally owned as private establishments followed by foreign controlled corporations whose number was 12.

## Chapter 3: Employment and Earnings

---

### 3.1 Introduction

This chapter deals with employment and earnings disaggregated by gender and functional categories.

### 3.2 Definition of terms

#### 3.2.1 *Functional categories*

##### 3.2.1.1 *Working proprietors and active business partners*

Working proprietors are owners who are actively engaged in the work of the establishment and receive wages and salaries. In private corporations working proprietors may be shareholders receiving salaries for the services they offer to the establishment as managers. A working proprietor can also be the sole owner of the business.

Active business partners are a group of persons of a common profession who pool their resources to form an establishment in partnership. They provide the labor inputs themselves and usually share the profits they derive from the productive activities of the establishment. Their role is dual in that they provide assets and other resources to the establishment as entrepreneurs and their expertise and skills as employees.

##### 3.2.1.2 *Unpaid family workers*

Unpaid family workers are defined as all persons living in the household of the proprietor(s) of the owning enterprise and working in or for the establishment, irrespective of the number of hours worked during the reference period. They work without regular pay (that is, without an agreed amount to be paid for work done). Family workers who receive pay for work performed are excluded from this category and classified as employees.

##### 3.2.1.3 *Production employees engaged in production work*

Production workers are all paid workers directly associated with the production process. Examples of production workers are:

- Welders, fitters & turners and painters in the metal fabricating industry
- Bricklayers, plumbers and electricians in the construction industry
- Designers, cloth-cutters and tailors in the clothes manufacturing industry

Employees of a similar type engaged in activities ancillary to the main activity of the establishment are also considered as production workers.

##### ***Production employees engaged in Research & Development (R&D)***

Persons employed in research and development comprise all persons employed directly on research and development, as well as those providing direct services such as research and development managers, administrators and clerical staff.

##### ***Production employees engaged in mineral exploration & evaluation***

This comprises employees working on exploration for petroleum and natural gas and for non-petroleum deposits that may be exploited commercially and subsequent evaluation of the discoveries made.

#### ***3.2.1.4 Production employees engaged in software & database development***

These are persons employed working on development of software and databases with an expected working life of more than one year, as well as those providing direct services such as managers, administrators and clerical staff.

#### ***3.2.1.5 Production employees engaged in production of entertainment, literary and artistic originals***

These are employees working in the production of entertainment, literary and artistic originals. Entertainment, literary and artistic originals are considered as an asset consisting of original films, sound recordings, manuscripts, tapes, model, etc., on which drama performances, radio and television programming, musical performances, sporting events, literary and artistic output, etc., are recorded or embodied.

#### ***3.2.1.6 Production employees engaged in own account fixed asset formation & major repair***

These are employees engaged in the own account fixed asset formation & major repairs. Fixed assets formation and major repair when undertaken on own-account is considered as capitalized production that is retained by their producers as investment.

#### ***3.2.1.7 Other employees***

These are defined as all employees other than those considered as production workers. This category includes administrative, technical and clerical personnel such as salaried managers and directors, laboratory and research workers, clerks, typists, bookkeepers, administrative supervisors, sales persons and the like.

#### ***3.2.1.8 Leased employees***

Leased employees are human resources provided by a leasing company to a client business for a fee. The leasing company operates in a co-employment relationship with client businesses and is specialized in providing a wide range of human resource services typically done on a short-term, long-term or permanent basis. While the leased employees are under the control (direction and supervision) of the client, they are on the payroll of the leasing company.

#### ***Remuneration of employees***

Remuneration in cash or in kind is the amount payable by an establishment to an employee in return for work done by the employee during the reference period of 2009. Remuneration to employees was classified into two main components:

- (a) wages and salaries payable in cash or in kind
- (b) social insurance contributions payable by employers

#### ***3.2.1.9 Wages and salaries in cash and in kind***

### ***Wages and salaries in cash***

Wages and salaries paid to employees in cash include basic wages & salaries, encashment of leave days or paid holidays, payment for overtime, dearness, compensatory, house-rent and other allowances, regular bonuses such as production bonus, incentive bonus, commissions, etc which are paid more or less regularly for each pay period. The amount of wages & salaries paid during the accounting year are taken as gross, i.e. before deductions for fines, damages, taxes, provident-fund contributions, etc.

### ***Wages and salaries in kind***

Payment in kind comprise of food, drink, fuel, clothing (but not working cloth, overalls, safety shoes), housing, etc, which are primarily of benefit to employees. Payments in kind are provided in value terms according to the current market price.

#### ***3.2.1.9 Social insurance contributions payable by employers***

Social insurance contributions payable by employers are payments made by the employer on behalf of the employees which, form part of employees' income but not wages and salaries. Included are employers' contributions to social security systems, employers' insurance premiums on hospital and medical plans, private pension plans, life insurance premiums, etc. Excluded are the costs of uniforms for employees, cost of training and business travels, cost of canteen and other food services etc.

## **3.3 Results**

Table 3a shows the number of employees classified by sector and gender for 2009 and 2010.

**Table 3a: Summary - Number of employees for the years 2009 and 2010 classified by sector and gender**

<b>Sector</b>	<b>2009</b>			<b>2010</b>		
	Male	Female	Total	Male	Female	Total
Mining	17 984	1 519	19 503	17 873	1 518	19 391
Manufacturing	72 971	7 831	80 802	114 227	18 019	132 245
Electricity	7 339	771	8 110	8 353	909	9 262
Construction	16 442	750	17 192	16 442	750	17 192
<b>Total</b>	<b>114 736</b>	<b>10 871</b>	<b>125 607</b>	<b>156 894</b>	<b>21 196</b>	<b>178 090</b>

The four sectors had a total of 178 090 employees in 2010, an increase of 42 percent from 125 607 in 2009. In 2010, females constituted 12 percent of the employees. This was a 95 percent increase when compared to 2009.

**Table 3b: Summary - Total wages & salaries in million US\$ for the years 2009 and 2010 classified by sector and gender**

Sector	2009			2010		
	Male	Female	Total	Male	Female	Total
Mining	73.8	6.9	80.7	102.5	13.3	115.7
Manufacturing	191.1	23.1	214.0	445.2	63.8	509.0
Electricity	14.2	1.4	15.6	21.3	2.1	23.5
Construction	56.2	1.9	58.1	56.2	1.9	58.1
<b>Total</b>	<b>335.3</b>	<b>33.3</b>	<b>368.4</b>	<b>625.2</b>	<b>81.1</b>	<b>706.3</b>

Wages & salaries amounted to US\$706.3 million in 2010 up from US\$368.4 in 2009, an increase of 92 percent. Manufacturing had the largest share of 92 percent of wages and salaries. Eleven percent of wages and salaries went to female employees.

**Table 3c: Summary - Total social insurance contributions in million US\$ for the years 2009 and 2010 classified by sector and gender**

Sector	2009			2010		
	Male	Female	Total	Male	Female	Total
Mining	2.7	0.3	3.1	6.0	0.6	6.6
Manufacturing	13.7	1.6	15.3	47.7	8.2	55.9
Electricity	0.8	0.1	0.9	0.9	0.1	1.0
Construction	-	-	-	-	-	-
<b>Total</b>	<b>17.2</b>	<b>2.0</b>	<b>19.3</b>	<b>54.6</b>	<b>8.9</b>	<b>63.5</b>

Table 3c shows the total social insurance contributions in millions of US\$ payable by employers classified by sector and gender. About US\$63.5 million was paid to employees by employers in 2010 up from US\$19.3 million in 2009. This was about three times higher in 2010 than in 2009.

**Table 3d: Summary – Annual average wages and salaries in US\$ for the years 2009 and 2010 payable by employers classified by sector and gender**

Sector	2009			2010		
	Male	Female	Total	Male	Female	Overall Average
Mining	4 104	4 512	4 136	5 733	8 742	5 969

Electricity	1 939	1 814	1 927	2 552	2 354	2 532
Construction	3 419	2 520	3 380	3 419	2 520	3 380
<b>Overall Average</b>	<b>3 020</b>	<b>2 948</b>	<b>3 023</b>	<b>3 900</b>	<b>4 290</b>	<b>3 933</b>

## Chapter 4: Costs of production raw materials used

---

### 4.1 Introduction

This chapter covers what costs establishments incurred on items such as material inputs, gas, fuels, electricity, water & sewerage, services, rent, goods & services purchased for resale without further processing, non-life insurance premiums and environmental protection. Thus cost of material inputs and industrial services are costs incurred in the production of those goods and services within the establishment that become available for sale or use outside that establishment.

Out of these costs, intermediate consumption is given and hence inventories associated with its derivation are also given.

Details of materials and supplies used are covered in terms of volumes and cost local source market and import.

### 4.2 Definition of terms

#### *4.2.1 Intermediate consumption*

Intermediate consumption consists of the value of the goods and services consumed as inputs by the process of production, excluding consumption of fixed assets whose consumption is recorded as consumption of fixed capital.

Hence intermediate consumption = Cost of raw materials & supplies + cost of gas, fuel and electricity purchased + cost of water and sewerage services + purchases of services + rental payments + changes in inventories of materials, fuels and supplies

Changes in inventories = stocks at beginning of year - stocks at end of year

Definitions of specific items that constitute components for deriving intermediate consumption follow.

#### *4.2.2 Purchases or receipts of raw materials and supplies from other enterprises*

Cost of material inputs and industrial services consists of the cost of raw materials, parts & components for use in production & repairs.

#### *4.2.3 Cost of raw materials and supplies delivered by other establishments of the same enterprise*

This item covers the value of raw materials and supplies and the like or pre-fabricated parts (intermediate products), purchased or, manufactured by one establishment of an enterprise and transferred to another establishment of the same enterprise, which further manufactures them, incorporates them into other products or employs them otherwise in its own production process.

#### ***4.2.4 Cost of materials for own-account fixed assets formation or major repair***

This includes the cost of raw materials and other materials purchased or received by the establishment for the production by the unit itself of capital goods for its own use (or for rental or lease) and materials and parts used for own-account major repair on its own buildings, structures, machinery and other fixed assets. Included are materials and the like for the construction of employee-occupied dwellings and other staff facilities and for the major repair and maintenance of all establishment-owned or rented buildings, except housing accommodation.

#### ***4.2.5 Cost of solid and liquid fuels, gas and electricity purchased***

This includes the cost of all solid fuels (coke, coal and charcoal), liquid fuels (petrol, diesel, lubricants oils and other liquid fuels), gas and electricity purchased by the establishment only if they are to be used as fuel for heating and energy.

Fuels and electricity used for heating and lighting are also included, except when used for employee-occupied dwellings owned or operated by the establishment.

##### ***4.2.5.1 Solid fuels: coke, coal and charcoal***

Coke, coal and charcoal are mainly used in industrial boilers as a productive process. Coke is derived from coal and its heating power is higher than that of coal. Charcoal is derived from half-burnt hardwood such as wattle trees.

##### ***4.2.5.2 Liquid fuels: petrol, diesel, lubricants & oils, other liquid fuels gas***

Petrol, diesel, lubricants, gas and other liquid fuels are used in the maintenance and running of plant, machinery, equipment and vehicles used during the period under review.

##### ***4.2.5.3 Electricity***

Electricity is used as energy for machinery and equipment in both industrial and non-industrial services by the establishment.

#### ***4.2.6 Cost of water, wastewater and sewerage services***

This includes the cost of water, wastewater and sewerage services purchased by the establishment during the reference period 2009.

Water purchased by establishments may be used for both industrial and non-industrial purposes, wastewater recycled and sewerage for production of bio-fuels and organic fertilizers.

#### ***4.2.7 Cost of industrial services purchased and also delivered by other establishments of the same enterprise***

This includes amount payable by the establishment for contract, commission repair and maintenance work carried out during the reference period by other establishments of the same enterprise and by other enterprises. Where the work is carried out by other enterprises, the actual invoice prices are used, value-added tax excluded. Freight charges should be included. Where the services are carried out by other establishments of the same enterprise, equivalent commercial values at basic prices (excluding taxes on products and transport cost) should be used.

##### ***4.2.7.1 Maintenance, repair and installation (except construction) services***

This includes the maintenance and repair work of industrial nature, such as maintenance and repair services of fabricated metal products.

Payments for the installation of goods sold by the establishment on an installed basis and service on goods sold are included, but amounts paid for the installation and major repairs of capital goods such as fixed assets are excluded.

##### ***4.2.7.2 Contract and commission work***

This includes payment made by an establishment for a work that is outsourced to another unit covers including work done by others and the other establishment of the same enterprise, on materials owned by the establishment, which generally entails the transformation or processing of raw materials. Also included are payments made through subcontractors to outworkers not on the payroll.

##### ***4.2.7.3 Maintenance and repair of buildings and structures***

This includes current repair and maintenance work on building and other structures of the establishment and in respect of rented buildings other than housing accommodation. The repair and maintenance costs of employee-occupied dwellings are excluded.

#### ***4.2.8 Cost of non-industrial services purchased***

Non-industrial services include other costs besides the costs of production. These costs are incurred whether the establishment is producing or not. Details of the constituents of the non-industrial services follow

##### ***4.2.8.1 Communication services***

This includes postal and telecommunication services, fixed and mobile phone services, faxes, internet, etc.

##### ***4.2.8.2 Transport services***

This includes costs for hired transport only, especially for establishments that contract others to provide this transport service for a fee.

#### ***4.2.8.3 Advertising and promotional services***

These are all expenses for advertising through television, newspapers and other media as well as promotional materials, market research activities and public relation activities carried out by a third party. Market research undertaken by the establishment itself is excluded.

#### ***4.2.8.4 Financial services***

These are fees and charges directly payable for financial intermediation services and indirect outlays for purposes of financing the acquisition of fixed assets. Examples are floating costs in respect of security issues such as underwriter's commissions and registration charges, service charges in respect of loans. Interest payments are excluded.

#### ***4.2.8.5 Other non-industrial services***

This item includes purchases of services such as:

- legal services
- accounting and bookkeeping services
- managing and consulting services
- entertainment
- travelling and subsistence
- contributions to business and professional associations
- newspaper and periodical subscriptions
- costs of meetings of the governing bodies and shareholders
- patent and license fees (but not the value of outright purchases of patents and license) should also be included.
- other services not elsewhere classified (n.e.c)

#### ***4.2.9 Purchases of goods and services for resale in the same condition as received***

This is the cost of purchasing goods from other establishments or sources for resale without further processing commonly known as goods bought for resale.

#### ***4.2.10 Rental payments for machinery and equipment***

This includes all costs for hiring, leasing or renting of machinery and equipment. Financial leasing payments are excluded.

#### ***4.2.11 Rental payments for dwellings and structures***

This includes the cost of rents paid to local authorities, estate agents or owners of properties on which the establishment occupies.

#### ***4.2.12 Non-life insurance premiums payable on establishment property***

This includes non-life insurance premiums payable by the establishment during the year on the establishment's property for example against damages due to fire, natural calamities, losses etc.

#### ***4.2.13 Environmental protection expenditure***

Environmental protection expenditure is the cost of all actions and activities that are aimed at the prevention, reduction and elimination of pollution as well as any other degradation of the environment. This includes cost of measures taken in order to restore the environment after it has been degraded due to the pressures from human/industrial activities.

### ***4.3 Quantities of fuels, lubricants and gas***

#### ***4.3.1 Quantity of electricity purchased***

This is defined as the quantity (in kilowatt-hours) and cost of all electricity purchased by the establishment during the year.

#### ***4.3.2 Quantity of electricity generated***

This is defined as the total quantity (in kilowatt-hours) of electricity generated in the establishment (gross less generating-station use) during the year, including any part of the energy sold or transferred.

#### ***4.3.3 Quantity of electricity sold***

This is defined as the quantity (in kilowatt-hours) of electricity sold to other enterprises or transferred to other establishments of the same enterprise.

#### ***4.3.4 Quantity of electricity consumed***

Quantity of electricity consumed is the quantity (in kilowatt-hours) of electricity consumed by the establishments and is defined by quantity of electricity purchased plus generated less sold.

#### ***4.3.5 Quantity of water purchased***

This is defined as the total quantity (in cubic meters) of all water purchased by the establishment during the year.

#### ***4.3.6 Quantity of water abstracted for own use***

This is defined as the total quantity (in cubic meters) of water abstracted from the environment by the establishment during the year, including any water sold or transferred.

#### ***4.3.7 Quantity of water sold***

This is defined as the total quantity (in cubic meters) of water sold by the establishment to other enterprises or transferred to other establishments of the same enterprise.

#### ***4.3.8 Quantity of water consumed***

Quantity of water consumed (in cubic meters) by the establishments is defined by quantity of water purchased plus abstracted less sold.

#### **4.3.9 Quantity of wastewater treated on site prior to discharge**

This is defined as the total quantity (in cubic meters) of wastewater treated by the establishment before being discharged to the environment by the establishment during the reference period year, including any wastewater services sold or transferred.

#### **4.3.10 Quantity of wastewater discharged without treatment**

This is defined as the total quantity (in cubic meters) of wastewater discharged without treatment to the environment by the establishment during the reference period.

## **Results**

### **4.4.1 Cost of production and Intermediate consumption**

Table 4.1 shows a summary of the cost of materials, supplies and services classified by industrial group without adjusting for inventories and a summary of intermediate consumption classified by sector having adjusted costs for inventories.

**Table 4.1: Summary of cost of materials, supplies, services and intermediate consumption classified by industrial sector**

Industrial Sector	Cost (US\$ million) of:					Total	Intermediate Consumption
	Material and supplies	Gas, fuel and electricity purchased	Water and sewerage services	Services pur-chased	Rental pay-ments		
Mining	332.4	167.9	5.9	26.9	15.6	548.7	550.1
Manufacturing	483.9	72.5	8.2	111.1	9.1	684.8	617.0
Electricity	1.7	49.8	5.2	2.7	-	59.4	58.6
Construction	39.4	1.4	5.2	3.0	-	49.0	47.8
Total	857.4	291.6	24.5	143.7	24.7	1 341.9	1273.4
% total	<b>63.9</b>	<b>21.7</b>	<b>1.8</b>	<b>10.7</b>	<b>1.9</b>	<b>100</b>	

Of the \$1.342 billion expenditure, materials and supplies had the largest portion of \$857 million (64%). The lowest expenditure was on rental payments and water & sewerage services with 1.8% apiece.

In terms of sectors, manufacturing had the highest expenditure of \$685 million (51%) while construction had the least US\$49 million (3.6%).

**Table 4.2 Summary: Values of materials used from local and foreign market classified by industrial groups**

Industrial Sector	Value in US\$ of materials used from local and foreign market in millions					
	2009			2010		
	Value of local	Value imported	total	Value of local	Value imported	Total
Mining	20.5	42.0	62.5	61.0	38.7	99.7
Manufacturing	222.2	79.2	301.4	309.6	273.0	582.6
Electricity	36.4	-	36.4	53.4	-	53.4
Total	279.1	121.2	400.3	424.0	311.7	735.7

Mining imported most of its raw materials whilst in manufacturing most of the raw materials used were produced locally. In the electricity sector all of its raw materials were produced locally.

## Chapter 5: Receipts and goods produced

---

### 5.1 Introduction

This chapter covers receipts from sales of goods and services; contract and commission work; maintenance, repair and installation; research and development work of and industrial nature; industrial and non-industrial services and other revenues. Gross output is covered and hence values of inventories associated with derivation of gross output are also covered.

Details of products produced are covered in terms of volumes and value of local sales and export market.

### 5.2 Definition of terms

#### *5.2.1 Value of shipments/sales/turnover, produced by the establishment*

This includes the value of shipments, including transfers to other establishments of the same enterprise. It also includes goods produced by other organizations from materials supplied by the establishment. All shipments of principal products, secondary products, by products, water supply, sewerage, and waste management and remediation activities arising from the production process; and all sales of electricity, gas and steam, whether purchased or produced by the establishment are also included.

#### *5.2.2 Value of shipments/sales/turnover of goods produced to other enterprises*

This item includes sales or shipments of goods produced by the establishment, to other enterprises, organizations and individuals.

#### *5.2.3 Transfers of goods produced to other establishments of the same enterprise*

This includes transfers from the producing establishment to other establishment(s) of the same enterprise, including transfers to wholesale and retail trade establishments of the enterprise for which separate accounts are kept. Transfers from the producing establishment to other establishments of the same enterprise for further processing should also be included. These are valued as if sold to an independent enterprise.

#### *5.2.4 Value of goods exported to customers and affiliated foreign branches*

This item includes the sales or shipments of goods produced by an establishment and exported to other customers and transferred to affiliated overseas branches.

### ***5.2.5 Value of shipments/sales/turnover of all goods and services purchased for resale in the same condition as received***

This includes the sale or barter of goods and services purchased for resale by the establishment. The sale, excludes VAT and other similar deductible taxes directly linked to the sale/turnover, which are collected from the customers and paid directly to government tax authorities, as well as all duties and taxes on the goods and services invoiced by the unit. Included also are all other invoiced charges for transport, packaging, etc passed on to the customer, even if the charges are listed separately on the invoice.

The item also includes the value of goods withdrawn by the owner(s) of the establishment for their own use. Those goods are valued at the appropriate market price (i.e. as if sold to a customer).

Goods and services purchased for resale are either sold to final consumers, other enterprises or transferred to other establishments of the same enterprise.

### ***5.2.6 Receipts for industrial work done or industrial services rendered to others***

This covers the value, at actual invoice prices, of industrial-work done and services rendered to other enterprises or establishments of the same enterprise. The invoice prices exclude VAT (value-added tax) and other similar deductible taxes directly linked to the sales as well as all duties and taxes on the goods and services invoiced by the unit. The amounts charged for materials supplied by the establishment in the course of the work are also included. Services provided to other establishments within the same enterprise are valued as though sold.

#### ***5.2.6.1 Contract and commission work***

Contract and commission work includes cases when a production unit (contractor) carries out specific aspects of the production activity like, processing, transforming, assembling or fabricating the materials as ordered by another productive unit (principal), in whole or in part in the production of a good or service. Sales commissions are excluded.

##### ***5.2.6.1.1 Value of contract and commission work from units not resident in the country***

This item includes revenue received from carrying out contract and commission work done outside Zimbabwe, provided the data is available.

### ***5.2.7 Other revenue***

This item covers revenue receivable by the establishment from activities other than the sale of goods or the rendering of services. The values reported are the actual amounts received, excluding VAT, and other similar deductible taxes directly linked to the sales as well as all duties and taxes on the goods and services invoiced by the establishment.

All remaining revenues not included in the above categories are included in this item and these include:

- 1) Revenue from the operation of cafeterias, hostels, camps and other employee facilities.
- 2) Receipts for transport services rendered to others, other than delivery of own products

- 3) Revenue from sale of scrap
- 4) Receipts for storage of goods, warehousing and the like, including cold storage
- 5) Commission from the arrangement of financing
- 6) Receipts for the right to use patents, trademarks, copyrights and the like, manufacturing and quarrying rights, technical "know-how".
- 7) Dealers' margins and other transfer costs in respect of transactions involving second-hand goods and scrap, land, intangible assets (financial claims, leases, mineral rights, patents); these cover brokers' commissions, legal fees and the like which represent the only output generated in such transactions; the output may be shared by the buyer and seller and , in some cases, may be charged to the buyer
- 8) Any other revenue arising from the production of goods or rendering of services

The following items that do not arise from the production of goods and rendering of services by the statistical unit are excluded:

- (a) Dividend receipts
- (b) Interest and discount receipts
- (c) Revenue from the outright sale of patents and licenses
- (d) Revenue from the sale of land and used capital goods

#### ***5.2.8 Receipts from work of own-account fixed assets***

This includes value of sale of all fixed assets, such as buildings and structures, machinery and equipment, etc., manufactured or built by the establishment for its own use during the reference period. It must have a service life of more than one year. Also included are receipts from extensions, alterations, improvements and major repairs that are carried out by the establishment by its labor force to extend the service life or increase the productive capacity of existing fixed assets. Fixed assets produced for rental or lease should also be included.

The own-account fixed assets are recorded at the time the work is put in place and the asset becomes part of the fixed capital formation of the establishment.

#### ***5.2.9 E-commerce sales/turnover/value of shipments/receipts for services or other revenues***

E-commerce sales are sales of all goods and services where an order is placed by the buyer, price and terms of sale are negotiated over the internet, extranet, electronic data interchange (EDI) network, or other on-line system. Payment may or may not be made online. The revenues from e-commerce sales are included in the total sales/shipment. This item includes the sales value of all goods and services sold through a computer-mediated network (ecommerce). Both business-to-business and business-to-consumer transactions are included. The revenues from the e-commerce sales are part of turnover, sales, shipments, receipts for services and other revenues.

### 5.2.1.0 Capacity Utilization

Capacity utilization is a concept in economics and managerial accounting which refers to the extent to which an enterprise/establishment or a nation actually uses its installed productive capacity. Thus, it refers to the relationship between actual output that “is” produced with the installed equipment and the potential output which “could” be produced with it, if capacity was fully used. It is expressed as percentage of actual production relative to production capacity.

## 5.3 Results

### 5.3.1 Value of gross output adjusted for inventories

Table 5.1(a) shows value of gross output classified by industrial sector.

**Table 5.1(a) Value of gross output classified by industrial sector**

Industrial Sector	Value in US\$ million of net inventories of:			Gross Output
	Working in Progress	Finished goods	Goods bought for resale	
Mining	-0.48	0.11	0.00	1 478.19
Manufacturing	-12.35	-20.75	-1.21	1 390.61
Electricity	0.00	0.00	0.00	193.53
Construction	-3.02	1.43	0.00	74.77
<b>Total</b>	<b>-15.85</b>	<b>-19.21</b>	<b>-1.21</b>	<b>3 137.10</b>

Mining contributed 48%, manufacturing contributed 44% electricity contributed 6% and construction contributed 2% to the overall gross output. The low values of net stocks contributed negatively to the value of gross output. Mining of non-ferrous metal ores, except uranium and thorium ores had the largest value of sales / turnover hence contributing largely to the overall gross output while manufacture of jewellery and related articles had the lowest turnover. Manufacture of structural metal products, tanks, reservoirs and steam generators had the lowest value of net stocks while the industrial group manufacture of bodies.

### 5.3.2 Value of sales

Table 5.1(b) shows a summary of the total sales classified by sector

**Table 5.1 (b) Summary of total sales classified by sector**

Industrial sector	Value in US\$ million of total sales:			
	Shipments/sales/ turnover produced to other establishment	Transfer of goods produced to other establishments of the same enterprise	Goods exported to customers and affiliated to foreign branches	Total value of shipments/sales/ turnover
Mining	1 378.53	10.18	0.00	1 388.71
Manufacturing	748.46	45.50	213.58	1 007.53
electricity	175.94	0.00	0.00	175.94
<b>Total</b>	<b>2 302.93</b>	<b>55.68</b>	<b>213.58</b>	<b>2 572.19</b>

In table 5.1(c) the variable ‘as a sub main contractor’ is not represented in the table because the values were zeros for all sectors.

**Table 5.1 (c) Summary: value of work done of the construction sector**

	Value of work done in US\$ '000				
	As a main contractor	As contract and commission work for other establishment of the same enterprise	As contract and commission work done outside Zimbabwe	On own account	Total revenue from building construction and related work
<b>Industrial sector</b>					
Revenue from building construction work:	29 954.06	0	0	7 802.43	37 756.50
Revenue from civil engineering work:	0	0.92	942.18	1 366.69	2 309.79
<b>Total</b>	<b>29 954.06</b>	<b>0.92</b>	<b>942.18</b>	<b>9 169.12</b>	<b>40 066.28</b>

Table 5.1(c) shows the summary of products sold locally or exported per industrial groups

**Table 5.1 (d) Summary: Values of products sold locally or exported per industrial groups**

Industrial Sector	Value in US\$ of products sold locally and exported in millions					
	2009			2010		
	Value of local	Value exported	Total	Value of local	Value exported	Total
Mining	115.3	223.2	338.5	114.8	270.1	384.9
Manufacturing	612.8	71.0	683.8	1 590.3	201.5	1 791.8
Electricity	21.4	6.6	28.0	121.1	6 565.9	127.6
<b>Total</b>	<b>749.4</b>	<b>300.8</b>	<b>1 050.3</b>	<b>1826.2</b>	<b>478.1</b>	<b>2 304.4</b>

Mining had the highest value of exports whilst manufacturing had the highest value of local sales.

### 5.3.3 Capacity Utilization

Capacity utilisation for the mining sector alone was 50.9 percent in 2010 compared to 46.6 percent in 2009. Manufacturing sector alone has a capacity utilization of 40.7 percent in 2009 as compared to 2010 which is 44.2 percent.

## Chapter 6: Capital Formation

---

### 6.1 Introduction

This chapter covers values of assets in the form of fixed assets and intellectual property at the beginning of the year, acquisition of and disposal of such and depreciation.

### 6.2 Definition of terms

#### 6.2.1 Value item

##### ***6.2.1.1 Gross value of fixed assets (at acquisition cost) at the beginning of the year***

Gross value of fixed assets is the value at which assets were acquired at the beginning of the year. Assets acquired through barter were valued at their estimated basic prices plus any taxes payable and costs of ownership transfer. In principle, fixed assets produced on own account were also valued in this manner.

##### ***6.2.1.2 Capital expenditure on new and used fixed assets (acquisitions) during the period***

The value of new and used fixed assets purchased during the year form part of the assets acquired in the year. The new assets could either have been imported or locally produced. For all assets, the value is in US Dollars.

##### ***6.2.1.3 Gross value of fixed assets, retired and scrapped (disposal) during the period.***

This is the value realized from sale of fixed assets, otherwise known as disposal of assets.

##### ***6.2.1.4 Depreciation***

Depreciation is the amount of loss of value of fixed assets due to wear and tear over continuous use of assets during the year.

##### ***6.2.1.5 Gross value of fixed stock at the end of the period***

Gross value of fixed stock at the end of the period is the gross value of fixed assets at the beginning of the year plus capital expenditure on new and used fixed assets during the period minus gross value of fixed assets, retired and scrapped during the period minus depreciation. Fixed assets acquired through barter should be valued at their estimated basic prices plus any taxes payable and costs of ownership transfer. In principle, fixed assets produced on own account should also be valued in this manner.

### ***6.2.2 Classification by type of fixed asset***

The transactions in fixed assets are divided into the following categories:

#### ***6.2.2.1 Dwellings***

Dwellings are buildings that are used entirely or primarily as residences, including any associated structures, such as garages, and all permanent fixtures customarily installed in residences. Houseboats, barges, mobile homes and caravans used as principal residences of households are also included.

#### **6.2.2.2 *Other buildings and structures***

Other buildings and structures comprise of non-residential buildings, other structures and land improvements. These are described in turn below:

- (a) *Non-residential buildings*: Non-residential buildings consist of buildings other than dwellings, including fixtures, facilities and equipment that are integral parts of the structures. For new buildings, costs of site clearance and preparation were included. Examples are warehouses, industrial buildings, and commercial buildings.
- (b) *Other structures*: Other structures include structures other than buildings, including the cost of the streets, sewer, site clearance and preparation etc. Examples are shafts, tunnels and other structures associated with mining mineral and energy reserves, construction of sea walls, dykes flood barriers etc. which intended to improve the quality and quantity of land adjacent to them.
- (c) *Land improvements*: Land improvements are the result of actions that lead to major improvements in the quantity, quality or productivity of land, or the result of actions that prevent its deterioration, are also treated as fixed capital formation. Activities such as land clearance, land contouring, creation of wells and watering holes which are integral to the land in question are to be treated as resulting in land improvements. The value of natural land before improvement is not included. However, the costs of ownership transfer on land improvement are included.

#### **6.2.2.3 *Machinery and equipment***

Machinery and equipment covers transport equipment, machinery for information communication and telecommunications (ICT) equipment, other machinery and equipment. Tools that are relatively inexpensive and purchased at a relatively steady rate, such as hand tools, may be excluded. Also excluded are machinery and equipment integral to buildings that are included in dwellings and non-residential buildings.

#### **6.2.2.4 *Transport equipment***

Transport equipment consists of equipment for moving people and objects. This includes transport equipment, such as motor vehicles, trailers and semi-trailers, ships, railway, tramway locomotives and rolling stock, aircraft and spacecraft, motorcycles and bicycles, etc.

#### **6.2.2.5 *ICT equipment***

ICT equipment consists of devices using electronic controls and also the electronic components forming part of these devices.

#### **6.2.2.6 *Other machinery and equipment***

Other machinery and equipment consists of machinery and equipment not elsewhere classified. Examples include general purpose machinery, special purpose machinery, office, accounting and computing equipment, electrical machinery and apparatus, radio, television, communication equipment and apparatus, medical appliances, precision and optical instruments, watches and clocks etc.

#### **6.2.2.7 *Intellectual property products***

Intellectual property products are the result of research, development, investigation or innovation leading to knowledge that the developer can market or use to their own benefit in production because use of the knowledge is restricted by means of legal or other protection.

Specific form of intellectual property products are research and development, mineral exploration and evaluation, computer software and databases, and entertainment, literary or artistic originals.

Each component of intellectual property product is divided into two components:

- Those that are investment goods procured from other enterprises
- Those that are developed on own-account or for own use.

### ***6.2.3 Classification of intellectual property products by type***

The transactions in fixed assets are divided into the following categories:

#### ***6.2.3.1 Research and development***

Research and experimental development (R&D) on own account consists of the value of expenditures on creative work undertaken on a systematic basis in order to devise new applications. Sale at market value of the R&D reported as receipts is the production of R&D for sale, which is different from R&D for own use recorded here.

#### ***6.2.3.2 Mineral exploration and evaluation***

Mineral exploration and evaluation consists of the value of expenditures on exploration for petroleum and natural gas and for non-petroleum deposits and subsequent evaluation of the discoveries made. These expenditures include pre-license costs, license and acquisition costs, appraisal costs and the costs of actual test drilling and boring, as well as the costs of aerial and other surveys, transportation costs, etc., incurred to make it possible to carry out the tests.

#### ***6.2.3.3 Computer software and databases***

Computer software consists of computer programs, program descriptions and supporting materials for both systems and applications software. Gross fixed capital formation in computer software includes both the initial development and subsequent extensions of software as well as acquisition of copies that are classified as assets. Software purchased on the market was valued at purchasers' prices, while software developed in-house was valued at its estimated basic price or at its costs of production if it is not possible to estimate the basic price.

A database consists of files of data organized in such a way as to permit resource-effective access and use of the data. The creation of a database was generally estimated by a sum-of-costs approach. The cost of the DBMS used was not included in the costs but was treated as a computer software asset unless it was used under an operating lease. The cost of preparing data in the appropriate format was included in the cost of the database but not the cost of acquiring or producing the data initially.

#### ***Entertainment, literary and artistic originals***

Entertainment, literary and artistic originals consists of the original films, sound recordings, manuscripts, tapes, models, etc., on which drama performances, radio and television programming, musical performances, sporting events, literary and artistic output etc, are recorded or embodied. Such works are frequently developed on own account which may be estimated by a sum-of-costs approach.

## 6.3 Results

### 6.3.1 Gross value of fixed assets

Table 6.1 (a) shows a summary of fixed assets classified by sector.

**Table 6.1 (a) Summary of fixed assets classified by sector**

Industrial sector	Value in US\$ millions of gross value of fixed stock at the end of the year				
	Dwellings	Other buildings	Vehicle and transport equipment	ICT equipment	Other machinery and equipment
Mining	212.60	228.45	161.15	157.30	757.58
Manufacturing	51.52	391.97	102.46	15.30	518.50
Construction	0.25	13.03	6.35	-11.69	-
<b>Total</b>	<b>264.37</b>	<b>633.45</b>	<b>269.97</b>	<b>160.91</b>	<b>1 276.08</b>

Mining sector had the highest value of assets in the dwellings, vehicle & transport equipment, ICT equipment and other machinery & equipment while manufacturing sector has the highest value in assets as other buildings. The electricity sector had no figures of assets.

Table 6.1 (b) shows a summary of intellectual property products classified by sector.

**Table 6.1 (b) Summary of intellectual property products classified by sector**

Industrial sector	Value in US\$'000 of gross value of intellectual property products				
	Research and Development	Mineral Exploration	Computer Software and database	Entertainment, literary and artistic originals	Other
Mining	115.2	-	-	-	261.0
Manufacturing	3662.5	672.1	207.8	-	120 219.7
Construction	-	-	115.4	-	-
<b>Total</b>	<b>3777.7</b>	<b>672.1</b>	<b>323.2</b>	<b>-</b>	<b>120 480.7</b>

Manufacturing had the highest value of intellectual property products assets which constituted about 99% of total.

**Table 1: Principal Indicators - Gross output, Intermediate consumption and Value added classified by industrial group; CIP Zimbabwe 2010: USD**

ISIC	Industrial group	Gross Output	Intermediate Consumption	Value Added	Intermediate Consumption / Gross Output
------	------------------	--------------	--------------------------	-------------	---

**Mining <sup>(1)</sup>**

132	Mining of non-ferrous metal ores, except uranium and thorium ores	330,027,392	104,582,840	225,444,552	32%
141	Quarrying of stone sand and clay	19,149,768	6,875,836	12,273,932	36%
142 & 101	Mining of chemical, fertilizer minerals, extraction of salt, quarrying and other mining; Mining and agglomeration of coal and lignite	149,392,499	108,376,995	41,015,504	73%
	<b>Total</b>	<b>498,569,659</b>	<b>219,835,671</b>	<b>278,733,988</b>	<b>44%</b>

**Manufacturing**

151 & 152	Processing and preserving of fish and fish products; Manufacture of dairy products	113,502,027	95,100,901	18,401,127	84%
154	Manufacture of other food products	184,296,798	110,744,114	73,552,684	60%
155 & 160	Manufacture of beverages; Manufacture of tobacco products	116,485,255	18,019,857	98,465,398	15%

**Table 5.4: Capacity Utilization classified by industrial group: CIP Zimbabwe 2010: USD**

ISIC	Industrial group	Capacity Utilization (%)
<b>Mining</b>		
132	Mining of non-ferrous metal ores, except uranium and thorium ores	65.3
141	Quarrying of stone sand and clay	44.5
142&101	Mining of chemical, fertilizer minerals, extraction of salt, quarrying and other mining: Mining and agglomeration of coal and lignite	42.9
	<b>All mining</b>	<b>50.9</b>
<b>Manufacturing</b>		
151 & 152	Processing and preserving of fish and fish products; Manufacture of dairy products	20.0
154	Manufacture of other food products	59.5
155 & 160	Manufacture of beverages; Manufacture of tobacco products	56.5
171 & 172	Spinning, weaving and finishing of textiles; Manufacture of other textiles	47.5
181 & 182	Manufacture of wearing apparel, except fur apparel; Manufacture of fur and fur products	60.7
192 & 192	Manufacture of footwear	53.5
201	Sawmilling and planing of wood	43.5
210	Manufacture of paper, paper products	39.2
221	Publishing of books, brochures, musical books and other publications	41.7
241 & 242	Manufacture of basic chemicals; Manufacture of other chemical products	45.8
251 & 252	Manufacture of rubber products; Manufacture of plastics products	44.3
261	Manufacture of glass and glass products	41.0
269	Manufacture of non-metallic mineral products	50.6
271	Manufacture of basic iron and steel	20.2
272	Manufacture of non-ferrous basic metals	51.1
281	Manufacture of structural metal products, tanks, reservoirs and steam generators	47.0

**Table 5.4: Capacity Utilization classified by industrial group: CIP Zimbabwe 2010: USD**

<b>ISIC</b>	<b>Industrial group</b>	<b>Capacity Utilization (%)</b>
291 & 323	Manufacture of general purpose machinery; Manufacture of Radio, Television and communication equipment and apparatus	66.8
311	Manufacture of electric motors, generators and transformers	40.0
341	Manufacture of bodies (coachwork) for motor vehicles; manufactures of trailers and semi-trailers	39.7
361	Manufacture of furniture	48.3
369	Manufacture of jewellery and related articles	33.1
	<b>All manufacturing</b>	<b>45.2</b>

**Electricity and Water Supply**

401 & 410	Production, collection and distribution of electricity; collection, purification and distribution of water	<b>89.8</b>
-----------	--	-------------
